

# U.S. Coins

January 29-30 & February 1, 2015 | Long Beach

## Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGE Live!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103B  
300 E. Ocean Blvd. • Long Beach, CA 90802

### Session 1 - PREMIER

Thursday, January 29 • 6:00 PM PT • Lots 3001-3395

### Session 2

Friday, January 30 • 1:00 PM PT • Lots 3396-3945

### Session 3

Friday, January 30 • 6:00 PM PT • Lots 3946-4481

## Signature® Internet Session 4

(HERITAGE Live!®, Internet, Fax, & Mail only Session)

### Session 4

Sunday, February 1 • 4:00 PM CT • Lots 7001-8177

## LOT SETTLEMENT AND PICK-UP

Friday, January 30 • 10:00 AM – 1:00 PM PT  
Saturday, January 31 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a 17.5% Buyer's Premium.**

## BIDDING METHODS:

### HERITAGE Live!® Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGE Live!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Wednesday, January 28, by 12:00 PM CT.  
Client Service: 866-835-3243.

### Internet Bidding

Internet absentee bidding ends at 10:00 PM CT the evening before each session. [HA.com/1217](http://HA.com/1217)

### Fax Bidding

Fax bids must be received on or before Wednesday, January 28, by 12:00 PM CT. Fax: 214-409-1425

### Mail Bidding

Mail bids must be received on or before Wednesday, January 28.

# HERITAGE AUCTIONS

Dear Bidder:

Welcome to the Long Beach Expo! Heritage Auctions is delighted to present the first of three appearances at Long Beach scheduled for 2015. Compelling Floor Sessions are highlighted by the high-value Premier Session on Thursday evening, followed by two Signature® Floor Sessions on Friday. Our popular Signature® Internet Session is scheduled for Sunday, February 1.

More than 150 consignors will participate in this auction, with coins for almost every series and budget. The sale has a particularly strong run of high-grade quarters in both business strike and proof formats, including a Premium Gem 1825/3/2 quarter (lot 3092) and a stunning 1858 PR67 NGC quarter (lot 3104, probably the finest-known example). Other highlights include:

- A high-grade 1924-S Buffalo nickel in MS66 ★ NGC, with none finer at either service (lot 3053).
- A 1798/97 dime, JR-2 variety, in MS61 NGC — the rarest of four varieties for the date (lot 3071).
- An 1876 twenty cent piece in MS67 PCGS, razor-sharp, among the finest known (lot 3088).
- An 1807 Draped Bust half graded MS66 NGC, an important early type coin (lot 3122).
- Another notable early type coin, an appealing 1803 silver dollar, graded MS63 NGC (lot 3172).
- The one-year-type "No Stars on Obverse" 1796 Quarter Eagle in XF40 NGC (lot 3238).
- A rare 1843 quarter eagle graded PR63 Cameo NGC, one of just five proofs known (lot 3245).
- A 1907 Saint-Gaudens High Relief twenty graded MS64 PCGS with great eye appeal (lot 3354).
- A classic 1869 double eagle in proof format graded PR65 Ultra Cameo NGC, the finest of 12 known and the Lorin G. Parmelee coin (lot 3349).
- A remarkable 1908 double eagle in PR65, perhaps the only Roman Finish proof specimen, formerly owned by Dr. William Sturgis Bigelow (likely from Theodore Roosevelt), The Boston Museum of Fine Arts, and the Phillip H. Morse collection (lot 3374).

If you are attending the Long Beach Expo, lot viewing and the auction floor are easily available to you. We also accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® — our proprietary, award-winning online platform.

We hope to see you on the Bourse, and wish you the best of luck with your bids.

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

1776 Continental Dollar, VF25  
CURENCY, Pewter, W-8445

- 3001** 1776 Continental Dollar, CURENCY, Pewter VF25 PCGS. CAC. Newman 1-C, W-8445, R.3. The 1776 Continental dollars were issued in late 1776, and were probably intended to take the place of paper bills issued by the Continental Congress earlier in the year. Examples are known in seven different die varieties, with three different compositions. This coin was struck in pewter and features the misspelling of CURENCY and the solid lines in the reverse rings that characterize the W-8445 variety.

The present coin offers lightly abraded silver and gray surfaces that retain a few hints of original mint luster. Moderate, even wear on both sides leaves all lettering legible and much interior detail intact on the design elements. Listed on page 85 of the 2015 *Guide Book*. PCGS# 791

1787 Fugio Cent, MS64 Brown

4 Cinquefoils, Pointed Rays, N. 13-X, W-6855

- 3002** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. N. 13-X, W-6855, R.2. The W-6855 variety of the 1787 Fugio cent is a relatively available issue, with large numbers found in the Bank of New York Hoard. This impressive Choice example offers chocolate-brown surfaces that show slight granularity in some areas, with prominent clash marks on the obverse and the diagnostic vertical die crack at 6 o'clock on the reverse. The design elements are bold and traces of mint luster shine through the patina. Listed on page 87 of the 2015 *Guide Book*. Population: 89 in 64 (7 in 64+) Brown, 11 finer (12/14). PCGS# 883

1783 J. Chalmers Threepence, XF40  
Seldom Encountered Denomination

- 3003** 1783 Chalmers Threepence XF40 PCGS. Breen-1018, W-1760, R.5. Annapolis, Maryland silversmith John Chalmers issued small silver coins in 1783, denominated as threepence, sixpence, and shillings. His shillings are most frequently encountered today, and his sixpence are least frequently seen. Although Chalmers earned a profit from his silver coins, they were well-respected and filled a void in commerce in the late 18th century. This attractive example has delicate rose and champagne toning on its pleasing blue-steel surfaces. A well-centered impression shows full border details on the obverse and partial border details on the reverse. Population: 3 in 40, 7 finer (12/14). PCGS# 592

PROOF BRAIDED HAIR HALF CENTS

1841 B-1 Half Cent, PR65 Red  
Brilliant Orange Original

- 3005** 1841 Original PR65 Red NGC. B-1, R.5. Both sides of this lovely Gem exhibit light orange mint color and traces of iridescent overtones. Mellow toning outlines the profile. A few dark toning spots on the obverse will identify this piece in future appearances. The usual obverse die crack connects stars 3 through 6, just missing stars 2 and 7. Although 50 to 60 examples of this proof-only variety exist, few of those are equal to this brilliant Gem. The strike is bold and the overall eye appeal is excellent. Our EAC grade PR64. Census: 1 in 65 Red, 0 finer (12/14). PCGS# 1256

HALF CENT

1806 Half Cent, MS63 Red and Brown  
C-4, B-4, With Stems

- 3004** 1806 Large 6, Stems, C-4, B-4, R.1, MS63 Red and Brown PCGS. CAC. Manley Die State 2. A lovely Mint State example of this With Stems variety. Some minor striking softness is noted on several wreath leaves and the hair curls, but the surfaces are free of obtrusive abrasions. Well-balanced auburn-brown and coppery-orange hues encompass each side, with the latter most prominent in the protected regions. Our EAC grade MS63. PCGS# 35201 Base PCGS# 1100

**1848 B-2 Half Cent, PR63 Brown  
First Restrike**

- 3006 1848 Restrike PR63 Brown PCGS. B-2, R.5.** Richard Coleman records 42 examples of the 1848 First Restrike half cents. This variety is the most plentiful proof half cent of any date or variety. This example appears as number 32 on Coleman's list. The mirrored fields are considerably subdued on this piece, with light wear or rub on the high points, especially evident on the reverse. The surfaces are deeply toned with blue and olive accompanying faded mint red on the obverse. Minor scuffs are visible in the field between stars 1 and 2. The reverse is greenish steel-blue.

PCGS has certified 29 1848 Restrike half cents in all color categories, including four in PR63 Brown, and 25 finer (12/14). Like all proof half cent issues, the population data combine First and Second Restrike half cents into a single population listing. Regardless of population data, it is important to remember that proof half cents of all dates are rare and in great demand. Our EAC grade PR58.

Ex: Tallarico Rare Coins; Dr. Robert J. Bye; Stack's (5/1997), lot 372. NGC ID# 26ZK, PCGS# 1299

**1854 Half Cent, PR65 Red and Brown  
Elusive B-2 Proof**

- 3007 1854 PR65 Red and Brown NGC. B-2, Low R.6.** The diagnostic rust lump appears near the top of the I in UNITED, identifying the rare B-2 proof variety. Light pinkish-orange mint color with traces of blue toning appears on the obverse. The reverse has deep brown color with bluish overtones. Both sides have extremely sharp design features with reflective fields. Among the proof half cents from the 1850s, this is a scarce issue, and it is more elusive than the 1852 proof-only issue, for example. Our EAC grade PR62. Census: 2 in 65 Red and Brown, 0 finer (12/14).

Ex: Central States Signature (Heritage, 4/2006), lot 237; Chicago Signature (Heritage, 8/2011), lot 3037, realized \$9,200. PCGS# 1324

**1856 Half Cent, B-3, PR65 Brown  
Deep Aquamarine Toning**

- 3008 1856 B-3, R.4, PR65 Brown PCGS.** Reflective fields and bold design elements are the hallmarks of this Gem proof half cent. Both sides display a blanket of ocean-blue toning that beautifully complements the carefully preserved surfaces. The 1856 proof half cent is scarce in all grades, but is decidedly rare in Gem condition, regardless of color designation. Our EAC grade PR60. Population: 5 in 65 Brown, 0 finer (12/14). NGC ID# 26ZX, PCGS# 1329

**The American  
NUMISMATIST**

Vol. I. September-October 1888 No. 1.

**ON COLLECTING.**

This is the age of collections and the spirit of gathering together and classifying is abroad. It shows itself in the gigantic museums, the vast art and antiquarian collections and the great libraries that grace the capitals and literary centers of the world, that have become the mecca of so many pilgrims to-day.

This spirit has gathered force as it crossed the waters, and in our young republic great progress has been made. The old world and the ages of the past are yielding their tribute to us and the time will come when the country that has given by far the greatest exposition, will have the grandest museum and collections of art.

The day is coming when the old world will envy from American masterpieces; pilgrimages will be to the Occident rather than the Orient.

We have lately established in Washington, one of the largest museums on the globe. A museum, though yet in its infancy, in some departments has no equal. States vie with states in the greatness of their collections in the different fields of science and art.

Cities and public institutions feel the influence and local societies and collections are established. The enthusiasm of our youth catches the prevail-

ing spirit and the different tastes are shown in the variety of their collections.

A sign of the time most favorable, is the spirit of our youth in these matters; weak and feeble as the efforts may be, fruit will be borne in the future.

It is a hopeful sign when the youth of any land turn their attention to the making of collections; whether it be of coins, minerals, Indian relics, paper money, birds eggs, autographs, postage stamps, fossils or curios, it matters not, from any of these lines much may be learned, and the taste cultivated will inevitably lead to something higher and better. The germ is there, fruit will be borne some day.

II

For variety, complexity, and immensity of their coinage, commend us to those small principalities and powers, that were of Germany. Fifteen years ago, with a few dozen specimens we vainly thought our set was complete now, with upwards of a thousand varieties, we find we have just begun.

There is nothing you can collect that will represent so much, if properly selected, or will cost so little, if properly bought, as a variety of fifty, one or two hundred coins.

## LARGE CENTS

### 1803 Draped Bust Cent, MS63 Brown S-260, Small Date, Large Fraction

- 3009 1803 Small Date, Large Fraction, S-260, B-19, R.1, MS63 Brown PCGS.** Ex: Husak Collection. S-260 is a plentiful variety in the absolute sense, being one of the most available in the Small Date, Large Fraction *Guide Book* type, but it becomes notably scarce in pleasing Mint State condition. PCGS has certified only 18 Mint State examples of the Small Date, Large Fraction variant, only one of which — the present coin — has been attributed as S-260 (12/14). This piece is highly glossed on each side, with satiny underlying luster. A few wreath leaves and Liberty's lowest hair curls are slightly soft, but the strike is otherwise sharp. No mentionable abrasions are present, and the eye appeal is simply excellent for the grade. Clash marks, as are typical of this die pairing, are present in the fields on both sides. Our EAC grade MS60. Ex: Francis Lee (1913); Essex Institute; Stack's (1975), lot 157, \$2,700; RARCOA; New England Rare Coin Galleries; Superior (10/1977), lot 176, \$1,150; Jack Beymer (1979); R.E. Naftzger, Jr. (2/1992); Eric Streiner; Early American Coppers (4/1994), lot 287, \$3,000; Anthony J. Terranova; Stack's (1995 FPL), lot 95, \$5,850; Stack's (11/1995), lot 1033, \$3,080; Stack's (3/1998), lot 54; Chris Victor-McCawley (7/2005); Walter Husak (Heritage, 2/2008), lot 2263. PCGS# 36404 Base PCGS# 1485

### 1805 Cent, S-267, AU58 Distinct Burgundy-Red Patina

- 3010 1805 S-267, B-1, R.1, AU58 NGC.** Splashes of reddish-orange color appear on the olive and steel-brown surfaces of this retoned cent. Both sides exhibit faint hairlines and minor surface marks that are especially evident on the neck and right obverse field. The hair curls are well-delineated, though the upper reverse shows some of the usual softness. Our EAC grade VF35. PCGS# 36427 Base PCGS# 1510

### 1812 Cent, S-288, MS63 Brown Lustrous Type Coin, Large Date

- 3011 1812 Large Date, S-288, B-3, R.2, MS63 Brown NGC.** The Classic Head large cent type is decidedly difficult to locate in pleasing circulated condition, and Mint State representatives are scarce in all grades. This piece is from a late die state, with substantial die fatigue in the recesses, but is nonetheless well-struck on the central elements. Glossy burgundy-brown toning yields the occasional glint of red, and the surfaces are devoid of any significant flaws. Our EAC grade AU50. PCGS# 36505 Base PCGS# 1564

### 1847/7 N-18 Cent, MS65 Brown Rare Repunched Date Variety

- 3012 1847/7 Large Over Small 47, N-18, R.5, MS65 Brown NGC. CAC.** Die State a. A rare variety, commonly referred to as Large 7 Over Small 7, but with the entire date repunched south. This Gem example is in an early die state, before the die breaks form along the lower-left obverse border. Both sides show delicately preserved, smooth surfaces that display soft, satiny luster. The stars are well-defined and the central elements show crisp detail. Consistent burgundy-brown color reveals faint bluish overtones in the recesses when tilted against a light, and gives this piece a high degree of eye appeal. Our EAC grade MS60. Census: 2 in 65 Brown, 0 finer (12/14). NGC ID# 226D, PCGS# 1880

## PROOF FLYING EAGLE CENTS

### 1856 Flying Eagle Cent, PR61 Scarcer Snow-3 Variety

- 3013** 1856 Snow-3 PR61 NGC. Repunching on the 5 in the date aids in identification of this scarcer 1856 Flying Eagle cent variety. Series authority Rick Snow suggests that no more than 700 examples of this variety were struck, with many of these coins making up at least most of the pieces that were distributed to Congress during the passage of the legislation that abolished the large cent and established the new small cent. Survivors from this die pair are estimated to comprise only about 20 percent of the total 1856 Flying Eagle cent population. The present piece is better-struck than most examples of Snow-3, with the eagle's tailfeathers well-delineated. Medium bronze-gold patina blankets each side, and the surfaces exhibit satiny mint luster. Some minor planchet irregularity is noted on the reverse from 7 to 1 o'clock, undetectable to the unaided eye. PCGS# 47058 Base PCGS# 2037

### 1858 Small Letters Flying Eagle Cent, PR64+ High Leaves Reverse, Rarely Seen

- 3014** 1858 Small Letters PR64+ PCGS. CAC. Snow-PR1. High Leaves Reverse. This superlative near-Gem proof 1858 Small Letters Flying Eagle cent is struck with the High Leaves or Type of 1857 Reverse, characterized by the thin inner leaves passing or approaching the letter bottoms of C and T in CENT, respectively; on the Low Leaves Type of 1858, those thin leaf tips end well below those letters. This reverse is rarely found on the proof 1858 Small Letters, making this already-attractive coin that much more desirable. The obverse boasts a needle-sharp strike on the eagle's feathers and the peripheries, and both sides display attractive golden-tan color with reddish high points. Population: 43 in 64 (3 in 64+), 10 finer (12/14). One of only nine PR64 pieces at CAC. NGC ID# 227D, PCGS# 2043

## INDIAN CENTS

### 1860 Indian Cent, MS66 Pointed Bust Variant

- 3015** 1860 Pointed Bust, FS-401, MS66 PCGS. The 1860 Pointed Bust is a challenging transitional variety that combines the bust style of 1859 with the shield reverse of 1860. The present orange and lemon-gold Premium Gem has potent luster and a precise strike. A loupe reveals occasional minute carbon. Population: 8 in 66, 2 finer (12/14). PCGS# 37393 Base PCGS# 2056

**1860 Indian Cent, MS66  
Scarce Pointed Bust Variety**

- 3016 1860 Pointed Bust, FS-401, MS66 PCGS. CAC.** The so-called Pointed Bust variety, exhibiting the bust style of 1859. Most 1860 Indian cents are of the Rounded Bust type, and the Pointed Bust variant is notably scarce in Gem condition, and rare any finer. This representative is sharply detailed, despite minor die fatigue in the border recesses that accentuates the radiant, bronze-gold mint luster. No carbon spotting is observed, and the surfaces are beautifully preserved without any distinguishable contact marks or abrasions. PCGS has certified only eight Pointed Bust cents in this grade, with just two numerically finer (12/14). PCGS# 37393 Base PCGS# 2056

**1860 Cent, MS66+  
Golden-Tan Luster**

- 3017 1860 MS66+ PCGS. CAC.** The usual Rounded Bust variety, but rarely seen in such amazing condition. This high-end Premium Gem has brilliant golden-tan luster with bold design motifs that shows only slight weakness at the feather tips. A few trivial marks are evident below the first S in STATES. Hints of peripheral lilac toning on the obverse add to the overall eye appeal. Population: 43 in 66 (3 in 66+), 9 finer (12/14). NGC ID# 227F, PCGS# 2058

**1895 Indian Cent, MS66+ Red  
Fiery Orange Luster**

- 3018 1895 MS66+ Red PCGS Secure. CAC.** By 1895, a mintage of 38 million coins for the year was a nominal event, unremarkable in every way. Most of the cents struck, of course, show far more wear than this piece, one of the few finest survivors. Note that even it shows some die fatigue in the form of small bumps and voids and flow lines in the fields, visible only with magnification. Deep reddish surfaces boast superior eye appeal and uniformly high quality on this Premium Gem Red 1895 Indian cent. The strike is equally impressive, showing four bold diamonds on the ribbon. A curious, extremely thin toning arc runs through the right-side obverse, scarcely visible without a glass and affecting neither the grade nor the eye appeal. (CAC obviously was not put off by it, either.) Population: 46 in 66 (4 in 66+) Red, 4 finer (12/14). NGC ID# 228P, PCGS# 2192

---

1905 Indian Cent, Struck on a Quarter Eagle Planchet, MS64  
Sole Gold Indian Cent Known of This Date

---

**3019 1905 Cent — Struck on a \$2 1/2 Gold Planchet — MS64 PCGS.** Weight: 64.5 grains, the standard weight of a quarter eagle. Exactly five Indian cents are known on gold planchets, according to information available to us. Among them are three dated 1900, this piece dated 1905, and an example dated 1906. The Judd pattern reference lists 1900 and 1907 gold cents in the section on mint errors. However, Andrew W. Pollock, III, listed the 1900 gold Indian cents as P-1990 in the regular pattern section of his reference. Pollock writes: "Listed in Judd as a mint error, but it is difficult to imagine that a Mint employee would be so careless as to feed gold planchets into a coinage press fitted with one-cent piece dies." Pollock suggests that these pieces may have been deliberately struck for one or more collectors.

The following Census of gold Indian cents and additional information about them is compiled from a variety of sources, including [www.uspatterns.com](http://www.uspatterns.com), [www.minterrornews.com](http://www.minterrornews.com), Donald Taxay's 1976 *Catalogue and Encyclopedia*, Andrew Pollock's 1994 *United States Patterns and Related Issues*, the Judd reference, and selected auction catalogs. Conversations with Fred Weinberg and Richard Snow provided additional background.

**1900 MS65 PCGS.** Col. E.H.R. Green; B.G. Johnson; John Beck (Abner Kreisberg Corporation, 1/1975), lot 609; Mike Byers; Auction '89 (Superior, 7/1989), lot 856; Bowers and Merena (8/1991), lot 4103; recently PCGS authenticated as a 1900 Indian cent struck on a gold \$2.50 planchet, and graded MS65. The 1991 ANA catalog gives a weight of 65.8 grains, 1.3 grains too much for a quarter eagle planchet.

**1900 AU55.** Heritage (8/1993), lot 8000. The 1993 ANA catalog gives a weight of 4.35 grams (67.12 grains), 2.62 grains too much for a quarter eagle planchet.

**1900.** Michael Hodder reported in a May 14, 1996 letter to Q. David Bowers that he had personally seen three different pieces, all with weights in the range of 65.8 to 67.1 grains. See Bowers' *A Buyer's and Enthusiast's Guide to Flying Eagle and Indian Cents*, p. 427.

**1905 MS64 PCGS.** Apparently unknown to the numismatic community prior to its sale in the 2010 FUN Sale (Heritage, 1/2010), lot 2433. Weight: 64.5 grains, the standard weight for a quarter eagle planchet.

**1906 AU58 NGC.** Stack's (6/2004), lot 4097; Stack's (9/2009), lot 4299. Weight: 64.4 grains, within the 0.25 grain tolerance for a quarter eagle planchet.

**1907.** Listed in the Judd pattern book, and in Donald Taxay's *Catalogue and Encyclopedia [of] U.S. Coins*. The 1907 gold Indian cent is currently unlocated.

One example dated 1900 is also known in silver, from the identical dies as the 1900 gold Indian cents, suggesting they were all made at or near the same time. Rick Snow writes in *A Guide Book of Flying Eagle and Indian Head Cents* that "both the silver and gold examples are struck from the same dies, with light roughness on the reverse die, probably from die rust." That all three 1900 pieces have higher weights suggests that they were specially made, perhaps without the knowledge of Mint officials. Fred Weinberg explained to this cataloger that "the weights vary because in all probability, they were on planchets that might not have been filed down to the proper weight spread." Hand adjusting of individual gold planchets continued in the Mint until circa 1910. Those three pieces are almost certainly fancy pieces made for collectors, while the 1905 and 1906 examples, on correct weight planchets, are more likely pieces truly made in error, and substantially more important as such.

This example is slightly off-center toward 9 o'clock, the tops of UNITED STATES off the planchet. The strike is weak at the date, feather tips, RICA, the outer parts of the wreath, and the ribbon bow. The weakness seems counter to expectations of the soft gold, but the diameter is at least a full millimeter less than an Indian cent, meaning that the metal flowed out and was insufficient to accept the design from the deepest recesses of the dies. Both sides have bright yellow-gold surfaces with frosty mint luster. A few faint hairlines on the cheek prevent a Gem grade assignment. This stunning gold Indian cent is one of the truly amazing error coins we have ever handled. NGC ID# 2292, PCGS# 2220

## LINCOLN CENTS

### 1911 Lincoln Cent, MS67 Red Registry Set Quality

- 3020 **1911 MS67 Red PCGS.** The appeal of this full Red Superb Gem to the Registry Set collector is rivaled by very few others. PCGS has certified only 11 MS67 examples of the 1911 Lincoln cent (1 in 67+), with just one piece numerically finer, all within the Red color category (12/14). This piece exhibits frosty coppery-orange luster and remarkably clean surfaces, with none of the tiny marks and ticks that typically affect Lincoln's shoulder. The fields exhibit minor die fatigue in the margins, but the strike is nonetheless bold on each side. This superb example ranks a full grade point finer than the representative in the current highest-rated Registry Set. NGC ID# 22B7, PCGS# 2443

### 1911-D Cent, MS66 Red Only One Numerically Finer at PCGS

- 3021 **1911-D MS66 Red PCGS.** The 1911-D cent is fairly challenging in full Red Gem condition, but Premium Gem examples in the same color category are rare, and are on every Registry Set collector's want list. This example is well-struck, with satiny coppery-red luster. The surfaces are devoid of significant abrasions, though some faint specks are detected with a loupe. Population: 24 in 66 (1 in 66+) Red, 1 finer (12/14). NGC ID# 22B8, PCGS# 2446

### 1917 Cent, MS67 Red Glowing Orange-Red Luster

- 3022 **1917 MS67 Red PCGS.** Spectacular coppery-gold luster and sharply defined motifs are the hallmarks of this Superb Gem Registry coin. The surfaces are seemingly devoid of contact, and only a few microscopic specks on each side appear to influence the grade. To the unaided eye, this coin is simply awash in vibrant eye appeal. Population: 16 in 67 Red, 2 finer (12/14). NGC ID# 22BS, PCGS# 2497

---

**1935-S Lincoln Cent, MS67 Red  
Among the Finest Certified**

- 3023 1935-S MS67 Red PCGS.** The 1935-S Lincoln cent is one of the less often seen dates of the period in high-grade full Red condition, and the few Superb Gems certified are items of intense interest and demand among the rankings of Registry Set collectors. This MS67 Red coin is one of only 12 so-grade pieces at PCGS, where none are finer (12/14). The coin is well-struck for the issue, with glowing, satiny luster in rich orange-red hues. A few microscopic specks are detectable near the left reverse border with a loupe, but these are of little concern to the unaided eye. Tied numerically with the example in the current highest-rated Registry Set. NGC ID# 22DD, PCGS# 2647
- 

---

**1954-D Cent, MS67+ Red  
A Registry Trump**

- 3024 1954-D MS67+ Red PCGS. CAC.** With just two MS67+ Red coins graded by PCGS and none finer (12/14), this CAC-stickered piece has great appeal for the Lincoln cent Registry collector. Beyond the plastic it is simply a gorgeous piece, fresh copper-orange and peach with pleasing lines in the wheat ears and minimal spotting. NGC ID# 22FD, PCGS# 2818
- 

**PROOF LINCOLN CENTS**

---

**1910 Cent, PR66 Red  
Rare This Well-Preserved**

- 3025 1910 PR66 Red PCGS.** The 1910 matte proof Lincoln cent had one of the higher mintages of the 1909 - 1916 production period (4,118 coins), but full Red examples are nonetheless scarce. This Premium Gem representative is boldly struck, with glowing coppery-orange luster. Population: 24 in 66 (1 in 66+) Red, 3 finer (12/14). NGC ID# 22KT, PCGS# 3308
- 

**1936 Brilliant Lincoln, PR65 Cameo  
Sole Cameo at This Grade Level**

- 3026 1936 Brilliant PR65 Cameo PCGS. CAC.** An attractive orange-gold example of this first-year modern proof coinage, struck in the small amount of 5,569 proof coins, which at the time could be individually ordered from the Mint. Perceptible field-device contrast as well as excellent preservation separate this piece from most of its cohort. A couple of tiny brownish flecks do not distract, and a small, curving strikethrough appears on Lincoln's forehead. Although nearly 200 examples of this issue achieve the Gem level, this is the sole Gem Cameo at PCGS, and two Cameos are finer (12/14). Worthy of a premium bid as such. NGC ID# 22L3, PCGS# 83335
-

---

**1937 Cent, PR67 ★ Red  
Registry Set Contender**

- 3027 1937 PR67 ★ Red NGC.** Among the finest non-Cameos certified, this Superb Gem Red proof is deeply mirrored and beautifully preserved, boasting sharp design definition. The devices are richly satiny, rather than deeply frosty, lacking just enough in field-motif contrast to preclude a Cameo designation from NGC. Census: 13 in 67 (1 in 67 ★) Red, 0 finer (12/14). NGC ID# 22L4, PCGS# 3338

---

**TWO CENT PIECES**

---

**1864 Two Cent Piece, MS66 Brown  
Elusive Small Motto Type**

- 3028 1864 Small Motto MS66 Brown PCGS.** The introductory and briefly issued Small Motto subtype is far scarcer than its high mintage Large Motto successor. The present coruscating example is fully defined except for the UST in TRUST, which is affected by a mint-made strike-through. The obverse is predominantly aquamarine while the reverse is orange-red and gunmetal-blue. Population: 1 in 66 Brown, 0 finer (12/14). NGC ID# 22N8, PCGS# 3579

---

**1872 Two Cent Piece, MS65 Red and Brown  
Conditionally Elusive Series Key**

- 3029 1872 MS65 Red and Brown PCGS. CAC.** The 1872 is the final business strike issue in the rather short-lived two cent denomination, and with a mintage of only 65,000 pieces it is also the biggest key date overall. Mint State examples are scarce in all levels, and Red and Brown Gems are rare. This representative is sharply struck, with satiny luster and no carbon spotting. Both sides display significantly more red than brown, delivering a burnt-orange appeal, but faint burgundy overtones preclude the assignment of a Red color designation. Population: 15 in 65 (2 in 65+) Red and Brown, 1 finer (12/14). NGC ID# 22NG, PCGS# 3613
-

## THREE CENT SILVER

1852 Three Cent Silver, MS67  
Only Two Coins Numerically Finer

- 3030 1852 MS67 PCGS. CAC. An available date in lower grades, the 1852 silver three cent piece becomes conditionally rare at the MS67 grade level, and finer pieces are almost unobtainable. This piece is well-struck, with vibrant, frosty luster underlying a thin veil of light champagne toning. Population: 18 in 67, 2 finer (12/14). NGC ID# 22YZ, PCGS# 3666

1853 Three Cent Silver, MS67  
None Certified in Higher Numeric Grades

- 3031 1853 MS67 PCGS. CAC. The 1853 three cent silver piece represents the final year of the Type One design, without the extra outline around the star. Few survivors can match the quality and appeal of the present coin, a magnificent Superb Gem, with sharply detailed design elements, vibrant mint luster, and impeccably preserved surfaces. Population: 8 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 22Z2, PCGS# 3667

1863 Three Cent Silver, MS67  
Most Examples Melted

- 3032 1863 MS67 PCGS. The first of the "automatic rarities" in the three cent silver series for which virtually all non-proofs were melted. This Superb Gem is semireflective with hints of color against an otherwise silver-white set of mirrors. Excellent detail and eye appeal. Population: 2 in 67 (1 in 67+), 2 finer (12/14). NGC ID# 22ZD, PCGS# 3682

1866 Three Cent Silver, Richly Toned MS67  
Significant Field Reflectivity

- 3033 1866 MS67 PCGS. CAC. Ex: Gardner. Before we sold this coin in 2010, the previous consignor had purchased it as a proof. With only one pair of dies used to strike 725 proofs and 22,000 strikes for circulation, there is obviously a continuum of reflectivity that makes it difficult to differentiate between late-state proofs and early-state business strikes. This Superb Gem is among the finest examples known of this low-mintage date. PCGS has seen nine submissions in MS67 with one finer; NGC has seen three in the same grade with one finer (12/14). The surfaces are deeply toned in swaths of sea-green, plum-red, and cobalt-blue. The strike details are unusually strong for a three cent silver, showing definition comparable to that seen on proofs. A slight hint of cartwheel luster appears in the fields, but each side is strongly reflective, even through the multiple layers of toning.  
Ex: FUN Signature (Heritage, 1/2010), lot 3667. NGC ID# 22ZG, PCGS# 3686

## PROOF THREE CENT SILVER

### 1858 Three Cent Silver, PR68 Single-Finest Certified Example Favorite Type Two Issue

**3034 1858 PR68 NGC.** Sometimes the greatest gifts come in the smallest packages. Such is the case with this magnificent three cent silver from 1858, the last of the 1854-58 Type Two issues with two lines bordering the star. Although the reported mintage ranges from 60 to 75 “original” pieces in Walter Breen’s *Proof Encyclopedia* (1989) to 210 examples in the 2015 *Guide Book*, the correct number is probably somewhere in between, judging from the PCGS and NGC population data.

The same population reports also confirm the rarity of this issue in extraordinary states of preservation. The present coin is the sole PR68 certified at NGC, and PCGS has graded only two examples as high as PR67 (12/14). Steel- and pinkish-gray toning covers the obverse. The reverse has more cobalt-blue color and a slightly golden center that adds heat to the otherwise cool surfaces. The mirrors are as deep as one will ever find on this denomination, and the devices exhibit an appreciable amount of mint frost. The design elements are fully struck, and no areas reveal hints of weakness. Excessive die polishing has removed a couple of small segments of the star outlines in the southwest obverse quadrant, and heavy diagonal die striations appear in the obverse fields. The Type Two three cent silver is undoubtedly one of the most eagerly sought type coins in U.S. numismatics. Its short life span of only five issues for the type, and 1858 is the only year generally found as a proof, making the proof Type Two a perennial favorite of both collectors and investors alike. This pristine piece represents a remarkable opportunity for type collectors.

Ex: FUN Signature (Heritage, 1/2008), lot 2721, which realized \$57,500; FUN Signature (Heritage, 1/2012), lot 3075. NGC ID# 27C5, PCGS# 3705

**1863 Three Cent Silver, PR67**  
**Only One Numerically Finer at NGC**

- 3035 1863 PR67 NGC.** A low-mintage proof date that is rare at this advanced grade level. Lovely sky-blue, peach, yellow, and lilac shades adorn the flawlessly preserved surfaces of this gorgeous Superb Gem. The design motifs are sharply struck and watery reflectivity emerges from the fields. Census: 8 in 67 (1 in 67 ★), 1 finer (12/14). NGC ID# 22ZP, PCGS# 3712

**1869 Three Cent Silver, PR67**  
**Delicate Aquamarine Toning**

- 3036 1869 PR67 PCGS. CAC.** The business strike 1869 three cent silver had a scant mintage of only 4,500 pieces and is decidedly rare in Mint State, putting increased date pressure on the also small number of surviving proofs which had a mintage of only 600 pieces. This Superb Gem is one of just three non-Cameos certified by PCGS at the PR67 grade level, and none are numerically finer (12/14). The design elements are fully defined, and provide subtle, undesignated contrast with the deep, glassy fields. Lovely toning spreads across both sides in shades of sea-green and ocean-blue, a patina that pairs well with the water fields. NGC ID# 22ZR, PCGS# 3719

**PROOF THREE CENT NICKELS**

**1872 Three Cent Nickel, PR66 Deep Cameo**  
**Sole Finest in Category**

- 3037 1872 PR66 Deep Cameo PCGS. CAC.** PCGS has certified only three 1872 three cent nickels as Deep Cameos, and this Premium Gem is the sole finest; NGC has not certified any examples as Ultra Cameo (12/14). The strike is bold and the contrast is indeed stark, with a blanket of light golden toning overlying each side. Beautifully preserved. PCGS# 93768

**1882 Three Cent Nickel, PR68**  
**None Finer at PCGS**

- 3038 1882 PR68 PCGS.** Margins of golden-yellow surround pale lavender-pink interiors on this sumptuous Superb Gem proof late-date three cent nickel, struck to the extent of only 3,100 proofs complementing a meager business-strike emission of 22,200 coins. The bold strike and pristine preservation, along with the beautiful patina, all contribute to the top-shelf eye appeal. This example appears to be the first Breen enumerates in the *Proof Encyclopedia*: "First die. Clear 2, no trace of filling anywhere within the digit." Population: 7 in 68, 0 finer (12/14). NGC ID# 2764, PCGS# 3778

**1883 Three Cent Nickel, PR68**  
**Among the Finest Known**

- 3039 1883 PR68 PCGS. CAC.** Business strike three cent nickels of this date are rare in Mint State grades, making the available proof variant the option of choice for many date and type collectors. This piece, however, is so well-preserved that it stands above almost all other 1883 proofs. It is one of only five pieces certified at the PR68 level at PCGS, with none finer (12/14). Although not designated as a Cameo, both sides display noticeable field-motif contrast beneath a blanket of cool ice-blue toning. The mirroring is deep and the preservation is remarkable. NGC ID# 2765, PCGS# 3779

## SHIELD NICKEL

### 1875 Shield Nickel, MS66+ None Certified Numerically Finer

- 3040 1875 MS66+ PCGS. CAC.** A boldly struck and delicately preserved representative, this Plus-graded Premium Gem 1875 Shield nickel also ranks as the sole finest certified at PCGS, if only by the margin of the Plus designation (12/14). Frosty surfaces yield tinges of light golden toning around the margins, while both sides display the usual array of heavy peripheral die cracks. Population: 14 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 22PA, PCGS# 3804

## PROOF SHIELD NICKELS

### 1866 With Rays Shield Nickel Lightly Toned PR66 Cameo

- 3041 1866 Rays PR66 Cameo PCGS.** The popular first-year proof issue with the rays between the stars on the reverse. The rays were later removed to help the coins strike up better and to reduce the "crowded" appearance of the design. This Premium Gem is fully struck, with noticeable field-device contrast and light golden toning over each side. Population: 29 in 66 Cameo, 3 finer (12/14). PCGS# 83817

### 1873 Shield Nickel, Closed 3, PR67 Repunched Date

- 3042 1873 Closed 3 PR67 PCGS.** The date is minutely repunched north, with the underdigit most obvious on the 1. This variety is unlisted in the *Cherrypickers'* reference of die varieties for this date. The 3 is most certainly of the Closed 3 logotype, a characteristic which is sometimes difficult for the novice to discern on this issue. This coin is sharply struck and mirrored in the fields, with delicate rainbow toning blended over both sides. Population: 3 in 67, 0 finer (12/14). NGC ID# 276P, PCGS# 3827

### 1877 Shield Nickel, PR67 Cameo Key Proof-Only Issue

- 3043 1877 PR67 Cameo NGC.** This is a remarkably attractive key-date specimen from the original proof-only mintage of 900 pieces. Full strike definition graces the heavily frosted devices, and dark, deep mirror fields are free of even the smallest imperfection. This impressive example is one of the finest-known, and tied for finest-graded at both services. Census: 6 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (12/14). PCGS# 83831

## LIBERTY NICKELS

### 1886 Nickel, MS65 Elusive Key Date

- 3044 1886 MS65 PCGS.** The second 8 in the date is slightly recut. Although not as widely heralded as the 1885, the 1886 Liberty nickel is actually the scarcer date in Gem and finer grades. This example is fairly well-struck, though the lower-left wreath shows a touch of the usual softness. Iridescent golden-gray and lilac hues blanket each side, highlighting satiny, well-preserved surfaces. Population: 39 in 65, 8 finer (12/14). NGC ID# 22PK, PCGS# 3847

### 1896 Nickel, Elusive MS66 Above-Average Strike

- 3045 1896 MS66 PCGS.** High-grade Mint State 1896 nickels are very elusive, especially when they are sharply struck. The current Premium Gem exhibits razor-sharp definition in Liberty's hair and the star centers. Only the corn ear left of the bowknot is a tad soft, but not flat as usually seen. Nickel-gray lustrous surfaces are impeccably well preserved. Population: 15 in 66 (2 in 66+), 0 finer (12/14). NGC ID# 277B, PCGS# 3857

**1912-S Liberty Nickel, MS65+  
Low-Mintage Key**

- 3046 1912-S MS65+ PCGS.** While not the scarcest issue overall, the 1912-S does boast the lowest mintage of the series (only 238,000 coins), and also ranks as the only Liberty Head nickel produced at the San Francisco Mint. This high-end Gem displays satiny luster with varying shades of ice-blue, champagne, and pale lavender toning. The lower-left wreath is not fully defined, as is typical of this final-year issue, but the remainder of the design elements are well-detailed. PCGS has encapsulated just 19 numerically finer representatives (12/14). NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

**1883 Liberty Nickel, PR66  
Rare Deep Cameo Example**

- 3047 1883 With Cents PR66 Deep Cameo PCGS.** Despite a significantly higher mintage (more than 16 million pieces versus fewer than 6 million pieces), the proof 1883 With Cents Liberty nickel is somewhat scarcer overall than its No Cents counterpart, especially in Deep Cameo grades. This piece is one of just five coins to receive a Deep Cameo designation from PCGS, only one of which is numerically finer (12/14). The strike is crisp throughout Liberty's hair curls and the stars, and even the lower-left portion of the wreath is unusually well-defined. A blush of light golden color accents stark field-motif contrast, while the surfaces are nearly void of flaws. Population: 3 in 66 Deep Cameo, 1 finer (12/14). PCGS# 93881

**1884 Liberty Nickel, Lightly Toned PR67 Cameo**

- 3048 1884 PR67 Cameo PCGS. CAC.** Amber-gold and cinnamon patina rings the rims on each side of this nicely preserved Superb Gem Cameo proof 1884 nickel, one of the few finest survivors of the production of nearly 4,000 proof coins. Well-contrasted devices on each side show a notable paucity of mentionable contact, and the strike is sharp overall, if perhaps not to the kernel-counting stage on the lower-left ear of corn on the reverse. A nice coin for the grade, one of only eight such certified at PCGS and one of seven such at PCGS (12/14). PCGS# 83882

**1884 Nickel, PR67 Cameo  
Mix of Color and Contrast**

- 3049 1884 PR67 Cameo PCGS. CAC.** This second-year Liberty nickel proof has distinct gold-to-orange border toning that turns peach and extends into the left reverse field. Clearly contrasted even where toned and a Cameo-worthy coin, as affirmed by both PCGS and CAC. Population: 8 in 67 Cameo, 0 finer (12/14). PCGS# 83882

**1891 Liberty Nickel, PR66 Deep Cameo  
Sharp and Well-Contrasted**

- 3050 1891 PR66 Deep Cameo PCGS.** The needle-sharp proof strike encompasses all of the intricate details in Liberty's hair, coronet, and the star centers on the obverse, as well as all wreath elements on the reverse. It is, however, the abundant field-device contrast on both sides that most captures the viewer's attention on this Premium Gem proof. A small tick appears at the corner of Liberty's mouth but is far from overt. Among the few finest Deep Cameos of this issue. Population: 8 in 66 (3 in 66+) Deep Cameo, 0 finer (12/14). PCGS# 93889

## BUFFALO NICKELS

### 1918/7-D Buffalo Nickel, VF30 Popular Overdate Variety

- 3051** 1918/7-D FS-101 VF30 PCGS. A pleasing mid-grade example of this popular *Guide Book* variety. The overdate feature is bold, though the diagnostic die crack to the right of the braid just above the tie is also discernable. Light pewter-gray in color, with original surfaces and just grade-consistent wear. Pleasing in every way for the grade. PCGS# 38446 Base PCGS# 3939

### 1918/7-D Nickel, VF35 Extensively Cracked Die State

- 3052** 1918/7-D FS-101 VF35 PCGS. This example was struck during a very late state of the dies, with multiple obverse die cracks and significant die fatigue in the recesses on both sides. The overdate feature is bold, and the diagnostic crack along the Indian's lower jaw is complete all the way across. Pale battleship-gray in color, with pleasing detail for the grade. PCGS# 38446 Base PCGS# 3939

### 1924-S Nickel, MS66 ★ Tied for Finest Certified

- 3053** 1924-S MS66 ★ NGC. Ranking among the lowest mintage issues with a production of less than 1.5 million coins, the 1924-S is an important rarity in the Buffalo nickel series, in demand regardless of its grade. Coins that grade VF or finer are especially desirable. This issue was minted a decade before the advent of coin boards and albums heightened the popularity of date and mintmark collecting. Because of that, Mint State coins have only survived as a matter of chance, and the low mintage guaranteed their conditional rarity. Most Mint State coins are in the lower grade range from MS60 to MS63, and Choice, Gem, or finer examples are highly elusive.

Glorious eye appeal with hazel centers on both sides of this Premium Gem cede to delightful orange-gold rim toning. Well but not fully struck, with trivial weakness at the braid and the bottom of the lowest feather on the obverse. Fully struck coins remain unknown. The bison's tail is split on the reverse, but minor softness shows on the shoulder and hair on the head. Remarkable quality, justly recognized with the NGC Star designation. The opportunity to acquire an example of the finest available 1924-S Buffalo nickel is rarely encountered, and the wise bidder will take full advantage of the present offering. Census: 4 in 66 (2 in 66 ★), 0 finer (12/14). Ex: Long Beach Signature (Heritage, 6/2010), lot 414. NGC ID# 22RZ, PCGS# 3953

---

**1926-S Buffalo Nickel, MS64  
Low-Mintage Key Issue**

**3054 1926-S MS64 NGC.** The 1926-S Buffalo nickel claims a series-low business-strike mintage of 970,000 pieces and the issue is always in demand from series specialists, especially in high grade. Few high-quality examples were saved by contemporary collectors and the 1926-S is conditionally rare above the MS64 grade level.

This impressive Choice example offers well-detailed design elements, with just a touch of the usual softness on the braid and bison's head. Strong satiny mint luster is evident on both sides and the well-preserved surfaces show a few subtle hints of champagne-gold and lavender toning. NGC has graded 12 numerically finer examples (12/14). NGC ID# 22S7, PCGS# 3959

---

---

**1927-D Buffalo Nickel, MS65  
Above-Average Eye Appeal**

**3055 1927-D MS65 PCGS.** Denver issues from the 1920s are often seen with varying degrees of striking weakness in the centers, and this example of the 1927-D is a typical piece in that regard, showing mild softness on the hair above the braid and on the bison's shoulder. The preservation and corresponding eye appeal, however, are excellent, with smooth, satiny luster shining through iridescent golden-gray and lavender-blue toning. Population: 64 in 65 (4 in 65+), 5 finer (12/14). NGC ID# 22S9, PCGS# 3961

---

**1937-D Three-Legged Nickel, MS63  
Longtime Collector Favorite**

**3056 1937-D Three-Legged, FS-901, MS63 PCGS.** The Three-Legged 1937-D Buffalo nickel is visually distinctive enough and was recognized early enough that even Select examples are not rarities, though collector demand ensures that the price for a coin such as this will be hefty. Pale golden toning with occasional reddish elements settles across lightly abraded but lustrous and still-pleasing surfaces. PCGS# 38475 Base PCGS# 3982

---

---

**1937-D Three-Legged Buffalo, MS63+  
Lustrous and Appealing**

- 3057** 1937-D Three-Legged, FS-901, MS63+ NGC. CAC. Appealing pinkish patina suffuses each side of this Three-Legged Buffalo, showing few marks on the obverse and scattered minor ticks on the reverse that determine the grade. The die erosion that caused this error is in evidence, of course, including the moth-eaten appearance of the bison's hind leg. This piece is more lustrous than many survivors of this popular error, and as such should attract some premium bids. PCGS# 38475 Base PCGS# 3982

---

**1937-D Three-Legged Buffalo Nickel, MS64  
Standout Example of This In-Demand Error**

- 3058** 1937-D Three-Legged, FS-901, MS64 NGC. CAC. Excellent preservation shows on each side of this near-Gem Three-Legged Buffalo. Although the popular error is by no means rare, examples at this grade level are conditionally quite rare, and anything in Gem or finer grades is costly and seldom available. There are only minimal abrasions on this piece, largely confined to a couple of ticks on the buffalo's midsection. Good luster and eye appeal make this a standout coin. PCGS# 38475 Base PCGS# 3982

---

**1937-D Three-Legged Buffalo, MS65  
Conditional Rarity at This Level**

- 3059** 1937-D Three-Legged, FS-901, MS65 NGC. Another example in this incredible grading set of 1937-D Three-Legged Buffalo nickels, this Gem certified by NGC offers surfaces that are remarkably free of all but the most picayune ticks, one or two showing on the midsection of the buffalo. The obverse is free of any contact that requires singular mention, as expected at this grade level. Although lower-Mint State examples of this popular error are legion, in near-Gem and Gem grades the Three-Legged becomes legitimately rare. The excellent luster on this pinkish-gold piece further separates it from most survivors. Census: 59 in 65, 23 finer (12/14). PCGS# 38475 Base PCGS# 3982
-

## PROOF BUFFALO NICKELS

1915 Buffalo Nickel, PR67+  
Sharply Detailed and Unusually Lustrous

- 3060** 1915 PR67+ NGC. A stunning proof Buffalo nickel, from a mintage of just 1,050 pieces, this high-end Superb Gem exhibits razor-sharp definition on all design elements. The slightly granular matte surfaces are unusually lustrous and mostly brilliant, with just a wisp of sea-green toning on the reverse and a dab of amber color below the Indian's eye on the obverse. Census: 34 in 67 (1 in 67+, 1 in 67 ★), 4 finer (12/14). NGC ID# 278U, PCGS# 3992

1936 Satin Proof Buffalo, PR67+  
Delicately Toned

- 3061** 1936 Type One — Satin Finish PR67+ PCGS. CAC. The satin finish proof nickel of 1936 is moderately available at the PR67 grade level, but it becomes rare any finer. This Plus-designated piece is boldly struck on both sides and seemingly pristine. Faint lavender-blue and pale champagne hues accent the softly lustrous surfaces. PCGS has certified only 35 numerically finer representatives (12/14). NGC ID# 278X, PCGS# 3994

## EARLY HALF DIMES

1795 Half Dime, V-4, LM-10, AU58  
Sharp Flowing Hair Type Coin

- 3062** 1795 V-4, LM-10, R.3, AU58 PCGS. Heavily clashed, but struck before the rim cud develops above the TY in LIBERTY. The earlier crack in that area is present. This piece is an ideal type coin, showing sharp detail and only a trace of friction over the high points. Pale golden-gray toning yields deeper hues of olive and blended lavender in the margins. A few faint adjustment marks are detectable in the central reverse. PCGS# 38594 Base PCGS# 4251

1800 Half Dime, XF40  
V-2, LM-3, LIBEKTY

- 3063** 1800 LIBEKTY, V-2, LM-3, R.4, XF40 NGC. The R in LIBERTY is broken at the top, giving the apparent spelling of LIBEKTY. This is a scarce and popular *Guide Book* variety. The present coin is evenly struck and well-detailed for the grade, with original gunmetal-blue and gray toning that yields to lighter shades of tan-gold color over portions of the relief elements. Census: 3 in 40, 27 finer (12/14). PCGS# 38603 Base PCGS# 4265

## BUST HALF DIME

1835 Small Date, Small 5C Half Dime, MS67  
Multicolor V-7, LM-10 Example

- 3064** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS67 NGC. Distinctive identifiers on each side help attribute this available variety. On the obverse the 3 in the date is low compared to 8 and 5. On the reverse the upper loop of S2 is filled, the C in the denomination nearly touches the branch tip, and the last A in AMERICA is equally spaced between the adjacent C and the top arrowhead. The M in AMERICA is higher than the E at its base, which in turn is higher than the R. A die crack runs from the rim down through the upright of T2 to the R in PLURIBUS. This is a lovely Superb Gem example with beautiful multicolor toning and no singular marks. Some old "halo" die clashing appears in the obverse field before Liberty's profile, usual on this die marriage. PCGS# 38719 Base PCGS# 4285

## SEATED HALF DIMES

### 1850-O Seated Liberty Half Dime, MS67 Single-Finest Certified Example

**3065** 1850-O MS67 PCGS, CAC. This spectacular Superb Gem is the single-finest certified survivor of a business-strike mintage of 690,000 pieces. The 1850-O was released into circulation before coin collecting became widespread in this country, around 1857, and decades before any real interest in mintmark issues developed, in the 1890s. As a result, very few high-quality examples were saved at the time of issue, and Mint State specimens are elusive in today's market.

The present coin offers well-detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster on both sides. Subtle hints of champagne-gold and lavender toning enhance the outstanding eye appeal. Population: 1 in 67, 0 finer (12/14). NGC ID# 233G, PCGS# 4346

### 1858 Over Inverted Date Half Dime, MS67 Very Rare FS-302 *Cherrypickers'* Variety

**3066** 1858 Over Inverted Date MS67 NGC, FS-302. The chief diagnostic of this rare variety is the inverted bottom loops of the two 8s from the original date, intervening between the number pairs 18 and 58 of the subsequent date punch. The upside-down bottom loop of the original 5 also appears between 85. *Cherrypickers'* calls this variety "very rare, and more difficult to locate than the 1858 repunched date [FS-301]." Beautiful pinkish-gold centers cede to ice-blue at the rims on this well-preserved Superb Gem, showing excellent eye appeal. An interesting die crack runs through the right side of the wreath and F and E in HALF and DIME. This piece is the sole finest certified of the variety at either service, as PCGS' finest is one MS66+ (12/14). NGC ID# 233U, PCGS# 4368

---

### 1860 Transitional Half Dime, Lovely MS67

- 3067** 1860 Transitional MS67 PCGS. CAC. Judd-267. The “coin without a nation,” the 1860 Transitional half dimes retain the Stars Obverse design that preceded the 1860 introduction of the new cereal-wreath reverse as seen on these pieces, and they therefore lack the legend UNITED STATES OF AMERICA that was moved to the obverse for the regular issues. This is a lovely silver-gray piece that shows top-notch eye appeal overall and a bold strike, save for the soft centers on stars 9 and 10. These coins are technically patterns but have been collected for many years alongside the regular issues. Far finer quality than usually seen on the Transitional issue. Population: 8 in 67, 1 finer (12/14). NGC ID# 2346, PCGS# 4373

---

### 1868-S Seated Half Dime, MS66 Among the Finest Certified Examples

- 3068** 1868-S MS66 PCGS. CAC. The 1868-S half dime is a better date, especially at the upper grade levels. Areas of rich toning are present on this lustrous Premium Gem example, primarily at portions of the outer edges, including shades of dark russet, olive-gold, and flecks of amber-orange. Pronounced clash marks are noted upon further examination, though the strike is well-executed and the preservation is pleasing. Population: 4 in 66, 0 finer (12/14). NGC ID# 234P, PCGS# 4393

---

### PROOF SEATED HALF DIMES

### 1866 Seated Liberty Half Dime, PR67 Deep Cameo Single-Finest Certified at PCGS

- 3069** 1866 PR67 Deep Cameo PCGS. CAC. The 1866 proof Seated Liberty half dime claims a small mintage of 725 pieces, making the date elusive in all grades today. Only 10,000 business-strike coins were produced, putting added pressure on the small supply of proofs from date collectors.

The present coin is a spectacular Superb Gem, with razor-sharp definition on all design elements and deeply mirrored fields that contrast profoundly with the frosty devices to create a dazzling cameo effect. The impeccably preserved surfaces are essentially brilliant and eye appeal is terrific. Population: 1 in 67 Deep Cameo, 0 finer (12/14). PCGS# 94449

---

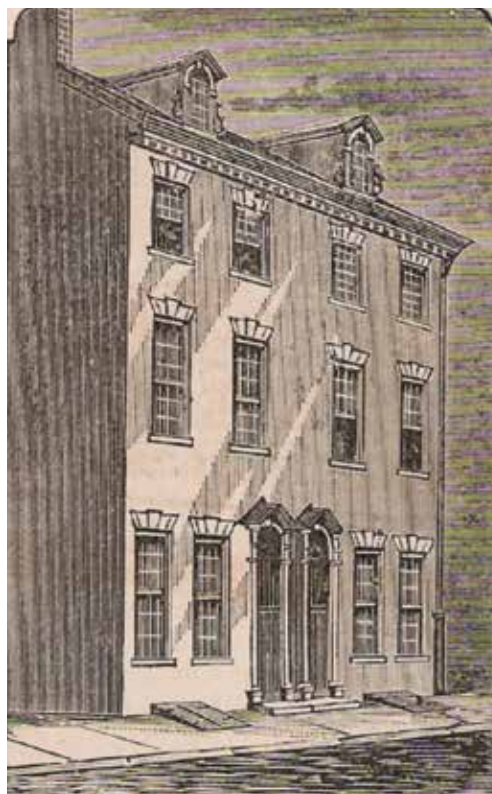

## EARLY DIMES

1797 JR-1 Dime, MS63  
16 Obverse Stars

**3070** 1797 16 Stars, JR-1, R.4, MS63 NGC. The debut of the denomination in 1796 consisted of 22,135 coins from seven different die pairings. The next year, a large mintage of 25,261 coins was accomplished from two easily distinguished die pairs, having either 16 stars or 13 stars on the obverse. The two varieties are similar in rarity. A strong loupe reveals trivial surface marks that are invisible to the unaided eye on this fully lustrous Select Mint State beauty. Both sides have delicate gold toning with lovely peripheral sky-blue accents. Census: 1 in 63, 4 finer (12/14). PCGS# 38748 Base PCGS# 4462

---

1798/97 Dime, JR-2, MS61  
13 Stars Reverse, Rare in All Grades

**3071 1798/97 13 Stars Reverse, JR-2, R.6, MS61 NGC.** JR-2 is the rarest of the four 1798 dime varieties, comprising only a tiny percentage of the total population for the date. The generally accepted survival estimate is only about 20 to 30 coins in all grades, a figure that is proportionate to the certified population which lists 24 pieces. Mint State coins are extremely rare; NGC has encapsulated just this MS61 coin and two MS62 pieces, while PCGS has seen two examples in MS62, as well as a sole MS63 representative (12/14).

This is the only use of this 13-star reverse die, but the second use of this obverse which was previously employed for JR-1, the more available overdate variety for this issue. The 8 in the date is small in relation to the other digits, and is punched over a large 7, the remnants of which are bold below and within the loops of the 8. This is the only overdate of the Draped Bust type and the feature is plain even to the unaided eye.

The present piece is largely toned in deep olive-gray patina, with areas of deeper gunmetal-blue color also observed in the border recesses. The peripheral stars and denticles are sharply detailed, though the central regions are deficiently struck — such central weakness is characteristic of virtually all known examples of this variety. Heavy clash marks are also noted on each side, and particularly noticeable is a sharp, incuse star in the obverse field before Liberty's throat, transferred from the reverse die. Such clash marks are also characteristic of this die pairing, and expected. An excellent opportunity for the advanced early dime specialist to acquire one of the rarest varieties in the Draped Bust type. PCGS# 38751 Base PCGS# 4469

**1805 Dime, JR-2, MS62**  
Attractively Toned Both Sides

- 3072** 1805 4 Berries, JR-2, R.2, MS62 PCGS. The 1805 is one of the most plentiful issues in the Draped Bust type, ideal for inclusion in a type set. This Mint State piece is a trifle soft in the centers, but is pleasantly free of any significant abrasions. Dusky rainbow hues form concentric circles on both sides beneath a veil of deeper gunmetal-gray toning. The reverse is rotated clockwise about 40 degrees. PCGS# 38769 Base PCGS# 4477

**BUST DIMES**

**1814 JR-3 Dime, MS64**  
Late Die State Example

- 3073** 1814 Large Date, JR-3, R.2, MS64 PCGS. CAC. The Large Date variety is the most available in Mint State, ideal for type purposes. This is a lightly toned Choice example, showing hues of olive-gold, amber, and pale lavender. Several stars and the eagle's right (facing) talons are slightly soft, as is typical, but no major abrasions are present. From a late die state, with extensive cracks on the reverse. PCGS# 38775 Base PCGS# 4488

**1827 Dime, JR-3, Richly Toned MS64**

- 3074** 1827 JR-3, R.1, MS64 PCGS. Impressive peach-red toning dominates, although gunmetal-blue and gold are also present. Slightly soft on the eagle's claws and the forehead curls, although all stars are sharply impressed. Population: 54 in 64, 16 finer (12/14). Ex: Alison Park Collection (American Numismatic Rarities, 8/2004), lot 296, realized \$3,105; Los Angeles U.S. Coin Auction (Heritage, 8/2009), lot 444, realized \$3,076.25. PCGS# 38813 Base PCGS# 4504

**1829 Capped Bust Dime, VG8**  
Rare JR-10 Variety

- 3075** 1829 Curl Base 2 VG8 PCGS. CAC. JR-10, FS-301, R.6. A substantial mintage of 770,000 Capped Bust dimes was accomplished in 1829, with 12 die varieties known for the date. This coin represents the JR-10 variety, with the Curl Base 2 in the date. The JR-10 is one of the most elusive varieties in the Capped Bust series and specialists prize examples in all grades and conditions. The variety was discovered in 1973 and most examples seen are in lower circulated grades. This was the only use of the obverse die, but the reverse was employed again in 1830, on the JR-2 variety.

The present coin is an evenly worn specimen, with legends, date, and LIBERTY all legible. The dove-gray surfaces show a moderate number of abrasions, mostly on the reverse, with a few hints of amber toning. This lot represents an important opportunity for the series enthusiast. Population: 6 in VG8, 8 finer (12/14). PCGS# 4512

**SEATED DIMES**

**1841-O Small O, Closed Bud Die, VF20**  
In-Demand Transitional Variety. Fortin-102

- 3076** 1841-O Transitional Reverse Small O, Closed Bud, VF20 NGC. Fortin-102. A Top 100 Variety per Gerry Fortin. This reverse showing the Small O mintmark, was a die left over from the Closed Bud 1840-O coinage used to strike more dimes in early 1841. This pinkish-gray example shows one noticeable gash through Liberty's left (facing) arm, and two other mentionable marks show on the reverse, one left of the left branch tip, the other at the rim above the second T in STATES. Both, fortunately, miss the crucial design elements. Extensive wear and strike weakness are apparent on the reverse, which is essentially dentil-free, but the obverse is better defined overall. This piece remains a nice, collectible midgrade example of this sought-after variety. PCGS# 145486

**1849-O Dime, MS64  
Tied for Finest Certified**

- 3077 1849-O MS64 NGC. Fortin-102, R.4.** The 1849-O Seated dime is a fairly scarce issue overall, but it becomes especially rare in Mint State, and is unknown finer than MS64. This piece is well-struck, with satiny luster that shines through a blanket of deep gunmetal-blue and lavender-gray toning. No significant abrasions are present. This piece is tied with just five others as the finest certified at NGC and PCGS combined (12/14). NGC ID# 238H, PCGS# 4592

**1874-CC Arrows Dime, Fair 2  
An Affordable Example**

- 3078 1874-CC Arrows Fair 2 PCGS. Fortin-101, R.5.** An unusual degree of peripheral definition remains for this low grade level, though weakness around the rims precludes a Good assessment. Well-circulated overall, but with a clear mintmark. The smooth surfaces display pale battleship-gray color, and the diagnostic die crack through the mintmark is distinguishable. A nice collector-grade coin for the collector on a budget. Population: 2 in 2, 45 finer (12/14). NGC ID# 23BL, PCGS# 4669

**1874-CC Arrows Dime, Sharp XF Details**

- 3079 1874-CC Arrows — Repaired — PCGS Genuine. XF Details. Fortin-101.** The surfaces show minor granularity under magnification, though the coin is remarkably appealing to the unaided eye. Substantial detail remains amid gunmetal-gray, olive, and deep lavender hues. The diagnostic die crack through the mintmark is clear. This key Carson City issue is so rare in high grades that even slightly impaired examples are widely sought by serious collectors. NGC ID# 23BL, PCGS# 4669

**1877-CC Dime, Lightly Toned MS67**

- 3080 1877-CC MS67 NGC.** The mintage of the 1877-CC dimes was a high 7.7 million pieces, but most circulated rather extensively, and fewer than dozen survive in the Superb Gem level or finer grades. This piece is lightly toned with excellent preservation, showing only scattered, inoffensive ticks on either side. Census: 11 in 67 (1 in 67 ★), 3 finer (12/14). NGC ID# 23AM, PCGS# 4683

**PROOF SEATED DIME**

**1881 Seated Dime, PR67+ Cameo  
Nice Peripheral Toning**

- 3081 1881 PR67+ Cameo PCGS. CAC. Fortin-101, R.3.** Splendid multicolor toning in shades of ice-blue, cherry-red, and orange surround essentially brilliant interiors on each side. The devices are heavily frosted, and the fields display a high degree of reflectivity. Collectors often turn to the proofs from this issue (975 coins) because the Mint produced only 24,000 circulation strikes, one of the lowest mintages in the series. Population: 8 in 67 (1 in 67+) Cameo, 2 finer (12/14). PCGS# 84778

## BARBER DIMES

1899-S Dime, Impeccable MS67  
Condition Rarity

- 3082 1899-S MS67 PCGS. CAC.** Pretty pale blue, heather, and golden-lilac tones enliven each side of this nicely preserved Superb Gem 1899-S dime, one of only four to achieve this highest numerical grade at PCGS. The surfaces show equally impeccable preservation on each side, and a couple of tiny dark flecks in Liberty's headgear are scarcely worth mentioning. Despite the moderate mintage of more than 1.8 million coins, the 1899-S dime is quite a conditional rarity at the Superb Gem level, as only six show in the combined population data of PCGS and NGC (12/14). This is one of three such with the CAC green approval. NGC ID# 23EB, PCGS# 4820

1904-S Dime, MS66+  
Richly Toned Condition Rarity

- 3083 1904-S MS66+ PCGS. CAC.** With just 800,000 pieces produced, the 1904-S is one of the lesser-known yet still challenging issues in the Barber dime series, particularly in the higher circulated and Mint State grade ranges. This impressively preserved MS66+ coin is notable for its softly lustrous surfaces, pearl-gray with a hint of rose on the interiors that blossoms into rich reddish-orange and brick hues at the margins. Liberty's hair offers above-average detail despite a touch of softness. PCGS has graded only a dozen coins at the Premium Gem and higher levels: 9 in 66, 2 in 66+, and 1 finer (12/14). NGC ID# 23ES, PCGS# 4834

**1910-S Dime, MS66+**  
**Rare This Fine**

- 3084 1910-S MS66+ PCGS. CAC.** A smooth medium-gray representative with sage and olive elements at parts of the margins. Detail is excellent, particularly on the bow of the wreath, and the surfaces are pleasingly preserved. A great example of an often-overlooked issue with a mintage of just 1.24 million pieces. Population: 11 in 66 (1 in 66+), 2 finer (12/14). NGC ID# 23FH, PCGS# 4856

**1912-D Barber Dime, MS67**  
**Tied With One Other for Finest Certified**

- 3085 1912-D MS67 NGC.** Most Mint State examples of the 1912-D Barber dime are in MS64 and lower grades; Gems are scarce, and this issue is rare any finer. The present piece is the sole finest certified at NGC, and is rivaled at PCGS only by a single numerically equal example (12/14). Brilliant centers deepen to amber-gold and ocean-blue toning around the borders, and the design elements are sharply impressed. NGC ID# 23FN, PCGS# 4861

**PROOF BARBER DIMES**

**1905 Barber Dime, PR68**  
**None Certified Numerically Finer**

- 3086 1905 PR68 NGC.** This high-end Superb Gem proof is among the finest certified of the issue. Deeply mirrored fields accent the sharp, frosty devices, but the surfaces are little too deeply toned to warrant a Cameo designation. The obverse displays a blend of sea-green, lavender-gray, and green-gold toning, while the reverse shows lighter shades of the same amid brighter sun-gold and amber hues. Census: 8 in 68 (1 in 68 ★), 0 finer (12/14). NGC ID# 23GJ, PCGS# 4889

**1905 Dime, PR67 Deep Cameo**  
**Only Deep Cameo Certified**

- 3087 1905 PR67 Deep Cameo PCGS.** With 727 pieces struck, the 1905 proof Barber dime is available in the absolute sense, but Cameos are scarce, and this Superb Gem holds the record as the only Deep Cameo certified by either PCGS or NGC (12/14). A faint golden tint accents the deep mirrors and frosty devices, while sharp design definition and impeccable preservation further heighten the visual appeal. PCGS# 94889

## TWENTY CENT PIECE

### 1876 Twenty Cent Piece, MS67 Important Condition Rarity Among the Finest Certified

**3088 1876 MS67 PCGS. CAC.** Authorized in March 1875, the unfortunate twenty cent piece soon proved unpopular and unnecessary, largely due to its similarity in size and design to the quarter dollar which created significant confusion in daily commerce. As a result, business strike twenty cent pieces were minted for only two years, but production utilized three different mints. San Francisco made the largest contribution, striking more than 1.1 million pieces and by default creating the only truly available date in the series. The Philadelphia and Carson City emissions for 1875 and 1876 were minimal in comparison to that of the California facility, and all are either scarce or rare in Mint State today. Proof-only mintages were issued in 1877 and 1878 at Philadelphia, and the denomination was discontinued completely on May 2, 1878.

Twenty cent pieces were heavily melted in later years, and the 1876, with a small mintage of only 14,400 coins, has proven to be a challenging semikey in all grades, and is especially sought-after in Gem and finer condition. At the MS67 level, NGC has certified just four examples, with none finer, while PCGS has so-graded only three representatives (1 in 67+), also with none finer (12/14).

The present coin is a stunning example, with brilliant fields and virtually perfect surfaces that showcase remarkably frosty luster. The striking details are sharp throughout. The intense visual appeal and high technical grade make this example a fitting choice for the finest type set or date collection.

Ex: FUN Signature (Heritage, 1/2010), lot 2498. NGC ID# 23R8, PCGS# 5299

## PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR66  
Only One Finer Coin at NGC

- 3089 1875 PR66 NGC.** Proof twenty cent pieces are seemingly underappreciated as a collectible set, even though only four issues are needed and all are relatively available overall. The present coin is a visually exceptional representative of the 1875 issue, with fully struck, frosty devices and deeply reflective fields. Intermingled shades of olive-gray, lavender-gold, and aquamarine toning preclude a Cameo designation from NGC, but make up for it by contributing a lovely visual display. Census: 18 in 66, 1 finer (12/14). NGC ID# 27GZ, PCGS# 5303

1877 Twenty Cent, PR65 Cameo  
Proof-Only Mintage of 510 Pieces

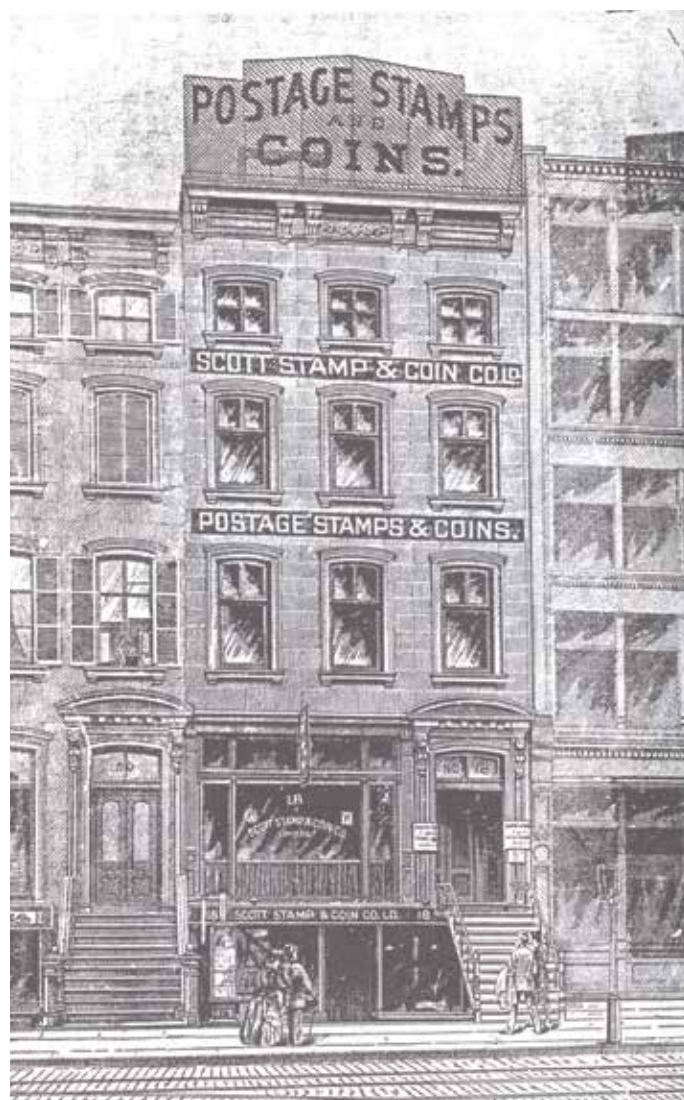

- 3090 1877 PR65 Cameo PCGS. CAC.** With a mintage of only 510 pieces, the 1877 proof-only issue instantly qualifies as a key date in the short-lived twenty cent series. This is a deeply reflective proof whose devices show a thick overlay of mint frost, producing the desirable cameo effect on each side. Much original brilliance remains despite hints of golden-tan patina overall. With the cameo contrast, this is one of the more attractive 1877 twenty cent pieces we have recently seen, regardless of technical grade. Population: 10 in 65 Cameo, 3 finer (12/14).  
Ex: *Central States Signature* (Heritage, 5/2004), lot 6889. PCGS# 85305

## EARLY QUARTER

1796 Draped Bust Quarter, Good 4  
One-Year Type Coin, Popular B-2 Variety

- 3091 1796 Good 4 NGC. B-2, R.3.** A well-worn but still-attractive example of this first-year key Draped Bust quarter, with the high 6 in the date that identifies the popular B-2 variety. On the obverse, the rim is only worn smooth from 2-4 o'clock, and the date and legend remain bold, with the bust and stars intact in outline. The rim is worn smooth on the reverse, but only a few of the letters in the legend are not legible. NGC ID# 23RA, PCGS# 5310

## BUST QUARTERS

1825/4/2 Quarter, B-2, MS66  
Tied for Finest at NGC

**3092 1825/4/2 B-2, R.2, MS66 NGC.** In the past, the overdate varieties of the 1825 quarter have been the subject of much debate in regards to exactly what the underlying numerals were; B-1 was generally labeled an 1825/2, while B-2 and B-3 have been viewed as 1825/3, 1825/4, and more recently 1825/4/(2). A recent study of die states and emissions sequences, however, outlined in-depth by Steve Tompkins in his *Early United States Quarters 1796 - 1838* (2008), suggests rather convincingly that all three 1825 varieties were struck with just two different obverses, both of which are in fact 1825/4/2 overdates.

The first was used only for the B-1 marriage, while the second was used for B-2, then lapped, and reemployed for B-3. The story of how this remarkable scenario came to be is not set in stone, but a careful study of the available data suggests that both dies were prepared in 1822, but were unneeded for production, so they were shelved. In 1824, they were among three dies that were overdated for new coinage (likely by the hand of Christian Gobrecht), but were again not employed for production. Then, in 1825, they were overdated once more (this time by William Kneass) and finally used for coinage. This likely chain of events is substantiated by noticeable recutting on the 8 in the date of both obverses, a characteristic shared by the 1824/2 obverse that was used in that year and overdated by Christian Gobrecht.

Of the three 1825 overdate varieties, B-2 is the most frequently seen, but its availability in Mint State is nearly nil. NGC has certified and attributed only 26 examples in all levels of Uncirculated, with just two pieces in MS66 and none numerically finer (12/14). This example is lightly toned lavender-gray, with glowing underlying luster and notable preservation. The stars show complete radial lines and the central devices are sharply impressed, as well. This is an early die state piece, with the upper curve of the underlying 2 clearly evident to the right and left of the primary 5, and the horizontal crossbar of the 4 faintly visible within the lower loop of the same. An important condition rarity and an intriguing variety for the Capped Bust quarter specialist. PCGS# 38975 Base PCGS# 5336

---

1828 Quarter, B-1, Lightly Toned MS63

- 3093** 1828 B-1, R.1, MS63 NGC. The Mint struck 102,000 quarters in 1828, the final year of production for the old large size Capped Bust type. Of the four die varieties known for the issue, B-1 is the most available, ideal for type representation. This is an attractively problem-free Select example, with smooth, satiny surfaces and well-struck design elements. Pale golden-gray toning covers much of both sides, yielding to areas of aquamarine and lavender-gray in the margins. PCGS# 38976 Base PCGS# 5342

---

1835 B-2 Quarter, MS64  
Old Green Label Holder

- 3094** 1835 B-2, R.2, MS64 PCGS. A fairly available variety, ideal for type or date representation. This Choice example is sharply struck on the stars and central devices, with frosty luster shining through a veil of light golden toning. A lack of noticeable abrasions warrants the near-Gem grade, and the eye appeal is proportionately high. Housed in an old green label holder. PCGS# 38998 Base PCGS# 5354

---

SEATED QUARTERS

---

1848 Quarter, MS64  
A Census Coin

- 3095** 1848 MS64 PCGS. CAC. An impressive near-Gem with intact luster beneath rich patina that offers aquamarine, cyan, cornflower-blue, and indigo shades at the margins and peach-to-orange interior hues when turned at the proper angle to the light. Excellent definition is this coin's crowning detail. Population: 1 in 64, 1 finer (12/14). NGC ID# 23SZ, PCGS# 5412

---

1859 Seated Quarter  
A No Motto Gem

- 3096** 1859 MS65 NGC. A luminous example of one of the few No Motto quarter issues to be available in Gem condition, albeit as a rarity. Well-defined all-around, even on those stars typically found weak, this piece has only a few old marks laid over with charming silver-blue, slate, and rose-gray patina. Census: 9 in 65, 1 finer (12/14). NGC ID# 23TL, PCGS# 5448

---

1859-S Quarter, XF45  
Distinguished S-Mint Rarity

- 3097** 1859-S XF45 PCGS. Briggs 1-A. The 1859-S, with a limited mintage of 80,000 coins, is scarce in all grades and rare in the XF to AU range. No Mint State examples are known to the certification services. This Choice XF example displays dusky aquamarine toning around the margins, with light golden centers. Wear is minimal and the coin is quite appealing for the grade. It may be a long time before a similar piece is again offered at auction. Population: 8 in 45, 6 finer (12/14). NGC ID# 23TN, PCGS# 5450

**1860-S Quarter, XF45**  
Only One Numerically Finer at PCGS

- 3098 1860-S XF45 PCGS. Briggs 1-A.** Struck on the eve of the Civil War in San Francisco, the 1860-S quarter saw a meager mintage of 56,000 pieces, although likely for reasons unrelated to that distant conflict. This frosty Choice XF example shows some scattered abrasions consistent with moderate circulation, but a long, lateral scrape from Liberty's knee is the only singular mark. Wear and strike weakness combine to soften the central details. Only two Mint State coins are reported on the certified population reports, including an MS61 NGC piece which sold as lot 2240 in the Jim Gray North Carolina Collection in July 2004 for \$48,300, and a recently encapsulated MS61 PCGS coin — it is possible that these two submissions represent the same coin. Population: 2 in 45, 1 finer (12/14). NGC ID# 23TS, PCGS# 5453

**1875-S Quarter, Premium Gem**  
Carefully Preserved and Colorful

- 3099 1875-S MS66 PCGS.** A colorful San Francisco quarter, one of the few to come out of the California economy of the time in better-than-Gem condition. Dominant colors include peach and various blues with several hues in-between. Minor striking softness at the stars flanking Liberty's head is one of the few perceptible faults. Population: 3 in 66, 0 finer (12/14). NGC ID# 23UZ, PCGS# 5500

**1876 Seated Quarter, MS67**  
None Numerically Finer

- 3100 1876 MS67 PCGS. CAC.** The 1876 has the highest mintage in the Seated quarter series (nearly 18 million pieces). Unsurprisingly, this is one of the most common dates in the series. PCGS alone has graded more than 400 coins in mint condition, most of which are concentrated in MS63 and MS64. Superb Gems such as the present coin are extremely rare and unknown any finer. Electric-blue and violet toning runs over both sides, joined by splashes of russet on the reverse. This sharply struck, impeccably preserved coin possesses the CAC sticker, attesting to its above-average eye appeal. Population: 8 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 23V2, PCGS# 5501

**1889 Seated Liberty Quarter, MS67+**  
Rare Low-Mintage Issue

- 3101 1889 MS67+ PCGS.** Both sides of this frosty Superb Gem display brilliant luster beneath lovely gold, violet, turquoise, and blue toning. The strike is bold with full head, star, claw and feather details. The 1889 had a mintage of just 12,000 business strikes as the Philadelphia Mint and its branches continued to concentrate on the production of silver dollars and double eagles. Population: 31 in 67 (4 in 67+), 2 finer (12/14). NGC ID# 23VM, PCGS# 5522

## PROOF SEATED QUARTERS

### 1848 Seated Quarter, PR65 Extremely Rare in Proof Format One of Only Six Examples Known

**3102 1848 PR65 NGC. Briggs-Unlisted.** The 1848 proof Seated quarter is an incredibly rare issue. Survival estimates range from five or six coins (Akers) to six or eight pieces (PCGS), and our analysis of auction records and other appearances confirms the existence of only six pieces in all grades, two of which are unattainably housed in the Smithsonian Institution and the ANS. The four coins held in private hands consist of the Pittman and Eliasberg specimens, Eugene Gardner's first example which was last seen at auction in Stack's 1965 sale of the Stadiem-Gardner Collection, and the present piece. NGC and PCGS combined report having certified six examples, including a PR62 coin, two Gems, and a PR66 example at PCGS, and two Gems at NGC (12/14). These numbers likely include one or more resubmissions.

This piece is fully struck, with mirrored fields and satiny devices. Deep gunmetal-blue, lilac-gold, and violet toning encompasses both sides, while the surfaces are well-preserved and the eye appeal is simply magnificent. Obverse die unlisted in Briggs — the shield point is above the far left edge of the 8 and the 1 is just left of centered over a denticle. A rare and important opportunity for the advanced Seated quarter or early proof collector.

#### Roster of 1848 Proof Seated Liberty Quarters

1. **PR66 PCGS.** Howard Rounds Newcomb; Newcomb Collection, Part II (Morgenthau, 5/1945), lot 833; John Jay Pittman; Pittman Collection, Part II (David Akers, 5/1998), lot 1314; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98395.
2. **PR66 NGC.** Louis E. Eliasberg, Sr.; Eliasberg Collection, Part II (Bowers and Merena, 4/1997), lot 1443; Phil Kaufman Collection/Baltimore ANA Signature (Heritage, 7/2008), lot 1818, realized \$63,250; Chicago Signature (Heritage, 8/2013), lot 5590, realized \$55,812.50.
3. **PR65 NGC.** Possibly Wayte Raymond; Sale 33 (New Netherlands, 4/1951), lot 484; Sale 41 (New Netherlands, 9/1953), lot 734; Kagin; ANA Signature (Heritage, 8/1996), lot 7100. **The present coin.**
4. **Brilliant Proof.** Hillyer Ryder; Wayte Raymond; Sale 49 (New Netherlands, 6/1957), lot 1154; Eugene Gardner; Stadiem-Gardner Collection (Stack's, 2/1965), lot 1642.
5. **Proof.** National Numismatic Collection, Smithsonian Institution.
6. **Proof.** R.C.H. Brock; J.P. Morgan; American Numismatic Society.

#### Additional Appearances

- A. John F. McCoy Sale (W. Elliot Woodward, 5/1864), lot 375, part of a complete silver proof set, sold to Levick for \$50; Fifth Semi-Annual Sale (Woodward, 10/1864), lot 302, sold to Hodge for \$50.
- B. **Proof.** Joseph J. Mickley Collection (Woodward, 10/1867), lot 1718, part of a five-piece silver proof set, sold to Lilliendahl for \$57.50.
- C. **Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1191, the other coins forming a complete silver and minor proof set were offered singly in adjacent lots, sold to H.P. Smith for \$6.50.
- D. **Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 840, part of a seven-piece silver and minor proof set.
- E. **Proof.** Richard B. Winsor (S.H. & H. Chapman, 12/1895), lot 1069, part of a seven-piece silver and minor proof set.
- F. **Proof.** Matthew Stickney Collection (Henry Chapman, 6/1907), lot 1792, part of a seven-piece silver and minor proof set.
- G. **Proof.** George Earle Collection (Henry Chapman, 6/1912), lot 3093.
- H. **Proof.** A specimen owned by A-Mark in the 1970s, per Walter Breen. PCGS# 5542

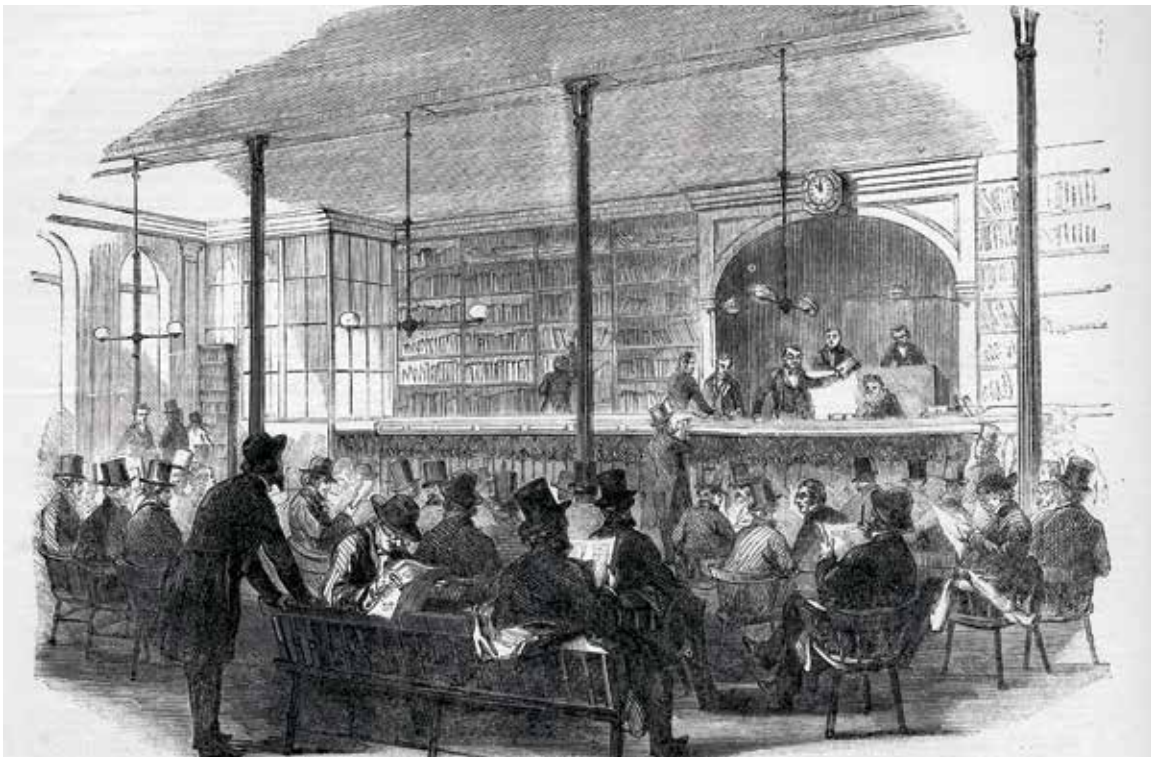

1857 Seated Quarter, PR66  
Tied for Finest Certified

**3103 1857 PR66 NGC.** The exact number of proof quarters struck in 1857 is not known, as the Mint did not begin recording proof mintage data until the following year, but it was undoubtedly small. Survival estimates vary greatly, ranging from just 15 (Briggs, 1991) to as many as 100 (PCGS). The actual number is likely near the middle, as the two leading services show a combined population of 72 coins, including an unknown number of resubmissions.

This Premium Gem example, formerly in the Phil Kaufman Collection, is one of the three finest examples graded by NGC and PCGS combined (12/14). A medley of low-intensity cobalt-blue, golden-tan, orange, and yellow-green patination adorns the obverse, while deeper hues of the same palette adhere to the reverse. The sharp proof strike has created full detail throughout both sides. The preservation is flawless, engendering elegant eye appeal. A coin of high quality and rarity.

*Ex: Phil Kaufman Collection / Baltimore ANA Signature (Heritage, 7/2008), lot 1828. NGC ID# 23WJ, PCGS# 5553*

---

1858 Seated Liberty Quarter, PR67  
Early Silver Proof Rarity  
Ex: Eliasberg-Kaufman

**3104 1858 PR67 NGC. Briggs 5-E.** This Superb Gem proof ranks high in the lineup of proof 1858 quarters, probably the finest known, and is the single finest NGC-certified specimen of its issue (12/14).

The original mintage of 1858 proof silver coins is open to question. The long-estimated number struck is 80 pieces. However, this mintage figure did not originate with Mint records, but apparently with one of the Chapman brothers. Later estimates of the 1858 silver proofs rose to between 225 and 300 coins, based largely on David Bowers' research on the 1858 proof dollar for *Silver Dollars and Trade Dollars of the United States*. The 300-piece figure was extrapolated to the other 1858 silver proof denominations and found its way into the current *Guide Book*. Based on the certified population, it would appear their mintage was between 80 and 200 and some specimens. In any event, 1858 proof quarters are rare in the Gem and finer levels of preservation.

The base of the 1 is lightly doubled, and the final 8 appears to lean slightly to the right, and is low. Faint die lines connect the D and S and others connect the S and O. Both dies are otherwise well made with few diagnostic features. Larry Briggs assigned proofs the variety number 5-E in *Liberty Seated Quarters*, although the present coin lacks the "Small die crack from second arrowhead, through third arrowhead, facing into field over 'O' of 'DOL'."

The obverse has a few minor lint marks, similar to most proof quarters of the date. The fields are deep mirrors beneath pale champagne toning with intense peripheral gold, lilac, and blue near the borders, especially on the obverse. The central devices are dominated by champagne-gold. Both sides yield modest field-motif contrast when the coin is tilted ever so slightly beneath a light. A sharp strike is indicated by full design features and a high wire rim with bold dentilation over each side.

Ex: Louis E. Eliasberg, Sr. (*Bowers and Merena*, 4/1997), lot 1468; *The Phil Kaufman Collection of Early Proof Sets, Part One* (Heritage, 8/2007), lot 1800; *The Scott Rudolph Collection* (Heritage, 1/2009), lot 3770. NGC ID# 23WK, PCGS# 5554

---

1861 Quarter, Beautifully Toned PR66

- 3105 1861 PR66 NGC. Briggs 7-E. Type Two Obverse and Reverse.** A boldly struck Premium Gem proof, this piece exhibits a beautiful pattern of patination over both clean sides. Shades of sunshine-yellow, mauve, orange, and green-blue pleasantly combine on the surfaces, and the reflectivity of the mirrors is undeniable even through the rich veil of color. PCGS and NGC combined have only graded two examples numerically finer (12/14).  
*Ex: FUN Signature (Heritage, 1/2008), lot 1147, which realized \$8,050. NGC ID# 23WN, PCGS# 5557*

---

1865 Quarter, PR65 Deep Cameo  
Seldom Seen With Such Contrast

- 3106 1865 PR65 Deep Cameo PCGS.** This lightly toned Gem proof quarter shows a sharp strike throughout both sides on surfaces that are largely free of post-Mint distractions. Some tiny raised lumps, most noticeable on the upper half of Liberty, appear to be die rust, as made, and a couple of small, curving strikethroughs were similarly as made at the Mint. Generous field-device contrast and good eye appeal prevail over all. Few Gem proof survivors of this issue show such deep cameo contrast. Population: 3 in 65 Deep Cameo, 4 finer (12/14). PCGS# 95561

---

1866 Seated Quarter, PR67 Ultra Cameo  
Single Finest Certified

- 3107 1866 PR67 Ultra Cameo NGC.** The first year of the With Motto design had a limited mintage of only 16,025 business strike quarters from one die pair and 725 proofs from a second die pair. The obverse of all proofs shows a prominent diagonal die scratch through the upright of the R in LIBERTY, extending upward to join vertical line 8 and downward to join vertical line 9. That die scratch is mentioned as an attribution aid to distinguish between proofs and prooflike business strikes.

A Superb Gem Ultra Cameo proof, this 1866 Seated quarter has amazing contrast with brilliant and sharply defined satin devices and deeply mirrored fields. There is no evidence of toning on either side. This piece is destined for a top quality collection, being the single finest certified Ultra or Deep Cameo proof. Census: 1 in 67 Ultra Cameo, 0 finer (12/14). PCGS# 95565

---

**1868 Quarter, PR65 Deep Cameo**  
Sole Deep Cameo Certified

- 3108 1868 PR65 Deep Cameo PCGS. CAC.** The 1868 quarter saw a mintage of 600 proofs, a fair number of which have survived to the present day, but field-motif contrast is lacking on most known examples. Cameos are rare in any grade, and this Gem ranks as the only Deep Cameo example certified at PCGS; NGC has not awarded any pieces an Ultra Cameo grade, making this coin, from a certain point of view, the single finest 1868 proof quarter certified (12/14). The essentially untoned surfaces exhibit an exquisite strike and stunning white-on-black contrast. Both sides are nicely preserved. Ex: Dallas Signature (Heritage, 10/2009), lot 532. PCGS# 95567

**1886 Seated Liberty Quarter, PR67**  
None Numerically Finer at PCGS

- 3109 1886 PR67 PCGS. CAC.** Only 886 proof Seated Liberty quarters were struck in 1886, and the date is extremely elusive in business-strike format as well because of its meager 5,000-coin mintage. This magnificent Superb Gem exhibits well-detailed design elements and deeply mirrored fields, under attractive shades of cerulean-blue and champagne-gold toning. Population: 9 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 23XJ, PCGS# 5587

**1888 Seated Liberty Quarter, PR67+**  
Only Four Finer Coins at NGC

- 3110 1888 PR67+ NGC.** From a proof mintage of 832 pieces, this high-end Superb Gem Seated Liberty quarter displays well-detailed design elements and deeply mirrored fields under vivid shades of apple-green and cerulean-blue toning. Eye appeal is outstanding. Census: 9 in 67 (1 in 67+, 1 in 67 ★), 4 finer (12/14). NGC ID# 23XL, PCGS# 5589

**PROOF BARBER QUARTERS**

**1901 Barber Quarter, PR68**  
None Numerically Finer at NGC

- 3111 1901 PR68 NGC.** Only 813 proof Barber quarters were struck in 1901 and few survivors can match the exceptional quality and eye appeal of the present coin. This spectacular PR68 example exhibits sharp definition on all design elements and virtually pristine mirrored fields that show subtle hints of blue and gold toning. Census: 7 in 68 (2 in 68 ★), 0 finer (12/14). NGC ID# 242G, PCGS# 5687

**1904 Barber Quarter, PR67 ★**  
Only 670 Examples Struck

- 3112 1904 PR67 ★ NGC. CAC.** This high-end Superb Gem possesses undeniably refreshing visual appeal, affirmed by both NGC and CAC. As if struck only yesterday, the surfaces remain entirely untuned and unmarked, with impressive reflectivity and razor-sharp definition. It is difficult to fathom NGC having certified 6 numerically finer examples (7/14). NGC ID# 242K, PCGS# 5690

## STANDING LIBERTY QUARTERS

### 1916 Standing Liberty Quarter, MS63 Lovely Eye Appeal and Luster

- 3113 1916 MS63 NGC.** Finding a 1916 Standing Liberty quarter with attractive luster and surfaces can be just as difficult as finding an example with notably strong head detail. Many pieces have been cleaned or dipped, and the with such poor mint luster to begin with, the result is somewhat less than impressive on most examples. The current offering, however, is a simply lovely coin, with soft, original luster that provides a glowing backlight to the delicate lilac-gold toning that graces each side. Liberty's head is just shy of full, but the remainder of the design is unusually well-defined for the issue, with particular notice given to Liberty's knee and the leading edge of the eagle's left (facing) wing. Surface abrasions are only minor and the overall quality is high-end for the grade. An attractive piece that will satisfy even the most discerning specialist. NGC ID# 242Y, PCGS# 5704

### 1916 Standing Liberty Quarter, MS64 Strong Central Detail

- 3114 1916 MS64 PCGS.** The 1916 Standing Liberty quarter dies were made from a different hub than that used for the 1917 dies, and lack the sharpened details later requested by the Director of the Mint. As a result, all 1916-dated examples exhibit moderate softness, particularly on the obverse, and sharply struck pieces are virtually non-existent.

This near-Gem displays unusually strong central gown folds and nearly full head detail. Satiny luster emanates from beneath pale lavender and ice-blue hues on each side, with light, dappled russet toning seen across the obverse. This is a pleasing example of this first-year issue. NGC ID# 242Y, PCGS# 5704

1916 Quarter, Well-Struck MS64+  
A Key to the Series

- 3115 1916 MS64+ NGC.** The fully lustrous surfaces of this key-date representative display freckles of golden-gray patina over both sides. The design elements are well-struck, including the gown lines, rivets, horizontal shield lines, and the feathers on the eagle's torso. While Liberty's head is not quite full, it still exhibits relatively strong detail. In this regard it should be noted that only three percent or less of the 1916 issue are struck with Full Heads (Cline, 2007). Remarkably well preserved for the designated grade. Census: 63 in 64 (2 in 64+, 1 in 64 ★, 1 in 64+★), 32 finer (12/14). NGC ID# 242Y, PCGS# 5704

1916 Quarter, Lightly Toned AU58 Full Head

- 3116 1916 AU58 Full Head PCGS.** Hues of delicate yellowish-green and grayish-violet patination compete for territory on this near-Mint State key-date quarter that retains considerable mint luster. A cluster of deep reddish-gold freckles congregate in the lower reverse border. In addition to Liberty's Full Head detail, the rivets and the eagle's plumage are relatively strong. The surfaces on both sides are remarkably clean. A few trivial marks in the field below E PLURIBUS UNUM are only visible under magnification. This coin will be a wonderful fit to a high-grade Standing Liberty collection. NGC ID# 242Y, PCGS# 5705

## WASHINGTON QUARTER

1962-D Quarter, Delicately Toned MS67  
None Certified Numerically Finer

- 3117** 1962-D MS67 PCGS. A beautifully toned Registry coin, this Superb Gem is among the finest-certified 1962-D quarters at both leading services. Both sides show blended lavender and ice-blue toning over much of the central and right-hand areas, with a crescent of olive and sun-gold color along the left-hand border. Sharply struck, with carefully preserved surfaces. Population: 9 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 246R, PCGS# 5873

## EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VG8  
Lovely Collector Coin

- 3118** 1794 O-101a, R.4, VG8 NGC. A die crack through the F in OF confirms the later die state variety of O-101. This is a scarce variety, but one of the more readily obtainable overall for the 1794 half dollar. As suggested by the grade, this example is well-circulated, but is remarkably appealing and suitable as an attractive collector-grade example of this first half dollar issue. A pleasing circulation cameo, this piece displays original gunmetal-gray toning in the recesses and lighter hues of the same over the relief elements. The obverse rim grows weak below the date, as usual, though the denticles are otherwise strong on both sides. The eagle is worn but fully outlined. No adjustment marks are present. PCGS# 39201 Base PCGS# 6051

1806 Half Dollar, AU55+  
O-111a, 6 Over Inverted 6  
Rarely Seen This High-Grade

- 3119** 1806 6 Over Inverted 6, O-111a, R.4, AU55+ NGC. An intriguing *Guide Book* variety; the 6 in the date was entered into the die upside down and then corrected, giving the appearance of an 1806/9 overdate. The underdigit is plain to the unaided eye. This variety is scarce in all grades, but becomes genuinely rare in XF and better condition, and is almost unobtainable in Mint State. This Plus-designated Choice AU piece is a late die state example, with a radial crack through the 8 in the date on the obverse and a large rim cud over the TED in UNITED on the reverse. Noticeable luster remains in the recesses, and the only trace of toning is seen in a thin glaze of light champagne color that accents each side. This is the only O-111a example certified and attributed by NGC in AU, with just one numerically finer (12/14); a few other similarly graded pieces may exist but are not currently attributed for variety and die state. PCGS# 39337 Base PCGS# 6078

1806 Half Dollar, MS62  
O-120, Pointed 6

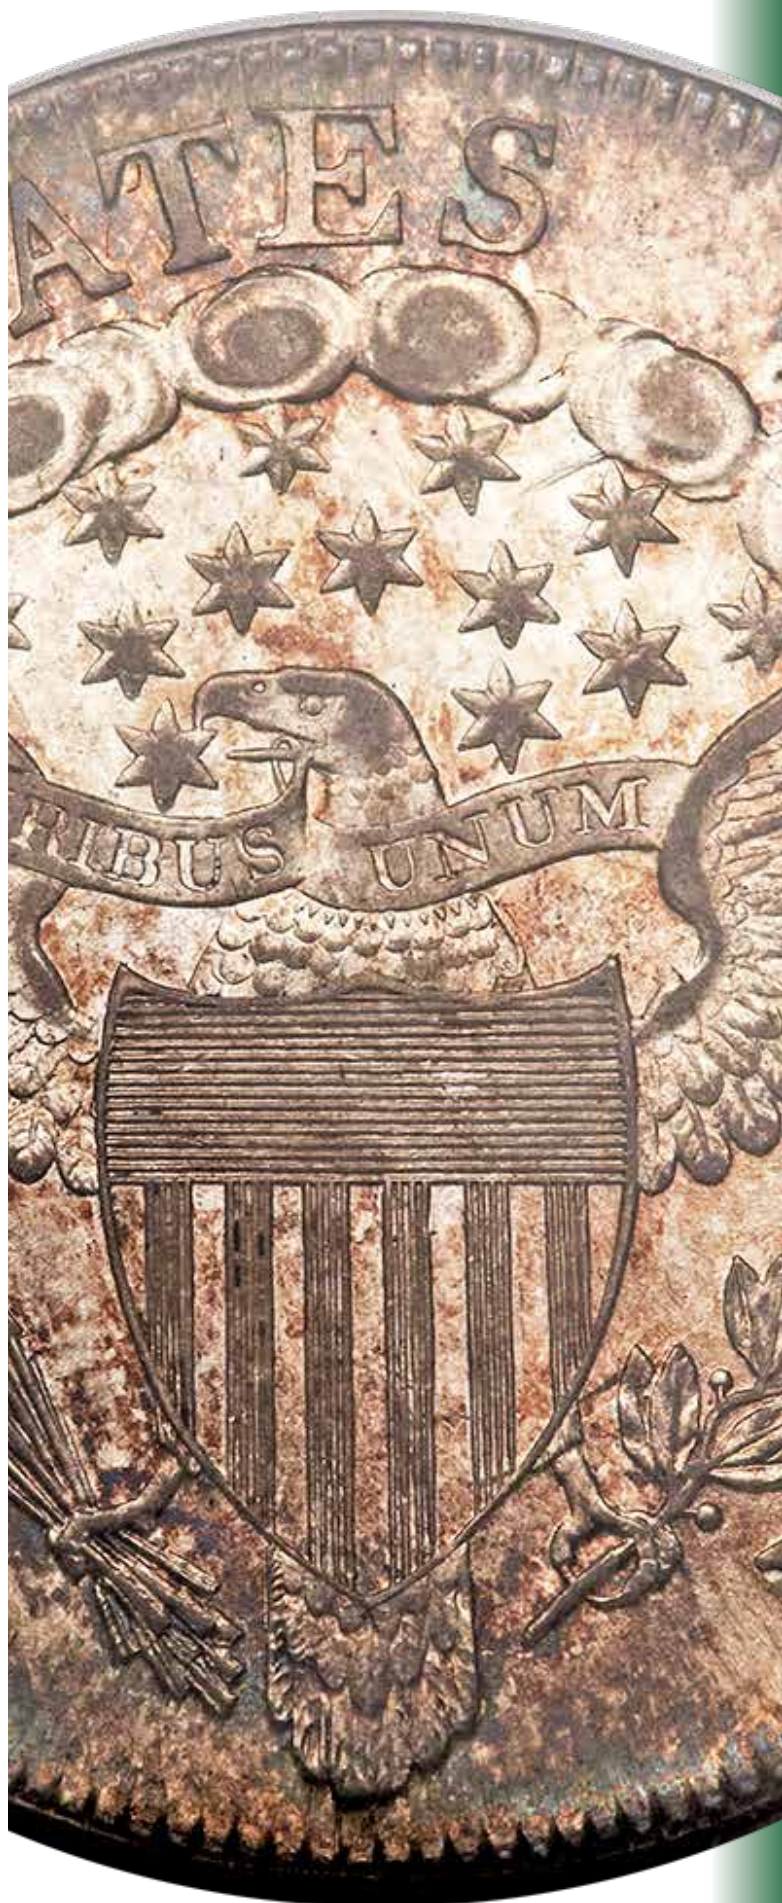

- 3120** 1806 Pointed 6, Stem, O-120, R.3, MS62 PCGS. An early die state example, before the cud develops in the middle of the reverse shield. This is a fairly scarce variety, with few examples known in Mint State. The present coin is better-struck than most, both in the centers and around the margins, with satiny luster shining through warm lavender-gold toning on each side. No obtrusive abrasions are present, although an array of minor clash marks is noted on the obverse. PCGS# 39325 Base PCGS# 6071

1807 Draped Bust Half, AU55  
O-102, Ideal Collector Grade

- 3121** 1807 Draped Bust, O-102, R.2, AU55 PCGS. This well-detailed Draped Bust half resides in the sweet spot of the grading curve, offering near Uncirculated quality at a fraction of the price of a slightly better example. Pleasing toning enhances the appeal, with gray centers leading to a halo of russet and blue-green at the rims. The two stars closely framing LIBERTY, along with the close placement of star 13 at Liberty's bust, identify the obverse. The O-102 and O-103 varieties both use this obverse, and the reverse leaf pointing to the right base of I in AMERICA serves to identify this O-102 example. PCGS# 39339 Base PCGS# 6079

---

1807 Draped Bust Half Dollar, MS66  
O-110, Unsurpassed Quality

**3122 1807 Draped Bust, O-110, R.2, MS66 NGC.** This is the first auction appearance of an 1807 half dollar graded MS66. Even at the MS65 level, appearances have occurred only about once every two years since 2002. NGC has certified but a single example in MS66 (the present coin), while PCGS reports only a single coin graded MS66 (12/14). Draped Bust halves, as a type, are elusive in MS66, with NGC having graded only six pieces total, two of the Small Eagle type (1796-1797) and four of the Large Eagle type (1801-1807).

The obverse die of the O-110 variety is identified by the centering dot below Liberty's ear, while the reverse die has an incomplete F in OF, with the right base missing. The centering dot is the most distinctive characteristic of the O-110 and is also seen on the 1807 Browning-1 quarter dollar obverse. This dot is thought to have been used by the engraver as a compass point, in order to arrange the peripheral devices in a circular orientation. Centering marks reappear on various denominations in the 1840s, but, as the stars and letters were already present on the working hubs, this usage is less clear. Craig Sholley, writing in the *Gobrecht Journal* in November 1998, cited Franklin Peale's 1835 report on the European mints, which suggests that the dot was used to help fix the location of the central punch during die preparation. In most cases, the dot was polished out, but this was not always done, to the delight of modern day variety specialists.

Early U.S. type coins in the highest grades convey a special appeal. Die production was not completely mechanized, although extensive use of punches relieved the engravers to some extent. Still, each die carries specific markers, and the rarity of certain varieties tells us that delivery of robust dies was a constant problem in the early Mint. Combined with the paucity of collectors at the time, the survival of a Premium Gem such as the present coin is a pleasant surprise.

This Draped Bust half displays light toning with copper and auburn shades seen especially in the protected areas. Coin gray predominates on the highest points, while iridescent rims admit varied hues of russet, orange, violet, and olive. The lower portion of the portrait exhibits circular die polish. Outstanding luster completes the package, a charming and important early U.S. half dollar. PCGS# 39351 Base PCGS# 6079

## BUST HALF DOLLARS

1813 Half Dollar, MS64  
O-101, 50 C Over UNI

- 3123** 1813 50 C Over UNI, O-101, R.2, MS64 PCGS. O-101 is arguably the most intriguing 1813 half dollar variety, showing the clear remnants of an errant UNI beneath 50 C. on the reverse. The engraver apparently began entering UNITED far to low on the periphery, and then attempted to correct the error. This variety is seldom seen in Mint State, and the present Choice example is among the finer-known representatives. The design elements are boldly struck throughout each side, and frosty luster illuminates pale hues of gold and lilac. No significant abrasions are present and the eye appeal is excellent for the grade and variety. PCGS has attributed only 10 examples in MS64, with one Gem numerically finer (12/14). PCGS# 39473 Base PCGS# 6104

1815/2 Half Dollar, O-101a, AU50  
Sole Die Pair of the Year

- 3124** 1815/2 O-101a, R.3, AU50 PCGS. This is the only die pair known for the 1815 half dollar, showing the remnants of an underlying 2 beneath the primary 5 in the date. The current coin is from a late die state, with a heavy peripheral crack extending from the E in AMERICA, through the arrowheads and 50 C., to the rim below the olive leaves. Sky-blue and olive-gold hues highlight dusky lavender-gray patina on each side. The strike is sharp and only light wear is evident over the high points of the design. Clash marks are prominent on the reverse. PCGS# 39492 Base PCGS# 6108

**1820 Capped Bust Half, MS64  
O-102, Curl Base 2 Variety**

- 3125 1820/19 Curl Base 2, O-102, R.1, MS64 PCGS. CAC.** Although not a rare die marriage in the Capped Bust half dollar series, this is a distinct variety which merits its own listing in the *Guide Book*. The O-102 variety is readily identifiable, featuring a bold overdate and the Curl Base 2 in the date. Bust coinage of the 1820s employed both Curl Base and Square Base 2s, most famously on the rare 1827 quarter, which was struck with both styles. This CAC-approved example is beautifully toned, with light, gray color predominating. Blue, green, and yellow shades underlay the medium toning on both obverse and reverse. Colorful bands at the rims surround the central figures, particularly on the reverse. For the variety, PCGS has graded one coin at MS64, one at MS64+, and one at MS65 (12/14). PCGS# 39574 Base PCGS# 6126

**1824 Capped Bust Half Dollar, MS65  
Popular "Dropped Worm" Variety, O-113**

- 3126 1824 MS65 PCGS. O-113, R.1.** More than 3.5 million Capped Bust half dollars were minted in 1824, with 17 varieties known for the date. This coin represents the popular O-113 variety, easily recognized by the small die break above the eagle's left (facing) shoulder. The design elements of this delightful Gem are sharply detailed, aside from a touch of flatness on stars 6 and 7. The well-preserved surfaces are brightly lustrous, under delicate shades of champagne-gold toning. Population: 11 in 65, 6 finer (12/14). NGC ID# 24FK, PCGS# 6137 Base PCGS# 6137

**1824 Half Dollar, O-108a, MS64  
Lustrous and Naturally Toned**

- 3127 1824 O-108a, R.2, MS64 NGC.** Ex: "Col." E.H.R. Green. A lovely coin from the Newman Collection that served time in an album. Peach-gold, cherry-red, and apple-green endow the obverse of this lustrous piece with exceptional eye appeal. The brilliant reverse is basically untuned with frosty luster. Liberty's profile is lightly doubled, a feature often seen in the half dollars of 1823 and 1824. Ex: "Colonel" E.H.R. Green; *Green Estate*; *Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.*; *Eric P. Newman @ \$3.00*; *Eric P. Newman Numismatic Education Society*. PCGS# 39630 Base PCGS# 6137

**1824/4 Half Dollar, O-109, MS63**  
**Distinguished *Guide Book* Variety**

- 3128** 1824/4 O-109, R.2, MS63 PCGS. CAC. This variety is sometimes mistaken for one of the 1824/1 die pairings, but the raised line to the left of the diagonal of the 4 is distinct on this piece, indicating the recut digit and not the overdate. This is one of two die pairings that comprise this *Guide Book* variety, both of which are similar in rarity. The piece is an attractive Mint State coin, showing satiny luster and moderately sharp devices — only star 13 exhibits noticeable weakness. The surfaces are primarily golden-gray, although appealing areas of mint-green and aquamarine are also observed along the borders. PCGS# 39643 Base PCGS# 6140

**1825 O-105 Half Dollar, MS65**  
**Likely Tied Atop the Condition Census**  
**Ex: Kennywood Coin**

- 3129** 1825 O-105, R.2, MS65 PCGS. A notable conditional rarity at this level. The proximity of stars 8 and 13 to the rear of the cap and front of the bust make this an easy obverse to attribute. The connections of ITE at the top and ED at the bottom on the reverse are also easy markers. This Gem is toned with a layer of even yellow-gold on the obverse; the reverse is similarly toned with some darker streaks. Traces of darker blue appear on the dentils. The strike is sharp on the upper obverse, but a couple of the lower obverse stars are not fully brought up at their centers. The reverse shows weakness on the scroll in the area opposing Liberty's bust. The surfaces are clean overall. This piece is a scarce issue in Gem condition, and likely tied for the top spot in the Condition Census. This piece, the ANR ex: Kennywood Collection coin, is a reappearance of this example at Heritage from nearly 10 years ago, and the intervening years have seen no other Gem offerings of this seemingly common variety.  
*Ex: Kennywood Collection (American Numismatic Rarities, 1/2005), lot 515; Long Beach Signature (Heritage, 9/2005), lot 3181. PCGS# 39651 Base PCGS# 6142*

**1831 O-109 Half Dollar, Untoned MS65**  
**Sumptuous Mint Frost**

- 3130** 1831 O-109, R.1, MS65 NGC. The obverse of this die pairing is identified via a small tine of metal projecting upward from the right edge of the R in LIBERTY, and one of her hair curls pierces the headband as well. The reverse shows two lines of vertical stripe 1 joined at the bottom and crowded together at the top. This is a sumptuous, frosty Gem with excellent luster on untoned surfaces, showing no mentionable problems. Some strike softness appears on the eagle's claws, the branch, and bottom feathers, and on part of the motto. The O-109 is an available variety but this piece is possibly only slightly outside the Condition Census. PCGS# 39845 Base PCGS# 6159

**1833 Half Dollar, O-102, MS65+**  
**High-End Type Representative**

- 3131** 1833 O-102, R.1, MS65+ NGC. CAC. Star 1 is recut on this available variety. This piece is in an early die state with the die line visible from the rim to the 0 in 50C. Frosty luster resides beneath a thin blanket of light golden toning, and the surfaces are remarkably clean. The strike is pleasing and the eye appeal is fully deserving of the Plus designation. As a date, the 1833 half dollar is conditionally scarce at the Gem level, and finer pieces are genuinely rare. Census: 28 in 65 (1 in 65 ★, 1 in 65+), 8 finer (12/14). PCGS# 39888 Base PCGS# 6163

## REEDED EDGE HALF DOLLARS

### 1836 Reeded Edge Half, GR-1, MS63 Rare This Well-Preserved

- 3132 1836 Reeded Edge, GR-1, R.2, MS63 NGC.** The Reeded Edge Capped Bust halves were struck from 1836 through 1839, but the 50 CENTS reverse was only employed on this type in 1836 and 1837. Of these two issues, the 1836 is the scarcer, and is a popular issue due to its unrecorded but decidedly low mintage. Mint State survivors are scarce in all grades, and decidedly rare in MS63 or better condition. This Select example displays deep gunmetal-blue toning with shades of olive-gray and amber-gold also evident in the recesses. Several right-hand stars are weak, but the strike is otherwise pleasing and the surfaces exhibit only minor, grade-consistent abrasions. Census: 6 in 63, 7 finer (12/14). PCGS# 531046 Base PCGS# 6175

### 1839 GR-7 Bust Half, MS64 Two-Year Subtype

- 3133 1839 Large Letters MS64 PCGS. GR-7, R.1.** Die lines on the forehead and from the lower part of the bust identify the Graham variety. Faint gold patina visits lustrous and predominantly smooth surfaces. Well struck except on the first S in STATES and the D in DOL. One spot noted between star 2 and the neck. A conditionally scarce and underappreciated two-year design subtype. Population: 43 in 64, 6 finer (12/14). NGC ID# 24G6, PCGS# 6179

## SEATED HALF DOLLARS

### 1841 Half Dollar, MS64 Only One Numerically Finer at PCGS

- 3134 1841 MS64 PCGS. WB-101.** The 1841 half dollar is rare in all Mint State grades, and pieces grading finer than MS64 are exceedingly so. This Choice example is well-struck, with satiny luster that illuminates shades of lavender-gray, gold, and pale olive-blue hues over each side. Semiprooflike reflectivity is observed in the fields. Population: 6 in 64, 1 finer (12/14). NGC ID# 24GR, PCGS# 6236

**1842 Small Date Half, MS65+  
Sole Finest Certified**

- 3135 1842 Small Date, Rev of 1842 MS65+ PCGS. WB-101.** The 1842 Small Date half dollar is significantly scarcer than its Medium Date counterpart, and is genuinely rare in Mint State. This example is one of only two Gems certified by PCGS and is the only one of the two awarded a Plus designation, with none numerically finer; NGC has seen only one MS65 coin, also with none numerically finer (12/14). Both sides display frosty sun-gold luster, with hints of lilac and pale lavender also present. The strike is bold and the surface preservation is exceptional. The reverse is extensively cracked, as is typical of this variety, with peripheral cracks connecting UNITED STATES OF, and radial cracks extending through the olive leaves and along the left side of the O in DOL. PCGS# 6240 Base PCGS# 6240

**1845-O Half Dollar, MS64  
Warm Toning, Conditionally Rare**

- 3136 1845-O No Drapery MS64 NGC. WB-101, Die Pair 7, R.4.** This is the second use of this obverse die, which is heavily lapped to the point of the drapery being effaced from below Liberty's elbow. As a date, the 1845-O half dollar is rare in Mint State, and is especially challenging in Choice and Gem condition. This example is well-struck, with satiny luster illuminating warm golden-orange and lavender-gray toning on each side. No significant abrasions are present. Census: 10 in 64, 3 finer (12/14). NGC ID# 24H5, PCGS# 6250 Base PCGS# 6250

**1854-O Seated Liberty Half Dollar, MS65  
Popular Arrows Type, WB-101, Die Pair 11**

- 3137 1854-O Arrows MS65 NGC. WB-101, Die Pair 11, R.3.** The 1854-O Arrows Seated Liberty half dollar was produced in large numbers and is a favorite with type collectors because of the short-lived Arrows design. This impressive Gem offers well-detailed design elements with a network of die cracks through the stars on the right that identify Die Pair 11. The well-preserved lustrous surfaces are visited by shades of golden-tan and lavender-gray toning. Census: 12 in 65, 10 finer (12/14). NGC ID# 24JM, PCGS# 6280 Base PCGS# 6280

1863 Half Dollar, Sharp MS67  
Sole Finest at PCGS

**3138 1863 MS67 PCGS. WB-101.** The 1863 Seated half dollar had a limited mintage of barely more than 500,000 pieces, most of which either circulated extensively following the Civil War or were melted for their bullion during the interim. Mint State pieces are scarce in all grades, and become genuinely rare in Gem or finer condition. This remarkable Superb Gem is the sole finest-certified example at PCGS, and is rivaled at NGC by only two numerically equal coins (12/14). The strike is razor-sharp throughout both sides, despite the late die state which exhibits several peripheral die cracks on the reverse. The fields showcase well-balanced mint frost and semiprooflike mirroring, and the surfaces are seemingly uninterrupted by abrasions. Tinges of olive and amber reside in the margins, while the remainder of each side shows pastel shades of champagne and ice-blue toning. NGC ID# 24JB, PCGS# 6309 Base PCGS# 6309

1876-CC WB-42 Half Dollar, AU58  
Currently Unique Discovery Coin

**3139 1876-CC AU58 PCGS. CAC. WB-42, Die Pair 29-G.** Seated Liberty half dollar specialists have an opportunity to vie for a new variety discovery that Mike Clark, a numismatist with Bozarth Numismatics, Inc., submitted to Mr. Bill Bugert for his confirmation. The obverse is identified as a new discovery, obverse 29, and the reverse is a previously known die, reverse G. The combination is now known as WB-42. Scattered die lumps appear on Liberty's head, neck, and torso, with others along the right edge of the shield and in the horizontal crossbars.

There were 36 varieties identified when Bugert's reference, *A Register of Liberty Seated Half Dollar Varieties, Volume II, Carson City Branch Mint*, was published in 2010. Now, early in 2015, the count is 42 varieties, so collectors are clearly examining their coins more carefully than at any time in the past.

Aside from a trace of wear on the high points that defines the grade, this near-Mint example has excellent luster beneath delicate gold and iridescent toning. The surfaces are pleasing and the strike is bold. This is an extremely important opportunity for the advanced collector to acquire a new discovery. NGC ID# 24KH, PCGS# 6353 Base PCGS# 6353

1885 Seated Liberty Half, MS66  
Tied for Finest at NGC

**3140** 1885 MS66 NGC. WB-101. Only 6,130 Seated Liberty half dollars were coined in 1885 at the Philadelphia Mint, and this delightful Premium Gem is among the finest survivors. The design elements are well-detailed and the virtually pristine surfaces are blanketed in shades of champagne-gold and cerulean-blue toning. Vibrant mint luster shines through the patina. Census: 2 in 66, 0 finer (12/14). NGC ID# 24KY, PCGS# 6367 Base PCGS# 6367

## PROOF SEATED HALF DOLLARS

### 1852 Seated Liberty Half, PR65 Only Three Examples Extant Finest Known, Ex: Kaufman

**3141 1852 PR65 NGC. WB-101.** Ex: Kaufman, Gardner. The Kaufman 1852 proof half dollar is the finest of just three or four specimens extant. The actual mintage is unknown, though the Coinfacts online reference estimates six coins were struck. That is probably on the high side. At least one silver proof set is mentioned in the literature, from the Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 1070:

“1852 Proof set. Complete. Dollar, 1/2, 1/4, 1/10, 1/20, 3 c., cent and half cent. The silver yellowed. Cent uncirculated. Half cent, small berries. Probably unique set. 8 pieces.”

Breen enumerates three examples in his proof *Encyclopedia*, corresponding exactly to the number of specimens in the population data, all NGC coins including one PR60, one PR63, and the present Gem. Given the extreme rarity of this issue, collectors of early Seated Liberty proofs will want to give special attention to this delightful specimen. Both sides display pleasing mirrored fields (including the areas between the stripes of both shields) that establish pronounced contrast with the satiny motifs. Whispers of golden-tan, sky-blue, and lavender toning make occasional visits to each side, slightly more so on the obverse, and the design elements exhibit razor-sharp definition throughout. Nicely preserved surfaces reveal just a few faint hairlines in the fields intermingled with die polish lines.

#### Roster of Proof 1852 Proof Half Dollars

- 1. PR65 NGC.** Phil Kaufman Collection / ANA Signature (Heritage, 7-8/2008), lot 1824; FUN Signature (Heritage, 1/2013), lot 5666; **the present coin.**
- 2. PR63 NGC.** Tecumseh Sale (Steve Ivy Numismatic Auctions, 12/1979), lot 700; Auction '84 (Paramount, 7/1984), lot 668; Worrell Collection (Superior Galleries, 9/1993), lot 731; Public Auction Sale (Stack's, 10/1996), lot 303. In 1993, the Superior cataloger noted: “Purchased by Paramount from Robert Batchelder, a Pennsylvania dealer, in 1974 and sold privately in early 1975. It later appeared in Steve Ivy's Tecumseh Sale.” The Superior pedigree chain for this piece also lists, incorrectly, lot 203 in Auction '86, which is an 1852-O brilliant proof half dollar.
- 3. PR63.** Norweb Collection (Bowers and Merena, 11/1988), lot 3157; Jascha Heifetz Collection (Superior, 10/1989), lot 1590; unknown intermediaries; Joseph O'Connor; purchased by Gene Gardner in February 2004 (not the present coin).

#### Additional Appearances

- A. Proof.** Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 1070, part of a complete silver proof set, realized \$115.
- B. Proof.** Howard Rounds Newcomb; Newcomb Collection, Part I (J.C. Morgenthau, 2/1945), lot 746 (per Breen, who says “later untraced unless this is the former W.L. Carson specimen via Lester Merkin.” If Breen is referring to Merkin's February 1971 sale, lot 755, he is mistaken, as that coin is an 1852-O brilliant proof half dollar).
- C. Proof.** Paramount, per Breen (possibly the coin purchased from Batchelder, referred to in number 2 above). PCGS# 6397

1859 Seated Half, PR66 Cameo  
Pleasing Contrast

- 3142 1859 PR66 Cameo NGC. WB-101.** One of the earliest Seated proof half dollar issues made for wide distribution, the 1859 has a mintage of 800 specimens, which were distributed in sets. Many examples with little patina show strong contrast, but few coins combine the Cameo appearance and great preservation of this PR66 Cameo survivor. Faint glints of champagne-gold color visit the gleaming fields, while the sharply struck devices are frost-white. A few tiny planchet flakes are scattered on either side of Liberty, and a mint-made depression is noted to the left of the date. Census: 3 in 66 Cameo (1 in 66 ★ Cameo, 1 in 66+★ Cameo), 1 finer (12/14). Ex: *Central States Signature* (Heritage, 4/2011), lot 5154. PCGS# 86413

1865 Half Dollar, Toned PR65 Cameo

- 3143 1865 PR65 Cameo PCGS. WB-101.** A fully struck Gem Cameo, this 1865 proof half dollar displays deeply reflective fields with rich golden-gray and gunmetal-blue toning that lightens somewhat over the relief elements. Any faint, grade-limiting hairlines are well-hidden by the rich patina, and leave this piece with a high degree of eye appeal. The 1865 proof had a limited mintage of only 500 pieces and, aside from the unique 1866 piece, is the final No Motto proof issue in the series. Survivors are fairly plentiful in Choice and lower grades, but the date becomes genuinely rare at the Gem level. Population: 11 in 65 (1 in 65+) Cameo, 9 finer (12/14). PCGS# 86419

1880 Seated Half, Stunning PR66+ Cameo

- 3144 1880 PR66+ Cameo PCGS. CAC.** A full proof strike embellishes the surfaces on each side of this stunning Premium Gem Cameo proof 1880 half dollar, showing excellent contrast on surfaces that are untoned in the centers, blending into cinnamon and amber-gold accents at the margins. A lovely survivor of this proof mintage of 1,355 coins. Population: 15 in 66 (2 in 66+) Cameo, 0 finer (12/14). PCGS# 86441

---

**1881 Half Dollar, Concentrically Toned PR66**

- 3145 1881 PR66 PCGS.** Small untoned areas compete with pinkish-gray, cobalt-blue, and mint-green radiating outward on this sumptuous Premium Gem proof 1881 half dollar, among the few finest survivors of the 975 struck. This piece boasts a nice, sharp proof strike throughout and shows impeccable preservation as well, but it is the lovely patina that first catches the viewer's eye. This example is one of 11 in the numeric PR66 grade at PCGS, surpassed by only two in PR67 (12/14). NGC ID# 27UG, PCGS# 6442

---

**BARBER HALF DOLLARS**

---

**1896-S Half Dollar, MS64  
Border-Toned Beauty**

- 3146 1896-S MS64 PCGS.** The 1896-S half dollar has a challenging, though not extreme mintage of fewer than 1.2 million pieces, and by the MS64 level it is a condition rarity. This near-Gem offers smooth pearl-gray centers and attractively dappled slate-blue and golden-tan border toning that reaches into the reverse fields. Population: 25 in 64 (1 in 64+), 14 finer (12/14). NGC ID# 24LX, PCGS# 6476

---

**1898 Barber Half, MS66  
Only One Coin Numerically Finer**

- 3147 1898 MS66 PCGS. CAC.** A beautifully preserved late-19th century type coin, this Premium Gem 1898 Barber half exhibits thickly frosted surfaces beneath an overlay of blended sun-gold, lavender-gray, and mint-green toning. The stars and talons are sharply brought up, and only a smidgen of lightness is seen on the upper-right corner of the shield, as usual. Population: 11 in 66 (1 in 66+), 1 finer (12/14). NGC ID# 24M3, PCGS# 6480

---

**1902 Half Dollar, Untoned MS66  
Sharp and Lustrous**

- 3148 1902 MS66 NGC.** This Premium Gem 1902 half dollar boasts effulgent luster and excellent preservation throughout both sides. No trace of toning appears on this high-end piece, one of the few survivors of the nearly 5 million-coin mintage to achieve this grade level. The strike is impressively sharp overall, save for the right shield corner and nearby wing. Census: 6 in 66, 1 finer (12/14). NGC ID# 24ME, PCGS# 6492

---

**1905 Barber Half, Nicely Toned MS65  
Ex: Dale Friend Collection**

- 3149 1905 MS65 PCGS. CAC.** Ex: Friend. This Gem features nearly mark-free surfaces and frosty luster beneath gorgeous gold, tan, and pale blue toning. The design definition is above average with slight central weakness. The 1905 Barber half issue's mintage of 662,000 is certainly impressive within the context of the series, and while examples are somewhat available in lower Uncirculated grades, coins as well-preserved as this are rare. Population: 13 in 65 (1 in 65+), 14 finer (12/14). Ex: FUN Signature (Heritage, 1/2009), lot 1121. NGC ID# 24MR, PCGS# 6501

## PROOF BARBER HALF DOLLARS

### 1892 Barber Half Dollar, PR66 Outstanding First-Year Type Coin

- 3150 1892 PR66 PCGS.** Although not certified as a Cameo, the sharply detailed frosty design elements of this Premium Gem Barber half contrast boldly with the deeply reflective fields. No mentionable flaws are evident and a few highlights of pale gold toning accent the terrific eye appeal. Housed in a green label holder. Population: 23 in 66, 18 finer (12/14). NGC ID# 24NU, PCGS# 6539

### 1895 Barber Half, Beautifully Toned PR66 Cameo

- 3151 1895 PR66 Cameo PCGS.** Beautifully toned and well-contrasted surfaces are the hallmark of this Premium Gem Cameo proof 1895 half dollar. Pale opalescent patina occupies the central obverse, bounded by tinges of moss-green and sunset-orange at the rims. The reverse shows pastel iridescent shades, a lovely effect on both sides. The sharp proof strike and excellent preservation make this an exceptional survivor from the proof mintage of 550 coins. Population: 10 in 66 Cameo, 8 finer (12/14). PCGS# 86542

### 1908 Half Dollar, PR66 Cameo Nice Color and Contrast

- 3152 1908 PR66 Cameo PCGS.** This coin combines the "best of both worlds" for lovers of color and contrast, showing pinkish-gold and pale-blue iridescent patina amid perceptible field-device contrast on both sides. This issue is seldom seen with cameo contrast, and most survivors also lack the excellent technical preservation present here. Population: 7 in 66 Cameo, 2 finer (12/14). PCGS# 86555

## WALKING LIBERTY HALF DOLLARS

### 1916 Walking Liberty Half Dollar, MS66+ Unusually Sharp Strike

- 3153 1916 MS66+ PCGS. CAC.** This high-end Premium Gem represents the first year of the Walking Liberty design, an important consideration for type purposes. This coin exhibits an unusually sharp strike for an early series issue, with fine detail on Liberty's head and wreath hand. The pristine brilliant surfaces radiate vibrant mint luster and eye appeal is outstanding. PCGS has graded four numerically finer examples (12/14). NGC ID# 24PL, PCGS# 6566

### 1916-D Walker Half, MS66 Sharply Struck First-Year Example

- 3154 1916-D MS66 PCGS. CAC.** Denver Mint officials took to spacing the dies wide apart in an effort to prolong their lifespan, resulting in a wide range of striking characteristics for the issue. This first-year Premium Gem is remarkably well-struck, notably on Liberty's branch hand and the eagle's breast feathers. Dappled shades of ocean-blue and russet toning encircle the peripheries, while the centers remain almost entirely brilliant. PCGS has seen only three numerically finer submissions (12/14). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1919-D Half Dollar, MS63**  
Conditionally Scarce Semikey

**3155 1919-D MS63 PCGS.** The 1919-D Walking Liberty half dollar is one of the most conditionally challenging dates in the series in Mint State grades. It is elusive at all levels of this range, and becomes decidedly rare in Gem condition. The quality of the Mint State pieces that do exist is also somewhat disappointing in general, with weak strikes and minimal luster being the norm. This Select example shows some of the usual weakness on Liberty's head and leg, but the definition is slightly above-average overall, and the surfaces are largely free of major distractions. The coin appears brilliant at first glance, but closer study reveals hints of light golden color throughout, illuminated by satiny mint luster. NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, MS64+**  
Memorable Obverse Toning

**3156 1919-S MS64+ PCGS. CAC.** The silver stage of the "Renaissance of American Coinage," as Burdette memorably called it, corresponded with the first World War in Europe and the coins debuted just months before the entry of the United States. The conclusion of hostilities and the subsequent economic shocks (the U.S. government purchasing less war equipment, the return of veterans to the labor force, and so on) led to a strong economic slowdown and correspondingly weak demand for coinage. The 1919-S half dollar, one of the many issues affected, is represented here by a gorgeous MS64+ coin with a medium-silver base and generous toning, in part sage and golden-orange but most notably deep blue-green in a delicate lattice pattern at the right obverse. Population: 93 in 64 (9 in 64+), 56 finer (12/14). NGC ID# 24R2, PCGS# 6579

**1920 Walker, MS66  
None Certified Numerically Finer**

- 3157 1920 MS66 PCGS.** Like many early dates in the Walking Liberty half series, the 1920 is conditionally scarce in Gem condition, and finer representatives are decidedly rare and highly sought-after among knowledgeable specialists. This Premium Gem is among the finest certified of the date, and also exhibits an attractively sharp strike, including full thumb separation. The reverse is softly frosted and essentially untoned, while the obverse displays deeper shades of gold and champagne color. Population: 24 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 24R3, PCGS# 6580

**1921 Half Dollar, MS64  
A Post-World War I Key**

- 3158 1921 MS64 PCGS.** One of several notably low-mintage issues struck after World War I, the 1921 half dollar saw just 246,000 pieces produced. This is an uncommonly appealing near-Gem, lustrous beneath gold-to-gray patina with a rounded, separated thumb on the branch hand. PCGS has graded 60 numerically finer pieces (12/14). NGC ID# 24R6, PCGS# 6583

**1928-S Walking Liberty Half, MS65  
Conditionally Scarce**

- 3159 1928-S MS65 PCGS.** The only half dollar issue struck this year, the 1928-S Walker is essential for a complete date set of this highly collected series. This Gem example exhibits satiny mint luster underlying mottled lavender, gold, and aquamarine hues. Liberty's head and thigh are deficiently struck, as usual, though the well-preserved surfaces balance the eye appeal. Population: 56 in 65 (1 in 65+), 6 finer (12/14). NGC ID# 24RB, PCGS# 6588

**1933-S Half Dollar, Intensely Lustrous MS67  
An Important Condition Rarity**

- 3160 1933-S MS67 PCGS.** The 1933-S is an important condition rarity in the Walking Liberty half dollar series. Indeed, PCGS and NGC combined have graded only 16 examples in MS67 and none finer. Golden-gray patination, slightly deeper in shade on the reverse, runs over the intensely lustrous surfaces. The design elements are sharply struck as is characteristic of this issue. The thumb on the branch hand shows virtually complete delineation, and Liberty's head and gown lines are quite strong as are the feathers on the eagle's breast. Even the trailing leg exhibits fairly nice feather detail. This impeccably preserved coin will generate spirited bidding. Population: 11 in 67, 0 finer (12/14). NGC ID# 24RE, PCGS# 6591

---

1947-D Walking Liberty Half Dollar, MS67  
None Certified Finer at PCGS

- 3161** 1947-D MS67 PCGS. From a mintage of 3.9 million pieces, the 1947-D Walking Liberty half dollar is seldom encountered at the MS67 grade level. This remarkable Superb Gem exhibits well-detailed design elements and impeccably preserved lustrous surfaces with subtle highlights of green and lavender toning. Population: 23 in 67, 0 finer (12/14). NGC ID# 24SN, PCGS# 6631

---

PROOF WALKING LIBERTY  
HALF DOLLAR

---

1937 Walking Liberty Half, PR68  
Essentially Unimprovable Quality

- 3162** 1937 PR68 NGC. From a mintage of 5,728 proofs, the second-lowest production among seven proof dates, this blazing example features virtually pristine surface preservation. Each side is all-brilliant save for a few faint blushes of light olive-green toning, and the strike is predictably razor-sharp. Census: 27 in 68 (3 in 68 ★), 0 finer (12/14). NGC ID# 27V5, PCGS# 6637

---

FRANKLIN HALF DOLLARS

---

1948-D Half, MS67 Full Bell Lines  
Premier Registry Set Leader

- 3163** 1948-D MS67 Full Bell Lines PCGS. For the Registry Set collector, few coins will be as important an acquisition as this Superb Gem Franklin half. It is tied with just one other as the finest certified at PCGS (12/14), and ranks nearly half of a grade point finer than the piece represented in the current highest-rated Registry Set. The obverse exhibits faded shades of russet, orange-gold, and lilac-blue around the peripheries, with pale golden hues in the center and over the entire reverse. The design elements are sharply impressed and the frosty surfaces are devoid of noticeable imperfections. An important and conditionally rare Franklin half. NGC ID# 24SS, PCGS# 86652 Base PCGS# 86652
-

**1952-S Half Dollar, MS66+ Full Bell Lines  
Above-Average Strike for the Issue**

- 3164 1952-S MS66+ Full Bell Lines PCGS. CAC.** Blazing luster emanates from the golden-gray surfaces of this high-end Premium Gem. Its design elements are sharply struck for the issue; Tomaska (2011) writes that: "Most 1952-S Franklin halves are not well struck and do not have full bell lines." Not only are the bell lines full on this piece, but its lettering is clear under magnification. Neither side reveals mentionable marks. Population: 48 in 66 (3 in 66+) Full Bell Lines, 2 finer (12/14). NGC ID# 24T5, PCGS# 86663

**1957-D Franklin Half Dollar, MS67  
Rare Full Bell Lines Example**

- 3165 1957-D MS67 Full Bell Lines PCGS.** Vivid shades of sea-green and lavender-gray toning enhance the eye appeal of this delightful Superb Gem, with most of the color on the obverse. The design elements are sharply detailed, with Full Bell Lines definition, and vibrant mint luster shines through the toning. Population: 13 in 67 Full Bell Lines, 0 finer (12/14). NGC ID# 24TF, PCGS# 86673 Base PCGS# 86673

**1962-D Half Dollar, MS66 Full Bell Lines  
A Late-Date Condition Rarity**

- 3166 1962-D MS66 Full Bell Lines PCGS.** This late-date Franklin half dollar issue saw a mintage of more than 35 million pieces, but few of those coins qualify for Full Bell Lines and even fewer also reach the MS66 level. This Full Bell Lines Premium Gem has pale silver luster offering just a touch of creaminess and a few tiny spots of color. Most of the grade-defining marks are on the reverse, leaving the obverse surprisingly smooth. Population: 16 in 66 (1 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24TS, PCGS# 86683

**EARLY DOLLARS**

**1795 Flowing Hair Dollar, VF30  
B-1, BB-21, Two Leaves**

- 3167 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 NGC.** An excellent Flowing Hair type coin, this lightly circulated BB-21 representative displays deep gunmetal-gray and pewter hues over each side, with hints of blue and lavender observed when tilted beneath a light. The borders are strong and the central devices retain significant definition for the grade. Smooth and problem-free, with no evidence of adjustment marks. PCGS# 39986 Base PCGS# 6853

**1796 Dollar, B-5, BB-65, VF30  
Large Date, Small Letters**

- 3168 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF30 PCGS.** Die State IV, with a heavy die lump firmly connecting the I and R in AMERICA. This is a less often encountered date in the Draped Bust type, and a seldom seen variety therein. This piece is lightly circulated, but retains plentiful detail on the devices. The surfaces are largely steel-gray, with areas of deeper gunmetal hues in the margins. No adjustment marks are observed. PCGS# 40002 Base PCGS# 6861

**1797 Draped Bust Dollar, XF40  
Popular 10x6 Stars, B-3, BB-71 Variety**

- 3169 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 NGC.** Bowers-Borckardt Die State III. The BB-71 variety is easily recognized by the 10x6 pattern of stars on the obverse. This attractive XF40 specimen displays distinct drapery and the hair is well-outlined and detailed. Prominent clash marks are evident in the obverse field and the pleasing gray surfaces retain traces of original mint luster. PCGS# 40004 Base PCGS# 6865

---

**1799 7x6 Stars, B-16, BB-158 Dollar, AU50  
Well-Struck, Lightly Circulated Survivor**

- 3170** 1799 7x6 Stars, B-16, BB-158, R.2, AU50 PCGS. Bowers-Borckardt Die State II, showing weak upper berries, especially the top one above the branch. Beautiful blue, pink, and heather-gray patina shows on each side, and the surfaces are minimally marked save for one straight, thin line through the portrait on the obverse. A nicely centered and well-struck example of this relatively available variety, here represented by a most attractive survivor. PCGS# 40050 Base PCGS# 6878

---

**1799 7x6 Stars Dollar, B-12, BB-160, XF45  
Top-Shelf Example**

- 3171** 1799 7x6 Stars, B-12, BB-160, R.3, XF45 NGC. None of the later die cracks that would afflict the obverse show on this early-state 1799 7x6 Stars dollar. The obverse is distinguished from the similar BB-165 and BB-166 dies by star 1 being much farther from the lowest hair curl. The reverse shows no berries and a defective top-left serif on the U(NITED). This is a beautiful Choice XF example of this variety, showing good centering, minimal marks, no planchet adjustment marks, and lovely pinkish-lavender patina. A top-notch coin for the variety. PCGS# 40051 Base PCGS# 6878
- 

*Milferd H. Bolender*

---

1803 Draped Bust Dollar, MS63  
B-6, BB-255, Large 3  
Among the Finer Known Examples of the Variety

**3172** 1803 Large 3, B-6, BB-255, R.2, MS63 NGC. Die State II, with a hairline die crack connecting stars 10 and 11; only about 20 to 30 percent of the BB-255 dollars are of this intermediate die state. BB-255 is, overall, one of the most plentiful 1803 dollar varieties, but its availability is restricted to circulated grades, primarily in the mid-to-lower range. Mint State pieces are very rare; Q. David Bowers, writing in *Silver Dollars & Trade Dollars of the United States*, estimates only about 11 true Mint State coins exist, and lists just seven different pieces in his accompanying roster of *Notable Specimens*. It is unknown if this piece was known at the time the roster was written, as several of the old auction catalogs that list Mint State examples lack a suitable plate for positive identification.

NGC and PCGS combined have certified and attributed only 10 Mint State coins, with NGC contributing one in MS62, this piece in MS63, and a Gem, while PCGS reports one in MS61, one in MS62, four in this grade, and a Gem (12/14), although it is possible that a couple of these may be the result of resubmissions.

BB-255 is the only use of this obverse die, which is unique as the only obverse with a Large 3 in the date. The 3 is lightly repunched north, with the lower loop of the underlying numeral evident to the south of the primary. This reverse die is seen here in its final of seven uses (from 1801 to 1803, inclusive), with terminal cracks from the rim into the eagle's left (facing) wing. These dies were apparently polished prior to the striking of the present coin, as the fields showcase nearly full prooflike mirroring. Areas of die fatigue are still detectable in the protected regions of the reverse, but most of the recesses exhibit excellent reflectivity. The design elements are unusually sharp, as well, particularly on the obverse stars, Liberty's hair curls, and the olive leaves. Both sides display just a hint of light golden toning, with deeper lilac and pale olive hues seen periodically around the peripheries. No significant abrasions are present, and the eye appeal is simply outstanding not only for the variety but for the Draped Bust type in general. PCGS# 40101 Base PCGS# 6901

## GOBRECHT DOLLAR

1836 Gobrecht Dollar, Toned PR50  
Judd-60, Die Alignment IV

- 3173 1836 Judd-60 Original, Pollock-65, R.1, PR50 NGC.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). Only the strongest magnification will pick up the diagonal die clash mark above the eagle's wing. Believed struck in the latter part of the final week of 1836, this example shows no evidence of die cracks on the peripheral letters on the reverse. Although traditionally considered proofs, there is little evidence of mirroring in the fields of this piece. This is due in part to light circulation, in part to the significant gray-blue toning, but undoubtedly it is primarily due to the not-quite-proof methods employed to strike Gobrecht dollars; yet the proof designation persists. The fields are remarkably clean on this example, but there are a number of rim bumps on each side. Sharply defined for the grade. PCGS# 11226

## SEATED DOLLARS

1842 Seated Dollar, MS64  
None Certified Numerically Finer

- 3174 1842 MS64 NGC.** The 1842 Seated dollar is one of the more plentiful issues in the series from the 1840s, but it is nonetheless conditionally scarce in Mint State. This Choice example is among the finest certified, and displays substantial semiprooflike mirroring beneath a blanket of warm golden-gray toning. A few stars are slightly soft, but the strike is otherwise pleasing and the surfaces are pleasantly free of major distractions. Census: 18 in 64 (3 in 64 ★), 0 finer (12/14). NGC ID# 24YC, PCGS# 6928

1860-O Seated Dollar, Lustrous MS64  
Great Type Coin, Seldom Seen Finer

- 3175 1860-O MS64 PCGS. CAC.** A light layer of pinkish-gray and amber-gold patina can disguise neither the generous luster percolating beneath nor the top-notch eye appeal of this near-Gem 1860-O Seated dollar. Scattered, trivial marks comprise the grade, mostly confined to the fields. Gems are far more elusive, as PCGS reports 35 submissions at the MS64 level and only 10 finer, the sole finest one MS65+ (12/14). A near-Gem such as this attractive piece, with the CAC green approval sticker, marks an excellent combination of quality and value, as well as an unimpeachable choice for a type set. NGC ID# 24Z3, PCGS# 6950

1872-CC Dollar, AU Sharpness  
Well-Detailed

- 3176 1872-CC — Cleaning — PCGS Genuine. AU Details.** Lightly cleaned, but with no other impairments. The surfaces have retoned a pleasing tan-gray patina, with deeper russet hues in the recesses. The coin is sharply detailed and appealing to the unaided eye, but a loupe reveals the telltale hairlines hidden in the fields. Smooth with no major abrasions. This elusive Carson City issue is always in demand among Seated dollar and Carson City collectors. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, AU58  
Rare This Well-Preserved

- 3177 1872-CC AU58 PCGS.** Prior to the establishment of the Trade dollar, silver dollar production at the Carson City Mint was largely dictated by local silver deposits. None of the issues from 1870 to 1873 experienced substantial mintages, and in 1872, only 3,150 coins were struck. These coins circulated and were largely lost to attrition, but a few high-grade pieces survive, and are items of intense interest among collectors of Carson City rarities. The present piece is a rare near-Mint example with semiprooflike fields and consistent lavender-gold toning over each side. The top of Liberty's head is a trifle soft, but the strike is otherwise sharp. No major abrasions are noted and the devices are nearly devoid of detectable friction. Population: 13 in 58, 12 finer (12/14). NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1856 Seated Liberty Dollar, PR64  
Rare Early Proof Issue

- 3178 1856 PR64 PCGS. CAC.** The 1856 dollar is very rarely encountered, as are all pre-1858 proofs. Only a couple of dozen have survived today in all grades. It is not known how many proof dollars were struck in this year, but it appears that no more than a couple of dozen survive today. This coin "carries its own credentials" as Walter Breen used to say. However, it also shows the diagnostic die lines in the field above ITE in UNITED on the reverse that are seen on all proof dollars from this year. The fields are deeply mirrored and the surfaces are brilliant with bright steel-gray surfaces. Lightly hairlined, the only readily visible flaw on this important coin is a light planchet streak above and to the left of the eagle's head on the reverse. Fully detailed in all areas. Population: 9 in 64, 3 finer (12/14).  
*Ex: Atlanta Signature (Heritage, 8/2001), lot 6504. NGC ID# 252A, PCGS# 6999*

---

1857 Seated Dollar, Well-Preserved PR64

- 3179 1857 PR64 NGC.** Nicely preserved surfaces on this near-Gem proof 1857 Seated dollar feature light tan-gold patina scattered around the device edges, heavier at the rims, and ceding to lovely rainbow iridescence at the extreme margins. The strike is quite sharp although falling short of absolute, as a touch of softness shows on the eagle's lower neck feathers and the edge of the left (facing) wing, although this is at best a minor distraction. The overall eye appeal is excellent. This reverse is the reused die from 1856, showing die lines above ITE and between ES, and connecting AM and RI, as described in the *Breen Proof Encyclopedia*. This issue is seldom seen any finer, and seldom seen with better eye appeal than the present example. Census: 11 in 64, 16 finer (12/14). NGC ID# 252B, PCGS# 7000
- 

---

1871 Seated Dollar, PR66 Cameo  
Excellent Type Set Acquisition

- 3180 1871 PR66 Cameo PCGS. CAC.** Deeply frosted grayish-gold devices on each side contrast well against the reflective fields, offering primarily pinkish-gold coloration with accents of ice-blue closer to the rims. A total of 960 proofs were reportedly struck this year, but this piece is definitely among the upper echelons of survivors, both in terms of preservation and contrast. A loupe reveals no mentionable marks among the light patina, and the strike is full, or essentially so, throughout both sides. This Cameo Premium Gem is one of only three such at PCGS, and none are finer (12/14). An excellent candidate for a fine type set. PCGS# 87019
-

## TRADE DOLLARS

1877-S Trade Dollar, MS65  
Lustrous, High-End Example

- 3181 1877-S MS65 NGC.** The majority of the 9.5 million Trade dollars minted in San Francisco in 1877 were exported to the Far East, where they remained available for decades. However, a theoretical inconsistency exists between the domestic and international uses for the issue. Based upon Treasury Secretary John Sherman's concerns regarding widespread domestic circulation by the end of 1877, it is reasonable to assume that export demand was on the decline.

A wash of faint golden patina blankets the obverse of this Gem example, while the reverse remains largely brilliant. Coruscating luster enlivens carefully preserved surfaces devoid of any distracting impairments. The design elements appear sharply struck with only slight incompleteness on the stems of Liberty's olive branch. NGC and PCGS have each certified 28 coins in MS65; they have seen six and seven coins finer, respectively (12/14).

*Purchased from Kevin Lipton Rare Coins (11/2009). NGC ID# 253E, PCGS# 7046*

1877-S Trade Dollar, MS65  
Well-Struck With Beaming Luster

- 3182 1877-S MS65 NGC.** The copious mintage exceeding 9.5 million pieces makes the 1877-S Trade dollar an ideal coin for type-collecting purposes, and the present Gem offers generous eye appeal and beaming luster on well-struck surfaces that are largely untuned, save for wisps of cinnamon and pearl-gray patina. Far finer than the usually seen AU examples of this issue, plentiful in circulated grades. Census: 29 in 65, 6 finer (12/14). NGC ID# 253E, PCGS# 7046

## MORGAN DOLLARS

1878 8TF Morgan Dollar, AU55  
Extremely Rare VAM-14.12 Variety

- 3183 1878 8TF, VAM-14.12, Wild Eye AU55 NGC.** VAM-14.12 is an R.7 variety, with less than 10 examples believed known, per the VAMworld online reference. NGC has certified and attributed only three examples, including the present piece, an MS60 Prooflike coin, and an MS62 Deep Prooflike example; PCGS has certified and attributed seven non-Prooflike pieces, including two VF coins, three XF pieces, an AU50 coin and an AU55 example, along with one Prooflike piece in MS60 and a Deep Mirror Prooflike coin in MS63 (12/14). It is possible that these figures include one or more resubmissions, but either way, VAM-14.12 is extremely rare. There are no major diagnostics for this variety, though several tiny die lumps near Liberty's eye and in the cap, along with minor doubling on the date numerals and the blunt shape of the eagle's beak, confirm the attribution. This piece is deeply reflective in the fields and well-struck, with just slight wear over the high points of the design. Traces of light golden color accent the flashy surfaces, and the eye appeal is excellent for the grade. Radial die cracks from the obverse near stars 4 and 11 are characteristic of a late die state example. PCGS# 133807 Base PCGS# 7072

**1878 7TF Morgan, Toned MS66  
Reverse of 1879**

- 3184 1878 7TF Reverse of 1879 MS66 PCGS.** Considered marginally plentiful overall, the 1878 7TF, Reverse of '79 Morgan is a major condition rarity in MS66. Only 20 coins have been graded at this numeric level by PCGS (1 in 66 Prooflike), and none numerically finer (12/14). This example is sharply struck, particularly on the hair above Liberty's ear, and the surfaces showcase vibrant, frosty mint bloom. Beautifully complementary hues of orange-gold, violet, and ocean-blue encompass the obverse, while the reverse shows uniform light golden color. NGC ID# 253L, PCGS# 7076

**1878-CC Morgan Dollar, MS66  
Radiant, Rarely Seen Finer**

- 3185 1878-CC MS66 PCGS.** Vibrant, frosty mint bloom yields just a hint of light golden color as it illuminates beautifully preserved surfaces on this Premium Gem first-year Carson City Morgan. The eagle's talons are softly struck, but the breast feathers and the hair above Liberty's ear are sharply impressed. PCGS has certified only six numerically finer representatives (12/14). NGC ID# 253M, PCGS# 7080

**1878-S Morgan Dollar, MS62  
VAM-57, Long Nock Reverse**

- 3186 1878-S Long Arrow Shaft, VAM-57, MS62 PCGS.** A Top 100 Variety. A rare Long Nock variety, identified by an array of small die lumps in front of Liberty's eye. This example is boldly struck and semiprooflike, with just a whisper of light golden toning over each side. Faint disruptions in the luster on Liberty's cheek and in the adjacent field limit the grade, but none are individually noticeable. Population: 4 in 62, 0 finer (12/14). PCGS# 133848 Base PCGS# 7082

**1879-CC Dollar, MS64 Prooflike  
Pleasing Cameo Contrast**

- 3187 1879-CC MS64 Prooflike PCGS.** Save for the key-date 1889-CC, the 1879-CC Morgan dollar is the scarcest Carson City issue in the series in high grades. Only limited quantities were dispersed through Treasury in the early 1960s, and even smaller numbers of the date were later found to be among the GSA holdings and in the Redfield Hoard. It is likely that significant quantities of this issue were melted under the terms of the Pittman Act of 1918, perhaps as many as hundreds of thousands of coins.

This representative grades MS64, and ranks among the few highly sought-after examples that showcase full prooflike mirroring in the fields. The devices are well-defined and contrast nicely with the golden-toned fields. A few minor abrasions are noted, but these are rather minor for the Choice grade level. Population: 82 in 64 (4 in 64+) Prooflike, 9 finer (12/14). NGC ID# 253T, PCGS# 7087

**1880-O VAM-48 Silver Dollar, MS65  
'Hangnail' Top 100 Variety  
Finest Certified**

- 3188 1880-O Hangnail, VAM-48, MS65 PCGS.** A Top 100 Variety. The variety is rare in high grades — in fact, this is the only Gem example listed by the variety according to both PCGS and NGC. Additional examples may exist that have not been identified by VAM number, although the 1880-O date is rare in Gem or finer grades regardless of variety, with fewer than 70 pieces certified by both services combined (12/14).

The “Hangnail” refers to a bold die gouge on the reverse, which pierces the left tailfeather. This high-grade example is a Gem in every sense of the word, with a bold strike and strong cartwheel luster across its untuned, silver surfaces. Liberty’s cheek is clean. Only a few tiny abrasions are widely scattered and do not distract from the brilliant-white appeal of this rare dollar. PCGS# 133879 Base PCGS# 7114

**1881-CC Dollar, Vibrant MS67  
A Low-Mintage Issue**

- 3189 1881-CC MS67 PCGS.** The low mintage of 296,000 pieces and the Carson City mintmark contribute to the desirability of the 1881-CC Morgan. Scintillating luster emanates from the silver-white surfaces of this magnificent Superb Gem. The design elements are strongly defined and both sides are nicely preserved. NGC ID# 2547, PCGS# 7126

**1881-O Dollar, MS65 Deep Mirror Prooflike  
None Finer at PCGS**

- 3190 1881-O MS65 Deep Mirror Prooflike PCGS.** From a mintage of 5.7 million pieces, the 1881-O Morgan dollar is a plentiful issue in lower grades, but high-grade specimens are elusive. In addition, most of the coins with prooflike surfaces are plagued with unsightly bagmarks. Finding a prooflike Gem with strong eye appeal is a significant challenge.

The present coin is a spectacular exception to the rule, with sharply detailed frosty design elements that contrast starkly with the deeply mirrored fields. The well-preserved, essentially brilliant surfaces show a few hints of greenish-gold toning on the reverse, with only minor signs of contact. Eye appeal is terrific. Population: 15 in 65 Deep Mirror Prooflike, 0 finer (12/14). NGC ID# 2548, PCGS# 97129

**1881-S Silver Dollar, MS68+  
Among the Finest Type Coins Known**

- 3191 1881-S MS68+ NGC.** As close to perfection as most collectors will ever hope to get, this superb 1881-S Morgan is one of only three MS68 examples awarded a Plus designation at NGC (1 in 68+ ★), with none numerically finer; PCGS has awarded a Plus designation to only two pieces in this grade, and has seen two numerically finer representatives (12/14). The present coin is awash in vibrant mint bloom, with sharp, frosty devices and nearly prooflike fields. Traces of light golden color complement the luster, and the eye appeal is seemingly unsurpassable. NGC ID# 2549, PCGS# 7130

---

**1883-S Dollar, Sharply Struck MS64**

- 3192 1883-S MS64 PCGS.** The 1883-S Morgan is a slightly better date in mint condition, and is only marginally available through the MS64 level. Only 35 numerically finer examples have been certified by the two major services (12/14). Nearly untoned surfaces display pleasing luster and sharply struck devices. A few minor obverse marks preclude Gem status. NGC ID# 254K, PCGS# 7148

---

**1884-S Silver Dollar, MS61  
Vibrant Mint Luster**

- 3193 1884-S MS61 PCGS.** Large quantities of this issue were released into circulation in the 19th century, resulting in an abundance of well-circulated coins but a small population of Mint State pieces. This example is well-struck, with radiant, brilliant luster over each side. Light, scattered abrasions contribute to the grade, but none are individually detracting. NGC ID# 254P, PCGS# 7156

---

**1888-O Morgan, MS62  
VAM-1B3, 'Scarface'**

- 3194 1888-O "Scarface," VAM-1B3, MS62 PCGS.** A Top 100 Variety. This is an immensely popular variety, distinguished by a heavy die break that gradually extends in various die states from the rim near the P in PLURIBUS, through the nose and across the cheek and neck. This piece is in a late stage of break, with the crack heavy across the cheek and just beginning to form over the neck as well. The luster is radiant and exhibits light golden areas in the margins. The extreme centers are softly struck, as usual, but this remains a pleasing example of this scarce variety. Population: 32 in 62 (3 in 62+), 11 finer (12/14). PCGS# 133918 Base PCGS# 87184

---

**1888-O Dollar, AU58  
VAM-4, 'Hot Lips'**

- 3195 1888-O "Hot Lips," Doubled Die Obverse, VAM-4, AU58 PCGS.** A Top 100 Variety. Liberty's profile is boldly die doubled on this popular *Guide Book* variety. The present example is softly lustrous beneath warm golden-gray toning, and the high points of the design display only minor friction. This variety is elusive in AU condition, and Mint State pieces are extremely rare. This near-Mint representative will be an attractive option for the VAM specialist. Population: 7 in 58, 4 finer (12/14). PCGS# 133919 Base PCGS# 7308

1889-CC Silver Dollar, AU58  
Lustrous and Eye-Appealing

- 3196 1889-CC AU58 PCGS.** The entire 350,000-coin mintage of the 1889-CC Morgan dollar was accomplished in final three months of the year, and many pieces were paid out into circulation before the turn of the century. Only small groups of Mint State pieces turned up in the first half of the 20th century, and it is plausible that some were destroyed under the terms of the Pittman Act of 1918. The 1889-CC Morgan has long been considered one of the major keys in the series, and is far and away the most elusive issue in the Carson City short set. This near-Mint representative displays still-lustrous surfaces and sharp, barely disturbed detail. Traces of light golden color are observed when tilted beneath a light, though the coin has an overall brilliant appearance. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS61  
Popular VAM-3 Variety

- 3197 1889-CC MS61 ANACS.** Designated by VAM on the ANACS insert, VAM-3 has a far date obverse and a series of die cracks on the upper reverse legends. Unlike most Carson City Morgan dollar issues, the 1889-CC was a no-show in the GSA auctions, and also failed to emerge in quantity from the Redfield holdings. The 1881-CC and 1885-CC have lower mintages but are common in Mint State relative to the elusive 1889-CC, which is typically encountered as a cleaned XF. The present Uncirculated example is silver-gray with glimpses of straw-gold. The strike is intricate for the Western facility and marks are surprisingly minimal, though the surfaces lack the luster associated with higher grades. An opportunity to acquire a fully detailed example for an affordable price. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar  
MS62 Deep Mirror Prooflike**

- 3198 1889-CC MS62 Deep Mirror Prooflike ANACS.** This is a coin certain to spur much interest on the part of the many hordes of Morgan dollar aficionados, an example of the key-date 1889-CC issue certified MS62 Deep Mirror Prooflike by ANACS. The surfaces are largely untuned, save for minor touches of cinnamon on each side, and the mirrored fields and well-frosted devices set up excellent contrast throughout. A few small reeding marks on Liberty's cheek and jawline, along with scattered abrasions elsewhere determine the grade, but much eye appeal and collectibility are both on blatant display here. This coin poses a unique opportunity for some forthright bidder to acquire this key Carson City date. NGC ID# 2559, PCGS# 97191

**1890-S Morgan Dollar, MS66+  
Outstanding Eye Appeal, Rarely Seen Finer**

- 3199 1890-S MS66+ PCGS. CAC.** Highly lustrous and essentially all-brilliant, this blazing Premium Gem Morgan dollar shows just the faintest blush of russet toning around the upper-obverse margins. The design motifs are boldly struck with slight central softness. Abrasions are few and far between, in accord with the lofty grade. The San Francisco Mint churned out over 8.2 million silver dollars in 1890, and while coins are readily available through Gem condition, the certified population drops precipitously in MS66. PCGS reports only seven finer submissions (12/14). NGC ID# 255F, PCGS# 7202

**1891-CC Silver Dollar, MS65+  
Nearly Premium Gem Quality**

- 3200 1891-CC MS65+ PCGS.** The rarity of the 1891-CC Morgan at the Premium Gem grade level makes high-end Gem examples, such as the present coin, highly appealing to the budget-conscious collector. Both sides are vibrantly frosted, with excellent preservation and just a touch of light golden toning. The eagle's talons are soft, but the strike is otherwise well-executed. Only 31 coins are numerically finer at PCGS (12/14). NGC ID# 255H, PCGS# 7206

**1891-CC Silver Dollar, MS65+  
Rarely Encountered Finer**

- 3201 1891-CC MS65+ PCGS.** Available in lower grades, the 1891-CC Morgan dollar becomes scarce in Gem condition compared to the demand for it, and finer pieces are absolutely rare. This Plus-designated MS65 coin is awash in vibrant mint frost and reveals just a few tinges of pale champagne color. Sharply struck and well-preserved. Only 31 coins are numerically finer at PCGS (12/14). NGC ID# 255H, PCGS# 7206

**1893-CC Dollar, Toned MS62  
Final Carson City Issue**

- 3202 1893-CC MS62 PCGS.** Coining operations at the Carson City Mint came to a halt in 1893, 23 years after the facility first opened in 1870. Production of silver dollars was suspended on May 23, but not before 677,000 pieces were manufactured. Both sides are delicately toned at the margins in shades of golden-orange, russet, and cobalt-blue, while the interiors remain mostly brilliant. The strike is slightly incomplete over Liberty's ear, and the eagle's wingtips and breast feathers. Scattered marks are largely hidden beneath the toning. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS62  
Sharp and Frosty**

- 3203 1893-CC MS62 NGC. CAC.** The 1893-CC Morgan is popular as the final issue in the series from the famous Carson City Mint. Furthermore, only a single example was represented in the GSA sales of the early 1970s, contributing to this issue's relative scarcity in Mint State when compared to other dates from the early 1880s. This is a brilliant, radiantly frosty example with an unusually sharp strike. Light, scattered ticks on the obverse limit the grade, but leave this piece with outstanding eye appeal for the numeric level. NGC ID# 255S, PCGS# 7222

**1893-S Silver Dollar, XF40  
Nice Collector-Grade Piece**

- 3204 1893-S XF40 PCGS.** With the lowest mintage of the series (only 100,000 coins), the 1893-S Morgan dollar has long been pursued as a major key date in all grades. This is a seldom seen XF example, with uniform golden-gray patina and pleasing detail. The surfaces are smooth with no severe abrasions or scars. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Lightly Toned AU50**

- 3205 1893-S AU50 NGC.** The acknowledged key to the Morgan dollar series, the 1893-S comes from a series-low business-strike mintage of 100,000 pieces. The coins were released into circulation at an early date, and served their intended purpose in the regional economy. Today, most examples seen are in VF grades, with other circulated grades underrepresented in population totals, and Mint State coins are seldom encountered. AU examples are scarce in absolute terms, and rare in the context of the series.

The present coin is an attractive, largely untoned example, with slight traces of wear on the high points, such as the hair over Liberty's ear. Mint luster is evident in the protected areas of the surfaces, near the devices. The surfaces show fewer abrasions than expected for the grade.

Ex: FUN Signature (Heritage, 1/2010), lot 2625. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, AU50  
Key San Francisco Issue

**3206 1893-S AU50 PCGS Secure.** The 1893-S Morgan dollar had the lowest mintage in the series of only 100,000 pieces, with large quantities being dispersed into circulation before the turn of the century. As a result, lower-grade circulated examples are usually available, albeit for a price, but the date becomes increasingly scarce in AU and Mint State levels. This Almost Uncirculated example is well-detailed, showing only light wear over the high points of the design. Traces of light golden color are detectable when rotated beneath a light, though the surfaces have an overall bright, brilliant appearance. NGC ID# 255U, PCGS# 7226

1894 Dollar, Brilliant MS64  
Attractive Philadelphia Key Date

**3207 1894 MS64 PCGS. CAC.** From a mintage of just 110,000 coins — the second-lowest production total in the Morgan dollar series — the 1894 is the first veritable key date among Philadelphia issues. Examples were scarcely paid out during the 19th and 20th centuries, and only several bags were released in the mid-20th century. Most pieces survive in lower Mint State grade levels, and coins as well-preserved as this Choice representative are scarce. Each side features entirely brilliant surfaces and abundant mint frost. The devices are sharply defined with minor softness over the eagle's breast. Overall, this is a lovely, minimally marked example with a strong degree of eye appeal. PCGS has seen just 27 numerically finer submissions (12/14). NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64+  
Low Business Strike Mintage**

- 3208 1894 MS64+ PCGS. CAC.** Only 110,000 silver dollars were struck at the Philadelphia Mint in 1894, which ranks as the second-lowest mintage of the series, trailing only the key-date 1893-S. A few scattered coins were discovered in the great Treasury releases of the early 1960s, but not enough volume to make this date available today in high grades. Gems are conditionally rare, but this high-end Choice specimen combines almost equivalent technical quality with a more affordable price. Both sides display vibrant mint luster and the mostly brilliant surfaces show subdued hints of golden-tan and lavender patina, with few signs of contact. Eye appeal is outstanding. PCGS has graded 27 numerically finer examples (12/14). NGC ID# 255V, PCGS# 7228

**1894-S Silver Dollar, MS65  
Nearly Prooflike**

- 3209 1894-S MS65 PCGS.** Parallel die polishing lines in the fields deliver a unique, somewhat striated luster, with noticeable semiprooflike mirroring being the principle appeal. The devices are well-struck with a more frosty appearance. A few minute ticks are present, but the preservation is in keeping with the Gem grade. Only 14 coins are numerically finer at PCGS (12/14). NGC ID# 255X, PCGS# 7232

**1895-O Dollar, Well-Defined AU58**

- 3210 1895-O AU58 PCGS.** The silver-gray surfaces of this near-Mint State O-mint Morgan display partially prooflike fields and are essentially untoned. The design elements are generally better defined than often seen on this issue and each side reveals just a few minute circulation marks. NGC ID# 255Y, PCGS# 7236

**1895-S Morgan Dollar, MS61  
Low-Mintage Better Date**

- 3211 1895-S MS61 PCGS.** The 1895-S Morgan dollar is a better date in the series, from a low mintage of 400,000 pieces. This attractive Mint State specimen offers sharply detailed design elements and lustrous surfaces with a scattering of minor contact marks on both sides. A few hints of pale gold toning visit the surfaces. NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS63**  
Vibrant, Frosty Luster

- 3212 1895-S MS63 PCGS.** The 1895-S Morgan dollar is scarce in Mint State in comparison to the demand for it. Most such examples are in the MS62 to MS64 grade range, and finer pieces are rare. This coin is nestled quite comfortably in the affordable, yet, moderately well-preserved middle grade of MS63, and is quite appealing for this level. Light marks on the cheek limit the grade, but the strike is sharp on the hair above Liberty's ear and the surfaces display brilliant, frosty luster. NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS63**  
Delicately Toned Golden

- 3213 1895-S MS63 PCGS.** Semiprooflike fields and a touch of light golden toning over each side contribute to the eye appeal of this Select Mint State example. The eagle's breast and the hair immediately above Liberty's ear are weak, as is typical of this conditionally challenging issue. No significant abrasions are observed upon close study. NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS64**  
Substantial Prooflike Mirroring

- 3214 1895-S MS64 PCGS.** Although not designated as such, this Choice 1895-S Morgan dollar is noticeably prooflike on both sides, with warm champagne toning overall. The hair above Liberty's ear is soft, as usual, but surface abrasions are limited to minor luster grazes on the high points of the design. PCGS has only certified 39 numerically finer representatives (12/14). NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS64+**  
Seldom Seen This High Grade

- 3215 1895-S MS64+ PCGS.** An exceptionally appealing example of this semikay San Francisco issue, this Plus-designated MS64 Morgan exhibits few disruptions in the luster, as well as a degree of semiprooflike reflectivity in the fields. A suggestion of light golden color accents the frosty devices and resides more deeply around the borders. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear, as usual. The 1895-S is a significant condition rarity in the finer Mint State grades, and is particularly elusive above the Choice level. PCGS has certified only 39 examples numerically finer than the present coin, including an unknown number of crackouts (12/14). NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, MS62 Prooflike**  
Modest Field-Motif Contrast

- 3216 1895-S MS62 Prooflike PCGS.** Prooflike examples of the 1895-S Morgan are scarce in all grades, made so partly by the elusiveness of Mint State coins in general. This piece has deeply mirrored fields beneath light golden toning on each side. Well-struck, but with faint roller marks visible across the eagle's breast feathers. Population: 23 in 62 Prooflike, 36 finer (12/14). NGC ID# 255Z, PCGS# 7239

---

**1896-S Morgan Dollar, MS65**  
**Conditionally Very Rare in Higher Grades**

- 3217 1896-S MS65 PCGS.** The 1896-S Morgan dollar claims a substantial mintage of 5 million pieces but the issue has always been more difficult to locate than the large production total would suggest. A small number of coins surfaced in the Treasury releases of the 1960s, but the 1896-S is still a challenging issue, even in circulated grades. This delightful Gem exhibits unusually well-detailed design elements, with just a trace of softness on the hair strands above the ear. The pristine brilliant surfaces radiate vibrant mint luster on both sides, with a few hints of lavender toning. Eye appeal is terrific. Population: 72 in 65 (5 in 65+), 4 finer (12/14). NGC ID# 2564, PCGS# 7244
- 

---

**1897 Dollar, MS66+ Prooflike**  
**Tied for Finest at PCGS**

- 3218 1897 MS66+ Prooflike PCGS. CAC.** A needle-sharp strike and decided contrast characterize this eye-appealing Prooflike Premium Gem. The surfaces are completely void of toning and virtually free of marks save for a few minute ticks. The PCGS population data shows 11 pieces certified in MS66 Prooflike, and this is one of only two examples to receive the coveted Plus designation (12/14). The CAC approval sticker further affirms the coin's quality within the assigned grade. An attractive condition rarity with above-average cameo contrast. NGC ID# 2565, PCGS# 7247
- 

---

**1897-O Dollar, MS63**  
**Elusive in Finer Grades**

- 3219 1897-O MS63 PCGS.** Soft, slightly granular luster remains resolutely medium-gray on this Select New Orleans dollar. Despite a mintage of just over 4 million pieces, the 1897-O dollar poses considerable difficulties in any grade finer than MS63 and competition for examples with appreciable eye appeal is high. PCGS has graded 48 numerically finer examples (12/14). NGC ID# 2566, PCGS# 7248
-

1901 Morgan, MS62  
Appealing for the Grade

- 3220 1901 MS62 PCGS. Softly frosted luster highlights pale golden toning on each side, while the surfaces reveal fewer abrasions than are expected for the grade. Slight softness on the hair above Liberty's ear is present, as is expected for this issue. The 1901 is one of the most conditionally challenging dates in the series in Mint State. NGC ID# 256J, PCGS# 7272

1904-S Morgan Dollar, Untoned MS65  
Seldom Seen in Finer Grades

- 3221 1904-S MS65 PCGS. CAC. The 1904-S Morgan dollar is the last S-mint production, at more than 2.3 million pieces, before the redesigned 1921 issues, and it is also among the most elusive of the late S-mint issues in higher Mint State grades. This untoned, satin-surfaced Gem shows few mentionable marks and top-notch eye appeal. A single reeding mark on Liberty's nose fails to detract. The surfaces are nicely struck, despite minor weakness on the hair over Liberty's ear. PCGS reports only 13 submissions numerically finer, and this Gem is one of only 16 in this grade with the CAC green approval sticker (12/14). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR67 Cameo  
Spectacular Toning and Contrast

- 3222 1880 PR67 Cameo PCGS. We have pointed out many times before that any Gem proof Morgan dollar is a condition rarity, and that obviously applies far more so to this Superb Gem Cameo 1880-dated proof, one of 28 submissions (certainly not all separate coins) in this grade with 16 finer at NGC (12/14). This is not an untoned proof; *au contraire*, both sides are toned, but from quite different palettes. The center obverse is silver with concentric sunset-orange, fire-red, and cobalt-blue, the reverse showing pale pastel tones moving in horizontal bands from top to bottom, smoke-gray, rose, and the palest jade hue imaginable. The contrast and eye appeal are absolutely stunning. PCGS# 87315

1882 Dollar, Toned PR65

- 3223 1882 PR65 PCGS. Yellow-gold and cobalt-blue toning at the obverse margin frames medium gray color in the center, while the reverse center features soft gold-orange that transitions to lavender, purple, and cobalt-blue at the margin. The design elements are sharply struck throughout and both sides have been marvelously cared for. Population: 30 in 65, 37 finer (12/14). NGC ID# 2726, PCGS# 7317

**1892 Morgan Dollar, PR67**  
**Vivid Toning, Well-Preserved Surfaces**

- 3224 1892 PR67 NGC.** This magnificent Superb Gem is richly toned in shades of lavender-gray, blue, and pale gold, with sharply detailed design elements throughout and deeply reflective fields. No mentionable distractions are evident. Eye appeal is outstanding. Census: 15 in 67 (1 in 67 ★), 7 finer (12/14). NGC ID# 272M, PCGS# 7327

**1900 Morgan Dollar, PR67**  
**Spectacular Multicolor Toning**

- 3225 1900 PR67 NGC.** Only 912 proof Morgan dollars were struck in 1900 and only a handful of survivors can match the quality and eye appeal of the present coin. This delightful Superb Gem exhibits sharply detailed design elements and deeply mirrored fields, under shades of pale gold and lavender-gray toning. Census: 8 in 67, 6 finer (12/14). NGC ID# 27ZY, PCGS# 7335

**1901 Dollar, Untoned, Modestly Contrasted PR66**  
**An Alternative to a High-Grade Business Strike**

- 3226 1901 PR66 NGC.** Morgan dollar specialists seeking a 1901 example in Gem or finer numerical grade will have to choose a proof because circulation-strike coins at this level are significant condition rarities. The present PR66 offering displays modest field-motif contrast at several angles, especially when the coin is rotated under a light source. The design elements are boldly struck and both sides are untoned and impeccably preserved. Census: 29 in 66 (1 in 66+), 17 finer (12/14). NGC ID# 27ZZ, PCGS# 7336

**1901 Dollar, PR65 Cameo**  
**Beautiful Preservation and Contrast**

- 3227 1901 PR65 Cameo NGC.** Due to the scarcity of high-grade business strikes, the 1901 proof Morgan dollar is especially popular in Gem condition with designated Cameo contrast. This piece delivers bold field-motif contrast and deep mirrors, with just a tinge of light golden color around the extreme outer peripheries. The strike is sharp and there are no significant hairlines or marks. Census: 7 in 65 Cameo, 10 finer (12/14). PCGS# 87336

**PEACE DOLLARS**

**1921 Peace Dollar, MS66**  
**Carefully Preserved and Attractive**

- 3228 1921 MS66 NGC.** Although not the rarest overall, the 1921 Peace dollar is arguably the most highly sought-after issue in the series due to the high relief with which it was struck. This is a lovely Premium Gem example, showcasing remarkably well-preserved, satiny luster and above-average central design definition. Pale champagne and ice-blue toning graces each side, complementing the bold motifs. NGC has graded only six numerically finer examples (12/14). NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66**  
**Well-Struck and Lightly Toned**

- 3229 1921 MS66 PCGS.** Whispers of beige, rose, and powder-blue patina bathe the fully lustrous surfaces. The design elements are generally well-struck, though there is some of the usual softness in the centers of both sides. A few minor marks on Liberty's cheek and neck and in the left obverse field are mentioned for accuracy. PCGS has certified just seven pieces numerically finer, and NGC has so-graded only six coins (12/14). Ex: ANA Signature (Heritage, 7/2005), lot 7030. NGC ID# 2U4E, PCGS# 7356

1928-S Peace Dollar, MS65  
VAM-3, Doubled Die Obverse

**3230 1928-S MS65 ANACS. VAM-3.** A Top 50 Variety. In high grade, the 1928-S is a key issue in the Peace dollar series. This delightful Gem features well-detailed design elements, with satiny mint luster and attractive shades of champagne-gold toning. The obverse doubling characteristic of the popular VAM-3 variety is most easily seen on the letters D and W in the motto. NGC ID# 257W, PCGS# 7374

1934 Peace Dollar, MS66+  
Remarkable Preservation and Appeal

**3231 1934 MS66+ PCGS. CAC.** The 1934 Peace dollar is a recognized condition rarity in high grades, being genuinely scarce in MS66 and extremely rare any finer. This Plus-designated example will draw significant attention from Registry Set collectors and series specialists both, as it is just a whisker away from being among the finest certified examples of this date. Only four Premium Gems have been awarded a Plus designation at PCGS, and there are only three numerically finer coins at that service (12/14). This piece displays soft, satiny luster with just a touch of light golden toning. The strike is sharp and the surface preservation is superb. NGC ID# 257X, PCGS# 7375

GOLD DOLLARS

1853-D Gold Dollar, MS61  
Better Type One Issue

**3232 1853-D MS61 NGC. Variety 5-G.** The 1853-D gold dollar is a slightly scarcer issue from this mint, with a mintage of only 6,583 pieces and an estimated survival of just 150 to 200 coins in all grades. This example shows medium olive-gold patina and, save for some of the usual weakness on Liberty's hair curls, is well-struck for the issue. Census: 13 in 61, 23 finer (12/14). NGC ID# 25BW, PCGS# 7523

---

**1861-D Gold Dollar, MS61**  
**Rarest Dahlonaga Issue**  
**All Coins Struck Under Confederate Authority**

**3233 1861-D MS61 PCGS. Variety 12-Q.** The 1861-D gold dollar is the rarest and most popular issue of the series from the famous Dahlonaga Mint. All the coins were struck after March 1, 1861, under the authority of the Confederate government, making the issue a favorite of Civil War aficionados. Of course, no official mintage figures were sent to the mint director in Philadelphia, although the coins were struck by the regular Dahlonaga Mint personnel. New research by series-specialist Carl Lester suggests only 500-1,000 gold dollars were actually produced, based on assay records sent to the Confederate capital in Montgomery, Alabama.

The surviving population for the 1861-D numbers no more than 65-75 specimens in all grades, with most examples seen in the XF-AU grade range. Although the 1861-D is very rare in Mint State, a number of examples were apparently saved for their novelty value, and the number of high-quality coins available is actually a little larger than one would normally expect. A single pair of dies was used to accomplish the entire coinage, with the obverse die being a leftover die from 1860. The die was heavily polished before its use in 1861, resulting in much loss of detail in the lettering of the legends and Liberty's hair and plumes.

The present coin is an attractive Mint State specimen, with lightly marked lemon-yellow surfaces that show prooflike reflectivity in most areas. The design elements show the usual lack of detail in the legend, especially on the U in UNITED and the A in STATES, but the portrait is well-detailed and bold in most respects. Some interesting clash marks are evident on the reverse. Eye appeal is quite strong for this incredibly popular issue. Population: 7 in 61, 12 finer (12/14). NGC ID# 25CV, PCGS# 7559

---

1883 Gold Dollar, MS68  
Immaculate Type Representative

**3234 1883 MS68 PCGS.** As with many gold dollars of the period, the 1883 had a relatively low production total (only 10,800 coins), but many examples were saved early on and the issue is remarkably more plentiful in high grades than it theoretically should be. This issue in particular is a gold mine for type collectors, as the certified population of MS67 examples numbers into the low hundreds; at the MS68 level, however, only 11 pieces have been certified by PCGS, with none finer (12/14).

This representative is awash in frosty mint bloom, with deep apricot and yellow-gold hues highlighting seemingly pristine surfaces on the obverse, and vibrant white-gold and rose colors seen across the reverse. Some striking irregularities seen around portions of the rims are normal for this issue, and the central devices are crisply impressed. NGC ID# 25DM, PCGS# 7584

---

1886 Gold Dollar, MS67  
None Numerically Finer

**3235 1886 MS67 NGC.** By 1886 the gold dollar was on its way out, yet the few examples produced each year were treasured by-and-large. This Superb Gem is proof, its yellow-gold surfaces shimmering and unmarred by post-striking abrasion. Copper alloy spots are noted on both sides, more obviously the reverse. Census: 15 in 67, 0 finer (12/14). NGC ID# 25DR, PCGS# 7587

---

PROOF GOLD DOLLARS

---

1864 Gold Dollar, PR64 Ultra Cameo  
Fewer Than 20 Pieces Believed Known

**3236 1864 PR64 Ultra Cameo NGC. CAC.** The 1864 proof gold dollar had a scant mintage of only 50 coins, being part of a low-mintage trend that would continue through 1880. As with many proof issues of this period, the surviving population is significantly lower than the original production figure. Jeff Garrett and Ron Guth estimate that fewer than 20 examples remain in all grades, with two housed in the Smithsonian Institution. This estimate coincides pleasingly with the combined NGC and PCGS certified population totals which count 23 pieces, a figure that is almost certainly inflated by resubmissions. The present Ultra Cameo example is a beautiful piece in terms of both eye appeal and technical quality. The strike is bold and the field-motif contrast is superb. Yellow-gold surfaces reveal few grade-limiting hairlines. Census: 2 in 64 Ultra Cameo, 2 finer (12/14). PCGS# 97614

---

1886 Gold Dollar, PR66  
Appealing Cameo Specimen

- 3237 1886 PR66 Cameo NGC. CAC. On its creation in the late 1840s, the gold dollar was meant to be a functional denomination. By the mid-1880s, it had turned into a gift-giving novelty, with four-figure mintages of proofs and most of the coins sold going to the children of the East Coast upper crust as holiday presents. This gleaming PR66 Cameo specimen may have been bought as a gift, but if so, it was kept remarkably well. Pale yellow-gold coloration is visible full-time on the frosted devices and at the non-"black" angles of the mirrors to the light. Marvelous visual appeal. Census: 12 in 66 Cameo (1 in 66 ★ Cameo), 4 finer (12/14). NGC ID# 25EW, PCGS# 87636

## EARLY QUARTER EAGLES

### 1796 Quarter Eagle, BD-2, XF40 Popular No Stars Obverse Variety

**3238 1796 No Stars on Obverse, BD-2, R.4, XF40 NGC.** The U.S. Mint struck its first gold coins in 1795, a recorded 8,707 pieces of the five dollar denomination, also called the half eagle, and 5,583 examples of the eagle or ten dollar denomination. Delivery warrants show that the first gold coins minted were 744 half eagles delivered to the Treasury on July 31, 1795, likely of the BD-1 variety, based on the research of Harry W. Bass, Jr. and John Dannreuther. There were a total of 12 documented die marriages used to produce the 1795 Draped Bust, Small Eagle five dollar coins, from a total of 16 obverse and reverse dies.

For the 1795 ten dollar coins, there are five known die pairings among the six total obverse and reverse dies.

It was 1796 before the U.S. Mint would strike its third gold denomination, the quarter eagle, although the total recorded production was only 1,395 pieces between the No Stars and With Stars obverses. There were a total of five dies — three reverse and two obverse — in three known die pairings used to strike the 1796 No Stars and With Stars quarter eagles.

The production of a rather small number of 1796 quarter eagles in the second year of overall gold coin production at the Mint would presage a long history of the denomination's status as the red-headed stepchild of U.S. gold coinage. From 1796 through the 1834 With Motto, only 20 different dates appear on the denomination, with none struck at all dated 1799-1801, 1803, and 1809-1820.

In the first 12 years of the quarter eagle's existence, from 1796 through 1807 inclusive, the Mint would strike only a reported 19,487 pieces with a face value of \$48,717.50. In stark contrast, the Mint's production of the 1807 half eagle *alone*, of the Capped Bust Right and Capped Bust Left varieties, would amount to 84,093 pieces with a face value of \$420,465.

Even though there is an overall dearth of die varieties among the quarter eagles as compared to the much more plentiful half eagles, the 1796 No Stars quarter eagle is a special case. Numismatists from various collecting interests pursue the 1796 No Stars as the first year of the denomination, a low-mintage issue, and a one-year type all rolled into one. This coin represents the popular BD-2 variety with shorter arrows in the eagle's claw. The surviving population of the BD-2 variety probably numbers 100-125 examples in all grades.

The present coin is a pleasing XF specimen, with light wear on Liberty's hair and cheek and antique gold surfaces that show highlights of yellow and green. The surfaces are lightly abraded and retain traces of original mint luster. Census: 2 in 40, 32 finer (11/14). PCGS# 45501 Base PCGS# 7645

---

1830 Quarter Eagle, Reddish-Orange AU58  
Well-Preserved and Attractive

- 3239** 1830 BD-1, R.4, AU58 PCGS. CAC. Only a single die combination was needed to manufacture the meager quarter eagle mintage of 1830, pegged at 4,540 coins, and those dies are known in only a single state due to their short usage period. (In fact, the same reverse die, showing repunching on the U of UNITED, was carried over and reused yearly up until the end of the Capped Bust quarter eagle series, in 1834.) This lightly circulated, high-end example shows generous eye appeal due to good preservation, with only a few small and scattered signs of contact. The beautiful orange-reddish color is another plus. This is an excellent representative of the design for type purposes. PCGS# 45524 Base PCGS# 7670

---

CLASSIC QUARTER EAGLE

1836 Quarter Eagle, MS64  
Exceptional Quality  
Block 8, Variety 15

- 3240** 1836 Block 8 MS64 PCGS. Breen-6144, Variety 15, R.2. An unusually nice example of a Classic Head date typically encountered in AU. Rich lemon-gold toning is predominant but leaves a blush of ice-blue in the central recesses. Both sides are remarkably clean, even for the MS64 level, with contact limited to trivial ticks on the field above the eagle's neck. The strike is crisp, if not quite full on the forehead curls and eyebrow. More quarter eagles were struck in 1836 than in all other years of the type combined, yet high-grade pieces are decidedly rare. Population: 9 in 64, 4 finer (12/14). Ex: FUN Signature (Heritage, 7/2010), lot 4535. PCGS# 97694

## LIBERTY QUARTER EAGLES

### 1842-D Quarter Eagle, Attractive XF40

- 3241** 1842-D XF40 PCGS. CAC. Variety 3-F, a later die state with minor date doubling visible only at the bottom of the 8. (Early states show prominent doubling on 184.) Attractive reddish-gold surfaces on this XF example show no major marks, just the expected moderate wear. A nice example for the grade, adequately struck and appealing. Only 4,643 pieces were made of this issue. Population: 15 in 40, 40 finer (12/14). NGC ID# 25GJ, PCGS# 7725

### 1851-C Variety 1 Quarter Eagle, AU53 The Only Dies

- 3242** 1851-C AU53 NGC. Variety 1. The only known dies for this low-mintage issue, with a total production of only 14,923 coins. The present example, slightly finer than usual, has light yellow-gold surfaces with a typical strike that exhibits some central weakness. Considerable luster remains in the protected areas, with myriad trivial marks. Census: 10 in 53, 48 finer (12/14). NGC ID# 25HM, PCGS# 7760

### 1861 New Reverse, Type Two Quarter Eagle, MS66 Only One Numerically Finer Coin at PCGS

- 3243** 1861 New Reverse, Type Two, MS66 PCGS. CAC. The new reverse hub that was first introduced in 1859 displays smaller arrowheads and letters than the old reverse. Peach-gold satiny surfaces on this gorgeous Premium Gem have intense luster and sharply struck design features. Impeccable preservation enhances the overall eye appeal. Population: 11 in 66, 1 finer (12/14). NGC ID# 25JX, PCGS# 7794

### 1898 Quarter Eagle, MS67 Outstanding Eye Appeal

- 3244** 1898 MS67 PCGS. CAC. The peach-gold surfaces of this Superb Gem are imbued with hints of mint-green and yield intense luster. All design elements are crisply defined. Close examination reveals no significant marks. Likewise, the copper stains often seen on this issue are completely lacking on this coin. Outstanding eye appeal is aptly recognized by CAC. Population: 11 in 67, 0 finer (12/14). NGC ID# 25LN, PCGS# 7850

## PROOF LIBERTY QUARTER EAGLES

---

1843 Liberty Quarter Eagle, PR63 Cameo  
Very Rare Early Proof Gold Issue  
Only Five Examples Traced

**3245 1843 PR63 Cameo NGC.** Before the Mint began its program of commercial proof set offerings in 1858, only a handful of proofs were struck each year to satisfy the needs of influential Treasury officials or well-connected collectors. Proof gold coins of the pre-1858 era are especially elusive, as few numismatists could afford to collect coins with such high face value in the mid-19th century. Although no specific records were kept of the number of proof coins struck in 1843, we can assume that at least five gold proof sets were produced that year, as five examples of all the gold denominations issued in 1843 have been reliably reported in proof format.

Two of those gold proof sets have remained intact until the present day. One set is in the National Numismatic Collection at the Smithsonian Institution and was probably acquired for the Mint Cabinet at the time of issue. The other set is the remarkable complete copper, silver, and gold proof set in the original case that last appeared in the sale of the Amon Carter Collection in 1984. John Jay Pittman succeeded in assembling another complete proof set in an original case in 1948, and that set remained intact until recent times, as well. In addition to the coins in the sets, two more examples of 1843-dated proof quarter eagles, half eagles, and eagles have appeared as individual pieces over the years, so we can assume at least five sets were struck. A few more coins may have been produced, but none have been identified and it is extremely unlikely that any significant number of unreported survivors will appear at this late date.

The coin offered here will be a pleasant surprise for collectors of early proof gold, as it has been off-the-market and unreported for decades. We believe it is the coin that last appeared in lot 32 of the Golden Jubilee Sale (B. Max Mehl, 5/1950), although the low quality of the image in that catalog prevents a conclusive plate match. The lot description reads:

“1843 Perfect, sharp, brilliant proof gem. Very likely from a proof set. I doubt very much if more than two or three specimens are known of this Quarter-Eagle in proof condition. A specimen was offered in 1946 and it brought \$275.00. In fact a coin of this kind is almost priceless.”

The \$275 auction result Mehl cited was a strong price for the 1940-1950 era, but the coin will undoubtedly realize many multiples of that figure today. The 1843 proof quarter eagle is so rare that we can find no record of any individual example of the issue in a numismatic auction since Mehl's 1950 sale. Garrett and Guth report an example that surfaced in a non-numismatic Connecticut estate sale in 2002, and was sold for \$66,125. Pittman's three gold coins were reportedly sold as a set in 2009, at the height of the recession, for a total price of \$937,765. As Mehl said in 1950, this coin is essentially priceless.

The present coin is a delightful Select example, with razor-sharp definition on all design elements. Even the eagle's left (facing) leg, which David Akers reports is usually softly rendered, shows fine detail on this specimen. The brightly reflective fields contrast boldly with the richly frosted devices, producing a dramatic cameo effect. Only a few minor hairlines and contact marks are evident and eye appeal is terrific. It may be decades, or even a lifetime, before another example of this rare proof gold issue becomes available again. The discerning collector should bid accordingly. Census: 1 in 63 Cameo, 1 finer (12/14)

#### Roster of 1843 Proof Quarter Eagles

Grades are per the last auction appearance, unless a subsequent certification is known. It is virtually certain that some coins have been submitted, or resubmitted, to the grading services since their last public offering. Grade of the Smithsonian specimen is per Jeff Garrett and Ron Guth.

**1. PR63 Cameo NGC.** Jerome Kern; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 32; **possibly the present coin.**

**2. PR63 Cameo PCGS.** William Woodin; Woodin Collection (Thomas Elder, 3/1911), lot 966; John Zug; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 110; J.F. Bell (Jacob Shapiro); Memorable Collection (Numismatic Gallery, 3/1948), lot 103; John Jay Pittman; Pittman Collection, Part I (David Akers, 10/1997), lot 832, as part of a complete copper, silver, and gold proof set; the three gold coins were reportedly sold by Blanchard & Company in May of 2009 for \$937,765. Note: William Woodin owned a three-piece 1843 gold proof set in 1911, but he split the set, selling the quarter eagle and eagle in his 1911 sale, but retaining the half eagle until later, and exhibiting it at the 1914 ANS Exhibition. Woodin sold most of his half eagles to Waldo Newcomer circa 1924, but the inventory of Newcomer's collection did not include an 1843 proof quarter eagle, so he could not have owned a complete gold proof set of that date. Someone, possibly John Zug, must have reassembled the set before 1946, as F.C.C. Boyd had all three coins in his collection by that date. John Jay Pittman purchased the three gold coins at the sale of the Memorable Collection, and united them with the silver and copper proofs of that date, which he purchased a few months later, to form a complete 1843 proof set in an original case.

**3. Brilliant Proof.** A coin in the complete copper, silver, and gold proof set in the original case reportedly presented to President Tyler in 1843; purchased by Richard B. Winsor for \$100 circa 1880; Winsor Collection (S.H. & H. Chapman, 12/1895), lot 1067; Fernand David Collection (Jacques Schulman, 3/1930), lot 112; purchased by an agent of B. Max Mehl at the Schulman sale in Amsterdam; Frank Stoddard; “Colonel” E.H.R. Green in 1932, via Mehl; Green Estate; Mehl again; Will W. Neil; Neil Collection (Mehl, 6/1947), lot 2292; Amon Carter, Sr.; Amon Carter, Jr.; Carter Family Collection (Stack's, 1/1984), lot 630. Note: Walter Breen incorrectly identified this set as the one in a “New York State private collection,” meaning John Jay Pittman, but Pittman never owned this set.

**4. PR65 Cameo.** Mint Cabinet; National Numismatic Collection, Smithsonian Institution.

**5. Proof.** An example that surfaced in a Connecticut estate sale in 2002. NGC ID# 2876, PCGS# 87869

---

**1890 Quarter Eagle, PR64+ Deep Cameo**  
**Rare in Proof Format**

- 3246 1890 PR64+ Deep Cameo PCGS.** The 1890 proof quarter eagle had a fairly high survival rate, but it is still a rare issue in all grades. From a mintage of 93 pieces, it is estimated that as many as 50 to 60 coins survive in all grades, although Deep Cameos comprise only a small portion of total population. This high-end Choice example is one of just 11 Deep Cameo specimens certified by PCGS, with this piece being the only PR64 coin and eight pieces numerically finer (12/14). The sharp, frosty devices provide excellent contrast with the deeply mirrored fields, while both sides exhibit rich orange-gold patina. A few faint hairlines in the fields preclude a full Gem grade assessment. NGC ID# 288D, PCGS# 97916
- 

---

**1905 Quarter Eagle, PR63 Cameo**  
**Only 144 Proofs Struck**

- 3247 1905 PR63 Cameo NGC.** The 1905 proof quarter eagle is rare in all grades, but is especially difficult to locate with any degree of field-motif contrast due to a change a few years before in the way proof dies were manufactured. This Select Cameo is appealing not only for its distinctive contrast, rich honey-gold color, and sharp devices, but also for its lack of major impairments; only a few minor ticks in unobtrusive locales limit the technical grade. Census: 5 in 63 Cameo, 15 finer (12/14). NGC ID# 288V, PCGS# 87931
- 

---

**INDIAN QUARTER EAGLES**

---

**1911-D Two and a Half, AU55**  
**Strong D**

- 3248 1911-D Strong D AU55 PCGS.** An appealing Choice AU representative, this well-detailed 1911-D quarter eagle is richly patinated in bronze and coppery-gold hues, with only slight friction evident over the fields and high points of the design. The mintmark is bold, and the diagnostic wire rim along the right obverse border is clear. A linear abrasion behind the eagle's head is the only flaw of note. NGC ID# 2894, PCGS# 7943
-

1911-D Quarter Eagle, MS63  
Strong D Example

**3249 1911-D Strong D MS63 PCGS. CAC.** As the only true “stopper” in the Indian quarter eagle series, the 1911-D is highly sought-after in all grades, but especially in Mint State. Only 55,680 pieces were struck, and while Uncirculated coins are not rare in the absolute sense, they are elusive at all levels in comparison to the demand for them. Among gold series, the Indian quarter eagle set is arguably the most heavily pursued of all United States gold due to its short length and the relative affordability of most issues therein.

This Select example of the 1911-D is well-struck, with the mildly granular luster that is characteristic of this issue. Medium honey-gold color blankets both sides and the fields are unusually clean for the grade. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, MS64  
Low-Mintage Series Key

**3250 1911-D Strong D MS64 PCGS.** The 1911-D is the sought-after key to the Indian quarter eagle series, from a series-low mintage of 55,680 pieces. Most examples seen are in lower Mint State grades and the issue becomes quite scarce at the MS64 grade level. This attractive Choice example offers well-preserved yellow and rose-gold surfaces that radiate vibrant mint luster on both sides, especially important because the luster on the 1911-D is often slightly subdued. The design elements are sharply detailed and overall eye appeal is outstanding. PCGS has graded only 25 numerically finer examples (12/14). NGC ID# 2894, PCGS# 7943

---

**1912 Quarter Eagle, Frosty MS65  
Beautiful Multihued Patina**

- 3251 1912 MS65 PCGS.** The demand for Gem-quality Indian quarter eagles has increased noticeably in the last few years, particularly for the less often seen issues, such as the 1912. This date is rare in Gem condition in comparison to the demand for it, and the few pieces that are certified numerically finer are prohibitively rare for most collectors. This is a delightful Gem example, showcasing frosty luster and remarkably clean fields. Orange-gold, honey, and lilac hues intermingle across each side, delivering the attractive color array that is a highly desirable characteristic on Indian gold. The strike is sharp and the eye appeal is simply terrific. Population: 68 in 65, 5 finer (12/14). NGC ID# 2896, PCGS# 7944
- 

---

**1914 Quarter Eagle, MS64  
Challenging Issue in High Grade**

- 3252 1914 MS64 PCGS.** The 1914 Indian quarter eagle is the second-most elusive date of the series in absolute terms and the issue is even more challenging in high grade. This attractive Choice example exhibits sharp definition throughout, with pleasing orange-gold surfaces that show few signs of contact, and subtle highlights of red. PCGS has graded 60 numerically finer examples (12/14). NGC ID# 2898, PCGS# 7946
- 

---

**1914 Indian Quarter Eagle, MS64  
Second-Most Elusive Issue of the Series**

- 3253 1914 MS64 PCGS.** The 1914 Indian quarter eagle is a challenging issue from a low mintage of just 240,000 pieces. This attractive Choice specimen offers sharply detailed design elements throughout and the well-preserved orange-gold surfaces show subtle hints of rose. Satiny mint luster is evident on both sides and eye appeal is quite strong. NGC ID# 2898, PCGS# 7946
-

## THREE DOLLAR GOLD PIECES

### 1854 Three Dollar, Conditionally Rare MS66

**3254 1854 MS66 NGC.** The 1854 three dollar gold piece, the first issue of the series, is one of the more available dates in mint condition. Premium Gems, however, are very rare; indeed, NGC and PCGS have graded a mere 14 specimens in MS66 and just four coins finer.

Soft orange-gold color adorns lustrous surfaces and the design features exhibit nice definition, including the feathers and plumes of the headdress. Some of the hair below LIB in LIBERTY is a tad soft, as typically seen. Excellent wreath detail is noted on the reverse. A small mark below the C in AMERICA and a couple of faint linear marks below and to the right of the 3 denomination are mentioned solely for identification purposes. Census: 6 in 66, 1 finer (12/14). NGC ID# 25M3, PCGS# 7969

### 1857 Three Dollar, MS63 High-End Example

**3255 1857 MS63 PCGS.** Only three years after the series' inception, the mintage of the 1857 three dollar gold was down to less than 21,000 pieces, and most of the survivors today are circulated. This Select example offers lovely mint luster on peach-gold surfaces with lilac accents in the peripheral areas. Some light clash marks appear on each side and a few scattered marks, none overt. A high-end example of this early three. Population: 21 in 63 (2 in 63+), 5 finer (12/14). NGC ID# 25MA, PCGS# 7976

### 1864 Three Dollar, AU55 A Low-Mintage Issue

**3256 1864 AU55 NGC.** The 1864 three dollar comes from a low mintage of 2,630 pieces and is difficult to locate in mint condition. Mint luster resides in the recesses of this Choice AU specimen. The design elements are well-defined save for localized portions of the wreath, and yellow-gold surfaces are quite clean for a briefly circulated gold coin. NGC ID# 25MK, PCGS# 7985

### 1885 Three Dollar Gold, AU58 Only 801 Coins Struck

**3257 1885 AU58 PCGS.** While not the rarest three dollar, the 1885 is one of the more sought-after late-series issues with its low mintage of only 801 coins. Some of this date actually circulated, and such pieces give the collector extra value over one of the better Uncirculated pieces that are occasionally offered and which cost multiples of the price of this piece. The fields are prooflike, as always seen on this low-mintage issue, and each side has even, deep reddish-orange coloration. Well-struck.  
Ex: Long Beach Signature (Heritage, 5/2007), lot 2304; ANA Signature (Heritage, 7/2008), lot 2957. NGC ID# 25N8, PCGS# 8007

**1885 Three Dollar Gold, MS65  
Low-Mintage Condition Rarity**

**3258 1885 MS65 PCGS.** There are many low-mintage issues in the three dollar gold series, but the 1885 stands out as one of just three dates with a mintage below 1,000 coins (not counting, of course, the unobtainable 1870-S). Only 801 pieces were struck, and high-end examples are among the most sought-after in the series. This Gem representative is an eye-appealing piece and among the finer-known examples of this date. The devices are sharply struck and frosted, providing subtle contrast with nearly prooflike fields. Only a few light, scattered marks are present, and both sides show rich orange-gold coloration. Population: 13 in 65, 7 finer (12/14). NGC ID# 25N8, PCGS# 8007

**1887 Three Dollar, Well-Preserved MS65  
Great Eye Appeal**

**3259 1887 MS65 NGC.** The yellow-gold surfaces are remarkably free of mentionable abrasions, to the point that just some faint stacking contact — undetectable to the unaided eye — may be all that precludes a higher grade on this lovely Gem 1887 three. A small mint-made strike-through just above Liberty's forehead should not be confused for an abrasion. Liberty's cheek is free of mentionable contact, and the reverse shows similar excellent preservation. Moderate strike softness appears on the bowknot on the reverse, on the tips of the headdress feathers on the obverse, and on the hair curls just below LIBERTY, all as typically seen for the issue. The eye appeal is nonetheless top-notch, making this a great choice for a type or date set. Census: 14 in 65, 5 finer (12/14). NGC ID# 25NA, PCGS# 8009

## PROOF THREE DOLLAR GOLD PIECES

### 1885 Three Dollar Gold, Gem Cameo Proof A Late-Series Rarity

- 3260 1885 PR65 Cameo PCGS. CAC.** The total mintage of three dollar gold pieces, Mint State and proof alike, did not reach four digits, putting mutual pressure on the two types. Of those coins, 109 were proofs, among them this Cameo Gem proof with exquisite “orange-peel” texture in the fields. Color is predominantly sun-gold with occasional deepening in places, mostly at the margins, and as CAC acknowledges, the surface preservation and contrast are solid by Cameo Gem standards. By commercial need in 1885 alone the three dollar gold piece had long outstayed its welcome, but the fortunate collector who wins this lot will want to keep it for many years. Population: 5 in 65 Cameo, 4 finer (12/14). NGC ID# 28AU, PCGS# 88049

### 1888 Three Dollar Gold, PR65 Popular Proof Type Issue

- 3261 1888 PR65 PCGS. CAC.** The 1888 had the highest mintage of any proof three dollar gold issue, and is an ideal choice for the collector seeking a single representative of this type in proof format. Most known examples, however, are in the Choice and lower grade levels, and Gem or finer pieces are rare. The certified population reports are no doubt inflated by resubmissions, and it is believed that as little half of the original mintage survives in any condition. This piece is boldly struck and displays modest field-device contrast that must have just missed a Cameo designation. Rich orange-gold patina accents the mirrored fields, heightening the visual appeal. Population: 25 in 65, 15 finer (12/14). NGC ID# 28AX, PCGS# 8052

---

1889 Three Dollar Gold, PR64 Cameo  
Starkly Contrasted Final-Year Proof

**3262 1889 PR64 Cameo NGC.** Proof three dollar gold piece production was unusually low in the final year of the denomination, with only 129 coins produced; this in contrast to mintages of 142 to 291 coins during the previous few years. Much to the delight of collectors, however, a significant portion of the mintage — as many as 80 to 100 pieces — survives in collectible grades. The certified population total of 141 examples in all grades — more than were actually struck — is highly inflated by resubmissions. This piece is a scarce Cameo, with remarkably bold, frosty devices and deep, glassy mirroring in the fields. Some faint, minor hairlines limit the technical grade, but hardly impede the eye appeal. Census: 13 in 64 Cameo, 15 finer (12/14). NGC ID# 28AY, PCGS# 88053

---

---

EARLY HALF EAGLES

1798 Half Eagle, AU53  
Elusive Heraldic Eagle, Large 8, BD-5

**3263 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-5, High R.5, AU53 NGC.** Bass-Dannreuther Die State c/b. A respectable mintage of 24,867 Capped Bust Right half eagles was produced in 1798. Eight die varieties are known for the date, one with the old Small Eagle reverse and seven with the Heraldic Eagle motif. This coin represents the Heraldic Eagle BD-5 variety, with a large 8 in the date and the reverse stars arranged in a perfect cross pattern. The BD-5 is a scarce-to-rare variety with a surviving population of just 30-40 examples in all grades. The BD-5 probably accounted for 2,250-3,250 pieces of the reported mintage. This was the only use of the obverse die, but the reverse was employed again to strike the 1799 BD-2 variety.

The present coin is an attractive AU53 example, with well-detailed design elements that show a touch of the always seen softness on the centers. Harry Bass noted this issue was, "Shallowly hubbed or lapped." A long obverse die crack is evident from star 7 across the bust to the 8 in the date, with another in the field below ER in LIBERTY. The lightly abraded greenish-gold surfaces retain considerable amounts of original mint luster. PCGS# 507325 Base PCGS# 8078

---

1808 Half Eagle, BD-4, AU Details  
Ex: Eliasberg

- 3264 1808 Wide 5D, BD-4, High R.3 — Improperly Cleaned — NGC Details. AU. Ex: Eliasberg. Bass-Dannreuther Die State c/a. A fairly available variety, with more than 175 examples believed extant. This piece is well-detailed, with medium green-gold surfaces that retain remnants of luster in the border recesses. Lightly cleaned, but with pleasing eye appeal.  
Ex: B.H. Collins (6/1893); J.H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Ruddy, 10/1982), lot 360. PCGS# 507605 Base PCGS# 8102

1808 Half Eagle, BD-4, AU55  
Attractive, Original Patina

- 3265 1808 Wide 5D, BD-4, High R.3, AU55 NGC. Bass-Dannreuther Die State c/a. A moderately available variety, with 175 to 225 examples believed known. This is the second of two uses for this obverse and the first of two uses for this reverse. The present coin is well-struck and sharply detailed, with hints of luster illuminating the original green-gold patina on each side. There is no evidence of adjustment marks, and the surfaces are pleasantly smooth. PCGS# 507605 Base PCGS# 8102

1808 Half Eagle, BD-4, MS61  
Unlisted Late Die State  
Heavily Clashed Reverse

- 3266 1808 Wide 5D, BD-4, High R.3, MS61 NGC. Bass-Dannreuther Die State — unlisted. BD-4 has long been believed to only exist in a single die state, with a lapped obverse and a perfect reverse. This Mint State example, however, exhibits bold clash marks over the entire reverse, confirming the existence of a second die state for this variety. John Dannreuther, writing in *Early U.S. Gold Coin Varieties*, remarks that, "This variety is the first early gold coin that seems to have a single die state for both dies for the entire production run," but indeed, it is now known to exist in a second, later die state as well.

This clashing apparently occurred near the end of 1808 half eagle production, as the silhouette of the 1808 date is clearly transferred to the upper reverse behind STATES. Other clash marks are prominent throughout, with Liberty's entire portrait boldly outlined on the reverse. This clashing is much more extensive than is seen on the earliest die state of the 1809/8 die marriage, suggesting that this reverse was lapped prior to its usage with the 1809 obverse. In reference to the 1809/8 variety, John Dannreuther mentions the possibility of a perfect die state, but adds that it "probably does not exist," and we now know that it does not, since the reverse clashed prior to that die pairing. The die state sequence, then, consists of the 1808 c/a state with a perfect reverse, this late 1808 state with a heavily clashed reverse, and the 1809 a/b state, with the lapped reverse.

This piece is well-struck, with lustrous green-gold surfaces and minimal abrasions for the grade. A study of our auction archives reveals that we have offered a handful of pieces with this late die state over the past two decades, but only one was recognized. This is a landmark coin and an important acquisition for the advanced specialist. PCGS# 507605 Base PCGS# 8102

**1810 Capped Bust Left Five, MS63  
Popular BD-4 Variety**

**3267 1810 Large Date, Large 5, BD-4, R.2, MS63 NGC.** Bass-Dannreuther Die State a/a. A substantial mintage of 100,287 Capped Bust Left half eagles was accomplished in 1810, with four known die varieties for the date. Most of the mintage, probably 75,000-90,000 pieces including the present coin, represented the BD-4 variety, with large numerals in the date and a squat 5 in the denomination. The 1810 BD-4 is one of the most available varieties of the design and is often the choice of type collectors seeking an example of the Capped Bust Left half eagle. The obverse die was previously used to strike the 1810 BD-3 variety and this was the only use of the reverse.

This impressive Select specimen is sharply detailed in most areas, with just a touch of softness on the eagle's claws and the top arrow fletching. The lustrous yellow-gold surfaces show only minor signs of contact and visual appeal is quite strong. Census: 30 in 63 (2 in 63+), 32 finer (12/14). PCGS# 507598 Base PCGS# 8108

**1810 Half Eagle, BD-4, MS63  
Remarkably Eye-Appealing Type Coin**

**3268 1810 Large Date, Large 5, BD-4, R.2, MS63 PCGS.** Bass-Dannreuther Die State a/a. This is one of the few early half eagle varieties that can be considered available; more than 500 examples are believed to survive in all grades, which makes BD-4 an ideal choice for the collector seeking a single type or date representative. The present piece is a scarce Mint State example, however, and is a highly attractive piece, as well. The stars and central devices are boldly impressed and the surfaces exhibit remarkably frosty luster in medium green-gold hues. Some minor luster grazes on the cheek seem to be all that preclude an even finer grade on this truly eye-appealing type coin. PCGS# 507598 Base PCGS# 8108

1812 Narrow 5D Half Eagle, BD-2  
Uncirculated Sharpness

- 3269** 1812 Narrow 5D, BD-2, High R.4 — Obverse Improperly Cleaned — NGC Details. Unc. This Narrow 5D half eagle, BD-2, is by far the scarcer (verging on the R.5 “rare” category) of the two 1812 half eagle varieties, as the Wide 5D is merely R.3 or “scarce.” Despite some minor surface problems — some planchet porosity visible in the center obverse, a few scattered contact marks — and the adjustment marks visible at the left and right obverse margins, this remains a coin with a lot of meat on its bones. Both the peripheral and central details are sharply struck, and the attractive color ranges from lighter yellow-gold to orange-gold. A couple of trivial ticks show near Liberty’s mouth. As the saying goes, “buy the coin, not the holder.”

CLASSIC HALF EAGLES

1834 Crosslet 4 Half Eagle, Well-Defined AU50

- 3270** 1834 Crosslet 4 AU50 PCGS. Second Head, McCloskey 5-D, R.4. The key to a collection of Philadelphia Mint Classic fives, the Crosslet 4 is scarcer than its Plain 4 counterpart. Rich apricot-gold patina imbued with hints of olive-green embraces this AU example. The design elements are well-defined save for the usual softness in some of the star centers. A few minute marks are in concert with a briefly circulated gold coin. Population: 5 in 50, 37 finer (12/14). PCGS# 8172

1834 Classic Head Half Eagle, AU55  
Elusive Crosslet 4, McCloskey 5-D Variety

- 3271** 1834 Crosslet 4 AU55 PCGS. Second Head, McCloskey 5-D, R.4. The 1834 Classic Head half eagle with the Crosslet 4 in the date is much more elusive than its Plain 4 counterpart. This attractive Choice AU specimen offers lustrous yellow-gold surfaces that show the expected number of minor abrasions for the grade, with just a touch of wear on the well-detailed design elements. Population: 12 in 55, 16 finer (12/14). PCGS# 8172

1834 Half Eagle, MS61  
McCloskey 5-D, Crosslet 4

- 3272** 1834 Second Head, Crosslet 4, Breen-6503, McCloskey 5-D, R.4, MS61 NGC. This is the scarcer Crosslet 4 variety, notable for the different logotype in the date. While the Plain 4 variety is plentiful for type purposes, the Crosslet 4 half eagle is rare in Mint State. The present example is well-struck on the stars and central devices, with bright, green-gold coloration and semireflective fields. Evenly distributed chatter in the fields accounts for the grade. This is one of the scarcest issues in the short-lived Classic Head type, rivaled only by the 1838-C and D branch mint issues. Census: 6 in 61, 5 finer (12/14). PCGS# 8172

## LIBERTY HALF EAGLES

1839 Half Eagle, Sharply Struck MS62  
First Year of the Design Type

**3273 1839 MS62 PCGS.** This was the first year of the Liberty Head design on the five dollar gold piece. The typical grade is Extremely Fine or About Uncirculated. Mint State pieces are elusive; PCGS and NGC have certified 56 Uncirculated pieces, none finer than near-Gem. The peach-gold surfaces of this MS62 example display hints of mint-green and retain nearly full luster. The design elements are sharply struck except for minor softness in a couple of the star centers and on the arrow feathers. A very nice specimen for the grade designation. Population: 7 in 62, 8 finer (12/14). NGC ID# 25S7, PCGS# 8191

1839-C Liberty Half Eagle, MS60  
Underrated One-Year Type

**3274 1839-C MS60 NGC. Variety 1.** The 1839-C Liberty half eagle represents a one-year design type, as the design of the bust was slightly altered in 1840, with differences easily seen in the shape of the truncation and details of the hair. From a mintage of 17,205 pieces, the 1839-C is a scarce issue, and its importance has been overlooked by nonspecialists in the past. Perhaps 150-200 examples survive in all grades today, and Mint State specimens are very rare.

The present coin is an attractive MS60 example, with pleasing greenish-gold surfaces that show the minimum number of minor contact marks for the grade. The design elements are well-detailed, with just a touch of softness on the eagle's claws. Vibrant mint luster is evident on both sides and eye appeal is outstanding. Census: 2 in 60, 11 finer (12/14). NGC ID# 25S8, PCGS# 8192

**1861-S Half Eagle, AU53  
Scarce San Francisco Issue**

- 3275 1861-S AU53 NGC.** The San Francisco Mint struck only 18,000 half eagles in 1861, all of which were dispersed into circulation where they remained for use in Western commerce. Fewer than 100 examples are believed to survive in all grades, with none known in Mint State; the finest known examples are a handful of AU58 pieces certified at NGC, and even the Smithsonian coin grades just XF40, per Jeff Garrett and Ron Guth. This AU example is well-detailed, with bright bronze-gold surfaces that yield the occasional glint of luster when rotated beneath a light. Census: 8 in 53, 12 finer (12/14). NGC ID# 25VN, PCGS# 8291

**1879 Half Eagle, MS64+  
Very Rare in Finer Grades**

- 3276 1879 MS64+ PCGS. CAC.** The 1879 half eagle issue (301,920 coins) is somewhat more available than its San Francisco counterpart, especially in mint condition, and significantly more common than the rare 1879-CC five dollar issue. This Choice representative features sharply defined hair curls, stars, olive leaves, and claws. Frosty luster and lemon-gold color combine over each minimally marked side. Population: 19 in 64 (4 in 64+), 4 finer (12/14). NGC ID# 25X7, PCGS# 8348

**1896-S Half Eagle, MS63  
Significantly Rare This Nice**

- 3277 1896-S MS63 PCGS. CAC.** A scarce date in all grades, the 1896-S half eagle becomes a notable condition rarity in MS63 and better condition. This piece is well-struck, with satiny yellow-gold luster. Fewer abrasions are present than are expected for the Select grade level, giving this piece superior eye appeal. Population: 6 in 63, 5 finer (12/14). NGC ID# 25YL, PCGS# 8393

**1896-S Five Dollar, MS64  
Rare This Fine**

- 3278 1896-S MS64 PCGS.** Frosty wheat-gold luster highlights sharp stars and central devices on this near-Gem 1896-S half eagle. A few faint grazes and tiny ticks preclude a finer assessment, but are hardly detracting in and of themselves. This issue is a distinctly scarce date in any Mint State grade and is a notable condition rarity in Choice condition. A few Gems have been certified, but these are prohibitively rare. Population: 3 in 64, 2 finer (12/14). NGC ID# 25YL, PCGS# 8393

**1897 Half Eagle, MS66  
Tied for Finest Known**

- 3279 1897 MS66 PCGS. CAC.** An absolutely magnificent Premium Gem example of this popular 19th century type coin, this 1897 half eagle is among the finest known examples of the date. This piece is tied with just one other as the finest example certified by PCGS, while NGC has graded only eight coins in MS66, also with none finer (12/14). The rich yellow-gold surfaces are enhanced by subtle hints of rose. The strike is razor-sharp throughout, and the mint luster is vibrant. Eye appeal is overwhelming.  
Ex: Long Beach Signature (Heritage, 9/2010), lot 5379. NGC ID# 25YM, PCGS# 8394

---

**1906 Half Eagle, MS66**  
**Lovely, Undisturbed Mint Luster**

- 3280 1906 MS66 PCGS. CAC.** The appeal of this remarkably well-preserved Premium Gem, with frosty luster in shades of rose, honey, and lilac-gold, and boldly struck design elements, is seemingly unrivaled by any other example in this grade. Close study with a loupe finds only a single discernable surface flaw — a tiny contact mark on Liberty's lower jaw — that limits the grade, but it is hardly detectable to the unaided eye. A superb type coin and also conditionally rare. Population: 22 in 66, 4 finer (12/14). NGC ID# 25Z9, PCGS# 8413

---

**1908 Liberty Half Eagle, Frosty MS66**

- 3281 1908 MS66 PCGS. CAC.** PCGS has awarded a Premium Gem numeric grade to 35 examples of the 1908 Liberty half eagle, with eight coins certified numerically finer (12/14), though these are actively sought by type specialists and draw strong demand at auction. This piece displays softly frosted shades of peach and green-gold luster, while the design elements are bold, and the preservation is outstanding. An excellent final-year type coin. NGC ID# 25ZE, PCGS# 8418

---

**PROOF LIBERTY HALF EAGLES**

**1873 Half Eagle, PR60 Details**  
**Extremely Rare, Only 25 Proofs Struck**

- 3282 1873 Closed 3 — Altered Surfaces — ANACS. Proof, PR60 Details.** The 1873 proof half eagle is a major rarity in any condition. Only 25 pieces were ever struck, and it is estimated that as few as 14 to 18 survive in all grades. With high-end examples bringing in the mid-five-figure range, this Details coin provides a slightly more affordable opportunity for the eager collector to acquire an example of this rare issue. The design elements are well-struck, with medium yellow-gold color overall. The fields lack mirroring due to the altered surfaces — close examination reveals a flaky texture in the recesses. NGC ID# 28CA, PCGS# 8468
-

---

1885 Liberty Five, PR66 Ultra Cameo  
Rare 19th Century Proof Gold Issue

**3283** 1885 PR66 Ultra Cameo NGC. CAC. The date is placed to the left and the peak of the 1 is much nearer to the bust point than the tip of the 5 is to the right end of the truncation. From a mintage of only 66 proofs, few are known to survive today regardless of grade. For the 1980s perspective, Akers estimates that less than 25 examples survive, while Breen lists it as "Extremely rare, more so than its mintage suggests; enough so as to be almost a forgotten coin."

Contemporary sources are more divided on the availability of the proof 1885 half eagle; perhaps the availability of certified data, rather than crystallizing the rarity of the date, has served to obscure it instead with resubmissions. For example, PCGS lists "25 to 30 known" proof 1885 half eagles, in conjunction with that firm's 21 certification events for the issue. By contrast, Garrett and Guth in the *Encyclopedia of U.S. Gold Coins* list a much lower ceiling, "perhaps 20 or so examples known."

On this Ultra Cameo Premium Gem proof, the fields are deeply mirrored with the characteristic "orange-peel" appearance and contrast drastically against the deeply frosted devices. Both sides are essentially untuned with a rich, golden finish. For pedigree purposes, a tiny horizontal scratch is seen to the left of Liberty's throat, and a contact mark is visible on her chin. A rare opportunity for the gold specialist. Census: 2 in 66 Ultra Cameo, 3 finer (12/14). NGC ID# 28CN, PCGS# 98480

---

---

1889 Half Eagle, PR63 Cameo  
Rare in All Grades  
Only 15 to 20 Examples Believed Known

**3284** 1889 PR63 Cameo PCGS. The 1889 proof half eagle is a low-mintage anomaly of the late 1880s; typical mintage figures for the period range from 72 to 95 pieces, yet the 1889 was struck to the limited extent of just 45 coins, likely a reflection of reduced collector demand during the year. The survival rate is even lower, with only 15 to 20 examples extant, per the research of Jeff Garrett and Ron Guth. The combined PCGS and NGC populations of 24 examples in all grades is likely inflated slightly by resubmissions, as two of the known survivors are raw in the Smithsonian Institution. The current offering is a sharply struck and deeply reflective Cameo, with warm honey-gold color and only minor hairlines to limit the grade. This is the first example of this proof issue we have offered at auction in four years. Population: 1 in 63 Cameo, 3 finer (12/14). NGC ID# 28CT, PCGS# 88484

---

---

1900 Half Eagle, PR66+ Cameo  
Rare This Well-Preserved  
Sole Plus-Designated Cameo in This Grade

**3285 1900 PR66+ Cameo NGC.** For unknown reasons, there was a sharp spike in proof half eagle production in 1900, with a total of 230 coins produced. This more than doubled the previous year's mintage of 99 proofs, and also dwarfed the following year's production of 140 coins. Surprisingly, though, the 1900 proof is no more available today than are most other issues of the period, leading to the generally accepted reasoning that a number of pieces must have been melted as unsold at the end of the year, or wound up being spent or melted later on.

Jeff Garrett and Ron Guth estimate only 75 to 100 pieces are known in all grades, a figure that is fairly close to the NGC and PCGS certified population totals, which count 121 coins, including an unknown number of resubmissions (12/14). These pieces are fairly scattered across the grade spectrum, as well as between the Deep Cameo, Cameo, and non-Cameo categories, with the former two groups being significantly the smallest.

This Plus-designated Premium Gem Cameo is a visual marvel and is technically impeccable. All design elements are sharply brought up and display a distinct coating of fresh mint frost, set against deeply mirrored and carefully preserved fields. Close study with a loupe reveals some faint, parallel die polishing lines in the fields and on the relief elements (mint-made), and should not be confused with hairlines or other post-mint surface impairments. The quality and visual appeal of this piece is exceptional. NGC has certified only five Cameos in PR66 — this coin being the sole Plus-graded example — with just four numerically finer (12/14). A premium quality turn-of-the-century proof five. NGC ID# 28D6, PCGS# 88495

---

1904 Half Eagle, PR64 Cameo  
Modest Gold-On-Black Contrast

- 3286 1904 PR64 Cameo PCGS. CAC. The 1904 five dollar is a rare date in proof, with a reported mintage of 136 pieces. Garrett and Guth (2008) estimate that 50 to 75 examples are extant today. PCGS and NGC combined have certified 60 specimens with a Cameo finish, a number of which are likely resubmitted coins. The current near-Gem offering display modest gold-on-black contrast when viewed at a direct, overhead angle. All design features are razor-sharp and each side reveals some minor, unobtrusive grazes that prevent Gem classification. Nevertheless, this piece possesses great eye appeal, aptly recognized by CAC. Population: 14 in 64 (1 in 64+) Cameo, 6 finer (12/14). NGC ID# 28DA, PCGS# 88499

---

## INDIAN HALF EAGLES

1908 Indian Head Five Dollar, MS65  
Impressive First-Year Representative

- 3287 1908 MS65 PCGS. The 1908 is the introductory issue in Bela Lyon Pratt's Indian Head half eagle series featuring the recessed design, and examples are eagerly sought-after for type purposes. This impeccably preserved Gem is strongly defined throughout, including the headdress and wingtip feathers. Glowing luster rolls over rich orange-gold surfaces that show glimpses of lighter pale-gold color. A small speck of copper toning occurs on the Indian's cheekbone. From a mintage of 577,845 coins, PCGS has graded only 22 examples numerically finer (12/14). NGC ID# 28DE, PCGS# 8510

**1908-S Half Eagle, MS65  
Low-Mintage San Francisco Issue**

**3288 1908-S MS65 NGC.** The 1908-S had a low mintage of only 82,000 coins, and is one of the more conditionally challenging dates in the Indian half eagle series. Mint State examples are elusive in all grades, and become decidedly rare in Gem and finer condition. This representative is remarkably lustrous for the type, with pleasantly clean fields and sharp definition throughout the headdress and eagle's feathers. This was the first half eagle produced at the San Francisco Mint since the great earthquake of 1906 that nearly destroyed the city. Census: 17 in 65, 18 finer (12/14). NGC ID# 28DG, PCGS# 8512

**1909-O Half Eagle, XF45  
Appealing Collector-Grade Example**

**3289 1909-O XF45 NGC.** An unusual grade for any Indian half eagle, as most examples of this type did not circulate enough to become this worn. This Choice XF 1909-O example is nonetheless well-detailed for the grade, with uniform olive-bronze color over each side. The mintmark is worn, but clear. This date is widely popular not only as a scarce key issue, but also as the final half eagle struck at the New Orleans Mint and the only O-mint issue of the Indian Head type. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, AU Details  
Sole New Orleans Issue of the Type**

**3290 1909-O — Improperly Cleaned — NGC Details. AU.** A well-detailed example of this final New Orleans half eagle issue, with satiny surfaces and bronze-gold color overall. Apparently struck on a defective planchet, with numerous large planchet laminations on both sides, most prevalent on the reverse over the eagle's wing and through E PLURIBUS UNUM. Lightly cleaned, but appealing nonetheless. NGC ID# 25ZK, PCGS# 8515

**1911-D Indian Half Eagle, AU58  
Elusive Issue in High Grade**

**3291 1911-D AU58 PCGS. CAC.** From a mintage of 72,500 pieces, the 1911-D Indian half eagle is an elusive, underrated issue that is often overshadowed by its more famous quarter eagle counterpart. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the orange-gold surfaces are lustrous and lightly abraded. NGC ID# 28DR, PCGS# 8521

**1912 Half Eagle, Sharply Struck MS64+**

**3292 1912 MS64+ PCGS. CAC.** Subtle greenish-gold patina covers both sides of this high-end near-Gem, each of which displays pleasing luster and sharply struck design elements, including the feathers on the headdress and the eagle's shoulder. A handful of minute marks prevents Gem classification. Gems are very scarce and higher-grade specimens are virtually unobtainable. NGC ID# 28DS, PCGS# 8523

## LIBERTY EAGLES

1857-S Ten Dollar, AU55  
Better S-Mint Issue

- 3293 **1857-S AU55 PCGS. CAC.** With a mintage of only 26,000 pieces, the 1857-S eagle is scarce in all grades and rare in AU or finer condition. This Choice AU representative is well-detailed, with bright, yellow-gold surfaces that retain areas of semiprooflike mirroring in the fields. Housed in an old green label holder. Population: 10 in 55, 8 finer (12/14). NGC ID# 263V, PCGS# 8624

1858-O Eagle, Attractive AU58 Example

- 3294 **1858-O AU58 PCGS. Variety 1.** Even though the Liberty Head 1858-O eagle issue was struck to the extent of only 20,000 coins, that amount was the *largest* of the three mints striking the denomination that year — Philadelphia made 2,521 pieces and San Francisco struck 11,800 examples. This piece shows much prooflike luster remaining on the surfaces, particularly in the protected areas around the devices, while the fields show a minor thinning of the luster consistent with a short spate in circulation. This piece boasts a nice, sharp strike and is free of mentionable distractions, an extremely attractive example. Population: 12 in 58, 7 finer (12/14). NGC ID# 263X, PCGS# 8626

1866 Motto Ten, MS61+  
Second Finest Certified

- 3295 **1866 MS61+ NGC.** The 1866 With Motto eagle is a scarce issue in all grades; it is decidedly rare in XF and AU, and Jeff Garrett and Ron Guth note that it is “almost impossible to find” in Mint State. NGC has encapsulated six pieces as Uncirculated, including two MS60 coins, three MS61 pieces (1 in 61+), and a sole Choice example, although these numbers may include one or more resubmissions; PCGS has not certified any finer than AU58 (12/14). Due to the Plus designation, the MS61 coin here offered sufficiently ranks as the second finest known. The strike is sharp and the surfaces display warm straw-gold luster. Noticeable semiprooflike mirroring in the fields delivers excellent eye appeal and the surfaces reveal only minor abrasions for the grade. An important rarity and a very attractive coin. NGC ID# 264J, PCGS# 8649

1867 Ten Dollar, Unc Sharpness  
Seldom Seen in Any Grade

**3296 1867 — Improperly Cleaned — NGC Details. Unc.** The 1867 eagle is a rare coin in all grades, boasting a low mintage of only 3,090 pieces, and is prohibitively rare in Mint State, with just three examples so-graded at NGC and PCGS combined. This representative is unworn, though light cleaning precludes a numeric grade from NGC. The strike is sharp and the fields display substantial semiprooflike mirroring amid bright yellow-gold hues. Some light, scattered abrasions are present, but not overly distracting. NGC ID# 264L, PCGS# 8651

1870 Ten Dollar, MS60  
Underrated Philadelphia Issue  
The Sole Coin Certified in Mint State

**3297 1870 MS60 NGC.** Ex: Kupersmith Collection. The 1870 eagle had a low mintage of only 3,990 coins, virtually all of which experienced heavy circulation and a correspondingly high attrition rate. The issue is scarce in all grades and is a notable rarity in XF and AU; this piece ranks as the sole finest certified and as the only piece encapsulated as Mint State. Bright yellow-gold luster illuminates sharply rendered design elements and slight reflectivity in the fields. No evidence of wear is present, and we instead note only grade-consistent abrasions over both sides. With such a low survival rate, the 1870 ten dollar seems somewhat underappreciated in comparison to branch mint issues of similar rarity. NGC ID# 264T, PCGS# 8657

---

1881-CC Ten Dollar, Sharply Struck AU58  
Elusive in Mint Condition

- 3298 1881-CC AU58 PCGS. Variety 1-A. The only known die pair. The 1881-CC is elusive in mint condition with fewer than 70 such pieces certified by PCGS and NGC, primarily no finer than MS62. This sharply struck near-Mint example displays ample luster on its yellow-gold surfaces. Light circulation marks are visible over each side. Population: 32 in 58, 21 finer (12/14). NGC ID# 265X, PCGS# 8692

---

1883 Ten Dollar, MS64  
Conditionally Rare  
Tied for Finest Certified

- 3299 1883 MS64 PCGS. The 1883 gold eagle is available in grades through MS63, but it suddenly becomes a major rarity in MS64, and finer pieces are unknown. This piece is tied with just two others as the finest certified at PCGS, and is rivaled at NGC by only four other numerically equal examples (12/14). The strike is sharp and both sides display frosty orange-gold luster. A short, thin scratch near star 2 is the only abrasion of note. NGC ID# 2666, PCGS# 8699

---

1890-CC Eagle, Lustrous MS61

- 3300 1890-CC MS61 NGC. Variety 1-A. IN GOD WE TRUST is lightly die doubled, as always for this low-mintage Carson City issue. A sharply struck sun-gold ten with good luster and fewer abrasions than is customary for the MS61 level. One small strike-through near the lower neck curl is as made. Much scarcer in Uncirculated grades than its 1891-CC successor. NGC ID# 266S, PCGS# 8718

---

PROOF LIBERTY EAGLE

---

1888 Ten Dollar, PR63 Cameo  
Rare in Proof Format  
Only 22 Pieces Certified in All Grades

- 3301 1888 PR63 Cameo PCGS. The 1888 proof eagle is significantly scarcer than its fairly substantial mintage of 72 coins would suggest. PCGS CoinFacts estimates that 25 to 30 coins are extant, though we feel the existing population is closer to David Akers' estimate of only about 20 coins in all grades. Two pieces are in the Smithsonian, and the combined PCGS and NGC populations count just 22 additional examples including an unknown number of resubmissions (The PR63 Cameo NGC coin is known to be an earlier encapsulation of this same coin). This is only the fourth 1888 proof eagle we have offered at auction in the past 20 or so years, a fact that in and of itself confirms greater rarity for the issue than is generally realized. The last example we offered was a PR63 Deep Cameo coin that sold as part of our February 2009 Long Beach sale and realized \$17,250. The present coin is fully struck, with deep orange-gold color and stark field-motif contrast. Light hairlines in the fields limit the grade, but are hardly distracting to the unaided eye. Population: 2 in 63 (1 in 63+) Cameo, 2 finer (12/14). NGC ID# 28FT, PCGS# 88828

## INDIAN EAGLES

### 1907 No Periods Indian Eagle, Appealing MS64

- 3302 1907 No Periods MS64 PCGS.** An near-Gem example of the first-year No Periods variety, showing uniformly attractive peach-gold patina on surfaces that show few marks for the grade. This piece is considerably nicer than most survivors of the issue and would make an excellent type coin to represent this Saint-Gaudens design, as reinterpreted for production by Mint Engraver Charles Barber. NGC ID# 28GF, PCGS# 8852

### 1907 No Periods Indian Ten Frosty Gem Type Coin

- 3303 1907 No Periods MS65 PCGS. CAC.** Frosty orange-gold surfaces reveal few imperfections as radiant luster cartwheels around each side. The design elements are well-struck, and slight weakness on the central hair curls is due only to inadequate engraving of the die. The 1907 No Periods Indian ten is the most available No Motto issue in the series, ideal for type representation. NGC ID# 28GF, PCGS# 8852

### 1908 Indian Eagle, Motto, MS64 Excellent First-Year Type Coin

- 3304 1908 Motto MS64 PCGS.** The 1908 Indian eagle represents the first year of the Motto design, making it a favorite choice of type collectors. This attractive Choice example displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and highlights of green. Eye appeal is outstanding. NGC ID# 28GJ, PCGS# 8859

### 1908-D Indian Ten, MS63 With Motto Variant

- 3305 1908-D Motto MS63 NGC.** Speckles of darker toning visit the peach-gold surfaces of this Select D-mint ten dollar. A touch of granularity is also noted, a typical characteristic of this issue. The design elements are well-defined including a bold mintmark. The luster is somewhat soft, and a few marks and scuffs, also very typical of this date, are visible over each side. Akers (2008) says of the 1908-D Motto ten that it "is difficult to locate with overall smooth surfaces." Nevertheless, this is a decent type coin. Census: 30 in 63, 33 finer (12/14). NGC ID# 28GK, PCGS# 8860

### 1908-S Ten Dollar, MS62 A Low-Mintage Issue

- 3306 1908-S MS62 PCGS.** The 1908-S ten dollar comes from a low mintage of 59,850 pieces. Mint State coins can be difficult to acquire, especially in near-Gem and higher. The peach-gold lustrous surfaces of this MS62 specimen display a fine granular appearance as often seen. The design elements are well-struck. Minor handling marks, especially on the reverse, limit the grade. NGC ID# 28GL, PCGS# 8861

### 1909-D Ten Dollar, MS63 Better Denver Issue

- 3307 1909-D MS63 NGC.** The 1909-D Indian eagle is a challenging date in Mint State, and most such pieces are only in the MS62 and lower grades. Select examples are scarce, and finer pieces are exceedingly so. This representative is well-struck, with satiny wheat-gold luster. A small tick on Liberty's cheek below the eye is the only abrasion of note. Census: 62 in 63, 32 finer (12/14). NGC ID# 28GN, PCGS# 8863

**1910 Ten Dollar, MS65  
Scarce, High-End Example**

- 3308 1910 MS65 PCGS.** A challenging date in MS65, the 1910 Indian eagle becomes genuinely rare any finer. This piece is well-struck and frosty, with just minor luster grazes on the high points of the design limiting the grade. Consistent wheat-gold color encompasses each side, delivering warm appeal. Population: 60 in 65 (3 in 65+), 28 finer (12/14). NGC ID# 28GR, PCGS# 8865

**1913 Ten Dollar, MS65  
Conditionally Scarce**

- 3309 1913 MS65 NGC.** A production of 442,000 eagles makes this Philadelphia Mint issue one of the more accessible dates in the Saint-Gaudens Indian Head series. However, Gems such as this are decidedly scarce. Orange-gold color dominates each side, accented with intermittent coppery hues. The striking characteristics are bold, as is typical for the issue. A few small ticks are well-hidden within the eagle's feathers and are all that prevent an even higher grade designation. Only 17 examples are rated numerically higher at NGC (12/14). NGC ID# 28GY, PCGS# 8873

**1913-S Ten Dollar, MS61  
Popular, Low Mintage Issue**

- 3310 1913-S MS61 PCGS. CAC.** A good amount of luster still remains on this MS61 eagle despite the several contact marks over each side. The design elements are generally well-struck. The 1913-S is a popular S-mint issue within the Indian Head ten dollar series, due in part to its mintage of only 66,000 coins. NGC ID# 28GZ, PCGS# 8874

**1914-S Eagle, Lustrous MS63  
With CAC Approval, Seldom Seen**

- 3311 1914-S MS63 PCGS Secure. CAC.** The 1914-S Indian Head eagle issue is relatively available in the middle Mint State grades, unsurprisingly given that it was struck in an ample amount of 208,000 coins and did not suffer the extreme melting that some issues saw. However, at the Gem grade level, the 1914-S is rarer than many other more celebrated S-mint issues. This MS63 PCGS example boasts excellent eye appeal, the sandy-gold surfaces showing only minimal abrasions amid rich luster and a nice, sharply impressed strike. Although PCGS has certified well over a hundred submissions in this grade, CAC shows only nine MS63 with the green approval sticker (12/14). NGC ID# 28H4, PCGS# 8877

**1916-S Ten Dollar, MS62  
Nice Collector-Grade Piece**

- 3312 1916-S MS62 NGC. CAC.** The majority of the certified Mint State population of 1916-S eagles is in MS62 and lower grades, these coins being ideal for the casual collector who wishes to avoid the high cost of better-grade pieces. This example is well-struck with satisfactory straw-gold luster. Light, evenly distributed abrasions contribute to the grade, but pose little distraction. NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

### 1850-O Liberty Twenty, AU58 Excellent First-Year Type Coin

**3313 1850-O AU58 NGC. Variety 1.** The 1850-O Liberty double eagle represents the first year of the denomination, an important consideration for type purposes. The 1850-O claims a substantial mintage of 141,000 pieces, but most of the coins circulated heavily near the time of issue, and few high-quality examples were saved by contemporary numismatists. Probably 500-600 examples survive in all grades, and Mint State specimens are quite rare.

The present coin is an attractive near-Mint piece, with just a touch of wear on the high points of the well-detailed design elements. The lustrous greenish-gold surfaces display a few minor abrasions, none that detract materially from the visual appeal. The overall presentation is quite attractive for a Type One double eagle. Census: 16 in 58, 5 finer (12/14). NGC ID# 268G, PCGS# 8903

### 1852 Double Eagle, AU58 Smooth and Lustrous

**3314 1852 AU58 PCGS.** The 1852 double eagle is one of the more available early issues overall of this denomination, but Mint State pieces are nonetheless elusive in all grades. This near-Mint representative is actually superior in eye appeal to most Uncirculated coins, showing smooth yellow-gold surfaces and retaining strong detail and pleasing luster. A collectible Type One representative. NGC ID# 268K, PCGS# 8906

### 1852 Double Eagle, AU58 High-End for the Grade

**3315 1852 AU58 PCGS. CAC.** Unusually smooth for the grade, the frosty surfaces of this nearly Uncirculated 1852 double eagle also display rich orange-gold color with the occasional lilac and pale violet overtone. The strike is sharp, and just a trace of friction is detectable over the high points of the design. Housed in an old green label holder. NGC ID# 268K, PCGS# 8906

### 1853 Double Eagle, AU58 Remarkable Surface Quality

**3316 1853 AU58 PCGS. CAC.** Only the faintest trace of friction is detectable on this very nearly Uncirculated Type One double eagle. Both sides display frosty, unusually smooth surfaces and rich orange-gold patina that yield the occasional lilac hue. PCGS has certified only 38 numerically finer examples (12/14). Housed in an old green label holder. NGC ID# 268M, PCGS# 8908

**1856 Twenty Dollar, AU58  
Better Philadelphia Issue**

- 3317 1856 AU58 NGC. CAC.** The 1856 is a slightly scarcer double eagle from this mint, being elusive in the finer AU grades and rare in Mint State. This nearly Uncirculated representative is well-detailed and retains hints of luster amid deep olive-gold patina that attests to the originality of the surfaces. Light surface abrasions are present, as expected for this grade, but none are individually distracting. Census: 54 in 58, 18 finer (12/14). NGC ID# 268Y, PCGS# 8917

**1858-S Double Eagle, AU58  
Difficult in Mint State**

- 3318 1858-S AU58 PCGS. CAC.** Most 1858-S double eagles entered the channels of commerce, accounting for the high number of XF and AU examples in the certified population along with relatively few Uncirculated coins. Luster resides in the recessed areas of the well-defined design elements of this AU58 specimen. NGC ID# 2699, PCGS# 8925

**1862-S Double Eagle, Near-Mint  
A Rarity Any Finer**

- 3319 1862-S AU58 PCGS.** The relentless demand for gold coins in the West Coast economy in the early 1860s meant the 1862-S issue was used up and quickly, with any Mint State survivor a condition rarity today. This near-Mint beauty is the next best thing, dusky orange-gold and honest about its minor high-point wear yet cohesive in its eye appeal. Population: 50 in 58, 20 finer (12/14). NGC ID# 269N, PCGS# 8938

**1865-S Double Eagle, MS63  
Ex: Brother Jonathan**

- 3320 1865-S MS63 PCGS. Ex: Brother Jonathan 777.** The 1865-S double eagle was very rare in high grade before the finds on the SS *Brother Jonathan* and the SS *Republic*. More than 500 coins were on the former ship and 250 on the latter. Rich orange-gold luster exudes from both sides of this Select specimen, each of which exhibits well-struck design elements, though some of the obverse stars are weak in the center. A few minute marks are consistent with the grade designation. A light crack travels through the stars along the right and upper-left border, as well as parts of the reverse periphery. NGC ID# 269V, PCGS# 8944

1865-S Double Eagle, MS64  
Ex: S.S. Brother Jonathan

- 3321 1865-S MS64 NGC.** Ex: S.S. Brother Jonathan. NGC has certified 192 1865-S double eagles from the shipwreck of the S.S. *Brother Jonathan*, and of that number, 57 have been graded at MS64, with 54 numerically finer (12/14). This is highly significant when one considers that, prior to the recovery of this sunken treasure hoard, NGC had only seen 13 survivors at MS64, and a mere 10 pieces finer. (A few additional high grade specimens have since been encapsulated by NGC from the shipwreck of the S.S. *Republic*.) This near-Gem example is boldly struck, if slightly weak on two or three obverse stars, and has a lovely, soft frosty sheen across each side. The pinkish-gold surfaces show a few minor blemishes that keep the piece from an even higher grade.  
Ex: *Central States Signature* (Heritage, 4/2009), lot 3958. NGC ID# 269V, PCGS# 8944

1868-S Double Eagle, MS61  
Elusive in Mint State

- 3322 1868-S MS61 PCGS.** The 1868-S double eagle is most frequently located in Very Fine through About Uncirculated grades, and the latter are quite scarce. Mint condition pieces are elusive with only 63 examples graded by PCGS and NGC, virtually all concentrated in the MS60 to MS62 grade range. The yellow-gold surfaces of this MS61 coin exhibit relatively good definition except that the hair below LIBERTY is weak, as are a few of the obverse star centers. Several distributed minute marks and grazes are visible that impede the luster flow on both sides. Population: 12 in 61, 2 finer (12/14). NGC ID# 26A4, PCGS# 8954

---

1872-CC Double Eagle, XF40  
Better Carson City Date

- 3323 1872-CC XF40 PCGS. Variety 2-A. The usually seen variety, with the 2 in the date high and the mintmark closely spaced. The 1872-CC is a less often seen issue from this mint, sought in all grades through the lower circulated levels. This XF coin is well-detailed, with smooth, bronze-gold surfaces and minimal chatter in the fields. NGC ID# 26AE, PCGS# 8964

---

1875-CC Double Eagle, AU53  
Some Luster Remaining

- 3324 1875-CC AU53 NGC. Variety 2-B. A fairly available Carson City double eagle, ideal for the collector seeking a single representative from this mint. This piece shows minor wear over the high points of the design, but retains remnants of luster in the protected areas. Medium green-gold patina encompasses each side. NGC ID# 26AT, PCGS# 8974

---

1875-CC Double Eagle, MS62  
Variety 2-B

- 3325 1875-CC MS62 PCGS. CAC. Variety 2-B. The Carson City Mint utilized 13 combinations of nine obverse dies and four reverse dies to create 111,151 double eagles in 1875. Slight field reflectivity appears on both sides of this brilliant lemon-yellow Type Two double eagle, with frosty devices that impart minimal contrast. While both sides exhibit a few scattered and trivial marks, there are no singular distracting nicks on either side. This is an exceptional example for the grade with impressive eye appeal. PCGS has only certified 30 finer examples of the 1875-CC issue (12/14). NGC ID# 26AT, PCGS# 8974

---

1875-S Twenty, MS62  
Lustrous Type Two Example

- 3326 1875-S MS62 PCGS. CAC. Like all Type Two double eagles, the 1875 is a condition rarity in MS62, and especially in finer grades. PCGS has only certified 22 numerically finer examples of this issue (12/14), despite a mintage in excess of 1 million coins. This piece has full mint brilliance and frosty luster with bright yellow and pink-gold surfaces. NGC ID# 26AU, PCGS# 8975

**1875-S Double Eagle, MS63**  
**Rare This Well-Preserved**

- 3327 1875-S MS63 PCGS.** The San Francisco Mint produced more than 1.2 million double eagles in 1875, a rather significant number for the period. Many pieces found their way into overseas shipments and have made their way back in recent decades. As a result, AU and Mint State survivors are plentiful in grades through MS61. In MS62 the population declines significantly, and Select or finer pieces are decidedly rare. This frosty representative shows vibrant golden luster and sharp design elements, particularly on the reverse. Grade-limiting abrasions are primarily restricted to faint grazes in the luster, making this piece a high-end coin for the grade. A shallow planchet void near star 3 is mint-made and not immediately obvious. Population: 16 in 63 (2 in 63+), 6 finer (12/14). NGC ID# 26AU, PCGS# 8975

**1876 Double Eagle, MS62**  
**Pleasing Type Two Representative**

- 3328 1876 MS62 PCGS.** Heavy Motto. This Uncirculated Type Two double eagle offers lustrous, orange-gold surfaces with well-struck motifs. Lighter shades of peach-gold color the central design recesses. A handful of grade-consistent marks are peppered over each side. The 1876 was struck to the extent of 583,860 coins, and while examples are available through lower Mint State grade levels, finer representatives prove challenging. NGC ID# 26AV, PCGS# 8976

**1876-CC Twenty, AU53**  
**Lustrous, Mid-1870s Carson City Gold**

- 3329 1876-CC AU53 NGC. Variety 4-A.** An attractive, lightly circulated double eagle with green-gold toning on the obverse and a sun-gold reverse. A few scattered, minor circulation abrasions exist but even wear has muted many light scuffs so the fields and devices appear remarkably smooth. Several die combinations exist for the 1876-CC despite a relatively low mintage of 138,441 pieces. This is one of the more interesting combinations with what appears to be the top of an 8 mispunched in the denticles. NGC ID# 26AW, PCGS# 8977

**1878-CC Liberty Twenty, VF35**  
**Challenging, Low-Mintage Issue**

- 3330 1878-CC VF35 PCGS. Variety 1-A.** From a small mintage of 13,180 pieces, the 1878-CC is an elusive issue with a surviving population of 300-350 examples in all grades. This Choice VF example exhibits light-to-moderate wear on the well-detailed design elements and the lustrous yellow-gold surfaces are lightly abraded, with highlights of green. NGC ID# 26B4, PCGS# 8986

**1878-CC Double Eagle, XF45  
Low-Mintage Carson City Issue**

- 3331 1878-CC XF45 NGC.** Production of twenty dollar gold coins at the Carson City mint dropped to just 13,180 pieces in 1878, making it one of the most elusive dates from the Nevada facility. This partly lustrous Choice XF example displays bright yellow-gold surfaces and crisply impressed design motifs, notably on Liberty's hair and the eagle's feathers. The stars show full radial lines, and the eye appeal is strong despite a number of small abrasions. NGC ID# 26B4, PCGS# 8986

**1878-S Double Eagle, MS62  
Rare Any Finer**

- 3332 1878-S MS62 PCGS.** Rich orange-gold surfaces show scattered light abrasions and a few deeper marks, yet the eye appeal is surprisingly strong for the grade. A handful of tiny coppery areas add character. While the 1878-S double eagle remains available for a price even at the MS62 level, this early Type Three issue is a clear condition rarity any better, as PCGS has graded nine such coins (12/14). NGC ID# 26B5, PCGS# 8987

**1884-CC Double Eagle, Sharply Struck AU55**

- 3333 1884-CC AU55 PCGS. Variety 1-A.** The Only known variety. The 1884-CC double eagle is mostly found in Extremely Fine through MS61, after which the issue is elusive. Considerable luster resides in the recessed areas of this Choice AU specimen, and the design elements are sharply impressed. Both sides are only lightly marked. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty, AU55  
A Collectible Carson City Issue**

- 3334 1884-CC AU55 NGC. Variety 1-A.** This lightly circulated representative exhibits olive-gold coloration and ample mint luster throughout. The design motifs are boldly impressed and feature minimal wear over the high points. Only the California and Nevada branch mints produced business strikes in 1884, with the Carson City mintage less than one-tenth that of the San Francisco mintage. NGC ID# 26BK, PCGS# 9001

**1884-S Double Eagle, Appealing MS63+**

- 3335 1884-S MS63+ PCGS.** A sharp strike and excellent eye appeal are hallmarks of this 1884-S twenty dollar, showing rich luster and color ranging from yellow- to orange-gold. Scattered marks are mostly small and undistracting while nonetheless accounting for the grade. The 1884-S double eagles are available for a price all the way up to the occasional near-Gem. Gems are quite rare, but in any Mint State grade the issue is a handsomely made one, as this piece demonstrates. NGC ID# 26BL, PCGS# 9002

**1889-CC Liberty Twenty, AU55  
Smooth Surfaces**

- 3336 1889-CC AU55 NGC.** This is a collectible Carson City issue in AU grades largely due to small quantities returning from overseas hoards in recent decades. This Choice AU representative is well-struck, with soft yellow-gold color and attractively smooth surfaces. Some luster remains in the recesses. NGC ID# 26BV, PCGS# 9011

**1889-CC Twenty Dollar, MS61  
Low-Mintage Carson City Issue**

- 3337 1889-CC MS61 PCGS. Variety 1-A.** The Carson City Mint struck meager coinages of silver dollars and double eagles in 1889, about \$350,000 worth of the Morgan dollars and some \$618,900 worth of Liberty Head twenties. This amounted to less than \$1 million between both denominations, the only two struck in 1889 Carson City. Mint State examples are mostly MS61, as here, or MS62, and anything finer is seldom seen. This piece boasts attractively deep reddish-orange patina alternating with lighter yellow-gold. Scattered marks, some on the larger side, determine the grade while not defeating the eye appeal. Population: 48 in 61, 63 finer (12/14). NGC ID# 26BV, PCGS# 9011

**1889-S Liberty Double Eagle, MS63  
Elusive Issue in Higher Grades**

- 3338 1889-S MS63 PCGS.** A rare San Francisco date any finer. The mintage of 774,700 pieces went primarily into foreign hands, and today Select Uncirculated coins are scarce whether they are of domestic or foreign origin. This example has attractive green-gold surfaces and few abrasions of any kind. A sharply struck example, very scarce any finer. PCGS has graded 40 numerically finer examples (12/14). NGC ID# 26BW, PCGS# 9012

**1889-S Liberty Twenty, MS64  
Conditionally Rare in Finer Grades**

- 3339 1889-S MS64 NGC.** The 1889-S Liberty double eagle enjoyed a substantial mintage of 774,700 pieces and the issue is not difficult to locate in lower Mint State grades, thanks to the repatriation of many examples found in overseas holdings in recent years, as well as those recovered from the Saddle Ridge Hoard. The 1889-S is rare at the MS64 grade level, however, and finer examples are very rare. The present coin is an attractive Choice example, with sharply detailed design elements and pleasing yellow-gold surfaces that show only minor signs of contact. A few minor marks in the left obverse field, near Liberty's chin, can serve as pedigree markers. Vibrant mint luster enhances the outstanding eye appeal. Census: 35 in 64 (7 in 64+ ★), 6 finer (12/14). NGC ID# 26BW, PCGS# 9012

**1890 Double Eagle, MS63  
Only Four Numerically Finer at PCGS**

- 3340 1890 MS63 PCGS.** Double eagle production at the Philadelphia Mint in 1890 amounted to only a little more than 75,000 pieces, fewer than were even produced at the small Carson City branch that year. Mint State survivors are occasionally seen, but are almost always in MS62 and lower grades; MS63 pieces are rare, and finer coins are exceedingly so. This radiant, frosty representative showcases rich orange-gold luster and boldly detailed motifs. A few surface grazes in the left obverse field preclude a finer grade, but do not overly inhibit the eye appeal. Population: 39 in 63, 4 finer (12/14). NGC ID# 26BX, PCGS# 9013

**1890-S Double Eagle, Attractive MS63**

- 3341 1890-S MS63 PCGS.** This is an attractive example of this S-mint issue, featuring a sharp strike throughout both sides and attractive apricot-gold and orange-gold patina on each side. A patch of abrasions on Liberty's cheek includes one long, thin scrape and some smaller blunt marks that account for the grade, but the surfaces elsewhere are nicely preserved, particularly the reverse, which would likely grade finer on its own. NGC ID# 26BZ, PCGS# 9015

**1890-S Double Eagle, MS64+  
Notable Condition Rarity**

**3342 1890-S MS64+ NGC. CAC.** This San Francisco issue is virtually unavailable in full Gem condition, making high-end near-Gem coins always in strong demand. This lustrous and Choice example is brilliant and virtually unmarked. The lightly frosted fields emit bold cartwheel luster, while the strike is absolutely full. All of Liberty's hair strands and curls are fully brought up. The eagle is bold from feathers to fletchings.

A "condition rarity" of the highest order, it is likely no more than a dozen or so finer coins exist of this surprisingly challenging S-mint date. Census: 10 in 64 (3 in 64+), 2 finer (12/14). NGC ID# 26BZ, PCGS# 9015

**1892-CC Double Eagle, AU53  
Rich Original Patina**

**3343 1892-CC AU53 PCGS. Variety 1-A.** An attractive and original example of this scarcer Carson City twenty, from a mintage of only 27,265 pieces. Substantial luster remains in the recesses amid warm honey-gold and deeper coppery hues. The strike is sharp, and the detail is hardly inhibited by slight, grade-consistent wear. NGC ID# 26C6, PCGS# 9020

**1894-S Liberty Twenty, MS64+  
Conditionally Rare in Finer Grades**

**3344 1894-S MS64+ PCGS.** A scarcer issue in Choice condition, the 1894-S is exceedingly rare in finer grades, with only nine coins so-certified by PCGS and NGC combined (12/14). This Plus-graded example displays vibrant lemon-gold luster and boldly impressed details. No individually significant abrasions are observed, even under magnification. NGC ID# 26CC, PCGS# 9026

**1897-S Double Eagle, MS65**  
**Just a Single Coin Finer at NGC**

- 3345 1897-S MS65 NGC.** Double eagle mintages at the West Coast branch mint typically remained within the range of 1 million to 2 million coins during the 1890s, with some expected variation from year to year and a few outliers. The 1897-S claims an unremarkable production total of 1.4 million pieces, but this fails to accurately illustrate the rarity of examples in this lofty grade. An examination of the NGC *Census Report* reveals only 18 coins graded MS65 and just a single representative finer (12/14). Vivid orange-gold coloration and frosty mint luster embrace each side and generate significant visual appeal. The stars show full centers and Liberty's hair is strongly detailed. A few areas of light russet and violet toning are confined to the the lower obverse, and singularly distracting impairments are essentially non-existent. NGC ID# 26CJ, PCGS# 9032

**1904-S Twenty Dollar, MS65**  
**Ideal S-Mint Type Coin**

- 3346 1904-S MS65 PCGS.** Over 5 million double eagles were struck at the San Francisco Mint in 1904, making it the most readily accessible Type Three S-mint issue and a popular choice among type collectors. Frosty luster abounds over the immensely appealing orange-gold surfaces of this Uncirculated Gem. Light marks are scattered throughout, and a small planchet void occurs in the right-obverse field behind Liberty's portrait. PCGS reports just six submissions in higher numeric grades (12/14). NGC ID# 26CZ, PCGS# 9046

**1905-S Double Eagle, Sharp MS64**  
**Seldom Seen in Finer Grades**

- 3347 1905-S MS64 PCGS.** Choice Mint State examples of this issue are extremely scarce, as David Akers pointed out as far back as 1982. Exuberant golden-yellow luster emanates from both sides of this near-Gem 1905-S double eagle. Only a few light grazes on Liberty's face and in the obverse fields, none blatant, account for the grade, but seldom will a survivor be found nicer, either technically or aesthetically. A small dark toning spot appears on the reverse rim at the A in STATES, but the reverse shows fewer abrasions overall. The strike is quite nicely brought up. PCGS reports only 12 pieces numerically finer — 11 in MS65 and one in MS67, the incredible Clapp-Eliasberg piece (12/14). NGC ID# 26D3, PCGS# 9048

**1906-S Double Eagle, MS64**  
**Rich Orange-Gold Coloration**

- 3348 1906-S MS64 PCGS.** The 1906-S is a relatively accessible issue with a mintage of just over 2 million coins. The typical example is found in the MS61 to MS63 range. Choice representatives such as this are scarce, and Gems are exceedingly rare. A ring of deep sunburst-orange color hugs the borders and yields to lighter shades of yellow-gold centrally. Bold definition, shimmering mint frost, and the absence of any overly distracting abrasions further contribute to the coin's appeal. PCGS has certified only four pieces in higher numeric grades (12/14). NGC ID# 26D6, PCGS# 9051

## PROOF LIBERTY DOUBLE EAGLES

---

1869 Liberty Double Eagle, PR65 Ultra Cameo  
Classic Proof Gold Rarity, 25 Examples Struck  
Approximately One Dozen Survive

**3349 1869 PR65 Ultra Cameo NGC.** Only 25 proof Liberty double eagles were struck in 1869, one of the lowest mintage figures for any post-1858 proof issue. Probably no more than a dozen examples survive today in all grades, with three of those pieces included in institutional collections and at least one coin in slightly impaired condition. The two leading grading services have certified a total of 11 specimens in all grades, including an unknown number of resubmissions and crossovers (12/14). Heritage Auctions is privileged to present a Condition Census example of this 19th century gold rarity in one of its very rare public offerings.

Apparently, all the 1869 proof double eagles were originally offered as part of six-piece gold proof sets, with 25 sets delivered on February 19, 1869. How many of the 25 sets were actually distributed is unknown. Specie payments (suspended by the federal government during the Civil War) were not resumed until 1879, and Walter Breen reports that the cost of a complete copper, silver, and gold proof set was \$57 in greenbacks in 1869, a stiff premium for coins worth only \$43.54 in face value. Undoubtedly some of the sets went unsold and the coins were melted after the end of the year. Since collecting double eagles was not popular in the 19th century, proof twenties tended to be sold cheaply by gold proof set purchasers, who retained the lower-denomination coins for their collections. Some pieces were even spent for face value, as the coins brought minimal premiums when offered at auction. The proof double eagle in lot 1365 of the Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890) realized only \$21.50, as an example. Accordingly, the survival rate for this low-mintage issue is quite low. Of course, the coins are treasured by present-day numismatists, and the record price realized for the issue is now \$308,000, brought by a PR65 Cameo NGC specimen in May of 1990.

The present coin is a delightful Gem, with razor-sharp definition on all design elements and startling field/device contrast. The light orange-gold surfaces are virtually flawless and the richly frosted devices seem to float on the liquid mirrored fields. Eye appeal is simply spectacular. We can find no previous auction appearances for this coin and believe it has been off the market for decades. It may well be one of the coins listed under Additional Appearances in our roster below, and it may be many years before a comparable specimen becomes available. Census: 3 in 65 Ultra Cameo, 1 finer (12/14).

#### Roster of 1869 Liberty Double Eagles

Grades are per the last auction appearance, unless a subsequent certification event is known. It is certain that some of the coins have been submitted, or resubmitted, since their last public offering. Grades for the Smithsonian coins are per Garrett and Guth.

1. **PR65 Ultra Cameo NGC.** The present coin.
2. **PR65 Cameo NGC.** Father Flanagan's Boys Home Sale (Superior, 5/1990), lot 5743, realized \$308,000; January-February Auction (Superior, 1/1993), lot 1511.
3. **PR64+ Deep Cameo PCGS.** J.F. Bell Collection (Stack's, 12/1944), lot 829; H.R. Lee Collection (Stack's, 10/1947), lot 1713; Gaston DiBello Collection (Stack's, 5/1970), lot 1235; Harry W. Bass, Jr.; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1795.
4. **PR64 Deep Cameo PCGS.** Long Beach Signature (Heritage, 6/2004), lot 6374; Pre-Long Beach Sale (Goldberg, 2/2009), lot 1609; January Pre-Long Beach Sale (Goldberg, 1/2014), lot 1867.
5. **Choice Brilliant Proof 65.** Chapman brothers; John M. Clapp, purchased in December of 1896; John H. Clapp; Clapp Estate; Louis E. Eliasberg in 1942, via Stack's; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 922; Ed Trompeter; Heritage Auctions; sold privately circa 1995.
6. **Brilliant Proof.** Hebbard Collection (Harlan Page Smith, 4/1883), lot 381, part of a six-piece gold proof set; T. Harrison Garrett; Robert Garrett; John Work Garrett, Johns Hopkins University; Garrett Collection (Stack's, 3/1976), lot 428, proof set dispersed.
7. **Brilliant Proof.** Amon G. Carter Family Collection (Stack's, 1/1984), lot 883.
8. **Brilliant Proof.** Nathan M. Kaufman, part of a six-piece gold proof set; Louis G. Kaufman; Kaufman Collection (RARCOA, 8/1978), lot 921.
9. **Brilliant Proof, slightly impaired.** Nicholson Family Collection (Stack's, 6/1967), lot 230; George F. Scanlon Collection (Stack's, 10/1973), lot 2647; 66th Anniversary Sale (Stack's, 10/2001), lot 1013; ANA National Money Show (Stack's, 3/2002), lot 1191.
10. **PR63 Deep Cameo.** Mint Cabinet, part of a complete copper, silver, gold proof set, purchased from the coiner on 3/8/1869; National Numismatic Collection, Smithsonian Institution.
11. **PR63 Deep Cameo.** National Numismatic Collection, Smithsonian Institution.
12. **Proof.** R.C.H. Brock, part of a complete gold proof set; J.P. Morgan; donated to the American Numismatic Society in 1908, exhibited at the 1914 ANS Exhibition.

#### Additional Appearances

- A. **Brilliant Proof.** George Seavey, part of a complete silver, copper, gold proof set purchased from the Mint in 1869; Seavey Descriptive Catalog (William Strobridge, 6/1873), lot 831; Lorin G. Parmelee; Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1365; possibly William Woodin; Woodin Collection (Thomas Elder, 3/1911), lot 1365.
  - B. **Proof.** Heman Ely, part of a six-piece gold proof set; Ely Collection (W. Elliot Woodward, 1/1884), lot 949.
  - C. **Proof.** Thomas Cleneay, part of a six-piece gold proof set; Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 419.
  - D. **Proof.** William B. Wetmore, part of a six-piece gold proof set; Wetmore Collection (S.H. & H. Chapman, 6/1906), lot 153.
  - E. **Proof.** David S. Wilson, part of a six-piece gold proof set; Wilson Collection (S.H. Chapman, 3/1907), lot 329, the set realized \$170, to Henry Chapman.
  - F. **Proof.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 872; Memorable Collection (Numismatic Gallery, 3/1948), lot 692.
  - G. **Perfect Brilliant Proof.** William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1261, possibly the same as number 7 above.
  - H. **Brilliant Proof.** Farish Baldenhofer (Stack's, 11/1955), lot 1532; possibly PNG Sale (Abe Kosoff, 10/1965), lot 693.
- NGC ID# 26DM, PCGS# 99084

**1891 Double Eagle, PR61 Cameo**  
**Rare in All Grades**  
**Only 52 Pieces Struck**

**3350 1891 PR61 Cameo PCGS.** A rare issue in any grade, the 1891 proof Liberty twenty had a scant mintage of only 52 coins, and it is believed that no more than 22 to 26 examples survive today, with two unattainably housed in the Smithsonian Institution. PCGS and NGC combined have encapsulated 52 examples, obviously including a large number of resubmissions (12/14). This piece ranks as the only Cameo certified at PCGS, although a handful of Deep Cameos are represented on the population reports. Field-motif contrast is bold, with both sides showing consistent orange-gold color. Scattered marks and a couple small hits in the right obverse field account for the grade, but are not overly detracting. We have only offered an example of this proof issue 16 times in the past two decades, with at least three of those offerings being reappearances of the same coin. The proof Liberty double eagle enthusiast should not let this slightly more affordable example pass by. NGC ID# 26EC, PCGS# 89107

**1903 Liberty Double Eagle, PR61**  
**158 Examples Struck**

**3351 1903 PR61 PCGS.** The 1903 is one of the more plentiful proof issues in the Liberty double eagle series, though this is only in the comparison to other proof issues in the series, many of which are prohibitively rare. The Mint struck only 158 examples, and it is believed only about 50 to 60 pieces are extant in all grades. PCGS and NGC combined show a population of 88 examples, though this figure undoubtedly includes a number of resubmissions. The present example shows a fair number of faint hairlines in the fields, limiting the grade, but is nonetheless a pleasing, moderately affordable example of the immensely popular proof Liberty double eagle. Deep mirrors frame boldly struck devices, while the obverse exhibits subtle field-motif contrast — a rarity on this issue. Population: 2 in 61, 25 finer (12/14). NGC ID# 26ER, PCGS# 9119

## HIGH RELIEF DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, AU50  
High Relief, Wire Rim Variant

**3352** 1907 High Relief, Wire Rim AU50 PCGS. From a limited mintage of 12,367 pieces, the 1907 Saint-Gaudens High Relief double eagle is widely considered the most beautiful regular-issue United States coin design. The majority of the coins, including the present specimen, exhibit a Wire Rim, or fin, around the edges of the coin. This feature was caused by metal extruding through the tiny gap between the die and collar when the coins were struck. Initially viewed as a problem, collectors prize this interesting feature today.

The present coin is an attractive AU example, with just a trace of friction showing on the high points of the sharply impressed design elements. The lustrous orange-gold surfaces show a few trivial abrasions on close inspection, none that are overly distracting, and a rim bruise at 8 o'clock on the reverse. Eye appeal is quite strong for the grade. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty  
Wire Rim, Uncirculated Details

**3353** 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. Unc Details. Due to its popularity, the High Relief double eagle is actively traded, but examples offered at auction never fail to find eager bidders and prospective new owners. Widely considered America's most beautiful regular issue, the High Relief twenty displays the distinct combination of realism and classical artistic excellence for which Saint-Gaudens was known and admired. PCGS notes evidence of light cleaning on this example, but the smooth, satiny surfaces remain appealing to the unaided eye and the design definition is bold. No major abrasions interrupt the appeal of this slightly more affordable example. NGC ID# 26F2, PCGS# 9135

---

1907 High Relief, Wire Rim Twenty, MS64  
Extraordinary Eye Appeal

- 3354 **1907 High Relief, Wire Rim MS64 PCGS.** Among a lifetime of other accomplishments, Q. David Bowers has popularized the Optimal Collecting Grade term for coins, and for the 1907 High Relief twenties, we believe that grade is MS64 — the near-Gem level of the present example. Although the mintage of the High Reliefs was likely somewhere north of 12,000 pieces per research by Roger Burdette, a good percentage of those coins survive today. The certified survivors average between MS61 and MS62, and Gems, while available, are far more expensive, so the MS64 grade level — especially when combined with a lovely example such as this — seems just about right. Rich sandy-gold patina occupies the surfaces, and yet, only a couple of mentionable marks appear, on Liberty's exposed right (facing) calf. The reverse is free of mentionable contact. The eye appeal is far from merely *intact*, it is extraordinary. Christmas approaches as we write this — hint hint! (We wouldn't even mind waiting until January to receive it.) NGC ID# 26F2, PCGS# 9135

PROOF HIGH RELIEF DOUBLE EAGLE

MCMVII High Relief Twenty, PR63  
Subdued Satiny Surfaces

- 3355 **1907 High Relief PR63 NGC.** Proof High Relief twenties remain a controversial issue; NGC recognizes them, PCGS does not. The main criteria used by NGC for determination of proof status is listed on page 77 of Robert Loewinger's reference *Proof Gold Coinage of the United States*. This piece displays uncommon sharpness of details when compared to other High Relief twenties, absence of die erosion or distortion, and uniform satiny surfaces. The satin finish on this particular piece is slightly subdued, unlike the brightness seen on other pieces, especially non-proof striking. A few contact marks distinguish this example from others, including: a couple of near-horizontal contact marks below the torch on the obverse, and three short, parallel marks above the sun on the reverse. The surfaces show a light green-gold color with just a hint of reddish patina. PCGS# 9132
-

## SAINT-GAUDENS DOUBLE EAGLES

### 1908-S Saint-Gaudens Twenty, AU58 Low-Mintage Branch Mint Issue

- 3356 1908-S AU58 PCGS.** With a mintage of only 22,000 pieces, the 1908-S Saint-Gaudens double eagle is a challenging date in almost all grades, and is scarce in Mint State. This near-Mint State piece is an attractive collector-grade coin, showing luminous orange-gold surfaces and well-struck, sharply detailed devices. No significant abrasions are present. NGC ID# 26FA, PCGS# 9149

### 1909/8 Twenty Dollar, MS63 Sole Overdate of the Series

- 3357 1909/8 FS-301, MS63 PCGS.** A popular *Guide Book* variety, struck from a leftover 1908 obverse die that was rehubbbed with the 1909 date; the remnants of the underlying 8 are evident in the lower loop of the second 9. This piece is well-struck, with satiny yellow-gold luster. No major abrasions are present, though we detect some minor contact on the figure of Liberty that limits the grade. NGC ID# 26FC, PCGS# 9151

### 1909/8 Twenty Dollar, MS64 Popular *Guide Book* Variety

- 3358 1909/8 FS-301, MS64 PCGS.** The 1909/8 double eagle is popular as the only overdate in the Saint-Gaudens series, and as the only major variety listed in the *Guide Book*. The underlying 8 is plain within the lower loop of the second 9 in the date. This is an appealing Choice representative, with satiny yellow-gold luster and well-struck design elements. PCGS has only certified 25 numerically finer representatives (12/14). NGC ID# 26FC, PCGS# 9151

### 1909-D Double Eagle, MS64 Upper-End for the Grade

- 3359 1909-D MS64 PCGS.** With a mintage of only 52,500 coins, the 1909-D double eagle is not surprisingly scarce in MS64, and rare finer. This representative is sharply struck, with vibrant, wheat-gold surfaces. Fewer abrasions are present than are expected for the grade, delivering a high degree of eye appeal. PCGS has certified only 23 numerically finer examples (12/14). NGC ID# 26FD, PCGS# 9152

### 1913-D Double Eagle, MS65 Conditionally Rare in Finer Grades

- 3360 1913-D MS65 PCGS.** From a mintage of 393,500 pieces, the 1913-D Saint-Gaudens double eagle is a condition rarity above the MS65 grade level. This delightful Gem displays sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded only five numerically finer examples (12/14). NGC ID# 26FP, PCGS# 9162

### 1913-D Twenty Dollar, MS65 Fresh Mint Luster

- 3361 1913-D MS65 PCGS.** A beautiful, radiant Gem, this 1913-D Saint showcases uninhibited, fresh mint bloom over minimally disturbed surfaces. The design elements are sharply brought up, illuminated by the dazzling cartwheel effect. The 1913-D is a slightly better date in high grades, and is genuinely rare finer than MS65. PCGS has certified only five numerically finer examples (12/14). NGC ID# 26FP, PCGS# 9162

---

**1914 Twenty, MS64**  
**Seldom Seen Finer**

- 3362 1914 MS64 PCGS.** A slightly better Philadelphia issue in high grades, the 1914 Saint-Gaudens twenty is only marginally available in MS64, and finer pieces are scarce. This Choice example is well-struck, with satiny apricot-gold luster. Fewer abrasions are present than are expected for the grade. Only 40 coins are numerically finer at PCGS (12/14). NGC ID# 26FS, PCGS# 9164

---

**1914 Saint-Gaudens Twenty, MS64**  
**Rarely Encountered Finer**

- 3363 1914 MS64 PCGS.** Satiny orange-gold luster reveals only minor abrasions on each side of this Choice example. The strike is sharp and the appeal is pleasing for the grade and issue. The 1914 double eagle is conditionally scarce in finer grades, with only 40 pieces so-certified at PCGS (12/14). Housed in an old green label holder. NGC ID# 26FS, PCGS# 9164

---

**1914 Twenty Dollar, MS64+**  
**Low-Mintage Philadelphia Issue**

- 3364 1914 MS64+ PCGS. CAC.** The Philadelphia Mint coined 95,250 double eagles in 1914 compared to 453,000 pieces struck in Denver and nearly 1.5 million coins produced on the West Coast. While the 1914 is generally available in Choice condition, only 5.6% of MS64 representatives have been awarded the Plus designation by PCGS (12/14). The strike is sharply impressed aside from typical shallowness at the lower obverse. Swirling luster and pleasing butter-gold surfaces enhance the elegant eye appeal and affirm the presence of a CAC approval sticker. NGC ID# 26FS, PCGS# 9164

---

**1916-S Twenty Dollar, MS66**  
**None Numerically Finer at PCGS**

- 3365 1916-S MS66 PCGS.** A slightly better San Francisco issue, scarce in MS66 and rare any finer. This example is sharply struck, with well-preserved surfaces that display a blend of honey and green-gold mint frost. The 1916-S was the only twenty dollar issued in 1916, making an example of this issue essential for a complete date set of Saint-Gaudens double eagles. None have been certified numerically finer at PCGS (12/14). NGC ID# 26FX, PCGS# 9169

---

**1920 Twenty Dollar, MS64+**  
**Only One Numerically Finer at PCGS**

- 3366 1920 MS64+ PCGS.** The 1920 double eagle is available in Choice condition, but finer pieces are extremely rare, with only one certified at PCGS, and seven at NGC (12/14). This Plus-designated piece is vibrantly frosty and well-struck, with warm honey-gold luster. Minor contact on the figure of Liberty precludes a full Gem assessment, but hardly impedes the eye appeal. NGC ID# 26FY, PCGS# 9170

---

1920-S Saint-Gaudens Twenty, MS64  
One of the Premier Rarities in the Series

**3367 1920-S MS64 PCGS.** The 1920-S is a premier rarity in the Saint-Gaudens double eagle series. Most of the 558,000-piece mintage was apparently kept in U.S. government vaults until the 1930s, after which the vast majority of it was melted during President Franklin Roosevelt's gold recall. Unlike some of the rarities of later years in the decade, the supply of 1920-S twenties has not been augmented by hundreds or thousands of recent imports.

Estimates of the number of survivors vary according to the information source. Walter Breen (1988) writes that only eight to 12 specimens have survived to the present day, an obviously inaccurate estimate. David Bowers' estimates that the "field population" of 1920-S twenties (that is, his estimate of the total number of this issue existing in the hands of collectors and investors) to be 45 to 60 in the circulated grades of Very Fine through About Uncirculated, and 40 to 60 in the Mint State levels of preservation. His estimate is more or less in line with that presented in the PCGS website: 100 to 150 pieces known. The actual number of 1920-S double eagles seen by PCGS and NGC amounts to 167 coins, some of which are likely resubmissions. Of these, 105, or nearly 63 percent, are Mint State examples, of which six are Gems and two Premium Gems, the finest certified. Better-grade Mint State examples were almost certainly obtained at the time of issue by collectors who had close ties to Mint or other government officials.

Most 1920-S double eagles are sharply struck except for softness on the Capitol building and adjacent stars. Luster is excellent, generally frosted. Most examples are noticeably abraded. This is a remarkably clean and problem-free example of this rarity. The surfaces display soft mint frost and even, light reddish-gold color. NGC ID# 26FZ, PCGS# 9171

---

**1922-S Double Eagle, MS62**  
**Many Melted in the 1930s**

- 3368 1922-S MS62 NGC.** Survivors of this scarce double eagle issue are infrequently encountered, despite a substantial mintage of more than 2.6 million coins. A considerable portion of that mintage was melted in the 1930s. Typical of the issue, this lemon-yellow example has brilliant satin luster with excellent central details and less distinct peripheries. NGC ID# 26G4, PCGS# 9174

---

**1924-S Saint-Gaudens Twenty, MS63**  
**Nice Color, Vibrant Luster**

- 3369 1924-S MS63 PCGS.** The 1924-S double eagle is a scarce issue due to the large quantity of coins melted in the 1930s. Several hues of deep yellow-gold color are present on this Select representative. Though not fully struck, this piece displays pleasing eye appeal. Scattered marks are present, consistent with the grade, though none are worthy of individual mention. NGC ID# 26G9, PCGS# 9179

---

**1924-S Twenty Dollar, MS64**  
**Heavily Melted Issue**

- 3370 1924-S MS64 PCGS. CAC.** The 1924-S double eagle had a mintage of nearly 3 million coins, but the vast majority was melted in the mid-1930s. Luckily for collectors, a small number of pieces survived in overseas vaults and have made their way back to America in recent decades. Most known examples of this date are in Mint State, falling into the MS62 to MS64 grade range; finer pieces are very rare. This Choice example is well-struck, with minimally abraded surfaces and vibrant, frosty luster. The central regions are largely yellow-gold, though deeper orange-gold hues overlap in the margins. PCGS has certified only four numerically finer representatives (12/14). NGC ID# 26G9, PCGS# 9179
-

**1925-S Twenty Dollar, MS61  
In-Demand Semikey Issue**

- 3371 1925-S MS61 PCGS.** The 1925-S double eagle issue is a well-known semikey issue in the Saint-Gaudens series, a former stellar rarity that has been dethroned in recent decades by repatriations of overseas hoards. Today the issue remains sought-after, although much more available overall than in earlier times. This Mint State example shows lively color ranging from lemon-yellow to orange-gold to deep reddish hues. Considerable luster appears, but there are numerous blunt marks on Liberty's midsection and in the sun's rays to her (facing) left that preclude an even finer grade. The reverse is better-preserved overall, showing only a few minor ticks scattered about. NGC ID# 26GC, PCGS# 9182

**1926-D Double Eagle, MS64  
Impressive Erstwhile Rarity**

- 3372 1926-D MS64 NGC.** In his *A Guide Book of Double Eagle Gold Coins*, Q. David Bowers offers a wonderful capsule view of this Denver double eagle issue, which has an original mintage of slightly under half a million pieces. He calls the date an "erstwhile formidable rarity," while also noting that it is still "very rare today."

The 1926-D, then, was not utterly annihilated like a handful of other issues from late in the series (the most famous example being the 1927-D double eagle), but instead saw a limited release to safe-havens overseas, where they were rediscovered in the 1950s and 1960s. That rediscovery is key to the vintage but still-valuable analysis of David W. Akers, who noted in 1982 (when he published the double eagle volume of *United States Gold Coins*) that he considered the 1926-D just outside his top ten in terms of Saint-Gaudens double eagle rarity.

This example is neither one of what Bowers calls "typical" coins, nor is it one of his (extremely) rare Gems. Instead, it is a Choice condition rarity, but beautiful all the same. Orange overtones blossom on sun-yellow luster. The strike is decent, if a little soft on the peripheral devices, and while an abrasion is noted just above 3 o'clock on the obverse, the rest of the coin has few significant marks. A coin of considerable importance, as indicated by the current NGC Census, which has not changed at this grade level in more than three years. Census: 9 in 64, 0 finer (12/14).

Ex: FUN Signature (Heritage, 1/2011), lot 5318. NGC ID# 26GE, PCGS# 9184

---

**1929 Twenty Dollar, MS64  
Vibrant and Eye-Appealing  
Heavily Melted Rarity**

**3373 1929 MS64 PCGS.** The 1929 is the first of the melt rarities that comprise the tail end of the Saint-Gaudens double eagle series. The Mint struck more than 1.7 million pieces, but virtually all of these remained in Treasury and bank vaults until 1933, when they were readily confiscated by the federal government and melted. During this period, large denomination gold coins served little commercial need in America, and were largely used as backing for the gold certificates then in circulation. Following Roosevelt's Executive Order, prohibiting the private ownership of most forms of gold and gold certificates, the coins' purpose was dissolved and they were melted by the millions.

Of those 1929 pieces that did escape the melting pots, most are in Mint State grades due to them never having circulated to a measurable extent. Most pieces are in the MS63 to MS64 grade range, and finer coins are rarely seen. The present Choice example is remarkably appealing, even for the MS64 level, with vibrant, frosty luster in warm apricot-gold hues. The strike is sharp, and a few scattered, grade-consistent abrasions are not overly obtrusive. PCGS has certified only 31 numerically finer representatives, and NGC just six (12/14). NGC ID# 26GL, PCGS# 9190

PROOF SAINT-GAUDENS DOUBLE EAGLE

---

1908 Saint-Gaudens Double Eagle, PR65  
Possibly Unique Roman Finish Proof  
Ex: Bigelow, Morse

---

**3374 1908 Motto PR65 NGC. Roman Finish Proof.** Ex: Ferrari Collection. Both 1907 and 1908 issues of double eagles saw variants in both design and finishes. The 1908 coins are most notable for the No Motto and With Motto designs. All proofs from that year are With Motto coins. These pieces characteristically are found with deep khaki-green coloration and pronounced matte surfaces. However, of the 101 proofs struck, at least one “Satin” or “Roman Gold” proof is known. The coin offered here shows razor-sharp definition on Liberty’s fingers, sandal, and toes, as well as the stars and torch, with broad squared off rims. It was clearly struck on a medal press as a proof. However, the surfaces are bright, orange-gold with a semireflective sheen in the fields, much different from the dark, granular surfaces of the matte proofs. In short, this coin is a “Roman Gold” proof.

One would think that this piece was struck late in the year as a prototype for the “Roman Gold” finish used in 1909 and 1910. However, research done by the staff at Sotheby’s in 1997 indicates that this piece was actually presented to the Boston Museum of Fine Arts by William Sturgis Bigelow on June 11, 1908. The museum’s catalog card for the coin states: “One of the first coins struck after this legend was restored.” This information was supplied to the museum by Frank Leach, Mint Director at the time of the coin’s striking.

This piece first appeared at public auction after it was deaccessioned by the Boston Museum of Fine Arts in the 1976 ANA catalog (Stack’s). Both a double eagle and an eagle with a Roman Finish were consigned to that sale, and both brought surprisingly high prices for the time: \$7,500 for the ten dollar and \$10,000 for the double eagle. Close examination of the plate in the 1976 ANA catalog and the 1997 Sotheby’s catalog show that this is the same coin. There are a couple of “shiny spots” that show on the photos that are also present on this coin.

The real question is whether there is only one coin. Until recently that was the consensus of opinion among experts like David Akers and Walter Breen, but Jeff Garrett and Ron Guth suggest as many as four examples may be extant. When one looks at the population data from PCGS and NGC, the answer would appear to be a resounding ‘no.’ NGC shows that six coins have been certified (three in PR65), while PCGS shows none, although this coin was certified as PR64 PCGS at the time of the Phillip Morse Collection sale in November of 2005. Do others actually exist? Is this a case of multiple resubmissions of the same coin? We are not in a position to answer these questions, but they are provocative. Nevertheless, this is the Boston Museum of Fine Arts coin and the one piece that has been consistently recognized in the literature as a Roman Finish proof. An exceptional opportunity for the specialist to acquire what is possibly a unique example of the Roman Finish from 1908. Census: 3 in 65, 0 finer (12/14).

Ex: Dr. William Sturgis Bigelow (from Theodore Roosevelt?) after May 18, 1908; Bigelow to The Boston Museum of Fine Arts, June 11, 1908; 1976 ANA Sale (Stack’s, 8/1976), lot 3302, where it brought \$10,000, and was purchased by Jim Halperin/NERCA; 1987 GNA Sale (Mid-American, 5/1987), lot 1115, where it realized \$69,300; Sotheby’s (12/1997), lot 268, where it realized \$253,000; Phillip H. Morse Collection (Heritage, 11/2005), lot 6557, realized \$276,000. NGC ID# 26GV, PCGS# 9205

## COMMEMORATIVE SILVER

### 1893 Isabella Quarter, Pastel-Toned MS67+ A Coin Difficult To Improve Upon

- 3375 1893 Isabella Quarter MS67+ PCGS. CAC.** The strike on this Isabella quarter is the usual razor-sharp affair, but it is the incredible pale pastel-blue and pinkish-gold patina and pristine preservation that set this piece apart from most of the survivors of this issue. A search for a nicer example, either aesthetically or numerically, would likely result merely in a long and futile search. The last example in this exact grade and service with the CAC approval was in our Chicago Signature of August 2011, lot 7715, similarly toned example that brought \$20,700. Population: 40 in 67 (5 in 67+), 6 finer (12/14). NGC ID# 28HR, PCGS# 9220

### 1900 Lafayette Dollar, MS65 Scarce DuVall 3-D Variety

- 3376 1900 Lafayette Dollar MS65 NGC. DuVall 3-D.** This impressive Gem represents the scarce DuVall 3-D variety, with the AT in STATES recut at the base. The design elements display razor-sharp definition throughout and the well-preserved surfaces radiate vibrant mint luster. A few highlights of pale gold toning enhance the outstanding eye appeal. NGC ID# 28N8, PCGS# 9222

### 1915-S Panama-Pacific Half, MS67 Lovely Peripheral Toning

- 3377 1915-S Panama-Pacific MS67 NGC.** An unusually attractive and lustrous example of this popular Panama-Pacific commemorative. The preservation alone would be enough to draw strong bidder attention, but this coin is also beautifully toned, with concentric rainbow peripheral hues surrounding brilliant, satiny centers. An impressive, well-struck coin. Census: 64 in 67 (11 in 67 ★, 2 in 67+★), 0 finer (12/14). NGC ID# 26H7, PCGS# 9357

### 1925 Stone Mountain, Pastel-Toned MS67+

- 3378 1925 Stone Mountain MS67+ PCGS.** Beautiful pale pastel heather, saffron, ice-blue, and pearl-gray tones enliven immaculately preserved surfaces on each side of this Superb Gem. The Stone Mountain is a member of the popular "Civil War subset" of the silver commemorative half dollar collection, which would also include the Antietam, Gettysburg, Grant, and other issues. Population: 10 in 67+, 8 finer (12/14). NGC ID# 26H8, PCGS# 9378

## COMMEMORATIVE GOLD

### 1903 McKinley Gold Dollar, MS67 Only Two Numerically Finer at PCGS

- 3379 1903 Louisiana Purchase, McKinley, MS67 PCGS. CAC.** From a distribution of 17,500 pieces, the McKinley gold dollar is seldom seen in grades above the MS67 level. This delightful Superb Gem displays sharply detailed design elements and lustrous orange-gold surfaces, with no mentionable distractions. PCGS has graded only two numerically finer examples (12/14). NGC ID# 26HB, PCGS# 7444

---

**1903 McKinley Gold Dollar, MS67  
Rarely Seen Finer**

- 3380** 1903 Louisiana Purchase, McKinley, MS67 PCGS. CAC. A magnificent Superb Gem example of the 1903 McKinley gold dollar, with sharply detailed design elements throughout and vibrant mint luster on both sides. The pleasing yellow-gold surfaces are free of mentionable distractions and eye appeal is outstanding. Population: 99 in 67 (2 in 67+), 2 finer (12/14). NGC ID# 26HB, PCGS# 7444

---

**1904 Lewis and Clark Gold Dollar, MS66+  
Exceptional Visual Appeal, Scarce Any Finer**

- 3381** 1904 Lewis and Clark MS66+ NGC. CAC. This is an unusually radiant, nearly flawless example of this popular early gold commemorative. Rich golden luster engulfs each side, with razor-sharp design definition throughout. A touch of the usual surface roughness is seen in the recesses around the border legends, but this is undetectable to the unaided eye. NGC has encapsulated only 29 numerically finer representatives (12/14). NGC ID# 26HC, PCGS# 7447

---

**1904 Lewis and Clark Gold Dollar, Toned MS67**

- 3382** 1904 Lewis and Clark MS67 PCGS. CAC. Shades of lime-green and apricot invigorate the highly lustrous surfaces of this gorgeous Superb Gem commemorative, and all design elements are sharply impressed. Both sides display remarkable preservation.

Produced with the dates 1904 and 1905, this is the first commemorative gold coin to be struck in more than one year. It celebrated the Lewis and Clark expedition of 1804 to 1806. Held in Portland in 1905, the Lewis and Clark Exposition attracted about 2.5 million visitors between June 1 and October 14 on a 406 acre site. This Exposition was not designated by Congress as an international event, yet 16 countries participated. Population: 19 in 67 (1 in 67+), 1 finer (12/14). NGC ID# 26HC, PCGS# 7447

---

**1905 Gold Dollar, MS67  
Lewis and Clark Exposition  
Among Finest Certified**

- 3383 1905 Lewis and Clark MS67 PCGS.** The Lewis and Clark gold dollar is the only true double-headed U.S. coin design. Struck in both 1904 and 1905, the initial mintage was substantial but most of the production was returned to the Mint and melted. The net distribution for the 1905 was 10,041 pieces, similar to the 1904, but the 1905 is conditionally rarer in the MS66 and MS67 grades. The present lemon-gold and lime-green Superb Gem is well struck aside from the dentils between 7 and 11 o'clock on the Clark side. The surfaces are pristine save for two tiny spots near the I and A in LEWIS-CLARK. Population: 4 in 67, 0 finer (12/14). NGC ID# 26HD, PCGS# 7448

**1917 McKinley Gold Dollar, Immaculate MS67+  
Among the Few Finest Graded**

- 3384 1917 McKinley MS67+ PCGS. CAC.** This 1917 McKinley gold dollar is technically and aesthetically among the few finest obtainable of this issue, one grade-for-grade more elusive in Mint State than its 1916 counterpart. Beautiful reddish-orange high points complement yellow-gold fields amid immaculate preservation. Population: 68 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 26HG, PCGS# 7455

**1926 Sesquicentennial Quarter Eagle  
Luminous Premium Gem Example**

- 3385 1926 Sesquicentennial MS66 NGC.** Frosty, wheat-gold luster illuminates well-preserved surfaces on each side of this Premium Gem Sesquicentennial quarter eagle. The strike is sharp, with pleasing detail for this low-relief issue. The Mint distributed 46,019 examples, but pieces surviving as fine as MS66 are scarce. Only three coins are certified numerically finer at NGC (12/14). NGC ID# 26HL, PCGS# 7466TERRITORIAL GOLD

## TERRITORIAL GOLD

1851 Humbert Fifty, VF25  
K-7 Variety, Reeded Edge  
Classic California Slug

- 3386** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF25 NGC. K-7, R.4. In his book, *California Coiners and Assayers*, author Dan Owens cites a passage from the *Pacific News* dated February 1, 1851 discussing Congressional authorization for the U.S. Assay Office in San Francisco to strike gold bars and ingots:

“... a gentlemen of integrity and experience Augustus Humbert, Esq., was duly appointed to execute the trust of supervising the coinage of these bars and ingots, and affixing the stamp which should determine their genuineness. The dies for this purpose — the striking of the \$50 pieces — have been procured, and the first coin produced by them was shown us yesterday...”

The small-sized inner circle and the ribbon positioned close to the engine turning on the reverse distinguish the K-7 variety from the K-6 variant. This classic Gold Rush era representative features bright yellow and green-gold surfaces and a predictable number of bumps and abrasions for the grade. The outer legends appear largely worn-away, although the date is partially visible. The eagle and rock show distinct outlines and little interior detail. Overall, this is an ideal entry point into the Territorial Gold fifty dollar series. Listed on page 385 of the 2015 *Guide Book*. PCGS# 10214

## COINS OF HAWAII

1883 Hawaiian Quarter, MS67  
Beautifully Toned and Radiant

- 3387** 1883 Hawaii Quarter MS67 PCGS. CAC. This vibrant Superb Gem is among the finest-certified Hawaiian quarter dollars at PCGS, and is seemingly unsurpassed visually at this level. The strike is sharply rendered and the delicately preserved surfaces display radiant cartwheel luster beneath shades of aquamarine, violet, and olive-gold toning. Population: 17 in 67 (2 in 67+), 0 finer (12/14). PCGS# 10987

## PATTERNS

### 1863 'Transitional' Half Dollar, Judd-344, PR65 Struck in Aluminum, With Motto Extremely Rare, Perhaps Five Known

- 3388** 1863 Half Dollar, Judd-344, Pollock-416, High R.7, PR65 NGC. Ex: Bass/ANA Museum Display. The obverse is that of the regular-issue Seated quarter of 1863. The reverse is also similar in design, but a scroll with IN GOD WE TRUST appears above the eagle, as adopted officially in 1866. Struck in aluminum with a reeded edge. These With Motto pieces and their counterparts in other metals are actually fantasy pieces or restrikes made several years after 1866, perhaps into the 1870s. At least four examples are known of the aluminum strikes, per USPatterns.com — far rarer than either the copper or silver counterparts to this issue. The Queller-Lemus Collection (Heritage, 1/2009) had both the “transitional” half dollar in copper (Judd-343) and the “transitional” dollar in silver (Judd-345), but it lacked an example of the Judd-344 aluminum half. Ex: Douglas Weaver, 12/21/1973; Harry W. Bass Research Foundation. Accompanied by an inventory tag showing provenance. HBCC-6054 (Bass Sylloge number). Selections From The Harry Bass, Jr. Foundation's A.N.A. Museum Display. PCGS# 60506

### 1866 Judd-508 Shield Five Cent in Copper Beautiful PR66 Red and Brown

- 3389** 1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR66 Red and Brown PCGS. This Shield five cent pattern is struck in copper with a plain edge from the regular dies, but lacking rays on the reverse, a transitional issue. The reverse shows the star points above CENTS directed between EN and TS, while all other No Rays reverse dies show the points aimed at E and T. Fewer than a dozen survive in copper. This piece offers beautiful orange, violet, and pale-gold patina with top-notch eye appeal and no visible carbon. This is the sole finest Red and Brown example at PCGS, which also shows one PR66 Brown (12/14). PCGS# 70704

### 1870 Judd-815 Silver Half Dime, Lovely PR66

- 3390** 1870 Half Dime, Judd-815, Pollock-904, Low R.7, PR66 PCGS. CAC. William Barber's Seated Liberty design offers her facing left, holding a shield in her right hand and with a free-standing Liberty pole behind. The reverse is the same design used to coin contemporary regular-issue half dimes. Struck in silver with a reeded edge. Perhaps a dozen survive of this issue, which www.USPatterns.com notes was sold as “part of complete silver sets.” Lovely mint and green patina occupies each side of this nicely preserved example. Population: 3 in 66, 0 finer (12/14). PCGS# 61059

### 1870 Judd-989 Half Dollar, PR66 Red and Brown Standard Silver Series

- 3391** 1870 Standard Silver Half Dollar, Judd-989, Pollock-1118, Low R.7, PR66 Red and Brown PCGS. CAC. Standard Silver design with Liberty facing right wearing a headband with a star, a scroll below reading IN GOD WE TRUST, and UNITED STATES OF AMERICA above. The reverse is similar to the one used in 1869 with 50 CENTS in the center and surrounded by a wreath of oak and laurel with 1870 below and STANDARD SILVER above. Struck in copper with a reeded edge. Hints of delicate brown toning appear on the contrasted obverse of this Premium Gem, with delicate bluish-brown toning on the subdued reverse. Population: 2 in 66 Red and Brown, 0 finer (12/14). PCGS# 71235

**1871 Judd-1164 Quarter Eagle, PR65 Red and Brown  
Regular Dies Copper Impression**

- 3392** 1871 Quarter Eagle, Judd-1164, Pollock-1306, High R.7, PR65 Red and Brown PCGS. CAC. The regular dies for the 1871 Liberty Quarter eagle, struck in copper with a reeded edge. In the 1860s and 1870s, the Philadelphia Mint served as an active coin dealer, with the legal ability to create their own inventory, unlike private dealers. Sometimes called trial pieces, the copper and aluminum strikes from regular-design gold dies were most likely issued for collectors. The present piece has considerable field-to-device contrast with mostly brilliant red surfaces that show only slight brown toning acquired over the years. Population: 2 in 65 Red and Brown, 0 finer (12/14). PCGS# 71426

**1872 Commercial Dollar, Brilliant PR64  
Judd-1219, Ex: Gaston DiBello**

- 3393** 1872 Commercial Dollar, Judd-1219, Pollock-1360, Low R.7, PR64 NGC. Ex: Bass/ANA Museum Display. The obverse is the regular design for the Seated Liberty dollar. The reverse shows a laurel wreath with UNITED STATES OF AMERICA around. The wreath stems are tied by a bow and intertwined with a ribbon inscribed GOD OUR TRUST. Inside, COMMERCIAL and DOLLAR are separated by two cornucopias, and below that, decorative ornaments are above and below 420 GRS 900 FINE on two lines. Struck in silver with a reeded edge. More than a dozen examples exist today of this popular silver dollar pattern, although several are in museum collections. This piece was described in its 1970 DiBello sale appearance as "Brilliant Proof, golden toning," and it retains the same appearance today, with some slight field-to-device contrast and much reflectivity throughout both sides. Census: 2 in 64, 1 finer (12/14).  
Ex: Gaston DiBello (*Stack's*, 5/1970), lot 458; Harry W. Bass, Jr. Research Foundation. Accompanied by an inventory tag showing provenance. HBCC-6100 (Bass Sylloge number).  
Selections From The Harry Bass, Jr. Foundation's A.N.A. Museum Display. PCGS# 61490

**1874 Twenty Cent, PR65 Brown  
The Popular Judd-1355 Bailly Design**

- 3394 1874 Twenty Cents, Judd-1355, Pollock-1499, Low R.6, PR65 Brown NGC.** Ex: Bass/ANA Museum Display. The Bailly obverse design shows a rather glum Liberty seated, surrounded by agricultural produce, her left hand resting on a globe with a scroll and incused LIBERTY, her right hand clutching a Liberty pole with Phrygian cap on top. Thirteen stars ring the rim. The reverse is close in design to the regular twenty cent dies of 1875, except that the second arrowhead points well above the T in TWENTY and all three leaves in the upturned triplet point toward the eagle's wing. Struck in copper with a plain edge. As we wrote in the Lemus-Queller catalog, "Mint Director Linderman foresaw difficulties with the twenty cent piece because of its close resemblance to the quarter. He specifically requested a pattern of this design to help differentiate between the two coins. In the end, the Seated Liberty obverse was adopted, and Linderman's concerns proved valid." About a dozen examples are known. This is a beautifully toned piece with gold, lilac, and violet over the medium brown surfaces, which show no spots or other distractions. Census: 3 in 65 Brown, 0 finer (12/14). Ex: Unspecified trade with Numismatics, Ltd., August 12, 1974; Harry W. Bass, Jr. Research Foundation. Accompanied by an original envelope showing provenance. HBCC-6113 (Bass Sylloge number). Selections From The Harry Bass, Jr. Foundation's A.N.A. Museum Display. PCGS# 61659

**1882 Transitional Nickel, PR67 Cameo  
Nicely Contrasted Judd-1680**

- 3395 1882 Liberty Head Five Cents, Judd-1680, Pollock-1882, Low R.6, PR67 Cameo PCGS. CAC.** The portrait of Liberty is identical to the adopted design of 1883, but here it is surrounded by UNITED STATES OF AMERICA instead of stars, and shows the date (1882) below. The border denticles are quite wide. The reverse features a wreath of corn and cotton encircling a large Roman numeral V — a numerator but no denominator. The motto E PLURIBUS UNUM is above. Struck in nickel with a plain edge. Perhaps two dozen in nickel with the plain edge survive. This beautiful Superb Gem Cameo proof is expectedly well-contrasted with only slight hints of patina amid excellent eye appeal. The sole finest Cameo certified at PCGS (12/14). PCGS# 414437 Base PCGS# 62085

*End of Session One*

## SESSION TWO

### COLONIALS

- 3396** (1670-75) **St. Patrick Farthing VF35 PCGS Secure. Breen-212, W-11500.** One of the various "Masonic punctuation" die varieties with a dot trio on the reverse border above the church. Uncertain objects beneath the king are described as "sea beasts" in the Breen *Encyclopedia*. The brass splasher is large yet misses the lower half of the crown. A nicely detailed mahogany-brown piece with unblemished and mildly wavy surfaces. The St. Patrick farthings were imported from Ireland to serve in New Jersey colonial commerce. Listed on page 41 of the 2015 *Guide Book*. PCGS# 42
- 3397** **1788 Massachusetts Cent, Period, AU55 PCGS. CAC. Ryder 10-L, W-6280, High R.2.** A lovely mahogany-brown representative. The moderately prooflike fields are essentially unabraded. Four slender mint-made laminations are mostly relegated to the reverse. The centers are incompletely impressed. Listed on page 59 of the 2015 *Guide Book*. PCGS# 948 Base PCGS# 311
- 3398** **1787 Fugio Cent, UNITED STATES, Cinquefoils VF30 NGC. N. 21-I, W-7010, R.4.** A midgrade example with unmarked and minutely granular walnut-brown surfaces. Evenly worn except for softness on ONE and the first three hours on the sundial. The dies are strongly clashed, which creates an incused sun on the lower reverse. The clashed sun has the appearance of wearing spectacles. Listed on page 87 of the 2015 *Guide Book*. PCGS# 889

### HALF CENTS

- 3399** **1793 C-2, B-2, R.3, Fair 2 PCGS.** A tan-brown example of this introductory single-year type. The portrait is well outlined, and the top of the linear date is evident. The wreath bow and nearby berries are clear. UNITED is readable, but the remainder of the legends are faint. The portrait displays faint hairlines and the reverse displays a few light thin marks. Our EAC grade Basal State 1. PCGS# 35006 Base PCGS# 1000
- 3400** **1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown PCGS.** Manley Die State 2. A sharply struck, glossy Draped Bust type coin, showing rich auburn-brown patina with the occasion hint of coppery-red color. No major abrasions are present, despite the grade. Our EAC grade AU55. PCGS# 35176 Base PCGS# 1063

1804 C-13 Half Cent, MS63 Brown  
Plain 4, No Stems

- 3401** **1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Brown PCGS.** Manley Die State 2. Although this is the common 1804 variety, and one of the two most plentiful Draped Bust half cent varieties, the 1804 Plain 4, No Stems is seldom encountered in higher grades. This glossy and lustrous chestnut and chocolate-brown example has a few splashes of lighter tan. Flowlines in the fields accompany the later die state. Our EAC grade MS60. PCGS# 35176 Base PCGS# 1063

- 3402** **1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS.** A dusky golden-brown example with refreshingly unabraded semiprooflike surfaces. The major devices are fully struck, although LIBERTY shows minor softness. The obverse border exhibits mostly retained laminations between 3 and 7 o'clock and unobtrusive spots between 9 and 1 o'clock. Our EAC grade AU55. PCGS# 35191 Base PCGS# 1093

- 3403** **1828 13 Stars, C-3, B-2, R.1, MS65 Brown NGC.** Manley Die State 4, as usual. Several stars are weak, but the strike is otherwise pleasing. As is expected for the Gem grade level, the surfaces are well-preserved with considerable luster. Largely burgundy-brown, but with noticeable red hues in the recesses. Our EAC grade AU55. PCGS# 35261 Base PCGS# 1147

- 3404** **1833 C-1, B-1, R.1, MS64 Brown PCGS. CAC.** Manley Die State 2.0. Designated as Brown but both sides exhibit substantial brick-red. Open areas are toned steel-gray. Unabraded and lustrous with a spot on the reverse at 2 o'clock. The C in CENT is clearly repunched. Our EAC grade AU58.  
*Ex: Long Beach Signature (Heritage, 6/2012), lot 7109. PCGS# 35282 Base PCGS# 1162*

- 3405** **1854 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC.** The stars and denticles are all sharp and the surfaces reveal only minor, grade-consistent flaws. Substantial mint Red illuminates the recesses amid medium auburn-brown toning, and there is no carbon spotting observed. Our EAC grade MS62. PCGS# 35331 Base PCGS# 1231

- 3406** **1855 C-1, B-1, R.1, MS66 Brown NGC.** An unabraded type coin with intermingled olive-brown, ebony, and faded red color on each side. The strike is bold except for the obverse dentils and right-side stars. Our EAC grade AU50.  
*Ex: Fort Worth Signature (Heritage, 3/2010), lot 78. PCGS# 35333 Base PCGS# 1233*

- 3407** **1856 C-1, B-2a, R.1, MS64 Red and Brown PCGS.** Soft luster illuminates sharp stars and central devices, with few noticeable surface flaws that primarily include just minor specks here and there. The obverse is almost full Red, though the reverse shows deeper burgundy hues intermixed. Housed in an old green label holder. Our EAC grade MS62. PCGS# 35337 Base PCGS# 1237

### LARGE CENTS

1797 Cent, S-131, VF35  
Reverse of 1797, No Stems

- 3408** **1797 Reverse of 1797, No Stems, S-131, B-27, R.2, VF35 PCGS.** An extreme late die state example, as the cracks from the obverse rim at 9:30 have expanded into a wide, heavy break. The reverse is well-centered, though the obverse is a trifle off-center to the right, with the denticles at 3 o'clock mostly off the flan. A few small marks are present, as is expected for the grade, though the detail is strong and both sides display smooth burgundy-brown patina. Our EAC grade VF20. PCGS# 35981 Base PCGS# 1425

- 3409 1798 Second Hair Style, S-173, B-38, R.3, VF35 PCGS.** Breen Die State VII. The obverse cud looms over all of RTY. A well defined medium brown cent. The reverse displays subtle verdigris near the fraction and above the upper right wreath end. The obverse exhibits moderate faded marks, mostly on the lower left field. Our EAC grade VF25. PCGS# 36089 Base PCGS# 1434
- 3410 1800/79 Style Two Hair, S-196, B-10, R.1, VF25 PCGS.** The 8 in the date has horns from an underdigit 7. The middle curve and knob of a 9 is within the first 0. This medium brown cent has pleasing hair definition. The obverse displays a few unobtrusive marks, and build-up is apparent in reverse design crevices. Our EAC grade Fine 15. PCGS# 36167 Base PCGS# 1455
- 3411 1816 N-2, R.1, MS64 Brown PCGS. CAC.** A late die state with an obverse rim cud at 4 o'clock and slender cracks through OF and ST. The heavy rim die break near stars 8 through 10 is usual for N-2. A medium brown and mahogany near-Gem with satin luster and only inconsequential contact. The strike is crisp except on the final two stars. Our EAC grade MS60. PCGS# 36526 Base PCGS# 1591
- 3412 1820 Large Date, N-13, R.1, MS64 Brown PCGS.** The usual peripheral die cracks surround the obverse. This is a glossy, luminous example, with burgundy-brown toning that yields subtle hues of lighter coppery-brown color. Several stars are weak, but the central details are sharp. No significant abrasions are present. Our EAC grade MS60. PCGS# 36673 Base PCGS# 1615
- 3413 1823/2 N-1, R.2, VF25 PCGS. CAC.** Each of the Newcomb varieties for this scarce date receives a separate *Guide Book* listing, respectively as an overdate, a normal date, and an out-of-Mint restrike. The present medium brown cent shows moderate wear and the expected number of individually minor marks. Our EAC grade Fine 12. PCGS# 36760 Base PCGS# 1630

**1823/2 Cent, N-1, XF40  
Problem-Free Surfaces**

- 3414 1823/2 N-1, R.2, XF40 NGC.** The remnants of the underlying 2 are clearly evident amid the 3 in the date on this *Guide Book* variety. The coin is lightly circulated, but retains strong detail for the grade. The surfaces exhibit smooth chocolate-brown coloration and are free of any environmental impairments. A few minor marks are present, as is expected for the grade. Our EAC grade VF25. PCGS# 36760 Base PCGS# 1630
- 3415 1839 Silly Head, N-4, R.1, MS63 Brown PCGS.** A glossy medium brown representative of this underappreciated single-year subtype. The borders display incompleteness of strike but the major devices are well brought up. Smooth except for a trio of tiny square marks beneath the bust truncation. Our EAC grade AU50. PCGS# 37231 Base PCGS# 1748

- 3416 1845 N-2, R.1, MS65 Brown PCGS. CAC.** Grellman Die State a. A short, heavy die line to the right of the Y in LIBERTY readily identifies this variety. As a date, the 1845 large cent is not considered scarce, though pieces grading as high as MS65 are elusive. This representative is one of just 18 Gem-graded examples at PCGS in all color designations, with none numerically finer (12/14). The nearly unabraded surfaces display glossy auburn-brown patina, with significant copper-red remaining in the protected regions. The strike is generally sharp overall, with the only notable weakness seen on the lower obverse stars. Our EAC grade MS62. PCGS# 397743 Base PCGS# 1862
- 3417 1851 N-10, R.1, MS66 Brown PCGS. CAC.** Grellman Die State b. Although the obverse is chocolate-brown with powder-blue undertones, the reverse displays considerable mint red. The reverse high points are gunmetal-gray. A lustrous high grade cent. Smooth save for a tick on the rim near star 11. Our EAC grade MS63. PCGS# 406677 Base PCGS# 1892

**1853 Cent, N-25, MS65 Red  
Glowing Original Luster**

- 3418 1853 N-25, R.1, MS65 Red NGC.** Die State b, the usual die state for high-grade Mint State pieces. This variety is fairly plentiful in high grades, ideal for type representation. This representative displays glowing coppery-red luster beneath frosty, delicately preserved surfaces. The peripheral stars are not all sharp, but the central devices are well-defined. Our EAC grade MS64. Census: 43 in 65 Red, 12 finer (12/14). NGC ID# 226K, PCGS# 1903
- 3419 1855 Upright 55, N-4, R.1, MS66 Brown PCGS. CAC.** Grellman Die State a. A crisply struck and coruscating high grade cent. The obverse is chocolate-brown with tinges of rose-red. The reverse is olive-green aside from a blush of ruby-red near the right periphery. Smooth aside from wispy field marks near the U in UNITED. Our EAC grade MS60. PCGS# 406154 Base PCGS# 1907
- 3420 1855 Upright 55, N-7, R.1, MS65 Brown NGC.** A few stars are weak, but the central devices are sharply brought up. Subtle luster highlights remaining coppery-red hues in the protected regions, while the remainder of each side is auburn-brown. Well-preserved, as expected for the Gem level. Our EAC grade MS62. PCGS# 406162 Base PCGS# 1907
- 3421 1856 Slanted 5, N-18, R.1, MS64 Red PCGS.** Die State c. The fields are rough, particularly on the obverse, as is characteristic of this late die state. The stars have complete radial lines, but are not as sharp as are the central devices due to die fatigue. Luminous coppery-red luster highlights the minimally disturbed surfaces, though the obverse also shows some deeper verdigris in the upper-right margin. Our EAC grade MS63. PCGS# 1924

## FLYING EAGLE CENTS

- 3422 1857 MS64 PCGS. CAC.** Type of 1857. This is a satiny, bronze-gold example of this short-lived Flying Eagle type. The eagle's tailfeathers are slightly soft, as usual, though the remainder of each side is sharply struck. A couple small die cracks are present in the central eagle feathers. NGC ID# 2276, PCGS# 2016

### 1857 Flying Eagle Cent, Attractive MS65

- 3423 1857 MS65 PCGS.** Type of 1857, showing an oval interior to O(F). Beautiful reddish-gold patina enlivens each side of this lustrous Gem 1857 Flying Eagle cent, a coin refreshingly free of visible flecks, even under a loupe. The only mentionable contact mark is one vertical line through the underside of the eagle's forward wing. PCGS reports only 14 grading events numerically finer than this attractive piece (12/14). NGC ID# 2276, PCGS# 2016

- 3424 1858 Large Letters MS64 PCGS. CAC.** High Leaves Reverse. Closed E in ONE. A sharply struck near-Gem with sweeping luster and pleasing surfaces. Protected areas display butter-gold while the high points and open fields show deeper olive-brown toning. NGC ID# 2277, PCGS# 2019

### 1858 Flying Eagle Cent, MS65 Sharp Small Letters Representative

- 3425 1858 Small Letters MS65 PCGS. CAC.** Low Leaves, Open E in ONE. This is a pleasingly lustrous, satiny Gem representative of this short-lived Flying Eagle type. The tailfeathers and the bowknot are sharply defined, rendering above-average eye appeal for the issue. The surfaces are free of major abrasions, with warm bronze-gold color throughout. Population: 71 in 65, 9 finer (12/14). NGC ID# 2279, PCGS# 2020

- 3426 1858/7 Snow-1, FS-301, AU53 PCGS.** The upper right corner of the underdigit 7 is evident northeast of the second 8. A die lump is nearly equidistant between the eagle and the first 8. Golden-tan and bluish patination covers both sides of this overdate. The design elements are well-struck. PCGS# 37383 Base PCGS# 2022

- 3427 1858/7 Snow-1, FS-301, AU55 PCGS.** The upper right notch of the 7 is faintly apparent northeast of the second 8 in the date. A die lump above the first 8 in the date provides a secondary diagnostic. A sharply struck and unmarked tan-brown Choice AU example of the very scarce *Guide Book* overdate. PCGS# 37383 Base PCGS# 2022

## INDIAN CENTS

- 3428 1859 MS64 NGC.** A boldly struck and satiny Choice example of this one-year Laurel Wreath type. The color is primarily tan-gold, and the surfaces are free of any significant abrasions. Housed in a prior generation holder. NGC ID# 227E, PCGS# 2052

- 3429 1859 MS64 PCGS. CAC.** The well-preserved original red surfaces of this attractive Choice example have mellowed to light brown in some areas but both sides retain bright mint luster and the design elements are well-detailed. Eye appeal is outstanding. NGC ID# 227E, PCGS# 2052

- 3430 1866 MS65 Red and Brown PCGS. CAC.** Eagle Eye Photo Seal, card not included. A sea-green and rose-red Gem. The strike is precise and the lustrous surfaces are essentially unabraded. A few tiny brown flecks are noted near the denomination. NGC ID# 227P, PCGS# 2086

- 3431 1867 MS65 Red and Brown PCGS.** A boldly struck and remarkably lustrous example of this elusive late 1860s issue. The obverse displays substantial mint red, though the reverse is a bit more deeply toned in glossy burgundy hues. Population: 58 in 65 Red and Brown, 1 finer (12/14). NGC ID# 227R, PCGS# 2089

- 3432 1867 MS65 Red and Brown PCGS. CAC.** A challenging date overall, but especially so in Gem condition with remaining mint Red. This piece is well-struck and consistently preserved, with lightly dappled auburn-brown toning scattered over luminous coppery-orange luster. Population: 58 in 65 Red and Brown, 1 finer (12/14). NGC ID# 227R, PCGS# 2089

- 3433 1867/67 Snow-1 AU55 PCGS.** The repunched date is boldly visible on this Choice AU example. Both sides have deep chocolate-brown toning with hints of lighter tan and delicate bluish overtones. Prominent clash marks appear in the left obverse field. PCGS# 37459 Base PCGS# 92088

- 3434 1869 MS64 Red and Brown PCGS.** This boldly detailed Choice Mint State 1869 Indian cent exhibits flashes of brilliant orange mint luster, intermingled with bluish-brown toning on each side. Minor clash marks are noted on both sides. NGC ID# 227T, PCGS# 2095

- 3435 1869 MS64 Red and Brown PCGS. CAC.** Both sides of this Choice 1869 Indian cent display consistent coppery-orange luster, although the presence of an additional violet hue in the central obverse likely accounts for this coin not receiving a Red color designation. The strike is sharp throughout the headdress feathers and the ribbon, and the eye appeal is equally impressive for the grade. NGC ID# 227T, PCGS# 2095

- 3436 1869/69 Snow-3, FS-301, MS64+ Red PCGS. CAC.** Although not noted on the holder, this popular variety, discovered by Walter Breen in 1953, shows the 69 in the date clearly repunched north. Blazing copper-red paints the boldly defined and highly lustrous surfaces. Trivial carbon appears over each side and only a minute tick below the O in OF deserves mention. Highly attractive. Population: 41 in 64 (1 in 64+) Red, 34 finer (12/14). PCGS# 37476 Base PCGS# 2096

- 3437 1872 MS64 Red and Brown PCGS. CAC.** Bold N. Indian cents from the 1870s are always in high demand, particularly with remaining Mint Red. This 1872 example is primarily orange-gold in color, although a few faint overtones on each side, hardly discernable at first glance, preclude a full Red color designation from PCGS. The strike is bold, with trivial marks on the high points. NGC ID# 227W, PCGS# 2104

- 3438 1877 VF30 PCGS. LIBERTY** is clear on this lightly circulated example, while both sides display uniform chocolate-brown coloration. A collector-grade representative of this widely sought series key. NGC ID# 2284, PCGS# 2127

- 3439 1877 VF30 NGC.** Smooth chocolate-brown patina encompasses each side of this mid-grade circulated example, while the devices retain pleasing detail. A collectible representative of this key Indian cent issue. NGC ID# 2284, PCGS# 2127

- 3440 1877 — Scratch — PCGS Genuine. AU Details.** Shallow N. Liberty's cheek has a hair-thin mark, and a pinscratch journeys from the top of the neck down to the 77 in the date. Nonetheless, a chocolate-brown key date with only moderate wear. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, Unc Details  
Moderate Auburn Toning**

- 3441 1877 — Cleaning — PCGS Genuine. Unc Details.** The 1877 Indian cent, the biggest key date in the series, is always in demand regardless of condition. This unworn example shows evidence of light cleaning, but has long since retuned with rich auburn-brown and burgundy hues that let through tinges of coppery-orange color. Struck from worn dies, with minor weakness seen periodically around the borders. The N in ONE is shallow on its lower-left point, a diagnostic of genuine representatives. NGC ID# 2284, PCGS# 2128

- 3442 1909-S MS65 Brown PCGS. CAC.** Remarkably appealing for a Brown coin, this Gem branch mint semikey displays strong, satiny luster beneath medium brown toning that reveals tinges of reddish color in the protected regions. The coin is well-struck, save for the tips of the top three feathers which are diagnostically soft. Population: 7 in 65 Brown, 1 finer (12/14). NGC ID# 2298, PCGS# 2238

**1909-S Indian Cent, Lustrous MS65 Red and Brown**

- 3443 1909-S MS65 Red and Brown PCGS. CAC.** Yellow, gold, tan, and orange patina intermingles on each side of this nicely lustrous key-date Indian cent, which still shows considerable mint red. A loupe reveals a few scattered tiny flecks on the obverse, but the reverse shows a couple of larger dark areas on the right and lower wreath areas, while still remaining on the small side. The 1909-S Indian is the true cent key date of the year, surviving in much smaller numbers than the 1909-S VDB Lincoln. This piece with the CAC green approval is one of only 38 in Red and Brown there, and only two are finer (12/14). NGC ID# 2298, PCGS# 2239

**PROOF INDIAN CENTS**

- 3444 1873 Closed 3 PR65 Red and Brown PCGS. CAC.** While the Closed 3 business strike 1873 Indian cents are sometimes difficult to differentiate from their Open 3 counterparts, the proof variant was only struck with the Closed 3 logotype, making identification swift. This Gem Red and Brown example displays nearly full red color, with just a few tiny specks discernable upon close examination. The strike is sharp and the fields are moderately reflective. Population: 43 in 65 Red and Brown, 7 finer (12/14). NGC ID# 229S, PCGS# 2307

- 3445 1886 Type One PR67 Brown PCGS.** Apple-green undertones endow this richly patinated Superb Gem. The strike is intricate throughout. Patience and a strong lens are required to locate infrequent pinpoint carbon. Certified in a green label holder. NGC ID# 22A7, PCGS# 2345

- 3446 1893 PR66 Red and Brown PCGS. CAC.** This beautifully preserved proof exhibits noticeably more red than brown color on each side, and also possesses modest cameo contrast on the obverse. A faint speckling of tiny specks shows up on the reverse upon close study with a lens, though the mirrored fields are otherwise devoid of flaws. Population: 7 in 66 Red and Brown, 1 finer (12/14). NGC ID# 22AF, PCGS# 2367

- 3447 1900 PR65 Red PCGS. CAC. Snow-PR1.** The 19 is lightly repunched south. A needle-sharp orange-red Gem with glimpses of apple-green near ONE CENT. Flashy and virtually devoid of carbon.  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 5576, which realized \$1,035. NGC ID# 22AN, PCGS# 2389*

- 3448 1902 PR66 Red and Brown PCGS. CAC.** Vivid violet and forest-green hues accent primarily sun-gold toning on each side of this beautifully patinated Premium Gem proof. The strike is bold and the fields display ample reflectivity. Population: 39 in 66 (3 in 66+) Red and Brown, 5 finer (12/14). NGC ID# 22AR, PCGS# 2394

**1903 Cent, PR66 Red  
Vivid Color and Sharp Motifs**

- 3449 1903 PR66 Red PCGS. CAC.** Due to a change in the preparation of the dies the year before, few proof cents from 1903 exhibit any degree of cameo contrast. The challenge, therefore, is more in locating a full Red, high-grade example such as the present Premium Gem. Deeply mirrored fields and sharp devices deliver catching eye appeal, while fiery-orange peripheries encircle lighter, lemon-gold centers. A few tiny specks are observed with a loupe, but pose little if any distraction. Population: 35 in 66 Red, 12 finer (12/14). NGC ID# 22AS, PCGS# 2398

## LINCOLN CENTS

### 1909 VDB Lincoln Cent, MS65 Red Doubled Die Obverse

- 3450 1909 VDB Die Doubled Obverse, FS-1101, MS65 Red PCGS.** The obverse is noticeably die doubled, most prominently on LIBERTY and the date. This full Red Gem example is well-struck, with frosty bronze-red luster and no evidence of carbon spotting. A well-preserved and appealing representative. Population: 12 in 65 (2 in 65+) Red, 4 finer (12/14).  
*Ex: Houston Signature (Heritage, 12/2010), lot 3238. PCGS# 37633 Base PCGS# 82425*

- 3451 1909-S VDB AU53 PCGS.** Golden-tan patination runs over both sides of this key-date Lincoln, displaying a wood grain finish on the obverse that is common to cents of its era. The design elements are well-defined and neither side reveals mentionable marks or spots. NGC ID# 22B2, PCGS# 2426
- 3452 1909-S VDB AU53 PCGS. CAC.** The 1909-S VDB Lincoln cent is arguably the most sought-after issue in the series. This is a collectible AU representative, with pleasing detail and smooth, medium brown surfaces. NGC ID# 22B2, PCGS# 2426
- 3453 1909-S VDB MS64 Brown PCGS.** Sharp motifs complement smooth, satiny surfaces on this Choice 1909-S VDB cent. The surfaces are largely olive-brown in color, though the strong underlying luster shines through in glimpses of coppery-orange and amber. NGC ID# 22B2, PCGS# 2426
- 3454 1909-S VDB MS62 Red and Brown PCGS.** The original red surfaces of this sought-after key Lincoln cent show a few areas of mottled brown toning and some minor signs of contact. The design elements are sharply detailed and vibrant mint luster is evident on both sides. NGC ID# 22B2, PCGS# 2427
- 3455 1909-S VDB MS63 Red and Brown PCGS.** Mint Red clings to design crevices, while the open fields and high points are brown. Lustrous, intricately struck, and impressively free from spots or abrasions. Certified in a green label holder. NGC ID# 22B2, PCGS# 2427
- 3456 1909-S VDB MS64 Red and Brown PCGS.** Both sides of this Choice Mint State example display rich orange luster beneath brown and blue-green toning. A dull toning spot is trapped between the O and N in ONE. NGC ID# 22B2, PCGS# 2427
- 3457 1909-S VDB MS64 Red and Brown PCGS. CAC.** This orange-gold Choice key date cent has a precise strike and no distracting contact. Study beneath a loupe locates only infrequent minuscule carbon. All three initials and periods are fully impressed. A lovely example of this all-time collector favorite. NGC ID# 22B2, PCGS# 2427
- 3458 1910-S MS66 Red PCGS.** A boldly struck Premium Gem, this 1910-S Lincoln also displays glowing golden-orange luster and satiny, well-preserved surfaces. Some minor die fatigue is evident around the extreme outer peripheries, but the border legends are nonetheless sharp. PCGS has certified only three numerically finer representatives (12/14). NGC ID# 22B6, PCGS# 2440
- 3459 1911-D MS65 Red PCGS. CAC.** The 1911-D Lincoln cent is an elusive issue in MS65 condition, with original red surfaces. This spectacular Gem example offers well-preserved surfaces with vibrant mint luster and sharply detailed design elements. PCGS has graded 25 numerically finer examples (12/14). NGC ID# 22B8, PCGS# 2446

- 3460 1911-S MS65 Red and Brown PCGS. CAC.** This is a boldly struck Gem, with almost matte-like luster and no evidence of carbon spotting. Consistent bronze-gold color accents each side, yielding an nearly full red appearance but being just a little too pale to warrant the designation from PCGS. Population: 64 in 65 (1 in 65+) Red and Brown, 0 finer (12/14). NGC ID# 22B9, PCGS# 2448

### 1912-S Lincoln, Flashy MS65 Red

- 3461 1912-S MS65 Red PCGS. CAC.** A key S-mint in the Lincoln cent series (like most of the S-mints in the series from this date up through 1927), the 1912-S is available in Gem Red condition at both services, yet only a single one grades finer at each. The flashy surfaces are almond-gold and quite sharply struck, save unfortunately for the 2, and they are quite clean and distraction-free. Some die clashing shows on the reverse. A fine example for a top-flight Registry Set. Population: 63 in 65 (3 in 65+) Red, 1 finer (12/14). NGC ID# 22BC, PCGS# 2458
- 3462 1914-D MS62 Brown PCGS.** This is a boldly struck, satiny example of this key Denver issue, with smooth surfaces that display tinges of olive-brown amid deeper chocolate-brown toning overall. An important opportunity for the budget-conscious collector to acquire a pleasing, yet affordable example of this elusive date. NGC ID# 22BH, PCGS# 2471
- 3463 1915 MS66 Red PCGS. CAC.** A few toning swirls appear in the right obverse field of this brilliant and highly lustrous Premium Gem. Both sides have full orange mint color and sharp design motifs. Population: 88 in 66 (2 in 66+) Red, 9 finer (12/14). NGC ID# 22BK, PCGS# 2479
- 3464 1917 MS66 Red PCGS.** Vibrant coppery-pink luster yields overtones of deeper orange-gold on the reverse, illuminating the boldly impressed relief elements. A couple small flecks are detectable upon close examination, though the radiant cartwheel effect is the chief draw on the viewer's eye. PCGS has certified only 18 numerically finer coins (12/14). NGC ID# 22BS, PCGS# 2497
- 3465 1918-S MS65 Brown PCGS. CAC.** The glossy surfaces of this Gem 1918-S cent are a little too deeply toned to qualify for a Red and Brown grade, though small tinges of red still reside amid the uniform auburn-brown patina, and the underlying luster is evident when tilted beneath a light. Boldly struck and remarkably eye-appealing. Population: 9 in 65 Brown, 0 finer (12/14). NGC ID# 22BX, PCGS# 2510
- 3466 1919-D MS64+ Red PCGS. CAC.** The Plus designation denotes exceptionally clean surfaces for the Choice grade level, though die wear results in softened definition on some of the finer design elements. Both sides show consistent coppery-pink luster, with a few faint specks detectable upon close examination. NGC ID# 22BZ, PCGS# 2518
- 3467 1920-D MS65 Red PCGS.** A high-end example of this conditionally scarce issue, this Gem 1920-D cent displays softly coppery-pink luster with just a few minor specks detectable in the left obverse field. Struck from worn dies, as usual, with moderate weakness around the reverse peripheries. Population: 86 in 65 Red, 7 finer (12/14). NGC ID# 22C4, PCGS# 2527
- 3468 1922 No D, Strong Reverse, FS-401, VF35 PCGS. CAC.** A pleasing mahogany-brown example, this 1922 No D cent features the Strong Reverse found on the only true examples of the *Guide Book* listed variety. Trivial surface marks are expected at this grade level. PCGS# 37676 Base PCGS# 3285

**3469 1922 No D, Strong Reverse, FS-401, XF45 NGC. CAC.** The second 2 in the date is sharp. This is an immensely popular *Guide Book* variety, and the present example is a well-detailed collector-grade coin. The obverse is medium brown in color, while the reverse is two-toned in the same and a lighter brassy hue. PCGS# 37676 Base PCGS# 3285

**3470 1929-D MS65+ Red PCGS. CAC.** Almost no abrasions are observed on either side of this Plus-graded Gem, though die fatigue limits the finer detail definition, particularly on the obverse. Satiny coppery-gold luster encompasses both sides, and only a few tiny flecks are seen with a loupe. PCGS has certified only 28 numerically finer full Red representatives (12/14). NGC ID# 22CV, PCGS# 2599

**3471 1931-S MS66 Red PCGS.** An elusive semikey issue, the 1931-S Lincoln cent boasts a low mintage of only 866,000 coins. This Premium Gem example displays satiny copper-orange luster and well-defined motifs. A few small specks are not overly obvious. Population: 96 in 66 Red, 0 finer (12/14). NGC ID# 22D4, PCGS# 2620

#### 1932-D Lincoln Cent, MS66+ Red Exceptionally Rare Numerically Finer

**3472 1932-D MS66+ Red PCGS. CAC.** Bright, coppery-pink luster yields tinges of deeper orange-red on each side of this satiny Premium Gem Registry coin. The strike is sharp, and the surfaces exhibit excellent preservation with only a few tiny specks detected upon close examination. PCGS has encapsulated only 12 numerically finer representatives (12/14). NGC ID# 22D6, PCGS# 2626

**3473 1936-S MS67 Red PCGS.** Frosty, orange-red mint luster accents beautifully preserved surfaces on each side of this well-struck Superb Gem. An important offering for the Registry collector. Population: 53 in 67 (1 in 67+) Red, 0 finer (12/14). NGC ID# 22DG, PCGS# 2656

**3474 1943-D MS68 PCGS.** An immaculate high-grade example of the single-year zinc-plated steel cent. The strike is unimprovable, and the silver-white surfaces are satiny. None graded finer at either service. PCGS# 2714

#### 1953 Lincoln Cent, MS67 Red Tied for Finest at PCGS

**3475 1953 MS67 Red PCGS.** A prime Registry Set candidate, this full Red Superb Gem ranks with just 13 others as the finest certified at PCGS (12/14), and is a full grade point finer than the example represented in the current highest-rated Registry Set. Vibrant coppery-orange mint bloom illuminates bold design features, while the surfaces are void of any discernable post-minting flaws. A few tiny strike-throughs (as made) are noted on Lincoln's shoulder, as usual. NGC ID# 22F9, PCGS# 2806

#### 1953-S Cent, MS67+ Red Glowing, Superb Surfaces

**3476 1953-S MS67+ Red PCGS. CAC.** This remarkable Registry Set blazer is tied with just two other Plus-designated MS67 coins as the finest certified at PCGS (12/14), and ranks nearly half a grade point finer than the example in the current highest-rated Registry Set. Frosty, vibrant luster displays warm coppery-red hues on each side, while the strike is sharp and the surfaces are largely devoid of flaws. NGC ID# 22FB, PCGS# 2812

**3477 1955 Doubled Die Obverse, FS-101, AU50 PCGS. Gold CAC.** The strongest doubled die of the entire Lincoln series. Deeply iridescent golden-brown, aquamarine, and lilac patina invigorates this satiny and pleasing key date cent. The upper right reverse exhibits a few hair-thin parallel retained laminations, as coined. PCGS# 37910 Base PCGS# 2825

**3478 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** FS-101 is the most impressive of the doubled die Lincoln cent varieties, with dramatic doubling on the date, LIBERTY, and IN GOD WE TRUST. Soft reddish-brown patination imbued with traces of sky-blue runs over both sides of this Choice AU, each of which exhibits well-struck design elements. PCGS# 37910 Base PCGS# 2825

**3479 1955 Doubled Die Obverse, FS-101 — Improperly Cleaned — NGC Details. Unc.** Most examples of the dramatic doubled die 1955 cent are toned brown, since the variety was saved from circulation instead of recovered from original rolls. The present coin is deceptively recolored lime-green, rose, and orange, but the surfaces are satiny and void of abrasions.

#### 1955 Cent, MS64 Brown Doubled Die Obverse

**3480 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC.** This eye-appealing Choice example is remarkably well-preserved for this *Guide Book* variety, with glossy violet and burgundy patina over much of both sides and significant tinges of coppery-red luster surrounding the relief elements. Few examples in the Brown color category can match this piece's immense visual appeal. PCGS# 37910 Base PCGS# 2825

**1964 Cent, MS66+ Red  
Only Two Numerically Finer at PCGS**

- 3481 1964 MS66+ Red PCGS.** An important opportunity for the Registry Set collector to acquire a high-end example of this seemingly common date. Only two pieces are certified numerically finer at PCGS (12/14). Both sides display heavily frosted copper-red luster, with sharp motifs and delicately preserved surfaces. NGC ID# 22G7, PCGS# 2890

**PROOF LINCOLN CENTS**

- 3482 1909 PR65 Brown PCGS.** Deep crimson, maroon, and orange toning cascades over the well-cared for surfaces of this Gem Proof. The design elements are sharply impressed. Population: 19 in 65 Brown, 6 finer (12/14). NGC ID# 22KS, PCGS# 3303
- 3483 1912 PR64 Red PCGS.** Uniform copper-gold color on the matte surfaces invigorate this sharply struck near-Gem proof. A handful of small toning spots is more prevalent on the reverse. Population: 31 in 64 Red, 19 finer (12/14). NGC ID# 22KV, PCGS# 3314
- 3484 1913 PR65 Red and Brown PCGS. CAC.** This Gem proof Lincoln exhibits significantly more red than brown, although a few burgundy overtones on the reverse limited PCGS's assessment. The strike is sharp and both sides appear free of noticeable carbon spotting. PCGS has certified only 26 numerically finer examples within the Red and Brown color category (12/14). NGC ID# 22KW, PCGS# 3316
- 3485 1940 PR65 Cameo NGC.** Although the Mint used an all-brilliant finish on proofs of the 1940s, the sharply detailed design elements of this spectacular Gem show enough mint frost to contrast noticeably with the deeply mirrored fields. The original red surfaces show no mentionable distractions. Census: 3 in 65 Cameo, 0 finer (12/14). NGC ID# 22L7, PCGS# 83347
- 3486 1942 PR66 Red PCGS. CAC.** This incredible Premium Gem displays original red surfaces with no mentionable flaws. The design elements are sharply detailed and the fields are deeply reflective, with terrific eye appeal. PCGS has graded two numerically finer examples (12/14). NGC ID# 22L9, PCGS# 3353
- 3487 1942 PR66 Red PCGS. CAC.** The original red surfaces of this spectacular Premium Gem are impeccably preserved and the design elements are sharply detailed throughout. The deeply reflective fields add to the outstanding eye appeal. PCGS has graded two numerically finer examples (12/14). NGC ID# 22L9, PCGS# 3353

**1990 Proof Set Featuring No S Cent  
Original Mint Packaging**

- 3488 1990 Proof Set Featuring No S Cent.** A five-piece proof set from 1990 in the original lavender-red government packaging, including the plastic case, box, and certificate of authenticity. The cent is the rare and coveted No S FS-101 variety. It is fully struck and offers exemplary cameo contrast. The cent appears pristine aside from a pair of tiny gray spots on the reverse rim near 2 and 3 o'clock. (Total: 5 coins) NGC ID# 274B, PCGS# 93506

**TWO CENT PIECES**

**1864 Two Cent Piece, MS65 Brown  
Scarcer Small Motto Variant**

- 3489 1864 Small Motto MS65 Brown PCGS.** The first T in TRUST grazes the ribbon fold nearby, and the leaf stem below is bold. On the reverse, die cracks join many of the peripheral letters and devices at their bottoms. This attractive medium-brown Gem example has a smattering of light gold near the rims on each side. This is a well struck piece with slight weakness only on the left-side center leaves, as often seen, but here stronger than on most examples. Population: 13 in 65 Brown, 1 finer (12/14). NGC ID# 22N8, PCGS# 3579
- 3490 1865 Plain 5 MS66 Red and Brown PCGS. CAC.** Much more Red than Brown, with only the field near the denomination faded from orange-gold. Lustrous, nicely struck, and devoid of contact. A high grade Civil War type coin. PCGS# 38248 Base PCGS# 3583
- 3491 1866 MS65 Red PCGS. CAC.** The 1866 two cent piece is a less often seen date in Mint State, and is especially scarce in full Red grades. This Gem example displays soft, bronze-orange luster and sharply struck central devices. Only a couple tiny specks are discernable with a lens. Population: 47 in 65 (2 in 65+) Red, 8 finer (12/14). NGC ID# 274R, PCGS# 3590
- 3492 1868 MS65 Red and Brown PCGS. CAC.** This Gem 1868 two cent piece showcases a full strike and satiny luster that is free of noticeable carbon spotting. The coin is certified as Red and Brown, but displays primarily orange-gold color, with just a few faint auburn overtones on the obverse limiting the assessment from PCGS. Population: 50 in 65 Red and Brown, 4 finer (12/14). NGC ID# 22NC, PCGS# 3598
- 3493 1869 MS65 Red and Brown PCGS. CAC.** Coppery-gold luster adorns the obverse of this sharply struck Gem, while soft maroon patina resides on the reverse. A few tiny flecks do not detract from the pleasing overall eye appeal. Population: 54 in 65 Red and Brown, 3 finer (12/14). NGC ID# 22ND, PCGS# 3604

**3494 1869 MS64 Red PCGS.** An olive-green and orange-gold Choice proof that boasts a full strike and potent luster. Minor carbon and contact emerges beneath a lens. Encased in an old green label holder.

Ex: Orlando FUN Signature (Heritage, 1/2008), lot 557, which realized \$1,380. NGC ID# 22ND, PCGS# 3605

**3495 1871 MS64 Red PCGS.** A scarce, late-date two cent piece that is more challenging with full red surfaces than earlier years. The color on this piece is undiminished with even copper-gold color over each side. Well defined, except minor softness on the leaves on the left side of the obverse. Some minuscule flecks are visible under magnification.

Ex: Central States Signature (Heritage, 5/2007), lot 1347. NGC ID# 22NF, PCGS# 3611

**3496 1872 XF45 NGC.** A collector-grade example of this key final-year business strike. This Choice XF piece exhibits even chocolate-brown coloration and pleasing detail for the grade. The 1872 is one of only two significant keys in this short, very collectible series, the other being the 1864 Small Motto. NGC ID# 22NG, PCGS# 3612

## PROOF TWO CENT PIECES

### 1864 Large Motto Two Cent, Unblemished PR66 Brown Beautiful Deep Blue Patina

**3497 1864 Large Motto PR66 Brown PCGS.** This Premium Gem proof two cent piece is a happy confluence for color aficionados and those who collect the so-called "odd denominations" of American coinage. Beautiful deep blue patina prevails in the obverse fields of this unblemished coin, while the reverse adds from heather patina, and the raised devices are truly mostly brown with an occasional splotch of orange. The strike is quite sharp, especially on the obverse, and a couple of trivial dark flecks appear only under magnification. Population: 9 in 66 (2 in 66+) Brown, 1 finer (12/14). NGC ID# 274T, PCGS# 3621

**3498 1869 PR65+ Brown PCGS.** Remarkably deep mirroring in the fields provides a spectacular back drop for fully struck design elements, and all amid beautiful shades of violet, gold, and royal-purple toning. Despite the patina, modest cameo contrast is noticed on both sides, heightening the immense visual appeal. Population: 9 in 65 (1 in 65+) Brown, 3 finer (12/14). NGC ID# 274Y, PCGS# 3639

### 1869 Two Cent Piece, PR66 Red and Brown Nearly Full Red Surfaces

**3499 1869 PR66 Red and Brown PCGS.** Considerable reflectivity in the fields and razor-sharp definition on the design elements are the hallmarks of this Premium Gem proof. Both sides display nearly full Red color, with only a few faint wisps of auburn detectable upon close study. A couple tiny specks are noted with a lens. Population: 19 in 66 Red and Brown, 2 finer (12/14). NGC ID# 274Y, PCGS# 3640

**3500 1870 PR66 Red and Brown NGC.** The original red surfaces of this delightful Premium Gem have mellowed to light brown and lavender in some areas, but no mentionable distractions are evident. The design elements are sharply detailed and the fields are deeply reflective under the patina. Census: 20 in 66 Red and Brown, 0 finer (12/14). NGC ID# 274Z, PCGS# 3643

**3501 1872 PR64 Red and Brown PCGS. CAC.** Due to the scarcity of high-grade business strikes, proof 1872 two cent pieces are in high demand among date collectors. This Choice Red and Brown representative is well-struck, with pleasantly reflective fields. The surfaces are largely bronze-orange in color, although both sides reveal areas of deeper violet. NGC ID# 2752, PCGS# 3649

**3502 1873 Open 3 PR62 Brown ANACS.** The 3 in the date is clearly of the Open logotype. This is a pleasing lower-grade proof, showing moderately reflective fields and sharply struck devices. Olive-gold is the primary color on both sides, though areas of violet and coppery-red are also present. NGC ID# 2754, PCGS# 3654

## THREE CENT SILVER

### 1851-O Three Cent Silver, MS65 Sole Branch Mint Issue of the Series

**3503 1851-O MS65 PCGS.** The 1851-O three cent silver, with a mintage of only 720,000 pieces, is highly popular in all grades as the only branch mint issue in the series. Few examples survive in the finer Mint State grades, however, and demand increases in proportion to the decrease in availability. This Gem representative is better-struck than most examples of the date, with thickly frosted mint luster shining through a tinge of light golden toning on each side. Population: 48 in 65, 26 finer (12/14). NGC ID# 22YY, PCGS# 3665

**3504 1853 MS66 PCGS.** A frosty, beautifully preserved example, with essentially untoned mint luster and above-average central definition than is typically seen on this type. The 1853 silver three cent piece is notably scarce this well-preserved, and is rarely encountered finer. Population: 63 in 66 (3 in 66+), 8 finer (12/14). NGC ID# 222Z, PCGS# 3667

**3505 1853 MS66 PCGS.** This Premium Gem shows evidence of die fatigue in the fields, but the devices are nonetheless well-defined. Satiny luster attests to the originality of the light champagne toning that warms each side. Population: 63 in 66 (3 in 66+), 8 finer (12/14). NGC ID# 222Z, PCGS# 3667

**3506 1854 MS65 NGC.** Silver three cent production declined in 1854 to just 671,000 pieces (down from more than 11 million coins the year before), and this issue is proportionately more elusive in high grades than its earlier Philadelphia counterparts. This Gem example is remarkably sharp for the type, with frosty luster illuminating splashes of violet, ocean-blue, and olive-gold. Census: 28 in 65, 5 finer (12/14). NGC ID# 22Z3, PCGS# 3670

**3507 1855 MS64 PCGS. Breen-2920.** The 5s in the date are boldly repunched within their loops. A beautifully patinated example that exhibits peach-red, forest-green, and slate-gray toning. Unabraded and coruscating with well struck centers and softly defined stars. NGC ID# 22Z4, PCGS# 3671

#### 1868 Three Cent Silver, MS64 Elusive, Low-Mintage Issue

**3508 1868 MS64 PCGS.** With a paltry mintage of only 3,500 pieces, the 1868 three cent silver is scarce in all grades, and is decidedly rare in Mint State. This Choice example is boldly struck, with distinctive prooflike mirroring in the fields — not uncommon for an issue with such a low production total. Light golden toning blankets each side and the surfaces are free of significant abrasions. Population: 11 in 64, 7 finer (12/14). NGC ID# 22ZJ, PCGS# 3688

#### PROOF THREE CENT SILVER

**3509 1865 PR64 PCGS. CAC.** Beautiful arcs of cherry-red, lemon-gold, and aquamarine endow the margins of this flashy and fully struck near-Gem. Minor mint-made lint marks are all that limit the grade. A Civil War date with a scant mintage of 500 pieces. Housed in a prior generation holder. NGC ID# 27CB, PCGS# 3715

**3510 1866 PR65 PCGS.** A splendid proof striking, with razor-sharp devices and highly reflective fields. Sun-gold, violet, and gunmetal-blue toning encompasses both sides in mottled patterns, slightly diminishing any field-motif contrast. Population: 27 in 65, 21 finer (12/14). NGC ID# 27CC, PCGS# 3716

**3511 1866 PR64 Cameo PCGS. CAC.** Sharply struck devices are highlighted by the mirrored fields of this near-Gem. Whispers of champagne-gold are somewhat more prevalent on the reverse of this nicely preserved specimen. PCGS# 83716

#### 1867 Three Cent Silver, Toned PR66 Cameo

**3512 1867 PR66 Cameo PCGS. CAC.** Cameos represent only a small portion of the surviving 1867 proof three cent silver population, and Deep Cameos are almost unobtainable. This Premium Gem Cameo is softly contrasted despite deep gold and aquamarine toning that blankets each side. The strike is full and there is glassy reflectivity in the fields. Population: 15 in 66 (2 in 66+) Cameo, 5 finer (12/14). PCGS# 83717

**3513 1868 PR64 Cameo NGC.** Outstanding cameo frost affirms the eye appeal of this brilliant near-Gem. A small gray spot is beneath the E in UNITED. The *Guide Book* reports a mere 600 pieces struck. Census: 7 in 64 Cameo, 14 finer (12/14).  
*Ex: Central States Signature (Heritage, 5/2005), lot 5747. PCGS# 83718*

**3514 1872 PR64 Cameo NGC. CAC.** The design elements of this attractive Choice example are sharply detailed and richly frosted, creating intense cameo contrast with the deeply reflective fields. A few hints of pale gold and cerulean-blue toning highlight the well-preserved surfaces. Census: 8 in 64 Cameo, 11 finer (12/14). PCGS# 83723

#### THREE CENT NICKELS

**3515 1868 MS66+ PCGS. CAC.** Prominent clash marks add character to each side of this high-end Premium Gem, with a full profile of Liberty visible on the reverse. Frosty luster yields a light golden hue, and the design elements are notably sharp, with special notice given to the bowknot. Population: 34 in 66 (1 in 66+), 1 finer (12/14). NGC ID# 2756, PCGS# 3734

#### 1884 Three Cent Nickel, MS61 Scarce in Mint State

**3516 1884 MS61 ANACS.** From a tiny mintage of just 1,700 pieces, the 1884 three cent nickel is a rare issue in Mint State. This attractive nickel-gray example exhibits hints of green and lavender toning, with slightly subdued luster, and well-detailed design elements. A small planchet lamination is tucked against the reverse rim at 3 o'clock. NGC ID# 275F, PCGS# 3752

**3517 1889 MS66+ PCGS. CAC.** From a mintage of only 18,125 coins, this final-year Premium Gem displays softly frosted, shimmering luster beneath consistent golden-gray toning. The strike is bold throughout and the surfaces are quite literally devoid of any detracting flaws. Population: 26 in 66 (1 in 66+), 13 finer (12/14). NGC ID# 275J, PCGS# 3758

## PROOF THREE CENT NICKELS

- 3518 1869 PR66 Cameo NGC.** A spectacular three cent nickel, with sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. The well-preserved surfaces show attractive highlights of pale gold toning. Census: 36 in 66 Cameo (1 in 66+ Cameo, 6 in 66 ★ Cameo), 5 finer (12/14). PCGS# 83765
- 3519 1874 PR66+ Cameo NGC. CAC.** The design elements of this high end Premium Gem are sharply detailed in most areas, but LIBERTY is a little soft. The deeply mirrored fields contrast boldly with the frosty devices. Census: 34 in 66 Cameo (2 in 66+ Cameo, 2 in 66 ★ Cameo), 6 finer (12/14). PCGS# 83770
- 3520 1880 PR67 NGC. CAC.** A superb proof type coin, with reflective fields and sharp, satiny relief elements. Traces of light golden color accent the beautifully preserved surfaces. Heavy die polishing has partially effaced the lower reverse ribbon ends. Census: 55 in 67 (3 in 67 ★), 3 finer (12/14). NGC ID# 2762, PCGS# 3776
- 3521 1881 PR67 NGC. CAC.** An available proof issue overall, the 1881 proof three cent nickel becomes conditionally scarce in PR67, and finer pieces are rare. This coin is sharply struck, with lightly mottled golden-gray toning and moderately reflectivity in the fields. Census: 56 in 67 (4 in 67 ★), 8 finer (12/14). NGC ID# 2763, PCGS# 3777
- 3522 1882 PR67 PCGS. CAC.** Splendid mint-green and golden-orange pastel toning adorns both sides of this nearly flawless representative. The sharp devices are heavily frosted, but the fields are not quite deeply mirrored enough to produce adequate cameo contrast for the designation. Population: 90 in 67 (1 in 67+), 7 finer (12/14). Ex: *Central States Signature (Heritage, 5/2004)*, lot 6036. NGC ID# 2764, PCGS# 3778
- 3523 1883 PR67 NGC. CAC.** Delicate gold-tan color resides on the luminous surfaces of this Superb Gem proof. Sharply struck, including all lines in the III denomination. There are no noticeable marks or spots. Census: 83 in 67 (3 in 67 ★, 1 in 67+★), 4 finer (12/14). Ex: *Central States Signature (Heritage, 4/2010)*, lot 436. NGC ID# 2765, PCGS# 3779
- 3524 1884 PR67 PCGS. CAC.** A superb proof that must have just missed a Cameo designation. This piece is well-struck and lightly contrasted, with shades of champagne and ice-blue toning over each side. Population: 40 in 67, 1 finer (12/14). NGC ID# 2766, PCGS# 3780

## SHIELD NICKELS

- 3525 1866 Rays MS65 PCGS.** A well-struck Gem example, with satiny, brilliant luster illuminating each side. Faint, parallel die striations are present in the fields, the remnants of heavy die lapping in an attempt to efface die cracks, some of which are still visible in the peripheries. PCGS has certified 38 numerically finer representatives (12/14). NGC ID# 22NX, PCGS# 3790
- 3526 1866 Rays MS65 NGC.** A well-preserved, satiny Gem example with just a tinge of light golden toning over each side. The peripheral legends and several stars are weakly defined, a product of the Mint's struggle with fully striking the hard nickel alloy in the early years of the Shield type. NGC has encapsulated 24 numerically finer examples (12/14). NGC ID# 22NX, PCGS# 3790
- 3527 1867 No Rays MS66 PCGS.** An excellent type coin from the first year of the No Rays design, this spectacular Premium Gem offers well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of pale gold toning. Population: 17 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 22NZ, PCGS# 3794

- 3528 1871 MS65 NGC.** Soft champagne-gold color covers the lustrous surfaces of this Gem Shield nickel, accented with patches of deep gray on the reverse. Well-struck devices and nicely preserved surfaces are noted on each side. Census: 20 in 65, 6 finer (12/14). NGC ID# 22P5, PCGS# 3798

### 1876 Shield Nickel, MS66 Among the Finest Certified

- 3529 1876 MS66 PCGS.** The 1876 Shield nickel had a mintage in excess of 2.5 million coins, but survivors are rare above the Gem grade level. This Premium Gem example is well-struck, with satiny golden-gray luster and subtle reflectivity in the fields. Some strike doubling is evident on the date, not to be confused with a repunched date or one of the doubled die varieties known for this issue. Population: 15 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 22PB, PCGS# 3805

### 1883 Shield Nickel, MS67 None Certified Numerically Finer

- 3530 1883 MS67 PCGS.** The 1883 Shield nickel is widely popular as one of three different nickel types produced during this year. The present piece would be ideal for either a complete date set or three-coin type set, showing superb preservation and frosty, gold-tinted luster. The strike is sharp, and each side shows the usual array of peripheral die cracks. Population: 13 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 22PE, PCGS# 3813

## PROOF SHIELD NICKELS

- 3531 1866 Rays PR64 PCGS.** This slate-gray Choice proof displays hints of champagne-gold in the fields and has slightly subdued mirrors except when the coin is tilted slightly under a light, after which each side shows mild field-motif contrast. The design elements are well-struck, and the borders show one or two minute, unobtrusive flecks. The first year of the long-lived nickel denomination, and the most collectible proof date of the Rays subtype. Ex: *FUN Signature (Heritage, 1/2010)*, lot 3669. NGC ID# 276G, PCGS# 3817
- 3532 1870 PR66 NGC. CAC.** This proof issue is fairly available in PR65 and lower grades, but finer pieces are conditionally rare. This Premium Gem example is well-struck and reflective, with pale lavender-blue and mint-gold hues blanketing each side. Census: 16 in 66, 0 finer (12/14). NGC ID# 276L, PCGS# 3824

**3533 1872 PR66 Cameo PCGS. CAC.** The obverse is noticeably die doubled, although the doubling does not seem to match any of the varieties currently listed in the *Cherrypickers'* reference; it is closest to FS-101, but the coin here offered has a slightly wider spread than that which is seen on FS-101. This lovely Cameo is a distinctly appealing coin in both aesthetic and technical terms, showcasing a sharp strike and just a touch of light golden color. Population: 33 in 66 (2 in 66+) Cameo, 4 finer (12/14). PCGS# 83826

**3534 1873 Closed 3 PR66 Cameo PCGS. CAC. Fletcher-2.** The Closed 3 was only used early in the year on business strikes, but all proofs of this year show this feature. The present coin is a sharply detailed Premium Gem that boasts flashy fields and a hint of peripheral golden patina. The 1 in the date is lightly repunched beneath the flag and base. Population: 26 in 66 Cameo, 1 finer (10/14). PCGS# 83827

**3535 1873 Closed 3 PR66 Cameo PCGS. CAC. Fletcher-2.** The 1 in the date is repunched beneath the base. A fully struck and high grade proof nickel with mirrored fields and merely a hint of golden patina. Flawless save for a minor lamination (as coined) on the reverse rim at 12 o'clock. PCGS# 83827

**3536 1874 PR66+ PCGS. CAC. Fletcher-4.** The 4 is repunched north, apparent on its crossbar and peak. The strike is needle-sharp, and the lustrous surfaces display attractive peripheral golden-brown toning. A beautiful high grade Shield nickel. NGC ID# 276R, PCGS# 3828

**3537 1874 PR65 Cameo PCGS. CAC. Fletcher-4.** The 4 in the date is repunched. Faint chestnut toning visits this otherwise brilliant Gem. Crisply struck and lustrous with only microscopic carbon. Population: 20 in 65 Cameo, 19 finer (12/14). PCGS# 83828

#### 1874 Shield Nickel, PR66 Cameo Sharp and Appealing

**3538 1874 PR66 Cameo PCGS. CAC.** The recutting atop the 4 in the date is mentioned by Walter Breen in the *Proof Encyclopedia*, and obliquely so are the raised planchet lines that appear near the date on this piece when he writes, "Nickel metallurgy was still a source of great difficulty to the mint." The surfaces are well-contrasted and show a sharp proof strike, save where lapping has effaced details, such as the underside of the fletchings. Light golden patina is largely unaffected by a small dark spot on the first vertical stripe. An extremely attractive coin. Population: 16 in 66 (1 in 66+) Cameo, 3 finer (12/14). PCGS# 83828

**3539 1877 — Tooled — ANACS. AU Details, Net PR40.** This example experienced slight circulation and exhibits dusky olive-gold patina with underlying hues of violet and lilac-green. The strike is sharp and just slight wear is present. Minor tooling is noted on the obverse within the recesses of the shield, and on the reverse around the central 5. NGC ID# 276U, PCGS# 3831

#### 1877 Shield Nickel, PR64 Old Green Label Holder

**3540 1877 PR64 PCGS.** The 1877 Shield nickel is a proof-only issue with a mintage of just 900 pieces, essential for a complete date set. This Choice example is well-struck, with reflective fields and just a touch of light golden toning over each side. Housed in an old green label holder, with pleasing eye appeal. NGC ID# 276U, PCGS# 3831

**3541 1878 PR64 NGC. CAC.** This near-Gem proof-only 1878 example displays sharply struck design elements and is devoid of mentionable abrasions. Numerous tiny flecks run over each side. NGC ID# 276V, PCGS# 3832

**3542 1878 PR65 PCGS.** Dynamic cartwheel luster endows this scarce proof-only Gem. Lightly toned straw-gold and pearl-gray. Nicely struck and undisturbed. The second 8 in the date is repunched. Housed in a first generation holder. NGC ID# 276V, PCGS# 3832

**3543 1878 PR66 NGC. Fletcher-1.** The second 8 in the date is repunched. Boldly struck and lustrous with apricot-gold toning and an absence of contact. A small spot is noted on the left border of the sixth vertical shield stripe. A popular proof-only date. NGC ID# 276V, PCGS# 3832

**3544 1878 PR67 NGC.** The 1878 Shield nickel is a proof-only issue, essential for a complete date set. This is a Superb Gem example, with fully struck details and mark-free, reflective fields. A light golden hue warms each side. Census: 21 in 67, 0 finer (12/14). NGC ID# 276V, PCGS# 3832

**3545 1878 PR64 Cameo PCGS.** A pleasing Choice example of this essential proof-only issue, this 1878 Shield nickel is boldly defined on the stars and wreath leaves, with moderately reflective fields and dusky golden-gray toning over each side. Population: 9 in 64 Cameo, 31 finer (12/14). PCGS# 83832

**3546 1879 — Repunched Date — PR66 Cameo PCGS. Fletcher-1.** The 18 in the date is strongly repunched. A flashy and pristine Premium Gem that boasts a full strike and light golden-brown toning. The lower left obverse exhibits a network of fine die cracks. PCGS# 83833

**3547 1880 PR66 Cameo NGC. CAC.** Intense white-on-black contrast is the hallmark of this Premium Gem Cameo, delivered by deeply mirrored fields and sharp, frosty devices. Traces of light golden color preclude full brilliance, attesting to the originality of the surfaces. Census: 54 in 66 Cameo (4 in 66+ Cameo, 1 in 66 ★ Cameo), 23 finer (12/14). PCGS# 83835

**3548 1881 PR67 Cameo PCGS. CAC.** Razor-sharp definition is evident on all design elements of this spectacular Superb Gem, and the deeply mirrored fields contrast boldly with the richly frosted devices to create a stunning cameo effect. Population: 24 in 67 Cameo, 0 finer (12/14). PCGS# 83836

**3549 1883 PR67 Cameo NGC.** The sharply detailed design elements of this spectacular Superb Gem display a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. The mostly brilliant surfaces show a few hints of pale gold toning and no mentionable flaws are evident. Census: 14 in 67 Cameo, 0 finer (12/14). PCGS# 83838

## LIBERTY NICKELS

### 1886 Liberty Nickel, MS64 Seldom Seen Finer

- 3550 1886 MS64 PCGS.** A splendid Mint State piece, this key issue has a typical strike with the ear of corn at the lower-left reverse flat, but pleasing definition elsewhere. Satiny luster illuminates just a tinge of attractive golden-gray toning. An important key date, with a mintage of little more than 3.3 million pieces. PCGS has certified only 47 numerically finer examples (12/14). NGC ID# 22PK, PCGS# 3847

- 3551 1888 MS65 PCGS. CAC.** This lovely Gem has a bold strike with subtly reflective fields and lustrous devices. Both sides are nickel-gray with faint champagne toning that deepens slightly toward the borders. Population: 68 in 65 (3 in 65+), 18 finer (12/14). NGC ID# 2774, PCGS# 3849

- 3552 1893 MS66 PCGS.** With a reported mintage of more than 13 million pieces, the 1893 Liberty nickel is surprisingly difficult to locate in high grade. This spectacular Premium Gem displays well-detailed design elements, except for the bowknot and leaves to the left, and well-preserved lustrous surfaces. Population: 21 in 66 (1 in 66+), 1 finer (12/14). NGC ID# 2778, PCGS# 3854

- 3553 1893 MS66 PCGS.** The highly lustrous surfaces of this Premium Gem display whispers of gold color on the reverse, and the design elements are well-struck except for weakness in the first two stars. A condition rarity at this grade level. Population: 21 in 66 (1 in 66+), 1 finer (12/14). NGC ID# 2778, PCGS# 3854

- 3554 1901 MS66 PCGS. CAC.** A pleasing high-end example of the first 20th century issue of the denomination. This Premium Gem is awash in vibrant silver-white luster, with remarkably well-preserved surfaces. Several stars and the lower-left portion of the wreath are weakly defined, but this is hardly detracting to the naked eye. Population: 53 in 66 (7 in 66+), 3 finer (12/14). NGC ID# 277C, PCGS# 3862

- 3555 1906 MS66 PCGS.** Golden-gray patination drapes this Premium Gem nickel. The design elements are well-struck, though the corn ear left of the bowknot is a tad soft. Neither side reveals mentionable marks. Population: 21 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 277H, PCGS# 3867

- 3556 1912-D MS65 NGC. CAC.** The only branch mint issues of Barber's Liberty Head nickel design were produced in 1912, at Denver and San Francisco. This Denver Mint example has the usual central weakness and typical satiny luster. The surfaces are attractive with vibrant gold and lilac color. NGC has only certified 25 numerically finer examples (12/14).

*Ex: Long Beach Signature (Heritage, 6/2006), lot 705; Houston Signature (Heritage, 12/2009), lot 254. NGC ID# 277P, PCGS# 3874*

- 3557 1912-S MS62 PCGS.** Housed in a green-label PCGS holder, this Mint State nickel has typical satin surfaces with indistinct design features, also standard for the issue. Struck during the first year of San Francisco coinage in this composition; mint personnel were unaccustomed to the challenges of nickel coinage ... a struggle the Philadelphia Mint had also experienced decades before with the introduction of the Shield nickel. NGC ID# 277R, PCGS# 3875

### 1912-S Liberty Nickel, Attractive MS65 Late-Date Key Issue

- 3558 1912-S MS65 PCGS.** This Gem last-year key date in the Liberty nickel series boasts good preservation on each side. The cheekbone of Liberty shows only a single small tick, and a few other abrasions are minor. The strike is average for this issue, which is never found fully struck. Attractive pinkish-tan patina shows on each side, and a stripe of deep brownish-pink toning runs along Liberty's jawline. The mintmark is nice and crisp. PCGS reports only 19 examples graded numerically finer (12/14). NGC ID# 277R, PCGS# 3875

### 1912-S Nickel, MS65 Sole S-Mint of the Series

- 3559 1912-S MS65 PCGS.** An unusually well-struck example of this semikey branch mint issue, with sharp stars and better-than-average definition on the lower-left wreath. Olive-gold toning warms the satiny surfaces, delivering the usual near-glossy appearance that is seen on this issue. A couple tiny ticks on the cheek are all that limit the grade. PCGS has certified only 19 numerically finer examples (12/14). NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

- 3560 1883 No Cents PR66 Cameo PCGS. CAC.** A boldly contrasted example of this one-year No Cents type, this Premium Gem Cameo displays sharply struck, frosty devices against a backdrop of gold-tinted mirroring. PCGS has certified only 17 numerically finer examples within the Cameo category. PCGS# 83878

- 3561 1883 No Cents PR66+ Cameo PCGS. CAC.** This is a deeply contrasted, carefully preserved example of this popular one-year type, with frosty devices set against glassy fields. A hint of light golden toning accents each side, and the design elements are largely sharp, save for the lower-left portion of the wreath, which is frequently soft. PCGS has certified only 17 numerically finer Cameos (12/14). PCGS# 83878

---

**1883 No Cents Nickel, PR67 Cameo  
None Certified Numerically Finer**

- 3562 1883 No Cents PR67 Cameo PCGS.** A popular one-year type, without CENTS on the reverse. This example is in superb condition, with bold, frosted design elements set against unmarked, mirrored fields. Traces of light golden color are seen when rotated beneath the light, leaving both sides with stark cameo contrast. Population: 17 in 67 Cameo, 0 finer (12/14). PCGS# 83878

---

**1883 Liberty Nickel, PR67 Cameo  
One-Year No Cents Type**

- 3563 1883 No Cents PR67 Cameo PCGS.** Sharp design elements exhibit substantial mint frost on this Superb Gem Cameo example of the popular No Cents Liberty nickel type. The fields are deeply mirrored and the contrast is in no way impeded by a blanket of warm golden toning that spreads over each side. Population: 17 in 67 Cameo, 0 finer (12/14). PCGS# 83878

- 3564 1883 With Cents PR66 Cameo PCGS.** Despite a higher mintage, the With Cents 1883 proof Liberty nickel is significantly scarcer than its No Cents counterpart, especially in high grades. This Premium Gem example is an appealing Cameo representative, with light golden toning and mirrored fields. The stars and hair curls are sharp, although the lower-left wreath is a trifle weak, as usual. Population: 38 in 66 (3 in 66+) Cameo, 4 finer (12/14). PCGS# 83881

- 3565 1885 PR66+ PCGS.** The proof 1885 Liberty nickel is in high demand among date collectors due to the rarity of high-grade circulation strikes. Sky-blue, lavender, and yellow-green peripheral toning frames the soft bluish-violet centers of this high-end Premium Gem. All design elements are sharply struck. A marvelously preserved specimen. NGC ID# 277T, PCGS# 3883

---

**1885 Liberty Nickel, PR67  
Only One Numerically Finer at PCGS**

- 3566 1885 PR67 PCGS.** The key-date 1885 Liberty nickel is keenly pursued both in proof and business strike formats. This extraordinary Superb Gem is among the finest-known examples, with full strike definition and immaculate surfaces. This great specimen is essentially untoned, with pleasing light accents of sky-blue noted in the fields. Population: 17 in 67 (3 in 67+), 1 finer (12/14). NGC ID# 277T, PCGS# 3883

- 
- 3567 1893 PR66+ Cameo PCGS. CAC.** Traces of mint-gold and lavender accent the icy blue-gray surfaces of this Plus-graded Premium Gem proof. The strike is bold and the field-motif contrast is unmistakable. Population: 35 in 66 (4 in 66+) Cameo, 14 finer (12/14). PCGS# 83891

---

**1894 Nickel, PR66+ Cameo  
Sharply Struck and Well-Contrasted**

- 3568 1894 PR66+ Cameo PCGS. CAC.** The surfaces are largely untuned save for a hint of golden patina on the frosty devices, which also provide stark contrast against the well-mirrored fields. This Premium Gem boasts a needle-sharp proof strike throughout both sides and excellent eye appeal. Population: 20 in 66 (4 in 66+) Cameo, 7 finer (12/14). PCGS# 83892

---

**1895 Liberty Nickel, PR66 Cameo  
Stark Field-Motif Contrast**

- 3569 1895 PR66 Cameo PCGS.** The striking definition on this Premium Gem Cameo is superb, and the field-device contrast is equally impressive. Deep mirrors showcase just a tinge of light golden toning, while the underlying surfaces are devoid of distractions. Cameo examples of the 1895 proof are elusive in all grades, and Deep Cameo pieces are almost unknown. Population: 8 in 66 Cameo, 3 finer (12/14). PCGS# 83893

**3570 1896 PR66 Cameo PCGS.** A glaze of pale sun-gold toning does not impede the stark field-device contrast on this Premium Gem Cameo. The strike is boldly executed, and a small contact mark near the E in E PLURIBUS UNUM is the only flaw of note. Population: 19 in 66 (1 in 66+) Cameo, 2 finer (12/14). PCGS# 83894

**3571 1900 PR67 NGC. CAC.** An appealing array of sun-gold, olive, and lilac hues encompasses much of each side of this Superb Gem proof, while the strike is full and the mirrored fields display considerable reflectivity when tilted beneath a light. Census: 28 in 67, 1 finer (12/14). NGC ID# 278A, PCGS# 3898

**3572 1901 PR67 NGC. CAC.** The obverse has green-gold peripheral toning around a blue-green center, while the reverse has the two colors dappled and orange added. A sharp and gleaming Superb Gem proof. Census: 32 in 67 (1 in 67 ★), 5 finer (12/14). Ex: *FUN Signature (Heritage, 1/2010), lot 541*. NGC ID# 278B, PCGS# 3899

**3573 1904 PR66 PCGS. CAC.** Iridescent olive, gold, and lavender-blue hues blend over both sides of this reflective Premium Gem proof. The strike is bold throughout, and the surfaces are devoid of contact marks or noticeable hairlines. Population: 48 in 66 (2 in 66+), 3 finer (12/14). NGC ID# 278E, PCGS# 3902

**3574 1906 PR67 NGC. CAC.** Mirrored fields accent satiny devices on this well cared for Superb Gem proof. The corn ear to the left of the bowknot is not fully defined, but the strike is otherwise pleasing. Uniform champagne color blankets the obverse, while the reverse shows areas of the same intermingled amongst pale lavender and mint-green. Census: 23 in 67 (1 in 67 ★), 4 finer (12/14). NGC ID# 278G, PCGS# 3904

**3575 1906 PR66 Cameo PCGS.** The well-detailed frosty design elements of this impressive Premium Gem contrast boldly with the deeply reflective fields to produce a startling cameo effect. No mentionable surface flaws are evident and eye appeal is terrific. Population: 29 in 66 (4 in 66+) Cameo, 21 finer (12/14). PCGS# 83904

**3576 1907 PR66 Cameo PCGS. CAC.** This Premium Gem Cameo displays considerable field-device contrast for a proof from this period, with a light golden hue adding a certain degree of warmth to the frosty motifs. The strike is also crisp, with particular sharpness noted on the lower-left portion of the wreath. Population: 18 in 66 (1 in 66+) Cameo, 5 finer (12/14). PCGS# 83905

#### 1907 Nickel, PR66+ Cameo Delicate Golden Toning

**3577 1907 PR66+ Cameo PCGS. CAC.** Boldly impressed design elements, including the lower-left portion of the wreath, are softly frosted against the deep mirroring of the fields. A hint of light golden toning accents each side, but does not impede the cameo contrast. The 1907 proof Liberty nickel is available overall, but is scarce with a Cameo designation. Population: 18 in 66 (1 in 66+) Cameo, 5 finer (12/14). PCGS# 83905

**3578 1909 PR67 NGC. CAC.** This essentially brilliant and deeply mirrored proof appears immaculate to the unaided eye, and a loupe reveals a faint graze or two. The devices are lightly frosted, but not quite enough for a Cameo designation. NGC has certified only nine coins numerically finer (12/14).

Ex: *Long Beach Signature (Heritage, 9/2008), lot 699*. NGC ID# 278K, PCGS# 3907

#### 1911 Nickel, PR67 Lovely Toning

**3579 1911 PR67 PCGS. CAC.** Razor-sharp, satiny devices exhibit soft mint frost against highly reflective fields. The obverse displays noticeable cameo contrast, although the reverse is slightly subdued by the rich multihued patina. Lavender and sky-blue centers yield to more vivid lemon-gold and violet-orange toning around the peripheries. Population: 7 in 67, 1 finer (12/14). NGC ID# 278M, PCGS# 3909

### BUFFALO NICKELS

#### 1913-S Type Two Nickel, MS65 Above-Average Strike

**3580 1913-S Type Two MS65 PCGS.** The 1913-S Type Two nickel typically suffers from poor striking, and this is evident to some degree on the present example, especially in the letters of LIBERTY. The remaining devices are relatively sharp. A lustrous, golden-gray example of this sought-after key-date San Francisco issue. PCGS has certified 34 numerically finer representatives (12/14). NGC ID# 22R3, PCGS# 3923

**3581 1916-D MS65 NGC.** Soft champagne patina resides on the lustrous surfaces of this D-mint Gem. Well-struck design elements and impeccably preserved surfaces round out the coin's pleasing eye appeal. NGC ID# 22RB, PCGS# 3932

**3582 1916-D MS65 PCGS. CAC.** This is a remarkable example of this early Denver issue, struck with fresh dies and exhibiting full design definition on both sides. Uniform golden-gray patina blankets the satiny surfaces. PCGS has certified only 17 numerically finer representatives (12/14). NGC ID# 22RB, PCGS# 3932

**3583 1916-S MS65 NGC.** An exceptional Gem, this 1916-S Buffalo nickel has a solitary splash of deep golden toning at the upper obverse, with champagne toning over the balance of the obverse and reverse. Sharply struck with satiny luster. Census: 50 in 65 (2 in 65 ★), 15 finer (12/14). NGC ID# 22RC, PCGS# 3933

- 3584 1918 MS65 PCGS.** This Gem example is boldly struck from lightly clashed dies, but does not exhibit the usual weakness in the recesses that is characteristic of die fatigue. Dies used for coinage of the hard nickel alloy failed quickly, and finding sharply struck examples of many issues in this series is a challenge for the collector. This Gem is satiny and toned light golden in color. No striking weakness or other complaints are noted. NGC ID# 22RG, PCGS# 3937

**1918 Nickel, MS66  
Lightly, Evenly Toned**

- 3585 1918 MS66 PCGS.** A high-mintage issue (more than 32 million pieces struck), the 1918 Buffalo is nonetheless seldom found in Premium Gem condition, and finer pieces are rare. This coin exhibits just a touch of softness on the central portion of the hair braid, though the overall definition is actually outstanding for the issue. Iridescent, golden patina graces satiny luster on each side, while the preservation is in keeping with the grade. Population: 54 in 66, 9 finer (12/14). NGC ID# 22RG, PCGS# 3937

**1918 Buffalo Nickel, MS66  
Sharp and Satiny**

- 3586 1918 MS66 PCGS. CAC.** Slight die fatigue in the reverse recesses does not affect the striking sharpness of this boldly rendered Premium Gem example. Satiny, golden-gray luster is largely undisturbed on both sides. The 1918 nickel is a less often seen date in Gem and finer condition, and is genuinely rare finer than MS66. Population: 54 in 66, 9 finer (12/14). NGC ID# 22RG, PCGS# 3937
- 3587 1918/7-D FS-101 VG8 PCGS.** The broad downstroke of the 7 can be distinguished on this key-date Buffalo. The design elements exhibit the appropriate detail for the grade designation. Both sides are quite clean for a heavily circulated coin. PCGS# 38446 Base PCGS# 3939
- 3588 1918/7-D FS-101 Fine 12 NGC.** A charming stone-gray representative of the elusive World War I overdate. The bison's flank has a couple of faded thin marks, and the hip shows a few delicate hairlines. PCGS# 38446 Base PCGS# 3939
- 3589 1918/7-D FS-101 — Cleaning — PCGS Genuine. Fine Details.** Although inoffensively cleaned, this chestnut-brown overdated nickel nonetheless possesses pleasing eye appeal. No marks are remotely of interest, and all four date digits can be discerned with the unaided eye. The diagnostic die crack above the braid is readily observed. PCGS# 38446 Base PCGS# 3939

- 3590 1918/7-D FS-101 Fine 12 PCGS.** Light to medium gray surfaces are devoid of significant marks. The overdate feature is clearly visible. A nice example for a mid-grade Buffalo collection. PCGS# 38446 Base PCGS# 3939
- 3591 1918/7-D FS-101 — Cleaning — PCGS Genuine. VF Details.** The upper right corner notch of the 7 is apparent on this moderately circulated and lightly hairlined key date representative. Minimally abraded. Die erosion lines on the fields are as made and usual for this Guide Book overdate. PCGS# 38446 Base PCGS# 3939
- 3592 1918/7-D FS-101 — Cleaning — PCGS Genuine. VF Details.** Blended stone-gray and olive-green toning embrace this moderately granular key date nickel. The crossbar and downstroke of the 7 is evident. A late die state with an orange peel texture (as made) on the field near the profile. PCGS# 38446 Base PCGS# 3939
- 3593 1918/7-D FS-101 — Environmental Damage — PCGS Genuine. VF Details.** The corner notch of the 7 is obvious when viewed beneath a loupe. Sharply detailed for the VF level. The gunmetal-gray surfaces exhibit distributed tiny pits. A very scarce overdate. PCGS# 38446 Base PCGS# 3939
- 3594 1918/7-D FS-101 — Tooled — PCGS Genuine. VF Details.** The medium nickel-gray and olive-toned surfaces have been smoothed and otherwise mishandled on this example, although the all-important overdate feature is boldly visible. PCGS# 38446 Base PCGS# 3939
- 3595 1918-D MS64 PCGS.** The 1918-D Buffalo nickel is a challenging issue to find well-struck, but this Choice example is above-average in that regard. Dusky lavender-blue centers yield to warmer green-gold peripheries, and the surfaces are free of major distractions. NGC ID# 22RH, PCGS# 3938
- 3596 1919 MS66 PCGS.** Beautifully detailed with delightful, dusky golden shadings over much of the otherwise nickel-gray surfaces. Luminous and carefully preserved.  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 757.* NGC ID# 22RL, PCGS# 3941
- 3597 1920 MS66 PCGS.** Whispers of champagne-gold appear on the highly lustrous surfaces of this lovely Premium Gem. A sharp strike and impeccable preservation rounds out the coin's pleasing eye appeal. Housed in a green label holder. NGC ID# 22RP, PCGS# 3944
- 3598 1920 MS66 PCGS. CAC.** Light olive and sky-blue colors are pleasingly blended across the surfaces of this lustrous Premium Gem. A bit lightly struck, as usual, but impressively preserved and free of mentionable surface marks. A handful of tiny flecks are visible on the lower obverse. NGC ID# 22RP, PCGS# 3944
- 3599 1920-D MS63 PCGS.** An unusually well-struck example of this Denver issue, despite mild die fatigue evident in the fields on both sides. The surfaces are satiny with pale golden-gray color, and abrasions are minimal. NGC ID# 22RR, PCGS# 3945
- 3600 1921 MS66 PCGS.** A less often seen date in high grade, the 1921 Buffalo nickel becomes genuinely rare finer than MS66. This Premium Gem example is boldly struck, with satiny luster that displays hints of light golden toning. Clash marks are present in the fields on both sides. PCGS has certified just 23 coins numerically finer (12/14). NGC ID# 22RT, PCGS# 3947
- 3601 1924 MS66 PCGS.** A frosty P-mint Buffalo nickel with surprisingly varied patina. Nickel-white, gold, orange, and violet hues appear on each side, in bands on the obverse but more dappled on the reverse. The design elements are sharply struck. NGC ID# 22RX, PCGS# 3951

**1924-D Nickel, MS65  
Rarely Offered Finer**

- 3602 1924-D MS65 PCGS. CAC.** The 1924-D Buffalo nickel is conditionally scarce in Gem condition, and finer pieces are extremely rare. This representative exhibits satiny, golden-gray luster and is free of any significant surface flaws. The usual weak points, including the bison's head and shoulder and the hair above the Indian's braid, are slightly soft, although not to a detracting extent. PCGS has certified only four numerically finer examples (12/14). NGC ID# 22RY, PCGS# 3952

- 3603 1925-D MS64 PCGS.** Lovely golden toning appears on both sides of this brilliant Choice Mint State nickel. The strike is well above average for a Denver issue from this period, and the eye appeal is equally strong. NGC ID# 22S3, PCGS# 3955

**1925-D Buffalo Nickel, MS65  
Struck From Rotated Dies**

- 3604 1925-D MS65 PCGS.** The 1925-D Buffalo nickel is scarce in Gem condition and virtually unknown at this level with a sharp strike. This piece is better-struck than most, but some weakness is present on the bison's shoulder and the Indian's hair. Both sides are largely devoid of abrasions, with smooth, satiny surfaces and pale champagne toning. The reverse is rotated counterclockwise 45 degrees. Only 10 examples are numerically finer at PCGS (12/14). NGC ID# 22S3, PCGS# 3955

**1925-D Nickel, MS65  
Unusually Sharp for the Issue**

- 3605 1925-D MS65 PCGS.** This Gem 1925-D Buffalo nickel is remarkably well-struck for the issue, showing a sharp full horn and nearly complete fur on the bison's shoulder. Slight die fatigue is noted in the recesses, particularly on the reverse, but the smooth, satiny luster is hardly impeded. Warm golden toning accents each side. PCGS has certified just 10 numerically finer representatives (12/14). NGC ID# 22S3, PCGS# 3955

- 3606 1926-D MS64 PCGS.** The 1926-D Buffalo nickel is widely known for being a distinguished strike rarity, almost to the same extent as its quarter dollar counterpart. This Choice example is remarkably well-struck for the issue, and displays unusually appealing, satiny luster. Both sides are light golden in color and devoid of distractions. NGC ID# 22S6, PCGS# 3958

**1926-S Nickel, Sharp AU58**

- 3607 1926-S AU58 NGC. CAC.** The 1926-S Buffalo nickel is conditionally challenging in Mint State, making high-end AU examples appealing to the budget-conscious collector. This nearly Uncirculated piece is well-struck, with glossy pewter-brown toning and just a trace of friction over the high points of the design. NGC ID# 22S7, PCGS# 3959

- 3608 1927 MS66+ PCGS. CAC.** Vibrant luster radiates from surfaces toned with light gold at the margins. The design elements are sharply defined, including the braid, and bison's horn and tail. NGC ID# 22S8, PCGS# 3960

**1927-S Nickel, MS64  
Lovely Iridescent Toning**

- 3609 1927-S MS64 PCGS.** A satiny near-Gem example, exhibiting pale gray-gold color with lilac and iridescent toning on both sides. Dave Bowers described the MS64 grade as the "Optimal Collecting Grade" for the '27-S. A trademark of Whitman Publishing Company, the Optimal Collecting Grade for each issue provides an indication of the best value, after considering several factors such as price and ease of obtainability. PCGS has certified 29 numerically finer examples (12/14).  
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 741. NGC ID# 22SA, PCGS# 3962

- 3610 1934 MS66 NGC. CAC.** Ex: Eric P. Newman Collection (specified on the NGC insert). The lustrous satin surfaces provide this Premium Gem with a strong degree of visual appeal. Light toning in shades of gold, peach, and orange adds to the attractiveness. Tiny flyspecks of carbon appear on both sides. Census: 85 in 66 (3 in 66 ★, 1 in 66+★), 12 finer (12/14). NGC ID# 22SL, PCGS# 3972

- 3611 1935 MS67 PCGS.** The 1935 Buffalo nickel is fairly obtainable in Superb Gem condition, ideal for type representation. This example is well-struck, with shimmering luster that shines through delicate sky-blue toning. A few wisps of pale golden color are also seen upon close examination. PCGS has certified just a single numerically finer example (12/14). NGC ID# 22SN, PCGS# 3974

- 3612 1936-D MS67 PCGS. CAC.** The splendidly original, lilac-gray surfaces are sharply defined in all areas. Both sides display a hard, satiny sheen that is free of even the most trivial distraction. Population: 65 in 67, 2 finer (12/14).  
Ex: *Central States Signature (Heritage, 4/2002)*, lot 5390. NGC ID# 22ST, PCGS# 3978
- 3613 1936-D 3 1/2 Leg, FS-901, Fine 15 PCGS.** All date digits are clear on this problem-free stone-gray representative. The bison's front leg is attenuated. Scarcer than the famous 1937-D Three Legged nickel, and challenging to obtain regardless of grade. PCGS# 38471 Base PCGS# 93978
- 3614 1937-D Three-Legged, FS-901, AU50 NGC.** The popular *Guide Book* variety, with the bison's right front leg effaced by excessive die polishing. This AU piece is well-detailed, with pewter-gray surfaces and minimal abrasions. PCGS# 38475 Base PCGS# 3982
- 3615 1937-D Three-Legged, FS-901, AU53 NGC. CAC.** Minor die fatigue is present in the recesses, as is typical for this late die state variety. Both sides show original olive-gray color and the design elements are only slightly worn. A collectible example of this important *Guide Book* variety. PCGS# 38475 Base PCGS# 3982
- 3616 1937-D Three-Legged, FS-901, AU55 NGC. CAC.** A well-defined representative of the eternally popular Three-Legged nickel. Light gold and lime toning drapes coruscating and moderately abraded surfaces. The granular back leg of the bison is diagnostic for the scarce variety. PCGS# 38475 Base PCGS# 3982
- 3617 1937-D Three-Legged, FS-901, AU58 NGC.** The famous variety with an absent front foreleg, caused by excessive die lapping at the Denver Mint. Three-and-a-half leg varieties are known for various issues, but the FS-901 1937-D unquestionably provides the most dramatic missing leg of the series. An attractive, satiny, and virtually unabraded steel-gray representative. PCGS# 38475 Base PCGS# 3982
- 3618 1937-D Three-Legged, FS-901, AU58 NGC. CAC.** A stone-gray example with occasional lilac high points on the reverse. Satiny and unblemished with a hint of wear on the bison's hip. All diagnostics are readily apparent. PCGS# 38475 Base PCGS# 3982
- 3619 1937-D Three-Legged, FS-901, MS60 NGC.** Struck from heavily fatigued dies, this unworn three-legged Buffalo nickel is slightly soft on the finer design elements, but retains moderately pleasing appeal to the unaided eye. Light pewter-gray in color, with no serious abrasions. PCGS# 38475 Base PCGS# 3982
- 3620 1937-D Three-Legged, FS-901, MS61 NGC.** Satiny luster illuminates appealing shades of violet, orange-gold, and olive toning on each side of this Uncirculated representative. A loupe reveals substantial die fatigue in the recesses, but the devices remain well-defined. Quite appealing for a three-legged Buffalo in this grade. PCGS# 38475 Base PCGS# 3982
- 3621 1937-D Three-Legged, FS-901, MS62 NGC.** A minimally abraded and coruscating stone-gray and caramel-gold representative. All diagnostics of the variety are clear, including the cluster of die lumps on the field beneath the flank and the granular back leg of the bison. PCGS# 38475 Base PCGS# 3982
- 3622 1937-D Three-Legged, FS-901, MS62 NGC.** A lustrous and well defined cream-gray key date nickel. Unabraded aside from a single slender diagonal line on the bison's flank. One of the few widely collected die abrasion mint errors, along with the FS-401 1922 No D cent. PCGS# 38475 Base PCGS# 3982

- 3623 1937-D Three-Legged, FS-901, MS62 NGC. CAC.** This piece is unworn, but moderate die fatigue is evident on each side which slightly affects the striking sharpness. All examples of this variety were struck with worn dies, hence the bison's leg being polished off by a vigorous attempt to prolong die life, and most examples show varying amounts of flowlines and die failure. This piece is satiny and exhibits iridescent golden-gray luster. PCGS# 38475 Base PCGS# 3982

## PROOF BUFFALO NICKELS

- 3624 1936 Type One — Satin Finish PR65 PCGS.** The first proof issue of the series since the matte proofs of 1913 - 1916. This Gem example is boldly struck, as would be expected for a proof issue, with delicate gold and mint-blue toning overall. NGC ID# 278X, PCGS# 3994
- 3625 1937 PR66 PCGS.** Light to medium butter-gold toning graces this final-year proof type coin. The strike is sharp despite slight blending on the hair above the braid. Minute carbon flecks deny a finer grade. Certified in a green label holder. NGC ID# 278Z, PCGS# 3996
- 3626 1937 PR67 PCGS Secure.** Deep, glassy fields beautifully accent satiny, sharply struck devices on this Superb Gem proof type coin. The preservation is exceptional, and both sides show a thin veil of light golden toning. PCGS has certified 10 numerically finer representatives (12/14). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3627 1939 Reverse of 1938 MS67 Full Steps PCGS.** This boldly struck, satiny Superb Gem displays radiant ice-blue luster over each side, with close examination needed to detect any signs of surface contact. The Registry Set collector will want to pay attention to this piece, as it is among the finest certified at PCGS (12/14). NGC ID# 22T8, PCGS# 84003
- 3628 1939 Doubled Monticello, FS-801, MS66 PCGS. CAC.** An exceptional Premium Gem, this Doubled Die nickel has ice-blue toning over frosty luster with bold design motifs. Doubling on MONTICELLO and FIVE CENTS is prominently visible. Population: 2 in 66, 1 finer (12/14). PCGS# 38481 Base PCGS# 4004
- 3629 1942-P Type Two MS67+ Full Steps PCGS.** The thickly frosted, blazing luster of this high-end Registry coin is typically found only on the wartime nickels of 1942 - 1945, containing an alloy of 35 percent silver. The strike is bold throughout, and the preservation is exceptional. Delicate mint-gold peripheral hues surround pale lavender-blue colors in the centers. Population: 43 in 67 (1 in 67+) Full Steps, 0 finer (12/14). NGC ID# 22TM, PCGS# 84016
- 3630 1942-S MS67 Five Full Steps NGC.** A mix of orange-gold, lavender, and sky-blue patina runs over the obverse of this S-mint war nickel, leaving the reverse primarily yellow-gold. Sharply struck design features include five Full Steps. Vibrant luster emanates from impeccably preserved surfaces. Census: 17 in 67 5 Full Steps, 0 finer (12/14). NGC ID# 22TN, PCGS# 84017
- 3631 1945-P Doubled Die Reverse, FS-801, MS66 PCGS.** Strong die doubling is seen on reverse, most clearly on MONTICELLO and CENTS, with the spread increasing from left to right. A lustrous high grade representative of the popular *Guide Book* variety. The lightly toned almond-gold surfaces are void of detractors. PCGS# 38505 Base PCGS# 4173

**1945-S Nickel, MS67 Five Full Steps  
Beautifully Toned**

- 3632 1945-S MS67 Five Full Steps NGC.** Rich, beautiful orange-gold toning dominates the obverse of this Superb Gem war nickel while a medley of the previous color palette intermingles with champagne, purple, lavender and cobalt-blue on the reverse. Radiantly lustrous surfaces exhibit sharply struck design elements with five Full Steps. Both sides are remarkably well-preserved. Census: 6 in 67 Five Full Steps, 0 finer (12/14). NGC ID# 22TZ, PCGS# 84027

**1975 Nickel, MS67+ Full Steps  
Sole Finest Certified**

- 3633 1975 MS67+ Full Steps PCGS.** Pastel multicolor toning encompasses each side of this remarkable Registry coin. The strike is bold and the preservation is superb. This is the sole finest certified at PCGS, if only by the margin of the Plus designation, and also ranks more than a full grade point finer than the coin in the current highest-rated Registry Set. Population: 2 in 67 (1 in 67+) Full Steps, 0 finer (12/14). NGC ID# 22W4, PCGS# 84094

**PROOF JEFFERSON NICKELS**

- 3634 1938 PR68 NGC.** Hints of soft champagne color visit the bright surfaces of this gorgeous proof. Both sides are sharply struck and immaculately well preserved. Census: 12 in 68 (1 in 68 ★), 0 finer (12/14). NGC ID# 279W, PCGS# 4175
- 3635 1939 Reverse of 1938 PR67+ PCGS. CAC.** A touch of light golden toning bathes both sides of this deeply mirrored Superb Gem proof, while the strike is sharp and the glassy fields are devoid of marks or significant hairlines. The obverse is decidedly cameo in appearance, though the reverse is a little too brilliant to warrant the designation from PCGS. PCGS has certified eight numerically finer examples (12/14). NGC ID# 279X, PCGS# 4176

- 3636 1956 PR68 Ultra Cameo NGC.** Thousands of 1956 proof Jeffersons are certified at NGC, but only 15 examples have been awarded an Ultra Cameo designation, with five in this grade and just three numerically finer (12/14). This piece is brilliant and fully struck, with pleasing white-on-black contrast. A superb Registry Set candidate. NGC ID# 22YG, PCGS# 94188

- 3637 1971 No S PR67 Cameo PCGS.** The striking definition on this Superb Gem Cameo is remarkable, as is the preservation and depth of contrast. A light golden hue blankets each side. Although not the finest certified, this 1971 No S proof nickel will please many collectors of this popular series. NGC ID# 22YN, PCGS# 84204

**EARLY HALF DIMES**

- 3638 1800 V-1, LM-1, R.3 — Surface Damage — PCGS Genuine. XF Details.** An early die state with no indication of the eventual cud beneath the 00 in the date. Marks are noted on Liberty's neck and chest. A few other lesser abrasions are scattered. Vividly toned sea-green, autumn-gold, and plum-red. PCGS# 38601 Base PCGS# 4264

**1805 V-1, LM-1 Half Dime, VF20  
Sharply Defined, Green Label Holder**

- 3639 1805 V-1, LM-1, R.4, VF20 PCGS.** Sharply detailed for the designated grade, with traces of luster present within the curls and letters. The bust tip and right wingtip show the bluntness of impression usual for the variety. Deeply toned steel-blue, olive-green, and golden-brown. Obverse marks are noted near the shoulder curl, on the upper left field, and on the right field near stars 9 and 12. Encapsulated in a green label holder. PCGS# 38611 Base PCGS# 4272

**SEATED HALF DIMES**

- 3640 1838 Large Stars, No Drapery MS65 NGC.** A well-struck, Gem example of this short-lived No Drapery type. Both sides display sharp motifs and luminous, satiny luster shining through a blend of gunmetal-blue, lavender, and amber-gray toning. NGC ID# 2TXX, PCGS# 4317

- 3641 1841 MS66 PCGS. CAC.** A fully struck half-dime with shimmering luster and carefully preserved surfaces. Brilliant and silver-gray in the centers, each side reveals a layer of deep amber-olive patina near the periphery. Population: 14 in 66 (1 in 66+), 4 finer (12/14). NGC ID# 232Y, PCGS# 4328

- 3642 1842 MS65 PCGS.** The lightly toned obverse center is framed by bands of golden-brown and apple-green. The reverse is mostly stone-gray but has chestnut toning near the rims. Population: 12 in 65 (1 in 65+), 5 finer (12/14).  
Ex: Long Beach Signature (Heritage, 5/2006), lot 957; Long Beach Signature (Heritage, 2/2011), lot 3334. NGC ID# 2332, PCGS# 4330

**1843 Seated Half Dime, MS67  
Late-State Reverse  
Finest Certified at NGC**

**3643 1843 MS67 NGC. V-4.** Ex: Gardner Collection. A large mintage of more than 1.1 million Seated Liberty half dimes was accomplished at the Philadelphia Mint in 1843, but the issue is conditionally very rare at the MS67 level, and numerically finer examples are unknown. This sharply detailed Superb Gem offers vibrant mint luster under shades of golden-brown, violet, and amber toning. This piece was struck from a fascinating late state of the reverse die, showing wedge-shaped pieces apparently ready to fall out. NGC shows this piece to be the sole finest certified at that services (12/14). Purchased from Jason Carter (1/2010). NGC ID# 2334, PCGS# 4332

**3644 1844 MS66 PCGS.** A well-defined and beautifully lustrous Premium Gem. Light silver-gray color gives way to blue, violet, and lavender elements at parts of the margins. Population: 21 in 66 (2 in 66+), 11 finer (12/14). Ex: Houston Signature (Heritage, 12/2009), lot 328. NGC ID# 2335, PCGS# 4333

**3645 1849-O AU53 PCGS.** There are few survivors from the 1849-O half dime's mintage of 140,000 pieces; the date is scarce across all grades and is decidedly rare in Mint State. This is a pleasing AU representative that shows some of the minor striking weakness that is typical of this New Orleans issue, with areas of gunmetal-gray, blue, and olive-gold toning. Population: 4 in 53, 20 finer (12/14). NGC ID# 233E, PCGS# 4344

**3646 1850 MS66 PCGS.** Beautifully toned in light shades of cobalt-blue at the margins that frame champagne and lavender hues in the centers, underlain with soft luster. Razor-sharp definition shows on the design elements and both sides are remarkably well-preserved. Population: 19 in 66, 11 finer (12/14). NGC ID# 233F, PCGS# 4345

**3647 1853 No Arrows MS64 NGC.** Lovely blue-green and plum-red shades embrace this coruscating and unmarked example. Much scarcer than its 1853 Arrows successor. Encapsulated in a former generation holder. Census: 43 in 64 (1 in 64 ★), 25 finer (12/14). NGC ID# 233M, PCGS# 4351

**3648 1853-O No Arrows VF25 PCGS.** The 1853-O No Arrows half dime is somewhat scarcer overall than its With Arrows counterpart, having a mintage of only 160,000 pieces versus 2.2 million coins for the With Arrows variety. This mid-grade example shows pleasing detail for the grade, with deep gunmetal-gray toning overall. Population: 6 in 25, 31 finer (12/14). NGC ID# 233N, PCGS# 4352

**3649 1854 Arrows MS65 PCGS.** A lustrous, satiny Gem example of this short-lived With Arrows No Motto type. Both sides display an array of lavender-gray and pale golden hues. The fields exhibit significant die fatigue, but the devices are nonetheless well brought up. Population: 46 in 65, 13 finer (12/14). NGC ID# 2342, PCGS# 4358

**3650 1854 Arrows MS65 PCGS. CAC.** Plentiful in lower grades, the 1854 Arrows dime becomes scarce in Gem condition and is rarely seen finer. This piece is sharply struck, with a light golden tint over the frosty surfaces. Bold clash marks are present on both sides. Population: 46 in 65, 13 finer (12/14). NGC ID# 2342, PCGS# 4358

**3651 1857 MS67 NGC.** An available date for type purposes, the 1857 half dime becomes a notable condition rarity at the Superb Gem level. This piece is delicately toned with luminescent ocean-blue and violet hues around the peripheries and light golden color in the centers. The right-hand stars are slightly soft, as is the upper-left portion of the reverse, but the strike is otherwise pleasing. Census: 14 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 233S, PCGS# 4365

**1860 Half Dime, MS67  
Superb Surface Quality**

**3652 1860 MS67 PCGS Secure.** The first year of the Legend Obverse half dime, with a mintage approaching 800,000 pieces. The current Superb Gem displays blazing luster exuding from light golden-gray surfaces. A well-executed strike sharpens the design features, better than usually seen on this issue. The obverse reveals a couple of minute, inoffensive marks. Population: 40 in 67, 4 finer (12/14). Ex: FUN Signature (Heritage, 1/2008), lot 906. NGC ID# 2347, PCGS# 4377

**3653 1862 MS67 PCGS Secure.** Dazzling luster overwhelms the medium apricot and lilac patina. An intricately struck and nearly immaculate Superb Gem. The 1862 was the final Civil War half dime issue to exceed a mintage of 120,000 pieces. Once specie payments were suspended, fractional currency replaced silver coinage in circulation. Population: 53 in 67 (5 in 67+), 3 finer (12/14). Ex: Long Beach Signature (Heritage, 9/2006), lot 1241; FUN Signature (Heritage, 1/2007), lot 2499; ANA Signature (Heritage, 3/2010), lot 573. NGC ID# 234B, PCGS# 4381

**1863-S Half Dime, MS65  
Only One Numerically Finer at PCGS**

**3654 1863-S MS65 PCGS Secure.** The 1863-S half dime had a fairly substantial mintage for the period of 100,000 coins, but few examples survive in Mint State, and the issue is rare at the Gem grade level. This piece is sharply struck, with frosty, delicately preserved surfaces. Both sides are toned pale champagne, with the remnants of a print on the obverse in the form of some deeper golden hues. Population: 9 in 65, 1 finer (12/14). NGC ID# 234D, PCGS# 4383

**3655 1867-S MS63 PCGS. V-1a.** Lightly toned and lustrous with a single short thin field mark near the raised arm. The base of the 1 in the date is repunched. The reverse is double clashed and has a complete wire rim. NGC ID# 234M, PCGS# 4391

**1872-S Dime, Splendid MS67  
Elusive and Tied for Finest at PCGS**

- 3656 1872-S Mintmark Below Bow MS67 PCGS. Fortin-101.** Splendid luster run across surfaces that are untuned save for a light tinge of gold on this Superb Gem, one of the few finest survivors of this Old West S-mint coinage of 837,000 pieces. The 1872-S dime issue is rare in any Mint State grade. The surfaces of this piece are essentially unmarked and extremely attractive. Die clash marks show on each side, and the strike weakness visible in the central obverse is a given on this issue. Population: 8 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 2352, PCGS# 4401

**PROOF SEATED HALF DIMES**

**1858 Half Dime, V-8, Lightly Toned PR65 Cameo**

- 3657 1858 PR65 Cameo NGC. V-8,** showing a die file line between IC on the reverse and rather soft 8s in the date and the lower ball of the 5. This is more frequently seen than the V-4a dies. A range of attractive colors enhances each side of this Gem Cameo proof, including pinkish-gold, moss-green, and slate-violet patina. Some die roughness shows on the obverse, along with a soft strike around Liberty's upper gown, and a few thin ticks on Liberty's left (facing) thigh. The reverse is distraction-free, but both sides offer plenty of eye appeal as well as a broad quotient of collectibility. Census: 3 in 65 Cameo, 2 finer (12/14). PCGS# 84437
- 3658 1860 PR65 NGC.** Deep reflectivity in the fields and original toning in shades of violet, gold, and ocean-blue are the hallmarks of this Gem proof, although the design elements are also well-struck and provide subtle contrast with the recesses. The first proof of the new Legend Obverse design, struck to the extent of 1,000 pieces. Census: 21 in 65, 19 finer (12/14). NGC ID# 235V, PCGS# 4443
- 3659 1863 PR66 PCGS. V-1, Flynn RPD-001.** Toning enthusiasts will no doubt find this piece of interest. Apricot-gold peripheries and aquamarine centers appear on this coin. The central reverse is particularly vivid. Only 460 proofs were struck for this Civil War date. The 1 in the date is repunched. Population: 11 in 66, 2 finer (3/13). NGC ID# 235Y, PCGS# 4446

- 3660 1867 PR65 PCGS.** Deep blue toning is the rule on this Gem proof, while violet and sea-green shadings add welcome accents. Carefully preserved with pleasing mirrors beneath the patina. Population: 22 in 65 (1 in 65+), 18 finer (12/14).  
Ex: *FUN Signature* (Heritage, 1/2010), lot 661. NGC ID# 2364, PCGS# 4450

- 3661 1867 PR65 PCGS.** This sharply struck proof possesses deeply mirrored recesses and subtle field-devices contrast, but the affect is not quite bold enough to warrant a Cameo designation from PCGS. Splashes of olive, gold, lavender, and aquamarine make up the delicate patina on each side. Population: 22 in 65 (1 in 65+), 18 finer (12/14). NGC ID# 2364, PCGS# 4450

- 3662 1869 PR65 NGC.** An attractive Gem proof half dime, with sharp, frosty devices and glassy reflectivity in the fields. Gunmetal-blue, lavender, and amber-gold toning encompass both sides, precluding a Cameo designation, but balancing the eye appeal with undeniable originality. Census: 36 in 65, 27 finer (12/14). NGC ID# 2366, PCGS# 4452

- 3663 1871 PR65 Cameo NGC.** Deep blue, lavender, and rose toning drapes each side of this outstanding specimen. A few minor hairlines become visible under a glass, but overall this piece is carefully preserved, with no blemishes or marks. Liberty's head shows a trace of weakness, but the rest of the details are razor-sharp. The reverse exhibits exceptional cameo contrast with an icy-frosted wreath and deeply mirrored fields. This highly reflective and exceptionally attractive representative is one of just 960 proofs minted. Census: 12 in 65 Cameo, 13 finer (12/14). PCGS# 84454

**EARLY DIMES**

**1805 4 Berries Dime, Appealing AU53  
Popular JR-2 Die Marriage**

- 3664 1805 4 Berries, JR-2, R.2, AU53 PCGS.** Dusky pinkish-gray patina appears on each side of this nicely preserved 1805 4 Berries dime, the more frequently seen of the two varieties for the year. Light high-point circulation wear is as expected, and a few planchet adjustment marks appear at the obverse rim and the lower reverse, through the shield stripes. Post-Mint damage is nonetheless minimal, imparting much eye appeal to this popular and in-demand variety. Population: 1 in 53, 6 finer (12/14). PCGS# 38769 Base PCGS# 4477
- 3665 1807 JR-1, R.2, VF20 PCGS.** The only known die pair for the final year of the Draped Bust Heraldic Eagle dime. The silvery surfaces display occasional whispers of soft gold and violet patina. The design elements are well-defined except for the typical weakness along the left borders of each side. No significant marks are visible. PCGS# 38770 Base PCGS# 4480

**1807 JR-1 Dime, Choice XF**  
**Remarkably Long-Lived Multipurpose Reverse Die**

- 3666 1807 JR-1, R.2, XF45 NGC.** The doughty reverse die of the JR-1 dimes of 1807 was earlier used to strike quarter eagles dated 1805, 1806/4, 1806/5, and 1807, so it is no wonder that the details on this Choice XF dime remain somewhat softly struck. This is the sole die marriage for the 1807 silver dimes, and Mint officials wanted it to last as long as possible before the Capped Bust dimes made their appearance; John Reich began working on the design on April 1, 1807, according to the JR dime book. Beautiful heather and pale blue patina appears on each side of this lovely dime, showing a few thin scrapes on the obverse. Incredibly, *the reverse shows no die cracks*, although the E in the motto is effaced. PCGS# 38770 Base PCGS# 4480

**1807 JR-1 Dime, AU53**  
**Lightly Toned Type Coin**

- 3667 1807 JR-1, R.2, AU53 PCGS.** One of the most available issues of the Draped Bust design, ideal for the type collector. This piece is from a late die state, showing minor fatigue around the borders. The strike is sharp and only slight wear is evident over the high points of the design. Pale golden-gray toning yields the occasional violet and lilac hue. Housed in an old green label holder. PCGS# 38770 Base PCGS# 4480

**BUST DIMES**

- 3668 1820 Small O, JR-2, R.3, AU55 NGC.** The second S in STATES and the O in OF are repunched. This is a pleasing AU representative, showing moderately sharp detail and uniform gunmetal-gray toning that exhibits the occasional glint of olive and gold. PCGS# 38782 Base PCGS# 4493
- 3669 1829 Small 10C, JR-3, R.4, MS63 NGC.** A well-struck type coin, with satiny luster and minimal abrasions for the grade. Pale lavender and golden-gray hues accent largely untuned surfaces on each side. PCGS# 38828 Base PCGS# 4511

**1833 Dime, JR-9, Unmarked MS64**

- 3670 1833 JR-9, R.2, MS64 PCGS.** The 8 in the date is lower than the other digits, and the two 3s are even. On the reverse, the S ending STATES is above the S ending PLURIBUS. Liberty's cheek is free of all but tiny marks on this near-Gem example, showing muted golden-pink in the centers and deeper violet patina near the rims. The strike is incompletely brought up on some of the central design elements on each side, but there are no mentionable distractions otherwise. PCGS# 38868 Base PCGS# 4522

**SEATED DIMES**

**1837 Large Date Seated Dime, MS64**  
**Deeply Toned and Sharply Struck**

- 3671 1837 No Stars, Large Date MS64 NGC. Fortin-101a, R.2.** The strike on this No Stars Seated dime is razor-sharp, and the fields retain mild reflectivity from the dies' previous use to strike proofs. Both sides are heavily toned in deep violet, army-green, and olive-gold hues, with any grade-limiting abrasions fully masked by the patina. The reverse is rotated clockwise 23 degrees, as always for this variety. NGC ID# 237R, PCGS# 4561

**1837 No Stars, Large Date Dime, MS65**  
**Early Stage Obverse Die Crack, Fortin-101a**

- 3672 1837 No Stars, Large Date MS65 NGC. Fortin-101a.** This is an early stage of this variety, as the heavy die crack from the obverse rim at 4 o'clock up onto Liberty is present, but the one at 7 o'clock has not yet formed. The devices are crisply struck, and no abrasions of note appear. Vivid ocean-blue and amber peripheral rings surround the light golden centers of this attractive Gem. The die rotation of 23 degrees on the reverse is a constant on the Large Date dimes, per Seated dimes pundit Gerry Fortin. Census: 27 in 65 (1 in 65 ★), 32 finer (12/14). NGC ID# 237R, PCGS# 4561

**3673 1838 No Drapery, Large Stars MS64 PCGS. Fortin-104, R.3.** A late die state variety, with a heavy crack from the obverse rim at 7:30 through the B in LIBERTY. This Choice example is sharply struck throughout both sides, with minimal surface contact and satiny luster. Amber and gunmetal-blue toning graces portions of the peripheries, leaving the centers brilliant. NGC ID# 237U, PCGS# 4568

**3674 1838 No Drapery, Large Stars MS64+ PCGS. Fortin-104, R.3.** A heavy radial die crack from the obverse rim at 7:30 to the B in LIBERTY is diagnostic of this variety. This example is sharply struck and satiny, with iridescent olive-gold and pale lavender-blue toning over each side. NGC ID# 237U, PCGS# 4568

**3675 1838 No Drapery, Large Stars MS64 PCGS. CAC.** Lustrous silver-gray surfaces exhibit well-struck design features. A few minute obverse marks do not disturb. NGC ID# 237U, PCGS# 4568

**3676 1838 No Drapery, Large Stars MS65 PCGS. CAC. Fortin-108.** Star 5 and the 1 in the date are repunched. Die gouges emerge from the dentils above the TA in STATES. The same die pair as the "Partial Drapery" variety, but an early die state before the dramatic clash. Fully struck and satiny with medium olive-green and pearl-gray toning. NGC ID# 237U, PCGS# 4568

**3677 1838 Partial Drapery MS62 PCGS. CAC. Fortin-108a.** The Drapery subtype was introduced in 1840. The Partial Drapery variety is a misnomer, caused by a bold clash near Liberty's raised elbow from the E in DIME. The variety is popular and listed in the *Guide Book*. The present fully struck and lightly toned dime has exemplary surfaces for its designated grade. PCGS# 4570

**3678 1853 Arrows MS65 NGC.** A short-lived type with the arrows added to denote a weight change in 1853, this magnificently toned dime is a memorable and attractive Gem example of the type. Bulls-eye toning shows blue and purple margins merging into lustrous red-gold centers. The same colors appear on the reverse in concentric rings with a sliver center. Bright mint luster resides beneath the toning of this colorful MS65 example, which is fully struck and virtually without abrasions. Census: 77 in 65 (1 in 65+, 2 in 65 ★), 61 finer (12/14). NGC ID# 2398, PCGS# 4603

**3679 1853 Arrows MS65 PCGS. CAC. Fortin-105, R.3.** Both arrows are repunched, most clearly seen on the left arrow, and a die crack runs through the base of the date, the arrows, and the stars. The upper reverse shows clashing. This is a boldly impressed and lustrous Gem with lavender and champagne accents. Phenomenal eye appeal. NGC ID# 2398, PCGS# 4603

**3680 1856 Small Date MS65 PCGS. Fortin-107.** Misplaced date digits (the base of an 8, 5, and 6, per Fortin) are apparent on Liberty's rock. The reverse is interesting for its heavy parallel horizontal die lines through the ITE in UNITED and the D in DIME. Lustrous and nearly brilliant with exceptionally smooth surfaces. Well struck except for the dentils. NGC ID# 238S, PCGS# 4609

#### 1857 Seated Dime, Rim-Toned MS66

**3681 1857 MS66 NGC.** The pearl-gray centers are bounded by deep sunset-orange patina with accents of moss-green and emerald on this attractive Premium Gem Seated dime. Some diagonal die-polishing striations are more noticeable on the reverse. A curlicue strikethrough, as made, shows on Liberty's left (facing) arm. The strike is quite sharp overall, and the eye appeal excellent. Census: 14 in 66 (2 in 66+), 1 finer (12/14). NGC ID# 238X, PCGS# 4614

**3682 1858-S XF40 PCGS.** A low-mintage issue of 60,000 pieces, the 1858-S is a scarce semikey in the Seated dime series. The light gray surfaces of this XF example exhibit well-defined design elements and are devoid of significant marks. NGC ID# 2393, PCGS# 4618

**3683 1862 MS65 PCGS. CAC. Fortin-101a.** A prooflike and brilliant Gem. Well struck except for the knot of the wreath bow and the hair above the ear. Beautifully preserved, although a strike-through (as made) is noted above Liberty's foot. Housed in a green label holder. NGC ID# 239H, PCGS# 4635

**3684 1872-CC — Device Engraved — PCGS Genuine. XF Details.** Some of the devices have been reengraved to strengthen the detail of this key-date representative, for example, Liberty's hair and left (facing) shoulder socket and the bow knot. The silver-gray surfaces are lightly granular, as frequently seen. NGC ID# 23A8, PCGS# 4657

#### 1873-CC Arrows Dime, XF Details Elusive Carson City Issue

**3685 1873-CC Arrows — Environmental Damage — PCGS Genuine. XF Details. Fortin-101.** The 1873-CC With Arrows dime is a significant key date in the series, and is genuinely rare in XF and better condition. The present piece shows some minor granularity, as do many examples of this heavily circulated issue, but is nonetheless appealing to the unaided eye. The design elements are well-detailed, and both sides exhibit pale golden-gray and lavender hues. NGC ID# 23BH, PCGS# 4666

#### 1873-S Arrows Dime, MS64 Semiprooflike Fields

**3686 1873-S Arrows MS64 NGC. Fortin-102, R.4.** This variety shows minor repunching on the bases of the 1 and the 8 in the date. This MS64 coin is boldly struck from freshly polished dies, with substantial mirroring noticed in the fields. Peripheral tinges of aquamarine accent lovely lavender toning overall. A slightly scarcer date overall, and genuinely rare in Choice and finer grades. Census: 38 in 64, 4 finer (12/14). NGC ID# 23BJ, PCGS# 4667

**1879 Seated Dime, MS67 ★  
Modest Cameo Contrast**

**3687 1879 MS67 ★ NGC. Fortin-103a, R.4.** The 9 in the date is boldly repunched on this retired proof die pair, with the underdigit visible within and below the lower loops of the primary. The coin is sharply struck with considerable cameo contrast as a result of the dies' previous usage for proof coinage. A touch of light golden toning accents the beautifully preserved surfaces. Census: 37 in 67 (10 in 67 ★, 2 in 67+★), 4 finer (12/14). NGC ID# 23AS, PCGS# 4687

**3688 1880 MS67 NGC. Fortin-102a, R.4.** The repunched 8 and broken 80 in the date and die rust on ONE DIM confirm the variety. Orange-toned centers turn outwardly in concentric fashion to magenta and ice-blue over the obverse, while the reverse exhibits similar colors mottled with splashes of brilliance. Luster radiates throughout, and the devices are sharply detailed. Census: 13 in 67 (1 in 67 ★), 4 finer (12/14). NGC ID# 23AT, PCGS# 4688

**3689 1882 MS67 NGC.** Richly toned on both sides, this Superb Gem example displays a number of hues, including teal, gold, frosty yellow, pink, red, and sea-green. The design elements exhibit bold definition. Wispy die cracks appear on both sides, particularly the obverse. Despite a relatively large mintage of 3,91 million pieces, few survivors have achieved the MS67 grade, only 47 at NGC and PCGS combined, with two finer (12/14). NGC ID# 23AV, PCGS# 4690

**1889 Seated Liberty Dime, MS66+  
Nice Luster, Natural Toning**

**3690 1889 MS66+ PCGS. CAC. Fortin-113, R.3.** An easily obtainable date overall, the 1889 Seated dime becomes scarce at the MS66 grade level, and finer coins are decidedly rare. This Plus-graded example displays heavily frosted luster beneath shades of olive, gold, and pale lavender toning. The strike is sharp and the surfaces are carefully preserved. Population: 27 in 66 (3 in 66+), 5 finer (12/14). NGC ID# 23B9, PCGS# 4702

**1889 Dime, Well-Struck MS67  
An Important Condition Rarity**

**3691 1889 MS67 PCGS. CAC. Fortin 110, R.4.** Attributed by recutting within the lower loops of 889 and die clashing to the lower left of E in DIME. Fortin's suggested premium for this variety is 20%-40%. Russet margins frame the brilliant centers of this Superb Gem. The design features are well-struck, including Liberty's head and the bowknot, elements that are often weak on this issue. Pleasing luster emanates from both sides, each of which is devoid of significant marks. Population: 5 in 67, 0 finer (12/14).

The 1889 dime saw a production of 7.4 million pieces, making it among the most available series issues. Even Gems can be obtained with a bit of patience and searching.

Eugene Gardner wrote of this coin (formerly in his collection): The present coin must be a later strike, as it features many die cracks. The most noticeable on the obverse links the final S in STATES to Liberty's head, then on to her cap and finishes up in the O of OF. Another links all the letters in AMERICA with Liberty's foot. On the reverse there is a die crack that traverses the lower portion of the wreath from 4 to 9 o'clock.

*Purchased by Eugene Gardner from Jason Carter (3/2006); Gardner Collection, Part II (Heritage, 10/2014), lot 98283. NGC ID# 23B9, PCGS# 4702*

**PROOF SEATED DIMES**

**3692 1871 PR66 PCGS. CAC. Fortin-102, R.4.** The most available proof variety; minor die doubling is evident on AMERICA. This Premium Gem example displays deeply mirrored fields behind sharp, frosty devices. The coin might have warranted a Cameo designation were it not for mottled shades of olive-gold, lavender-gray, and ocean-blue that encompass both sides. Population: 13 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 23CV, PCGS# 4764

**3693 1872 PR65 NGC.** Whispers of blue, gold, and lavender visit the well-cared for surfaces of this Gem proof. Sharply struck design elements and modest field-motif contrast when the coin is rotated beneath a light source round out the coin's pleasing eye appeal. Census: 24 in 65, 8 finer (12/14). NGC ID# 23CW, PCGS# 4765

**3694 1881 PR67 Deep Cameo PCGS.** A stunning Superb Gem proof, this Deep Cameo example has brilliant silver surfaces with deeply mirrored fields that frame the brilliant and highly lustrous devices. Both sides are bright, fresh, and untuned. Population: 1 in 67 Deep Cameo, 0 finer (12/14). PCGS# 94778

**3695 1884 PR66+ Cameo PCGS.** The untuned surfaces of this high-end Premium Gem display strong field-motif contrast and are impeccably preserved. The design elements are sharply impressed. Population: 17 in 66 (1 in 66+) Cameo, 20 finer (12/14). PCGS# 84781

**1886 Dime, PR67**  
**Among the Finest at PCGS**

- 3696 1886 PR67 PCGS. Fortin-Unlisted.** The tip of the flag of the 1 in the date is below the point of the shield, and the base of the same is just a whisker right of centered over a denticle. This piece is boldly struck and deeply mirrored, with splashes of olive, gold, and violet toning over both sides. An absolutely superb proof. Population: 9 in 67, 0 finer (12/14). NGC ID# 23DB, PCGS# 4783

**BARBER DIMES**

**1893/2 Barber Dime, MS63**  
**Upper-End for the Grade**

- 3697 1893/2 MS63 PCGS. CAC. Breen-3479.** Unlisted in the *Cherry-pickers'* reference, this *Guide Book* variety is believed to be an 1893/2 overdate; the underdigit is visible within the lower loop of the 3. The present example is well-struck and frosty, with fewer abrasions than are expected for the Select grade level. Warm champagne toning blankets each side. Population: 5 in 63 (1 in 63+), 21 finer (12/14). NGC ID# 23DP, PCGS# 4799

- 3698 1895-O — Cleaning — PCGS Genuine. XF Details.** The 1895-O Barber dime is a somewhat better date overall, and is particularly challenging in the finer circulated grades. This piece is only lightly worn, with pale chalk-gray surfaces that show occasional hints of amber and olive color. Lightly cleaned, but still a collectible example. NGC ID# 23DW, PCGS# 4807

**1897 Dime, Pastel-Toned MS67**  
**Top-Notch Eye Appeal**

- 3699 1897 MS67 NGC.** Despite the high mintage surpassing 10.8 million circulation strikes, the 1897 Barber dime is seldom seen at the Superb Gem level of the present coin. Beautiful pastel lavender, gold, and pale blue shades complement the frosty luster and top-notch eye appeal. The population at NGC is surprisingly small. Census: 7 in 67 (1 in 67 ★), 0 finer (12/14). PCGS# 4812

- 3700 1900 MS66 PCGS.** A bold strike and rich, satiny luster are the hallmarks of this Premium Gem turn-of-the-century dime. Areas of pale aquamarine and lavender accent the margins, while the remainder of each side is warmed by light golden toning. Population: 13 in 66 (1 in 66+), 6 finer (12/14). NGC ID# 23EC, PCGS# 4821

- 3701 1905 MS66 PCGS. CAC.** A mintage of over 14.5 million might not suggest it, however the 1905 Barber dime is one of the more challenging Philadelphia issues of the series and is rare in Gem grades. This fully struck Premium Gem is richly patinated, with rainbow toning at the margins yielding to lighter centers. Population: 7 in 66 (1 in 66+), 3 finer (12/14). NGC ID# 23ET, PCGS# 4835

- 3702 1911-S MS66+ PCGS. CAC.** The design elements of this high-end Premium Gem are sharply detailed throughout and vibrant mint luster radiates from both sides. The well-preserved surfaces show highlights of greenish-gold toning and eye appeal is terrific. Population: 56 in 66 (1 in 66+), 8 finer (12/14). NGC ID# 23FL, PCGS# 4859

- 3703 1912 MS66 PCGS. CAC.** Satiny luster is largely undisturbed as it illuminates a thin glaze of ice-blue color on each side. The strike is sharp and the eye appeal is exceptional. The 1912 Barber dime is a scarce issue in this grade, and is rare any finer. Housed in an old green label holder. Population: 51 in 66 (3 in 66+), 4 finer (12/14). NGC ID# 23FM, PCGS# 4860

**1914 Dime, MS67**  
**Tied for Finest Certified**

- 3704 1914 MS67 PCGS.** An available date in lower grades, the 1914 Barber dime becomes a significant condition rarity at the Superb Gem level. This well-struck MS67 example shows smooth, satiny surfaces with peripheral dabs of gold, olive, and deep amber color. The central regions exhibit just pale golden hues. Population: 6 in 67, 0 finer (12/14). NGC ID# 23FT, PCGS# 4865

**1916-S Barber Dime, MS66**  
**Only One Certified Numerically Finer**

- 3705 1916-S MS66 PCGS. CAC.** Despite a mintage of nearly 6 million coins, this final-year San Francisco issue is scarce at the Gem grade level and is rarely seen finer. This Premium Gem example is boldly struck with frosty, untuned mint luster. Some faint surface grazes on Liberty's cheek preclude an even finer grade, though the coin appears pristine to the unaided eye. Population: 24 in 66 (6 in 66+), 0 finer (12/14). NGC ID# 23FZ, PCGS# 4871

## PROOF BARBER DIMES

- 3706 1892 PR65 NGC. CAC.** The obverse of this Gem proof displays full cameo contrast, though the reverse is just a little too deeply toned to warrant the designation from NGC. The colors include shades of lavender, mint-gold, and gunmetal-blue, with deep mirroring in the fields and fully defined relief elements. Housed in a prior generation holder. NGC ID# 23G2, PCGS# 84875
- 3707 1899 PR65 Cameo PCGS.** Impressively sharp, frosty devices provide soft cameo contrast on each side of this Gem proof. Pastel shades of champagne, lavender, and ice-blue color adorn the mirrored fields, accentuating the delicate preservation. Population: 16 in 65 (2 in 65+) Cameo, 17 finer (12/14). PCGS# 84883
- 3708 1901 PR65 PCGS. CAC.** This debut 20th century proof dime is lightly toned in shades of sun-gold, violet, and gunmetal-blue, with deeply reflective fields and sharp, satiny devices. No contact marks or noticeable hairlines are present. Population: 31 in 65, 32 finer (12/14). NGC ID# 23GE, PCGS# 4885
- 3709 1906 PR65 PCGS. CAC.** Delicate green-gold peripheral toning cedes to deeper blue and violet at the centers. A colorful Gem proof that offers a bold strike and correspondingly great eye appeal. Population: 27 in 65, 33 finer (12/14).  
Ex: *Central States Signature (Heritage, 4/2009)*, lot 262. NGC ID# 23GK, PCGS# 4890
- 3710 1907 PR66+ NGC. CAC.** Sharp, satiny devices provide subtle contrast with the mirrored fields, though splashes of pale lavender-blue, olive, and sun-gold toning preclude a Cameo designation from NGC. No distractions are noted on this high-end Premium Gem. Census: 29 in 66 (1 in 66+), 21 finer (12/14). NGC ID# 23GM, PCGS# 4891
- 3711 1909 PR65 PCGS.** This minimally toned Gem proof displays moderate frost across the portrait and wreath, though the distinction falls just short of securing a Cameo designation. Population: 30 in 65, 51 finer (12/14). NGC ID# 23GP, PCGS# 4893

## MERCURY DIMES

### 1916-D Mercury Dime, Colorful VF20

- 3712 1916-D VF20 PCGS.** This colorful midgrade example of the key-date 1916-D Mercury dime boasts prevailing accents of lavender and burgundy, accented by pale blue, amber, gold, and orange. A few thin marks appear on the obverse, and a scrape through the I of LIBERTY into the field requires mention. A great example for a high-grade complete dime set. NGC ID# 23GY, PCGS# 4906

### 1921 Dime, Radiant MS64 Full Bands

- 3713 1921 MS64 Full Bands PCGS.** The brilliant surfaces of this near-Gem Mercury dime radiate strong luster. The design elements are sharply struck except for minor softness at Liberty's temple. Full middle bands extend to those at both ends of the fasces and the two diagonal ones. A few minute ticks on the fasces prevent Gem status. An important key date in the series. NGC ID# 23HE, PCGS# 4935

### 1921 Mercury Dime, Satiny MS64 Full Bands

- 3714 1921 MS64 Full Bands PCGS.** PCGS-certified examples of this issue and grade are generally available for about half of what a Gem Full Bands piece will bring, making it especially popular among series specialists. Those collectors will appreciate the satin-smooth, lightly toned surfaces of this attractive piece, showing minimal abrasions and no-questions Full Bands definition. Quite nice for the grade. NGC ID# 23HE, PCGS# 4935
- 3715 1924-D MS66 Full Bands PCGS. CAC.** Hints of gold and ice-blue reside on the highly lustrous surfaces of this sharply struck Premium Gem. This is a remarkably preserved specimen. Population: 36 in 66 Full Bands, 9 finer (12/14). NGC ID# 23HK, PCGS# 4945
- 3716 1925 MS66 Full Bands PCGS.** The frosty silver surfaces show glints of ochre on both sides, with olive added to the reverse. The luster is generous, and the strike is sharp, and the preservation impeccable. Population: 52 in 66 (3 in 66+) Full Bands, 27 finer (12/14).  
Ex: *Boston Signature (Heritage, 8/2010)*, lot 4590 NGC ID# 23HM, PCGS# 4949
- 3717 1931-D MS67 Full Bands PCGS.** Hints of light gold color visit the highly lustrous surfaces of this boldly struck Superb Gem dime. Both sides have been very well cared for. Population: 56 in 67 (2 in 67+) Full Bands, 0 finer (12/14). NGC ID# 23J8, PCGS# 4985
- 3718 1939 MS67 Full Bands PCGS. CAC.** Booming silver-white luster emanates from both sides of this gorgeous Superb Gem Mercury dime. All design elements are sharply struck and each side is immaculately preserved. NGC ID# 23JR, PCGS# 5017
- 3719 1944 MS67 Full Bands PCGS.** Whispers of maroon, aqua-green, and gold visit the obverse margin, leaving the remaining surfaces brilliant.. Lustrous, nicely preserved surfaces exhibit sharply struck design elements. NGC ID# 23KB, PCGS# 5051

## PROOF MERCURY DIMES

- 3720 1936 PR66 PCGS.** A fully struck, highly reflective Premium Gem proof. Both sides display pale golden color and are free of noticeable surface imperfections. PCGS has certified only 57 numerically finer representatives (12/14). NGC ID# 27DG, PCGS# 5071

### 1936 Mercury Dime, Lovely Rim-Toned PR67

- 3721 1936 PR67 PCGS. CAC.** Spectacular eye appeal is the hallmark of this pristine Superb Gem proof 1936 dime, showing an untuned silver center ceding into concentric violet, moss, orange, and indigo patina near the rims on each side, the effect a bit more prevalent on the obverse. Population: 56 in 67, 1 finer (12/14). CAC shows 24 in this grade with none finer. NGC ID# 27DG, PCGS# 5071

- 3722 1939 PR68 NGC.** This is a brilliant, deeply mirrored proof with satiny devices and bold design definition. The coin is virtually flawless from both a technical and aesthetic standpoint. Census: 77 in 68 (10 in 68 ★), 0 finer (12/14). NGC ID# 27DK, PCGS# 5074

- 3723 1940 PR68 NGC.** A beautifully toned specimen with orange-gold, cherry-red, and aquamarine obverse patina. The reverse toning is also attractive, and features caramel-gold and sky-blue shades. Census: 46 in 68 (5 in 68 ★), 2 finer (12/14). NGC ID# 27DL, PCGS# 5075

- 3724 1940 PR68 NGC.** The impressive eye appeal of this PR68 Mercury results from brilliant, immaculately preserved surfaces and razor-sharp design features. This coin is what would seem to be an unimprovable proof from a mintage of more than 11,000 pieces. Census: 46 in 68 (5 in 68 ★), 2 finer (12/14). NGC ID# 27DL, PCGS# 5075

- 3725 1942 PR68 NGC. CAC.** The remarkable ruby-red, apple-green, and cobalt-blue peripheral toning is particularly attractive on the obverse. The fully struck centers display only delicate silver-gray shades. NGC has graded only one numerically finer example (12/14). NGC ID# 27DN, PCGS# 5077

## ROOSEVELT DIMES

- 3726 1951 MS67+ Full Bands PCGS.** The 1951 Roosevelt dime is conditionally scarce at the Superb Gem level and is eagerly sought in this grade by Registry Set competitors. The present piece is fully deserving of the assigned Plus designation, showing not only exceptional preservation and a bold strike, but also intense multicolor toning on the obverse. Population: 40 in 67 (3 in 67+) Full Bands, 1 finer (12/14). NGC ID# 23L2, PCGS# 85097

### 1951-D Dime, Toned MS68 Full Bands One of the Three Finest at PCGS

- 3727 1951-D MS68 Full Bands PCGS.** The 1951-D dime is a fairly plentiful issue in high grades, and Full Bands representatives are not overly elusive in general; the number of Full Bands pieces awarded the lofty grade of MS68, however, is minuscule as PCGS has seen only three such pieces, with none finer (12/14). Razor-sharp details and frosty mint bloom illuminate vivid lemon-green and cherry-red hues over much of this stellar coin, delivering seemingly unrivaled visual appeal. NGC ID# 23L3, PCGS# 85098

- 3728 1953-S MS67+ Full Bands PCGS.** This high-end Superb Gem displays sharply detailed design elements with Full Bands on the torch and vibrant mint luster throughout. A few highlights of dark green and lavender toning accent the impeccably preserved surfaces. Population: 18 in 67 (3 in 67+) Full Bands, 1 finer (12/14). NGC ID# 23LA, PCGS# 85105

## TWENTY CENT PIECES

### 1875-CC Twenty Cent Piece, MS62 Popular Mintmark Type Coin

- 3729 1875-CC MS62 PCGS. CAC.** The 1875-CC is the only CC-mint twenty cent issue that is accessible to all but a handful of collectors, and the combination of the Carson City mintmark and the odd denomination is irresistible to many. This MS62 example has satiny yet reflective luster, as well as strong gold and russet peripheral shadings. The centers are softly struck, but the obverse displays well nonetheless. NGC ID# 23R6, PCGS# 5297

**3730 1875-S MS64 PCGS.** A well-struck piece, with satiny luster and consistent golden toning over each side. No major abrasions are observed. This is a pleasing example of this short-lived type and denomination. NGC ID# 23R7, PCGS# 5298

**3731 1875-S MS64+ PCGS. CAC.** Freckled golden-gray toning cascades over the lustrous surfaces of this high-end near-Gem. Sharply struck design elements and well-cared for surfaces further enhance the coin's overall eye appeal, appropriately recognized by CAC. NGC ID# 23R7, PCGS# 5298

#### 1875-S Twenty Cent Piece, MS65 Exceptional Type Coin

**3732 1875-S MS65 PCGS.** Although the shortest-lived denomination of the United States federal series, the peculiar twenty cent piece remains popular not only for type, but also for series collectors who will have an easy time completing the set except for the ultra-rare 1876-CC date. This example is frosty, lustrous, and freckled with light, golden-gray patina. Several of the stars lack their centers and the eagle's wing tops are a touch weak, but the piece is otherwise sharp and attractive. NGC ID# 23R7, PCGS# 5298

### EARLY QUARTER

#### 1804 B-2 Quarter, Good 6 Pleasing Color and Surfaces

**3733 1804 B-2, R.5, Good 6 NGC.** The rarest variety of this sought-after, low-mintage issue (just 6,738 pieces struck), with the 4 in the date positioned close to the bust. This example is well-circulated, but exhibits pleasing lavender-gray patina over the high points and deeper gunmetal-gray color in the recesses. Liberty's profile fades into the adjacent field, but the reverse eagle is well-outlined. The rims are weak in spots, but barely encroach upon the legends. PCGS# 38922 Base PCGS# 5312

### BUST QUARTER

**3734 1818 B-4, R.2, AU50 PCGS.** Tompkins Die State 4, with heavy obverse cracks and a small rim cud above the AM in AMERICA. This piece is well-detailed, with rich olive-brown and gold peripheries yielding to lighter battleship-gray centers. Evenly struck and well-centered. PCGS# 38945 Base PCGS# 5322

### SEATED QUARTERS

#### 1838 Seated Quarter, MS63 Sharp Type Coin

**3735 1838 No Drapery MS63 NGC. Briggs 1-A.** Sharply struck for the issue, this attractive quarter is only minimally weak at the star centers near Liberty's head, and the coin shows nice boldness on the eagle's plumage and talons. Deep, original toning covers the surfaces of this Select Uncirculated quarter — possibly from long storage in a kraft envelope. Blue and rose highlights offset the purplish-gray patina. Soft mint luster glows beneath the toning. Census: 22 in 63 (2 in 63+, 1 in 63 ★), 32 finer (12/14). NGC ID# 23SE, PCGS# 5391

**3736 1853 Arrows and Rays MS63 NGC.** With more than 15 million pieces produced, the Arrows and Rays quarters was a fixture of American commerce for decades. This is a sharply struck coin that has sparkling mint luster and just the slightest golden toning around the margins. A few minute handling marks limit the grade. Ex: *Long Beach Signature* (Heritage, 2/2005), lot 6539; *Central States Signature* (Heritage, 4/2009), lot 389. NGC ID# 23U4, PCGS# 5426

**3737 1857 MS64 PCGS. CAC. Briggs-Unlisted.** The 1857 Seated quarter is fairly plentiful for the period, but is nonetheless scarce in the finer Mint State grades. This Choice example displays semiprooflike fields beneath a haze of pale champagne toning on each side. The right-hand stars are poorly struck, but the central devices show pleasing detail. Both vertical lines in stripe 1 extend far into the horizontal crossbars. NGC ID# 23TE, PCGS# 5442

**3738 1858-S VF35 NGC. Briggs 2-B.** The 1858-S quarter is much more elusive in the upper circulated grades than its mintage of 121,000 coins might suggest. This Choice VF example displays undeniably original olive-gray toning in the recesses, with lighter hues of the same over the relief elements. This is an immensely attractive coin for the grade, ideal for the collector who appreciates old-time patina. Census: 4 in 35, 21 finer (12/14). NGC ID# 23TK, PCGS# 5447

**3739 1863 MS64 PCGS.** From a mintage of 191,600 pieces, the 1863 Seated Liberty quarter seldom encountered in high grade. This sharply detailed Choice example offers lustrous, well-preserved surfaces, with a few hints of champagne-gold toning. Population: 15 in 64, 27 finer (12/14). NGC ID# 23TX, PCGS# 5458

**3740 1867 XF40 PCGS. Briggs 1-A.** The 1867 Seated quarter is a somewhat better date overall, with a low mintage of only 20,000 coins. This lightly circulated example exhibits deep gunmetal-blue and olive-gold patina, with strong detail for the grade. Population: 8 in 40, 41 finer (12/14). NGC ID# 23UD, PCGS# 5470

**3741 1873 Arrows MS62 PCGS.** Medium caramel-gold and olive-green toning visits this lustrous two-year type coin. Subtle grazes on the left obverse field correspond to the grade. The uppermost stars lack a complete impression, but the strike is otherwise crisp. Housed in a green label holder. NGC ID# 23VU, PCGS# 5491

**3742 1877-CC MS63 NGC. Briggs 10-J.** A few marks on the figure of Liberty limit the grade, but the fields are remarkably clean. The stars are sharp and the frosty luster illuminates pale golden hues over each side. Seldom available finer. NGC ID# 23V6, PCGS# 5505

- 3743 1888 MS65 NGC. Briggs 1-A.** A popular late-series issue with a mintage of only 10,000 pieces. This Gem example is slightly soft on the top of Liberty's head and on several adjacent stars, but is otherwise well-defined. Frosty luster illuminates luminescent toning in shades of aquamarine, lavender-gray, and orange-gold. No distractions are observed. NGC ID# 23VL, PCGS# 5520

**1888 Quarter Dollar, MS66  
Delicate Peripheral Toning**

- 3744 1888 MS66 PCGS. Briggs 1-A.** A popular late-series issue with a mintage of only 10,001 coins. Premium Gem examples are scarce and finer pieces are rare. This satiny example is well-struck, with unabraded surfaces. Warm sun-gold hues swirl in the centers, yielding to deeper amber and aquamarine color around the borders. Population: 57 in 66 (5 in 66+), 9 finer (12/14). NGC ID# 23VL, PCGS# 5520

- 3745 1891 MS64 Prooflike NGC.** A brilliant and flashy final-year Choice type coin. Well preserved, although minute strike-throughs (as coined) are noted on the reverse field near the wings and beak. The strike is crisp at the centers but several stars are softly impressed. Census: 3 in 64 Prooflike, 1 finer (12/14). PCGS# 85524 Base PCGS# 5524

**PROOF SEATED QUARTERS**

- 3746 1859 PR64 Cameo NGC. Briggs 1-A.** The fully struck design elements of this spectacular proof have a frosty texture that contrasts dramatically with the deeply reflective fields. Only a few insignificant contact marks are evident. Census: 6 in 64 Cameo, 13 finer (12/14). PCGS# 85555
- 3747 1861 PR64 NGC.** A medley of soft cobalt-blue and crimson toning bathes the well-cared for surfaces of this near-Gem. Sharply struck design features heighten the coin's pleasing eye appeal. NGC ID# 23WN, PCGS# 5557
- 3748 1861 PR64 NGC. Briggs 7-E.** This near-Gem proof is beautifully toned in sky-blue, purple, and yellow-tan hues, and a well-executed strike imparts strong definition to the design elements. A few trivial marks preclude Gem status. The 1861 quarter comes from a mintage of 1,000 proofs, of which 600 or more were melted, according to Larry Briggs (1991). Census: 23 in 64, 24 finer (12/14). Ex: *FUN Signature* (Heritage, 1/2009), lot 2388. NGC ID# 23WN, PCGS# 5557
- 3749 1862 PR64 NGC. Briggs 5-E.** A small mintage of only 550 pieces assures the scarcity of the 1862 proof quarter in high grades. This Choice example is deeply reflective in the fields, with sharp, satiny devices and broad rims on each side. A touch of light golden color warms the surfaces. Census: 41 in 64, 39 finer (12/14). NGC ID# 23WP, PCGS# 5558
- 3750 1870 PR63 Cameo NGC. Briggs 2-B.** The lovely eye appeal of this conditionally scarce specimen is aided by the contrast between watery peal-gray fields, frosted alabaster-white motifs, and russet-gold peripheral toning. Fully struck and free of singular distractions. Census: 8 in 63 Cameo, 24 finer (12/14). PCGS# 85569

- 3751 1874 Arrows PR63 PCGS. Briggs 5-D.** This is a fully struck and reflective proof, with mottled toning in shades of olive, russet, and teal masking any grade-limiting flaws. Housed in an old green label holder. NGC ID# 23XS, PCGS# 5575

- 3752 1875 PR64 PCGS. Briggs 4-E.** Type One Reverse. This near-Gem from one of the more challenging With Motto proof dates has cobalt-blue, lavender, and gold-tan patina in the fields. Sharply struck design elements are silver-gray and highlighted by reflective fields at all angles. A few faint, inoffensive hairlines preclude a higher grade. Population: 35 in 64, 14 finer (12/14). Ex: *Central States Signature* (Heritage, 5/2007), lot 482; *ANA Signature* (Heritage, 3/2011), lot 3533. NGC ID# 23X7, PCGS# 5576

- 3753 1875 PR64 PCGS. CAC.** Type One Reverse. The white-on-black contrast is undeniable, but this brilliant near-Gem lacks a Cameo designation due to its green label holder. Intricately struck and exemplary for the third party grade. NGC ID# 23X7, PCGS# 5576

- 3754 1876 PR65 PCGS. CAC.** Type One Reverse. This fully struck Centennial-year Gem primarily exhibits medium wheat-gold toning, although glimpses of lilac patina are noted near the upper obverse margin. The flashy fields contrast with the frosted motifs, although PCGS has demurred on a Cameo designation. NGC ID# 23X8, PCGS# 5577

- 3755 1877 PR65 NGC.** Only 510 proof Seated Liberty quarters were struck in 1877. This impressive Gem displays sharply detailed design elements and deeply reflective fields under shades of greenish-gold and cerulean-blue toning. Census: 19 in 65, 11 finer (12/14). NGC ID# 23X9, PCGS# 5578

- 3756 1879 PR64 PCGS.** Medium-intensity electric-blue and grayish-gold patina covers both sides of this near-Gem, each of which displays sharply struck design elements. Pleasing overall eye appeal. NGC ID# 23XB, PCGS# 5580

- 3757 1879 PR65 NGC.** Electric-blue and soft crimson patina adorns the well-preserved surfaces of this Gem Proof. The design elements are sharply struck throughout. NGC ID# 23XB, PCGS# 5580

**1880 Quarter, Contrasted PR66 Cameo  
Beautiful Orange-Red Patina**

- 3758 1880 PR66 Cameo PCGS.** Beautiful orange-red patina accented with violet and cobalt-blue enriches each side of this nicely contrasted Premium Gem Cameo proof. The curious cut through the left shield border on the reverse is, in our opinion, Mint-made and caused by reuse of an 1872 die that shows the same mark (as well as a tiny bit of extra metal at the bottom of the fifth pair of vertical stripes), as noted in the *Breen Proof Encyclopedia*. Some die lapping below the shield and behind the fletchings reinforces our belief that these are the same dies. A well-preserved and lovely example of this date. Population: 22 in 66 (2 in 66+) Cameo, 11 finer (12/14). PCGS# 85581

- 3759 1885 PR65 Cameo PCGS. CAC.** Frosted devices are sharply struck and stand out against the mirrored fields of this Gem Cameo. Both sides are impeccably preserved. PCGS# 85586

**1887 Quarter, PR66 Cameo  
Brilliant With Pleasing Contrast**

- 3760 1887 PR66 Cameo NGC. Briggs 2-B.** The scintillating, mirrored fields appear exactly as struck, with a complete absence of toning. The first-glance eye appeal is enormous — especially for those collectors who favor brilliant coins. The central devices are not heavily frosted, but sufficiently to merit the Cameo appellation. A few of the obverse stars lack central definition; were it not for this minor drawback, this coin might rise to the top of both services' population data. Census: 7 in 66 Cameo (1 in 66+ Cameo), 6 finer (12/14). Ex: *Central States Signature (Heritage, 4/2006), lot 1543.* PCGS# 85588

**BARBER QUARTERS**

- 3761 1892 MS66 PCGS.** Type Two Reverse, with the wingtip across most of the E in UNITED. This precisely struck Premium Gem is toned in rich tobacco-brown, cream-gray, and aquamarine shades. The surfaces are virtually immaculate. Ex: *Orlando FUN (Heritage, 1/2007), lot 4001, which realized \$1,725.* NGC ID# 23XT, PCGS# 5601
- 3762 1901-S Fair 2 NGC.** Normally a Fair 2 example of this key Barber issue would only be used as a temporary filler, but this example is quite attractive for the grade and would serve well as permanent representative in lower-grade, cost-effect date and mintmark set. Deep gunmetal-gray in the recesses contrasts nicely with the battleship-gray surfaces. The obverse grades nearly Good, but the reverse is worn well into the peripheral legends. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, Good Details**

- 3763 1901-S — Reverse Scratched — NGC Details. Good.** The reverse scratch noted by NGC is nothing more than an old, hair-thin pinscratch that runs across the eagle in a diagonal from 7 to 1 o'clock. Some minor planchet irregularity is also noted in the central reverse. Both sides are evenly worn and display original olive-tan patina. A collectible example of this key Barber issue. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, Key-Date, Good 4  
Remarkably Clean Surfaces**

- 3764 1901-S Good 4 PCGS. CAC.** Both sides of this key-date quarter display natural gray color that assumes a slightly darker shade in the fields, thereby highlighting the devices. The Y in LIBERTY shows, as do Liberty's ear and eye. The obverse rim is complete while that on the reverse is worn into some of the peripheral letters, especially along the right border. The eagle is completely outlined, and the left side of the shield is separate from the wing. Three or four letters show in the ribbon motto, and the surfaces are remarkably clean for a heavily circulated coin. A great looking piece for a Good 4, well deserving of the CAC endorsement. NGC ID# 23YR, PCGS# 5630

- 3765 1908-S MS64 PCGS.** The 1908-S Barber quarter claims a small mintage of 784,000 pieces. This attractive Choice specimen exhibits well-detailed design elements with vibrant mint luster and few signs of contact. Population: 20 in 64, 20 finer (12/14). NGC ID# 23ZF, PCGS# 5652

**1908-S Barber Quarter, MS65**

- 3766 1908-S MS65 PCGS.** The 1908-S quarter, with a moderately low mintage of 784,000 pieces, is a challenging issue across nearly all Uncirculated grades, and David Lawrence goes so far as to say the issue is "Undervalued in most Mint State grades. Even though Gems are no bargain compared with some other dates, you should not let one go." This Gem is impressively well-struck with radiant, satiny luster. Pale olive-gray toning embraces the borders, attesting to the originality of the well-preserved surfaces. Population: 12 in 65 (1 in 65+), 8 finer (12/14). NGC ID# 23ZF, PCGS# 5652
- 3767 1909 MS65 PCGS. CAC.** Several die cracks on both sides — into the wing tips and tailfeathers on the reverse and along the bust truncation on the obverse — confirm a late die state. The stars and fletchings are well-struck, and both sides display softly frosted luster shining through a blend of ice-blue and pale lavender toning. Population: 64 in 65 (2 in 65+), 23 finer (12/14). NGC ID# 23ZG, PCGS# 5653

**1909-S Quarter Dollar, MS66  
Only Two Finer at PCGS**

**3768 1909-S MS66 PCGS.** This highly lustrous Premium Gem 1909-S Barber Quarter exhibits brilliant silver at the centers of the obverse and reverse, with lovely intermingled gold and lavender toning along the borders. Both sides have bold design motifs. Population: 17 in 66 (1 in 66+), 2 finer (12/14). NGC ID# 23ZK, PCGS# 5656

**3769 1910 MS66 PCGS.** This spectacular Premium Gem exhibits razor-sharp definition on all design elements, with vibrant mint luster and a few wisps of pale champagne toning. Marvelous preservation shows on both sides. Population: 18 in 66, 3 finer (12/14). NGC ID# 23ZL, PCGS# 5657

**3770 1910 MS66 PCGS. CAC.** Like many Barber issues of the 20th century, Premium Gem examples of the 1910 quarter are condition rarities, since few collectors saved examples of the utilitarian coinage. Speckles of olive-green and gray patina run over highly lustrous surfaces. Sharply struck, and unabraded aside from faint marks on the shield. The certified population for this and finer grades has remained almost constant for the past six years. Population: 18 in 66, 3 finer (12/14).

Ex: FUN Signature (Heritage, 1/2007), lot 4044; ANA Signature (Heritage, 3/2007), lot 690; FUN Signature (Heritage, 1/2009), lot 2545. NGC ID# 23ZL, PCGS# 5657

**3771 1911-S MS66 PCGS. CAC.** The 1911-S quarter had a mintage of less than 1 million pieces and is challenging in MS66 and finer condition. This piece is well-struck, with just a glaze of light golden color evident over the frosty mint luster. A small tick in the center of the shield is the only flaw of note. Population: 44 in 66 (3 in 66+), 7 finer (12/14). NGC ID# 23ZR, PCGS# 5661

**3772 1912-S MS65 PCGS. CAC.** Frosty luster shows minimal disruptions beneath a tinge of olive-gold toning. The eagle's talons and right (facing) shoulder are soft, as usual, although the obverse stars are sharply impressed. The 1912-S quarter is rarely seen this well-preserved. Population: 19 in 65, 14 finer (12/14). NGC ID# 23ZT, PCGS# 5663

**3773 1915 MS66 NGC. CAC.** Slight softness on a couple of the obverse stars and the eagle's talons is hardly of concern compared to the vibrant, frosty luster and exceptional surface preservation. Iridescent shades of pale lavender and ice-blue color grace each side, accentuating the visual appeal. Census: 9 in 66, 1 finer (12/14). NGC ID# 2422, PCGS# 5670

**3774 1915-D MS65 PCGS. CAC.** The 1915-D is a slightly more available Barber quarter in high grades, ideal for type representation. This Gem example is well-preserved and satiny, with pale olive-gold toning over each side. The eagle's right (facing) talons and shoulder are slightly soft, but the strike is otherwise pleasing. PCGS has certified 39 numerically finer representatives (12/14). NGC ID# 2423, PCGS# 5671

**1915-S Quarter, MS66  
Conditionally Rare Any Finer**

**3775 1915-S MS66 PCGS. CAC.** The 1915-S Barber quarter is a scarcer issue in Mint State, and is genuinely rare as fine as MS66. This representative is sharply struck and possesses frosty mint luster. Both sides display areas of lavender-gray, gold, amber, and olive-green toning, with the colors more evenly blended across the reverse. Population: 13 in 66 (1 in 66+), 3 finer (12/14). NGC ID# 2424, PCGS# 5672

**PROOF BARBER QUARTERS**

**3776 1892 PR64 Cameo NGC.** Type Two Reverse, as are most (although not all) first-year proofs. Delicate butter-gold, ice-blue, and magenta toning adorns this well preserved near-Gem. The strike is virtually full, and cameo contrast is significant between the reflective fields and frosted designs. PCGS# 85678

**3777 1894 PR65 NGC. CAC.** Peach-gold fields and ocean-blue margins ensure the eye appeal of this needle-sharp Gem. The flashy fields provide mild contrast with the lightly frosted motifs. A pleasing representative of the Barber design. Ex: Central States Signature (Heritage, 4/2009), lot 503. NGC ID# 2429, PCGS# 5680

**3778 1900 PR66 PCGS.** A spectacular Premium Gem proof from a popular turn-of-the-century issue. The mirrored fields illuminate beautiful tinges of forest-green, sun-gold, cherry-red, and lavender-blue hues, while the relief elements are sharply struck and frosty, with pale-lavender-gray color. No contact marks or noticeable hairlines are present. Population: 26 in 66, 8 finer (12/14). NGC ID# 242F, PCGS# 5686

**3779 1904 PR66 PCGS.** Whispers of cobalt-blue and violet visit the impeccably preserved surfaces of this Premium Gem Proof. The design elements are sharply struck throughout. Population: 30 in 66, 11 finer (12/14). NGC ID# 242K, PCGS# 5690

**3780 1913 PR66 NGC.** Deeply mirrored fields and sharp, frosty devices deliver modest cameo contrast, but both sides are toned just a little too deeply to qualify for the designation from NGC. Mint-green peripheries yield to deep royal-blue margins and violet centers. An incredibly eye-appealing proof type coin. Census: 38 in 66, 21 finer (12/14). NGC ID# 242V, PCGS# 5699

**3781 1913 PR64 Cameo PCGS.** This is a light golden example with outstanding field-motif contrast. While the reverse is gorgeous and immaculate, faint slide marks and a pinscratch near star 8 on the obverse prevent a higher grade. Population: 10 in 64 Cameo, 24 finer (12/14). Ex: Long Beach Signature (Heritage, 9/2004), lot 6413. PCGS# 85699

## STANDING LIBERTY QUARTERS

- 3782 1917 Type One MS66 Full Head PCGS. CAC.** The 1917 Type One quarter is perhaps the most plentiful issue in the series in high-grade Full Head, but immense demand from type collectors also makes it one of the most sought-after. This Premium Gem example exhibits sharp detail overall, with a bold Full Head and strong definition on the leading edge of the eagle's right wing being of special note. Satiny mint luster illuminates pale champagne and ice-blue hues on each side, with deeper golden-gray seen around the peripheries. NGC ID# 242Z, PCGS# 5707
- 3783 1917-S Type One MS65 Full Head PCGS.** Frosty luster illuminates well-preserved surfaces beneath a veil of light olive-gold toning. The leading edge of the eagle's left (facing) wing is not fully brought up, but the strike is otherwise sharp throughout. The San Francisco is the most challenging of the 1917 Type One issues in high-grade Full Head. NGC ID# 2433, PCGS# 5711
- 3784 1918-D MS64 Full Head PCGS. CAC.** The 1918-D is a fairly challenging date to locate with Full Head detail, and this Choice example is sharply defined in that area. Several shield rivets are weak, but the date is sharp. Varying shades of gold and champagne color blanket each side, yielding to the satiny underlying luster. NGC ID# 2438, PCGS# 5723
- 3785 1919-S AU58 PCGS.** This is a pleasing near-Mint example of this semikey San Francisco issue. The date is bold and the shield shows above-average definition. Some luster remains in the recesses and both sides show just a tinge of light golden color. NGC ID# 243D, PCGS# 5732
- 3786 1920-D MS65 PCGS. CAC.** Lustrous, well-preserved surfaces are toned in varied shades of pewter gray and golden-brown. The strike is typical for the issue showing sharpness in some areas and softness in others. The details of Liberty's chain mail armor and vertical stripes in the shield are sharp and all of her toes are visible, while her head shows characteristic softness at the highpoints. Most the eagle's wing feather features are sharp while the breast plumage details are predominantly soft. The 1920-D is scarce and eagerly sought at the MS65 grade level.  
Ex: *FUN Signature (Heritage, 1/2006)*, lot 2488. NGC ID# 243F, PCGS# 5736

1921 Quarter, MS64 Full Head  
Sharp Head and Shield

- 3787 1921 MS64 Full Head PCGS.** An elusive key date, the 1921 Standing Liberty quarter is seldom encountered in pleasing Mint State condition with Full Head detail. This Choice example displays frosty luster beneath warm sun-gold toning, while the surfaces are free of any significant abrasions. Liberty's head is sharp and the shield shows crisp lines and rivets. The date is clear, but the numerals are flatly struck, a striking characteristic to which this issue seems unusually prone. NGC ID# 243H, PCGS# 5741

- 3788 1923 MS67 NGC. CAC.** Exceptional preservation and intense, frosty luster are the initial eye-catchers on this Superb Gem 1923 Standing Liberty quarter, although closer examination also reveals outstanding detail on the shield, stars, date, and Liberty's head which is very nearly full. Both sides display swirling violet and champagne hues, delivering impeccable eye appeal. Census: 52 in 67 (1 in 67+, 1 in 67 ★), 0 finer (12/14). NGC ID# 243J, PCGS# 5742

1923-S Quarter, Frosty MS65

- 3789 1923-S MS65 PCGS.** The 1923-S is one of the key dates in the Standing Liberty quarter series. Splashes of rose and champagne-gold visit the lustrous surfaces of this lovely Gem. Excellent detail is apparent on the inner shield, rivets, chain mail, and most of the eagle's plumage. A few grade-consistent marks are undisturbing. PCGS has certified only 34 numerically finer representatives (12/14).  
Ex: *Long Beach Signature (Heritage, 9/2009)*, lot 666. NGC ID# 243K, PCGS# 5744
- 3790 1924 MS65 Full Head NGC.** Delicate gold and pink shadings grace the satiny surfaces of this sharply struck Gem. Excellent preservation and eye appeal to match. Census: 52 in 65 Full Head, 36 finer (12/14).  
Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 468. NGC ID# 243L, PCGS# 5747
- 3791 1924-D MS64 Full Head PCGS.** This attractive Choice example exhibits sharply detailed design elements, with Full head definition and almost complete shield rivets. The well-preserved brilliant surfaces radiate especially vibrant mint luster. Population: 86 in 64 Full Head, 68 finer (12/14). NGC ID# 243M, PCGS# 5749

1924-D Quarter, MS65 Full Head  
Scarce This Sharply Detailed

- 3792 1924-D MS65 Full Head NGC.** Potent luster envelops the untuned surfaces of this Gem D-mint quarter, and a well-executed strike delivers strong definition to the design elements; even the lowest few rivets on the shield are nearly full. A couple of trivial obverse marks preclude an even higher grade.  
Ex: *FUN Signature (Heritage, 6/2008)*, lot 916. NGC ID# 243M, PCGS# 5749

### 1924-D Quarter, Satiny MS65 Full Head

- 3793 1924-D MS65 Full Head PCGS.** Probably fewer than one in 20 Mint State survivors of this date comes with Full Head details. This satiny Gem shows lightly toned surfaces that are well within the Full Head designation. The strike detail is good throughout — all shield rivets are present, although a couple are faint, and minor softness shows on the tops of the date digits, more a design flaw than a strike deficiency. Marks are few and far between for the grade. An extremely nice example of this strike and conditional rarity. Population: 49 in 65 Full Head, 19 finer (12/14). NGC ID# 243M, PCGS# 5749

### 1924-S Quarter, MS65 Full Head Boldly Defined Throughout

- 3794 1924-S MS65 Full Head NGC.** The 1924-S quarter is very scarce in Full Head, and J.H. Cline (2007) estimates that less than 2% were ever struck with this feature. This Gem is one of those few. In fact, the only softness on this particular example occurs on the rivets near Liberty's abdomen. Essentially untuned surfaces exhibit pleasing luster and are devoid of all but a couple of grade-consistent marks. Census: 37 in 65 (1 in 65+) Full Head, 5 finer (12/14). Ex: *Central States Signature* (Heritage, 4/2009), lot 571; *Los Angeles Signature* (Heritage, 8/2009), lot 715. NGC ID# 243N, PCGS# 5751

### 1926-S Quarter, MS66 Exceptionally Well-Preserved

- 3795 1926-S MS66 NGC.** Vibrant luster exudes from each side of this beautiful Premium Gem. Pastel multicolored toning is more extensive and slightly deeper in hue on the reverse. Generally well-defined except for the usual softness on the shield and the leading edge of the eagle's left (facing) wing. There are no marks of consequence. Census: 10 in 66, 2 finer (12/14). Ex: *ANA Signature* (Heritage, 3/2010), lot 888. NGC ID# 243T, PCGS# 5758

- 3796 1926-S MS62 Full Head PCGS.** Only about one-percent or less of the 1926 Standing Liberty quarters from the San Francisco Mint are struck with full head detail (Cline, 2007). This Select piece is a refreshing exception, though the usual localized softness is visible elsewhere, especially on the chain mail and shield. The silver-gray, lustrous surfaces have been well-cared for. Population: 8 in 62 Full Head, 51 finer (12/14). NGC ID# 243T, PCGS# 5759

- 3797 1927-D MS65 Full Head NGC.** This fully brilliant silver Gem has excellent design details, including a full head and a strong shield, except for the typically weak rivets adjacent to Liberty's hip. The surfaces are satiny and highly lustrous. The 1927-D is a scarce issue with a fully struck head, and the present piece will be a nice addition to the specialist's cabinet. Census: 46 in 65 (1 in 65+) Full Head, 10 finer (12/14). Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1182. NGC ID# 243V, PCGS# 5763

- 3798 1928 MS67 NGC.** Satin luster and an overall brilliant appearance provide this Superb Gem with strong eye appeal. Closer examination reveals an area of tan patina at the upper right obverse. The reverse displays lovely pastel toning in intermingled shades of yellow, green, pink, and orange. NGC and PCGS combined have awarded MS67 grades to only 15 examples, with none numerically finer at either service (12/14). NGC ID# 243X, PCGS# 5766

- 3799 1928-S MS67 NGC.** Small S. Attractive golden-brown, aquamarine, and plum-red toning dominates the margins of this lustrous Superb Gem. The strike is crisp except on Liberty's cheek and the two shield rivets near the waist. NGC ID# 243Z, PCGS# 5770

- 3800 1928-S MS66 Full Head PCGS. CAC.** Boldly struck design elements go beyond Liberty's Full Head to include strong definition on the chain mail and vertical lines in the inner shield. Occasional glimmers of canary-yellow patina show against otherwise bright silver-white surfaces. Smooth and remarkable. Ex: *Long Beach Signature* (Heritage, 9/2009), lot 681. NGC ID# 243Z, PCGS# 5771

- 3801 1929 MS66 Full Head PCGS.** A natural and highly appealing Premium Gem with full head details. Traces of champagne toning are evident over both surfaces. Ex: *Dallas Signature* (Heritage, 10/2008), lot 781. NGC ID# 2442, PCGS# 5773

- 3802 1929-D MS64 Full Head NGC.** Vibrant luster emanates from the untuned surfaces of this lovely near-Gem. A solid strike culminates in a Full Head on Liberty and bold detail in the chain mail and most of the shield rivets. A couple of trivial marks barely prevents Gem classification. Ex: *Long Beach Signature* (Heritage, 9/2002), lot 6700; *FUN Signature* (1/2009), lot 8352. NGC ID# 2443, PCGS# 5775

- 3803 1929-S MS67 PCGS. CAC.** Gold and crimson at the borders with soft silver and pale champagne shadings through the interiors. Softness at Liberty's head and shield, as often seen on this challenging later issue. Population: 11 in 67, 0 finer (12/14). Ex: *Central States Signature* (Heritage, 4-5/2010), lot 798. NGC ID# 2444, PCGS# 5776

- 3804 1929-S MS66 Full Head PCGS. CAC.** Bright silver-white luster and generally well-defined devices add up to great eye appeal on this Premium Gem. Carefully preserved with intriguing eye appeal. Ex: *Long Beach Signature* (Heritage, 9/2009), lot 686. NGC ID# 2444, PCGS# 5777

- 3805 1930-S MS66 Full Head PCGS.** Glowing luster issues from both sides of this Premium Gem, each of which displays soft champagne color and beautifully preserved surfaces. This Full Head piece exhibits strong detail on the remaining devices, save for the typical weakness in the rivets adjacent to Liberty's hip. NGC ID# 2446, PCGS# 5781

## WASHINGTON QUARTERS

- 3806 1932 MS66+ PCGS.** Heavily frosted mint luster highlights the sharply impressed design elements on this Plus-designated Premium Gem type coin. Amber and lilac peripheral toning fades to pale champagne over the centers, and the surfaces are free of any significant abrasions. PCGS has certified three numerically finer representatives (12/14). NGC ID# 2447, PCGS# 5790
- 3807 1932 MS66+ PCGS. CAC.** This incredibly sharp, highly lustrous example displays splashes of green-gold, lemon, and amber-orange color over much of the obverse and to a lesser extent around the reverse periphery. This is one of only 19 MS66 coins to receive a Plus designation from PCGS, where only three have been deemed numerically finer (12/14), making it an ideal candidate for either the Registry Set specialist or type collector. NGC ID# 2447, PCGS# 5790
- 3808 1932-D MS61 PCGS. CAC.** A pleasing Mint State example of the key to the Washington quarter series, this coin offers sharply detailed design elements and vibrant mint luster throughout. The lightly marked surfaces show a few hints of champagne-gold toning. NGC ID# 2448, PCGS# 5791

### 1934 Washington Quarter, MS67 Popular Light Motto Variant

- 3809 1934 Light Motto, FS-401, MS67 PCGS.** The blurry Light Motto of the 1932-dated quarters returned on a small introductory percentage of the 1934 issue, soon replaced by Medium Motto and Large Motto varieties. The present honey-gold and ice-blue Superb Gem has potent luster and a virtually immaculate obverse. Population: 22 in 67 (3 in 67+), 0 finer (12/14). PCGS# 146000 Base PCGS# 5794
- 3810 1934-D Medium Motto MS66 PCGS.** From a relatively low mintage of 3.5 million pieces, the 1934-D Washington quarter is not readily available in high grade, and Premium Gem examples are very scarce. This well-detailed Premium Gem displays vibrant mint luster across smooth stone-gray, plum-mauve, and jade-green surfaces. NGC ID# 244C, PCGS# 5796
- 3811 1935-S MS67 PCGS.** Frosty, radiant mint luster is the hallmark of this Superb Gem's eye appeal, although the Registry Set collector find its ranking as one of the finest certified at PCGS to be of even greater importance. The strike is sharp and the surfaces are largely undisturbed. Population: 33 in 67, 0 finer (12/14). NGC ID# 244F, PCGS# 5799
- 3812 1936 Doubled Die Obverse, FS-101, MS65 NGC.** The obverse legends are unusually thick and the leftmost letters in the Motto show a clockwise spread. A lustrous and splendidly smooth Gem with faint almond-gold toning. An exceptionally high grade for this very scarce variety. Census: 1 in 65, 1 finer (12/14). PCGS# 146091 Base PCGS# 5800
- 3813 1936-D MS66 PCGS.** Frosty, vibrant mint luster yields pale ice-blue and lavender hues as it cartwheels around each side. The strike is bold and only a few faint ticks are detectable on the high points of the devices. PCGS has certified only 14 numerically finer representatives (12/14). NGC ID# 244H, PCGS# 5801

### 1937 Washington Quarter, MS67+ None Finer at PCGS

- 3814 1937 MS67+ PCGS. CAC.** An extraordinary Superb Gem with the coveted PCGS Plus-designation, this beauty exhibits satiny silver luster with delicate powder-blue and champagne toning on both sides. This example is tied with a small number of others for the finest that PCGS or NGC have graded. Population: 75 in 67 (6 in 67+), 0 finer (12/14). NGC ID# 244K, PCGS# 5803
- 3815 1943-S MS67+ NGC. CAC.** The Plus grade and CAC sticker are both well-deserved on this frosty, untuned Superb Gem 1943-S quarter, undoubtedly one of the finer-known survivors from the original mintage. The surfaces are virtually impeccable. NGC has seen just two numerically finer submissions (12/14). NGC ID# 2457, PCGS# 5822
- 3816 1960 MS67 PCGS. CAC.** Vivid shades of golden-brown and violet toning blanket the impeccably preserved surfaces of this spectacular Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Population: 14 in 67, 0 finer (12/14). NGC ID# 246K, PCGS# 5868

## PROOF WASHINGTON QUARTERS

- 3817 1936 PR66 PCGS.** Brilliant, deeply mirrored surfaces are free of distractions on this Premium Gem proof. An important Registry Set contender, as PCGS has certified only eight numerically finer examples (12/14). NGC ID# 27HN, PCGS# 5975
- 3818 1936 PR66 PCGS.** Deeply reflective fields showcase light golden toning on each side of this sharply struck Premium Gem proof. The devices are richly satiny with little field-motif contrast, although PCGS has not certified any examples of this issue as Cameo. Only eight coins are numerically finer at PCGS (12/14). NGC ID# 27HN, PCGS# 5975

### 1936 Quarter, PR66+ Delicately Toned

- 3819 1936 PR66+ NGC. CAC.** This first-year Washington quarter proof issue is ceaselessly pursued but seldom available in finer grades. This piece is bested by few numerically finer examples. Light pastel-gold color and boldly struck, seemingly pristine surfaces add up to excellent eye appeal. NGC has certified only 22 numerically finer representatives (12/14). NGC ID# 27HN, PCGS# 5975

**3820 1937 PR67 PCGS. CAC.** A spectacular Superb Gem proof from a mintage of 5,542 pieces, this coin offers sharply detailed design elements and reflective surfaces with no mentionable distractions. PCGS has graded two numerically finer examples (12/14). NGC ID# 27HP, PCGS# 5976

**3821 1938 PR67 PCGS. CAC.** With no Cameos or Deep Cameos certified at PCGS, this Superb Gem is among the finer-known examples of this proof issue. The centers display just a touch of champagne and ice-blue color over satiny devices and mirrored fields, while the obverse margins exhibit areas of deep amber toning. Only three coins are certified numerically finer at PCGS (12/14). NGC ID# 27HR, PCGS# 5977

**3822 1968-S PR69 Deep Cameo PCGS.** A hint of delicate gold toning appears on the light gray surfaces of this impressive Superb Gem Deep Cameo proof. First of the San Francisco proofs, this amazing quarter dollar has white-on-black contrast with exceptional eye appeal. Population: 27 in 69 Deep Cameo, 0 finer (12/14). NGC ID# 2495, PCGS# 96000

## PROOF STATEHOOD QUARTER

**3823 1999-S Delaware Silver PR70 Ultra Cameo NGC.** A technically perfect example of the first state quarter design, with fully struck frosty design elements and deeply mirrored fields that contrast boldly with the richly frosted devices. Eye appeal is incredible. NGC ID# 27M8, PCGS# 96043

## EARLY HALF DOLLARS

**3824 1795 2 Leaves, O-116, R.4 — Repaired — NGC Details. VF.** A straw-gold and powder-blue example of this scarce introductory half dollar type. Liberty's neck and forehead show smoothing, as does the left obverse field. The obverse is minutely granular and both sides are glossy. PCGS# 39232 Base PCGS# 6052

**3825 1795 2 Leaves, O-117, R.4 — Tooled — PCGS Genuine. VF Details.** Liberty's upper neck is smoothed, along with nearby portions of the jaw and field. The moderately granular surfaces are toned walnut-brown and steel-gray. Considerable definition remains on Liberty's hair and the eagle's wing. PCGS# 39233 Base PCGS# 6052

### 1795 Small Head Half, VG10 O-128, Two Leaves

**3826 1795 2 Leaves, Small Head, O-128, High R.5, VG10 PCGS.** A great example of this highly challenging second-year half dollar variety. This piece has generally light toning with pleasing silver-gray and peach shadings overall. Occasional elements of blue visit the smooth fields. For all Small Head varieties, Population: 30 in 10, 22 finer (12/14).  
Ex: *Houston Signature (Heritage, 12/2008)*, lot 583. PCGS# 39251 Base PCGS# 6054

### 1795 Flowing Hair Half, Fine 15 O-129, Two Leaves, S Over D

**3827 1795 2 Leaves, Second S Over D, O-129, R.4, Fine 15 PCGS. CAC.** A scarce and popular variety, with the second S in STATES punched over an errant D. The remnants of the underlying D are plainly visible to the unaided eye. This is a lightly circulated example, but retains some hair detail on the obverse bust, as well as complete rims. Uniform pewter-gray toning is visited by the occasional speck of deeper gunmetal-blue color. PCGS# 39259 Base PCGS# 6052

**3828 1806/5 O-101, R.3, XF40 PCGS.** The second T in STATES is repunched, and the final star touches the bust tip. Light gold toning graces this minimally marked Bust half dollar. Luster fills the legends, curls, wings, and shield. The strike is good despite softness on the rightmost clouds. PCGS# 39296 Base PCGS# 6077

### 1806 Half Dollar, O-106, AU50 Knob 6, Small Stars

**3829 1806 Knob 6, Small Stars, O-106, R.4, AU50 PCGS.** Heavy die lines, one near the upper-right corner of the shield and the other from the fletchings to the tailfeathers, confirm the attribution. A fairly scarce Knob 6 variety, elusive in AU and finer grades. This piece is well-detailed in most areas, showing just minor softness on the upper-right reverse. Areas of aquamarine, violet, and silver-gray toning encompass each side, with the deeper colors most prominent on the obverse. PCGS# 39306 Base PCGS# 6075

**3830 1806 Pointed 6, No Stem, XF40 NGC. O-109a, R.3.** An attractive XF40 example of the late die state O-109a, with the diagnostic die crack at star 12. The design elements show light wear, but retain most of their interior detail and the lightly abraded surfaces are lustrous, with greenish-gold and powder-blue toning. NGC ID# 24EJ, PCGS# 6071 Base PCGS# 6071

**3831 1806 Pointed 6, Stem, O-116, R.3, XF40 NGC.** Deep gunmetal toning dominates but the high points are pearl-gray. Evenly struck and refreshingly unabraded. A die crack runs through the bottom of the date and the first two stars. PCGS# 39319 Base PCGS# 6071

## BUST HALF DOLLARS

- 3832** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, VF25 NGC. CAC. Ex: "Col." E.H.R. Green, Eric P. Newman. The popular blundered denomination variety from the first year of Reich's Capped Bust design. A late die state with peripheral elements drawn toward the rim. The refreshingly unabraded surfaces are deeply toned slate-gray and forest-green. PCGS# 39356 Base PCGS# 6086
- 3833** 1807 Capped Bust, Large Stars, 50 Over 20, R.1, AU50 NGC. A dusky olive-green and lilac example without any consequential marks. The cheek and other high points show minor wear. The prevalent first-year Capped Bust marriage, interesting for its blundered denomination. PCGS# 39356 Base PCGS# 6086
- 3834** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 NGC. Deep autumn-brown and gunmetal-blue toning blankets this briefly circulated representative. A few brief vertical marks are noted on the field near the chin. A late die state with flowlined borders and a lengthy horizontal crack beneath the date. PCGS# 39356 Base PCGS# 6086

### 1807 Capped Bust Half, AU53 O-112, 50 Over 20

- 3835** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 PCGS. CAC. A stone-gray first-year Capped Bust half that boasts substantial luster across the borders and within the motifs. Noticeable marks are absent. High point wear on the curls and plumage correlates to the grade. The first Philadelphia Mint engravers sometimes had trouble distinguishing quarter and half dollar dies. The blundered denomination error is also seen on certain 1822 and 1828 quarters. PCGS# 39356 Base PCGS# 6086
- 3836** 1811 Small 8, O-106, R.3, AU53 PCGS. Narrow bands of jade-green, lilac, and tobacco-brown toning grace the borders. Only trivial contact is present, although the obverse is minutely granular. A late die state with multiple sets of clash marks and minimal obverse dentilation. PCGS# 39429 Base PCGS# 6097
- 3837** 1815/2 O-101, R.2, AG3 PCGS. A slate and charcoal-gray representative. All legends are readable, and marks are confined to a trio of horizontal lines on the left obverse field. The stopper to a date set of Capped Bust half dollars. One die marriage was coined from a reported mintage of 47,150 pieces. PCGS# 39491 Base PCGS# 6108
- 3838** 1818 O-111, R.1, AU58 NGC. A tiny spike from the top of Liberty's cap is the pick-up point for the collectible Overton-111. Silver-gray and wheat-gold toning grace partly lustrous and minimally marked surfaces. PCGS# 39528 Base PCGS# 6113
- 3839** 1820/19 Square Base 2, O-101, R.2, AU53 NGC. An impressive AU example with light silver surfaces and nearly full luster with traces of high-point wear. Both sides exhibit microscopic hairlines and handling marks of little consequence. PCGS# 39572 Base PCGS# 6125
- 3840** 1822 O-103a, R.5 — Improperly Cleaned — NGC Details. Unc. A repunched star 10 and a radial die crack to Liberty's nose identify the much better Overton-103a variety. This fully struck half dollar displays medium cream-gray, straw-gold, and sea-green toning. Satiny and free from any evident abrasions. Gray residue is noted in recesses of the reverse peripheral letters. PCGS# 39588 Base PCGS# 6129

### 1827 Half Dollar, O-108a, MS63 Upper-End for the Grade

- 3841** 1827 Square Base 2, O-108a, R.4, MS63 PCGS. CAC. The second marriage, with a large die lump within the F in OF. This piece is immensely appealing for the grade, showing soft, satiny luster beneath warm lavender-gray toning that fades to mint-green and gold around the borders. The surfaces are devoid of major abrasions, giving this piece the overall eye appeal of a higher grade. Several stars are weak, as usual, and the ribbon through PLURIBUS is not fully brought up, but the central devices are sharp. PCGS# 39701 Base PCGS# 6144

### 1827 O-129 Half Dollar, MS63 A Mint State Scarcity

- 3842** 1827 Square Base 2, O-129, R.4, MS63 PCGS. This difficult variety is seldom encountered in Mint State grades, and the present Select Mint State example is likely in the Condition Census. This piece has frosty luster with delicate champagne-tinged silver surfaces. A lovely example. PCGS# 39728 Base PCGS# 6144

### 1827 Square Base 2 Half, O-142, MS64 Pastel-Toned, Likely in the Condition Census

- 3843** 1827 Square Base 2, O-142, R.3, MS64 PCGS. CAC. This Square Base 2 variety shows a tiny curved die line from the right shield border that cuts through four nearby feathers. The bottom of the 8 is thin, and star 13 is nearly touching the lowest curl. This example offers lustrous surfaces with appealing pastel patina in shades of pinkish-gold and mint-green with outstanding eye appeal. This piece is likely within the Condition Census for the variety. PCGS# 39742 Base PCGS# 6144
- 3844** 1829/7 MS61 PCGS. O-102, R.2. Dusky steel-gray toning cedes to deeper cobalt-blue and tan-brown colors on the reverse. A well struck representative with subtle luster. Moderate marks near the chin and above the eagle's head are made inconspicuous by subsequent toning. Certified in an older generation holder. NGC ID# 24FT, PCGS# 6155 Base PCGS# 6155

- 3845 1829 Small Letters, O-107, R.3, MS61 PCGS.** Die lines in the field before the tip of the bust identify this variety, as this reverse is shared by two other varieties. This is a pleasing lower-grade Mint State coin, with sharply impressed design elements and fewer abrasions than are expected for the grade. Medium golden-gray toning blankets both sides. PCGS# 39786 Base PCGS# 6154
- 3846 1829 Small Letters, O-111a, R.2, MS62 NGC.** A lightly abraded stone-white half dollar with a satiny obverse and a semiprooflike reverse. A late die state with no evidence of recutting on the A in STATES and the 5 in 50 C. The outer star points are drawn to the rim. The portrait is lapped with detail missing from the forehead and shoulder curls. PCGS# 39794 Base PCGS# 6154
- 3847 1829 Small Letters, O-112a, R.2, MS62 PCGS.** The diagnostic die lines below star 13 have been removed by die lapping on this late die variant of O-112. This example is well-struck on the stars and central devices, though the lower reverse relief elements show considerable weakness. Semiprooflike in the fields, with a light golden hue over both sides. PCGS# 39796 Base PCGS# 6154
- 3848 1830 Small O, O-109, R.3, MS62 NGC.** This satiny Mint State example just missed the O-109 Condition Census. Both sides have ivory luster with splashes of peripheral blue-steel toning. Trivial lines and marks prevent a higher grade. PCGS# 39820 Base PCGS# 6156
- 3849 1832 Small Letters, O-102, R.1, MS62 NGC.** An outstanding Mint State Capped Bust half dollar, this 1832 represents the plentiful O-102 variety, making an ideal candidate for a date or type collection. Both sides have full luster beneath grayish-gold and iridescent toning. PCGS# 39858 Base PCGS# 6160
- 3850 1833 O-109, R.3, MS61 NGC.** This coruscating representative displays only a hint of tan toning at the borders. Smooth aside from a faint hair-thin mark beneath the right scroll end. A die line from the right foot of the I in AMERICA is the pick-up point for O-109. A late dies example with faded dentils and the outer star points drawn toward the rim. PCGS# 39897 Base PCGS# 6163

## REEDED EDGE HALF DOLLARS

- 3851 1836 Reeded Edge, GR-1, R.2 — Smoothed — PCGS Genuine. XF Details.** The 1836 Reeded Edge half dollar is a low mintage and historic issue. This nicely detailed example is glossy from a wipe intended to reduce the granularity of the left obverse field. Retoned chestnut-gold and ocean-blue. PCGS# 531046 Base PCGS# 6175

**1836 Reeded Edge Half, GR-1, XF40  
First Steam-Powered U.S. Coinage**

- 3852 1836 Reeded Edge, GR-1, R.2, XF40 PCGS. CAC.** Dusky pinkish-gray tones appear on each side of this classic type coin issue, the first struck using steam power at the U.S. Mint. (This was a party the Mint was quite late to, as Birmingham's Soho Mint, under the tutelage of Matthew Boulton and James Watt, had been striking coins using steam power for decades.) The surfaces show minor marks consistent with the grade and some small grayish toning areas. The mintage of the issue was only 1,200 pieces from a single die pair. PCGS# 531046 Base PCGS# 6175

- 3853 1837 Broad Collar, GR-24, R.2, MS61 NGC.** Reeded half authority Dick Graham writes, "I have seen a few GR-24s with an oversized and extended planchet, the reason for which I have not been able to ascertain. The planchet size will be 1.245 inches, the reverse dentils will be elongated and stretched to a shallow rim, and the legend will be drawn (bifurcated) and thinner." This broad collar (32 mm) example is satiny and unblemished with mottled cream-gray, walnut-brown, and apple-green toning. PCGS# 531078 Base PCGS# 6176

## SEATED HALF DOLLARS

**1842 Half Dollar, MS63  
Small Date, Reverse of 1842**

- 3854 1842 Small Date, Rev of 1842 MS63 NGC. WB-101.** This example is boldly struck on both sides, with semiprooflike fields and minimal abrasions for the grade. Mottled shades of gunmetal-blue, lavender, and amber-gray toning blanket the surfaces, delivering a distinct old-time appeal. The reverse is extensively cracked around the periphery, with a radial break also extending toward the arrow fletchings from the rim near the O in DOL. Census: 6 in 63 (1 in 63+), 18 finer (12/14). PCGS# 6240 Base PCGS# 6240
- 3855 1843 MS63 PCGS. CAC. WB-103.** The 4 in the date is recut on this variety, which is extremely rare in Mint State grades. The present Select example shows considerable semiprooflike mirroring in the fields, with delicate rainbow toning that fades to mint-green, lavender, and golden-gray in the centers. Some striking deficiency is noted on Liberty's chest and the corresponding portion of the eagle. Population of all 1843 halves: 17 in 63, 11 finer (12/14). NGC ID# 24GX, PCGS# 6243 Base PCGS# 6243
- 3856 1846-O Tall Date XF45 PCGS. WB-106, Die Pair 22, R.4.** Scarce in all grades and rare in Choice XF condition, the Tall Date type always attracts strong attention from Seated half collectors. This is a textbook example of the Wiley-Bugert Die Pair 22, with diagnostic reverse die cracks through the olive leaves and a bold crack along the top letters of UNITED starting to form a cud. Smooth, silver-gray surfaces shows light, amber-gold toning at the margins. A few light abrasions are minimal for the assigned grade. Population: 9 in 45, 8 finer (12/14). NGC ID# 24H9, PCGS# 6256 Base PCGS# 6256
- 3857 1848-O AU58 PCGS. WB-101, Die Pair 22, R.3.** Nice luster remains across the silver-white surfaces of this New Orleans issue, with little wear and an attractive crescent of reddish gold at the upper left obverse. Abrasions are limited to a few light field lines. Liberty is particularly bold on this near-Mint coin, with sharp hair detail surrounded by bold star centers. An arching die crack through (STAT)ES and a weak crack from the rim to Liberty's forehead help confirm the die pair. Population: 14 in 58, 24 finer (12/14). NGC ID# 24HD, PCGS# 6261 Base PCGS# 6261

**1850-O Half Dollar, Toned MS64  
Reflective Fields**

- 3858 1850-O MS64 PCGS. WB-101, Die Pair 2, R.3.** The 1850-O half dollar had a fairly substantial mintage in excess of 2.4 million coins, but Mint State survivors are scarce across the spectrum, and those grading higher than this example are rare. Both sides display semiprooflike fields, with gunmetal-blue and golden-gray toning overall. The stars are flat, a common characteristic for this variety, though the figure of Liberty and the eagle are sharply defined. Population: 24 in 64 (2 in 64+), 6 finer (12/14). NGC ID# 24HH, PCGS# 6265 Base PCGS# 6265

**1853 Arrows and Rays Half, In-Demand MS64  
Late-Stage Obverse and Reverse Dies**

- 3859 1853 Arrows and Rays MS64 NGC.** The Arrows and Rays quarters and half dollars are perennially popular coins beyond mere type collectors and series specialists, as they are sufficiently “different” that even those who do not pursue complete collections will often want to acquire at least one Arrows and one non-Arrows example. This heightens demand among all collecting segments. Despite their high mintage exceeding 3.5 million pieces, the Arrows halves are much in demand. This near-Gem shows problem-free surfaces in terms of its post-Mint status, but a network of interesting die cracks on the obverse, and a pair of die lumps within the shield on the reverse, indicate dies that were being worked hard to achieve the large production quota. A Gem of this issue will be much harder to find — and much more expensive to purchase. NGC shows only 26 submissions numerically finer than this piece — 15 in MS65, 11 in MS66 (12/14). NGC ID# 24JJ, PCGS# 6275 Base PCGS# 6275

**1853-O Arrows and Rays Half, AU58  
Early State WB-101, Die Pair 3 Example**

- 3860 1853-O Arrows and Rays AU58 PCGS. WB-101, Die Pair 3, R.3.** More than 1.3 million examples of the 1853-O Arrows and Rays half dollars were struck, but their first-year type-coin status combined with the popular New Orleans mintmark makes them hotly pursued by collectors. This example is just a hair's breadth of wear away from Mint State, a piece that almost certainly traded as a “slider Uncirculated” in the decades before third-party grading. The die cracks connecting the date digits and arrowheads attribute the WB-3 die pair, although in an early die state, with not all of the later cracks appearing. The crack through UNITED is scarcely perceptible. An attractive lightly gold-tinged example. Population: 14 in 58, 34 finer (12/14). NGC ID# 24JK, PCGS# 6276 Base PCGS# 6276

- 3861 1861-S AU58 NGC. WB-101, Die Pair 6, R.3.** Large S mintmark. A bold and untuned example, void of relevant contact although the upper reverse has a hint of granularity. As is the trend for S-mints from the era, minimally worn and Uncirculated representatives are far more difficult than the mintage would suggest. This near-Mint example shows a bold strike and diagnostic die cracks through the reverse legend and arrowheads. Census: 19 in 58, 31 finer (12/14). NGC ID# 24J5, PCGS# 6306 Base PCGS# 6306

- 3862 1867-S AU58+ PCGS. WB-102, Die Pair 10, R.3.** Lovely, light pearlescent patina covers the silver surfaces of this borderline Uncirculated San Francisco half. Nearly mark-free fields and devices are sharp and attractive. The variety is known for its doubled reverse die — most evident on the motto — and by a wavy die crack beneath STATES, paired with a unique obverse with a large die lump on Liberty's bicep near the pole. Population: 14 in 58 (1 in 58+), 19 finer (12/14). NGC ID# 24JU, PCGS# 6322 Base PCGS# 6322

- 3863 1868 MS63 NGC. WB-101.** The 1868 Seated Liberty half dollar is a better date in the series, from a mintage of 416,600 pieces. This attractive Select specimen is well-detailed and lustrous, with a few minor contact marks and highlights of greenish-gold and turquoise toning. Census: 6 in 63, 6 finer (12/14). NGC ID# 24JV, PCGS# 6323 Base PCGS# 6323

- 3864 1871 MS63 PCGS. WB-103.** The 1 in the date is recut south, with the underdigit evident just above the base of the primary. This example is well-struck and frosty, with just a hint of light golden toning over each side. Scattered luster grazes limit the grade, but no obtrusive abrasions are present. Population: 13 in 63, 26 finer (12/14). NGC ID# 24K4, PCGS# 6330 Base PCGS# 6330

- 3865 1874 Arrows MS62 PCGS. WB-102.** Large Arrows. A number of scattered luster grazes limit the grade of this frosty, largely untuned example, but no obtrusive abrasions are present. The design elements are sharply rendered. This issue is seldom seen in finer Mint State grades. NGC ID# 24LA, PCGS# 6346 Base PCGS# 6346

- 3866 1877-S MS63 NGC. WB-104, Die Pair 38.** A remarkable Select example, with sharply detailed design elements, and reflective prooflike fields under shades of champagne-gold and powder-blue toning. This elusive subtype shares the reverse of the rare 1878-S half dollar. NGC ID# 24KM, PCGS# 6357 Base PCGS# 6357

**3867 1877-S MS64 PCGS. CAC. WB-101, Die Pair 3, R.3.** A crisp strike and semireflective fields deliver strong eye appeal for this Choice 1877-S half. Abrasions are limited to a few minor ticks, primarily on the devices, and are largely hidden by splashes of sun-gold, olive, and ocean-blue toning. A highly appealing coin and upper-end for the grade. NGC ID# 24KM, PCGS# 6357 Base PCGS# 6357

**3868 1889 MS64 PCGS. WB-101.** Only a few minor stacking marks on the high points of the devices limit the grade of this well-preserved, satiny Choice example. Tinges of deep amber and navy-blue peripheral toning frame pale champagne hues overall, and the design elements are sharply impressed. Population: 49 in 64, 33 finer (12/14). NGC ID# 24L4, PCGS# 6371 Base PCGS# 6371

## PROOF SEATED HALF DOLLARS

**3869 1859 PR63 Cameo PCGS.** The sharply struck design motifs are highlighted against the mirrored fields. Whispers of soft gold color cling to the margins. Minute marks on Liberty's cheek and lower left (facing) arm and adjacent field limit the numerical grade. Population: 9 in 63 Cameo, 14 finer (12/14). PCGS# 86413

### 1860 Seated Half, Sharp PR64

**3870 1860 PR64 PCGS.** This early proof boasts lots of eye appeal for the grade, showing a sharp proof strike and only a couple of scattered ticks in accord with the grade. A light heather tint suffuses into deep, dusky copper-burgundy color at a small crescent on the reverse rim. Population: 38 in 64, 22 finer (12/14). NGC ID# 27TK, PCGS# 6414

**3871 1869 PR64 Cameo NGC.** Fully struck with creamy, light coloration, highly reflective fields, and a well preserved overall appearance. Attractive if mild field-to-device contrast is noted on each side of the piece. Census: 2 in 64 Cameo, 7 finer (12/14). Ex: *Long Beach Signature* (Heritage, 9/2006), lot 1950. PCGS# 86427

**3872 1871 PR64 NGC. WB-101.** Subtle cameo contrast is present on both sides of this Choice proof, with satiny devices and mirrored fields. A few tinges of amber accent consistent champagne toning over each side, while the strike is full and the surfaces are free of noticeable marks or hairlines. Census: 37 in 64 (1 in 64 ★), 31 finer (12/14). NGC ID# 27U6, PCGS# 6429

**3873 1872 PR64 NGC. CAC. WB-101.** The fields on this Choice proof are deeply mirrored, although the devices are not quite frosty enough to warrant a Cameo designation from NGC. A faint suggestion of light golden toning accents each side, while only a few minor hairlines preclude a finer grade. The eagle's left (facing) leg is slightly soft, but the remainder of the design elements are well-struck. Census: 36 in 64, 24 finer (12/14). NGC ID# 27U7, PCGS# 6430

**3874 1873 Arrows PR63 PCGS.** A fully struck Select proof, with minimal distractions and deep toning in shades of gunmetal-gray, navy-blue, and olive. The mirroring in the fields is slightly muted by the heavy patina. From a limited mintage of just 500 With Arrows proofs. Population: 43 in 63, 55 finer (12/14). NGC ID# 27UJ, PCGS# 6434

**3875 1878 PR63 PCGS.** The mirrored fields of this essentially untuned Select Proof highlight the sharply struck design motifs, especially when the coin is rotated slightly beneath a light source. Wispy handling marks in the fields preclude a finer numerical grade. Population: 56 in 63 (1 in 63+), 71 finer (12/14). NGC ID# 27UD, PCGS# 6439

**3876 1881 PR63+ Cameo PCGS. WB-101.** Tinges of gold around the peripheries are the only trace of color on this high-end Select proof. The fields showcase deep reflectivity and starkly contrast with the frosty, sharply struck devices. A few minor hairlines limit the grade. Population: 23 in 63 (1 in 63+) Cameo, 40 finer (12/14). PCGS# 86442

**3877 1883 PR64 NGC. WB-101.** Deep reflectivity is evident in the fields, above which sharp, modestly frosted devices rise. Although not designated as a Cameo, both sides exhibit noticeable contrast. There is no mentionable toning, and we can find no individually conspicuous surface blemishes. Ex: *Santa Clara Signature* (Heritage, 11/2001), lot 5911. NGC ID# 27UJ, PCGS# 6444

**3878 1890 PR62 Cameo PCGS. WB-101.** A pleasing lower-grade proof, this 1890 Cameo half dollar displays deep mirrors and softly frosted devices. Minor hairlines limit the grade, while both sides display just a touch of light golden color. A boldly struck piece. Population: 7 in 62 Cameo, 36 finer (12/14). PCGS# 86451

### 1890 Seated Liberty Half Dollar, PR65 Cameo Only 590 Pieces Struck

**3879 1890 PR65 Cameo NGC.** Only 590 Seated Liberty half dollars were struck in proof format in 1890. This delightful Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. A few hints of green and blue toning visit the peripheries. Census: 10 in 65 Cameo, 14 finer (12/14). PCGS# 86451

## BARBER HALF DOLLARS

- 3880 1892 MS64 NGC.** An appealing first-year type coin, this Choice 1892 Barber half dollar displays satiny luster amid pale champagne toning that deepens to amber and aquamarine around the borders. The upper-right corner of the shield is not fully defined, as usual, but the strike is otherwise well-executed. No significant abrasions are present. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461
- 3881 1895 MS64 PCGS. CAC.** This heavily frosted near-Gem is remarkably devoid of noticeable abrasions, and we instead note only some faint luster grazes on the obverse that limit the numeric grade. Pale olive-gold toning yields to hues of lavender and sea-green near the borders, while the vibrant underlying surfaces illuminate sharp design elements. Population: 31 in 64 (1 in 64+), 29 finer (12/14). NGC ID# 24LS, PCGS# 6471

### 1899 Barber Half, Deeply Toned MS65+

- 3882 1899 MS65+ NGC.** Both sides of this Gem offer vastly different color palettes, the obverse chiefly amber-gold and orange with some ochre accents, the reverse lavish blue-green, saffron, violet, emerald, and lavender — and probably some others we lack names for. At any rate a prize for toning enthusiasts, this piece is quite well-struck, even on the right shield corner on the reverse, and shows no mentionable contact marks, even under a loupe. Census: 16 in 65 (1 in 65+), 7 finer (12/14). NGC ID# 24M6, PCGS# 6483
- 3883 1902 MS64 NGC. CAC.** An impressive Choice Mint State Barber half dollar, this 1902 survives from a mintage of 4.9 million half dollars. Both sides are richly toned with a splash of gold at the center of the obverse, graduating to turquoise and russet. The reverse is evenly toned golden-brown. Census: 37 in 64, 15 finer (12/14). NGC ID# 24MF, PCGS# 6492
- 3884 1902 MS65 NGC. CAC.** The 1902 Barber half dollar is surprisingly elusive at the Gem grade level for an issue with a mintage of nearly 5 million coins. This softly lustrous example is sharply detailed in virtually all areas, though some usual softness is seen on the upper-right shield corner and nearby wing. Dappled copper-lilac and russet hues deepen toward the rims, and a couple of small marks on Liberty's cheek are all that preclude a higher grade. Census: 8 in 65, 7 finer (12/14). NGC ID# 24MF, PCGS# 6492
- 3885 1907-D MS65 PCGS.** Consistent sea-green and olive-gold hues blanket the frosty surfaces of this Gem 1907-D Barber half, masking any minor grade-limiting ticks on the obverse. The upper-right corner of the shield is slightly soft, but the strike is otherwise sharp. This Denver issue is scarce in Gem condition, and finer pieces are rare. Population: 24 in 65, 16 finer (12/14). NGC ID# 24MZ, PCGS# 6509
- 3886 1909 MS65 PCGS.** Most Barber half issues become conditionally scarce in Gem and finer grades, and the 1909 is no exception. This example is awash in brilliant, frosty mint luster, and is largely devoid of grade-limiting disruptions. The strike is bold and the eye appeal is equally impressive. Population: 58 in 65, 14 finer (12/14). NGC ID# 24N8, PCGS# 6516

### 1909 Barber Half Dollar, MS65 Natural Toning, Vibrant Luster

- 3887 1909 MS65 PCGS. CAC.** A layer of delicate powder-blue and lavender toning embraces the surfaces, while vibrant luster shimmers throughout. The design features are generally well-struck with mild softness on star 3 and over the lower reverse. Exceptionally smooth and appealing. Population: 58 in 65, 14 finer (12/14). NGC ID# 24N8, PCGS# 6516

### 1909-S Barber Half, Golden-Tinged MS65

- 3888 1909-S MS65 PCGS. CAC.** Although the 1909-S Barber half was struck in the respectable quantity of 1.7 million pieces, the issue was apparently not widely saved at the time. Uncirculated examples are difficult to locate, especially with surfaces as pristine as those of the present golden-tinged Gem. This coin is sharply struck with rippling mint frost and no distracting abrasions. Population: 10 in 65, 14 finer (12/14).  
Ex: FUN Signature (Heritage, 1/2010), lot 3509. NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518

### 1910 Barber Half, Seldom-Seen MS65 Low Mintage of 418,000 Circulation Strikes

- 3889 1910 MS65 PCGS. CAC.** The 1913 and 1914 Philadelphia Mint Barber half issues are both well-known low-mintage rarities. The string of sub-million-coin P-mint emissions in the decade, however, actually began with the 1910, struck to the extent of only 418,000 pieces. This frosty Gem shows light pinkish and pearl-gray patina with good luster and a decent strike. A couple of tiny marks appear near Liberty's mouth, completely unbothersome. Population: 23 in 65 (1 in 65+), 7 finer (12/14). NGC ID# 24NB, PCGS# 6519

**1911 Half Dollar, MS66**  
**Tied for Finest Certified at PCGS**

**3890 1911 MS66 PCGS.** Satiny luster yields warm, champagne toning on each side of this luminous Premium Gem. The surfaces are devoid of noticeable abrasions, and the design elements exhibit above-average definition on both sides. The 1911 Barber half is conditionally scarce in Gem condition, as are many issues in the series, and becomes decidedly rare any finer. This piece is among the finest certified at PCGS. Population: 13 in 66, 0 finer (12/14). NGC ID# 24ND, PCGS# 6521

**3891 1912-D MS64+ PCGS.** Brilliant, frosty luster is the hallmark of this Plus-graded Choice 1912-D half dollar. The eagle's right (facing) talons are slightly soft, but the strike is otherwise sharp throughout. Light contact marks on Liberty's cheek limit the technical grade. NGC ID# 24NH, PCGS# 6525

**1912-S Barber Half, Satiny MS65**

**3892 1912-S MS65 PCGS. CAC.** The 1912-S is an available issue in the lower Mint State grades, given the mintage of 1.3 million pieces, nominal for the series. Survivors are relatively available in grades up through MS63. In higher Mint State grades, however, the 1912-S is a noteworthy rarity, and few examples match the technical quality of this example. Satiny luster complements a bold strike in most areas. The otherwise olive-gray surfaces reveal blushes of dappled light-purple patina on the obverse. A small abrasion on the upper-right eagle's shield is the only possible distraction. Population: 22 in 65, 8 finer (12/14).  
*Ex: Andy Geosits Collection/November Signature (Heritage, 11/2003), lot 6808. NGC ID# 24NJ, PCGS# 6526*

**3893 1913-D MS64 PCGS.** Lemon-gold toning glows a little deeper on the obverse of this Choice 1913-D Barber half. The strike is pleasing throughout and the surfaces exhibit only minor ticks to limit the grade. This issue is a slightly better date in high grades, with a mintage of only 534,000 pieces. Population: 57 in 64 (1 in 64+), 18 finer (12/14). NGC ID# 24NL, PCGS# 6528

**3894 1913-S MS64 PCGS.** Soft champagne-gold patina adorns the highly lustrous surfaces of this near-Gem Barber half. The design features are sharply struck except for the typical minor softness in the upper-right shield corner. Population: 25 in 64, 20 finer (12/14). NGC ID# 24NM, PCGS# 6529

**1915-D Half Dollar, Moderately Toned MS65**  
**Excellent Type Coin**

**3895 1915-D MS65 PCGS. CAC.** The 1915-D Barber half dollar is among the more available issues in the series in this grade, making the present example an excellent choice for a high-grade type set. Both sides are refreshingly free of mentionable contact — a factor that can be a problem for this date — and the beautiful moderate toning ranges from pinkish-gray to olive and amber hues. The strike is adequate, although slightly soft on the eagle's right (facing) claw and shield corner. A nice coin for the grade. Population: 59 in 65, 17 finer (12/14). NGC ID# 24NS, PCGS# 6533

**1915-S Half Dollar, Near-Untoned MS65**

**3896 1915-S MS65 NGC. CAC.** Like its D-mint sibling, the 1915-S Barber half is among the more frequently seen issues in this popular series that can be found for a price in Gem and finer grades. This piece is largely untoned save for widely dispersed daubs of color, but generous luster shines forth from each side. A pair of thin marks on the obverse, one on the neck and one on the cheek, preclude an even finer grade, but this piece offers good eye appeal. Census: 44 in 65, 9 finer (12/14). NGC ID# 24NT, PCGS# 6534

## PROOF BARBER HALF DOLLARS

- 3897 1894 PR64 Cameo NGC.** The design sharpness on this Choice proof Cameo is superb, as is the field-device contrast. A trace of light golden color accents each side, partially masking any grade-limiting hairlines in the fields. Census: 16 in 64 Cameo, 46 finer (12/14). PCGS# 86541

### 1894 Barber Half, PR66 Cameo

- 3898 1894 PR66 Cameo PCGS.** The 1894 Barber half proofs seldom appear above the Gem grade level, and far fewer still appear with cameo contrast such as the present example. The surfaces are lightly rim-toned in cinnamon-gold against untuned centers, and perceptible field-device contrast appears on both strike. The strike is uniformly sharp, save for the upper-right shield corner. An attractive example of this proof date. Population: 18 in 66 (2 in 66+) Cameo, 5 finer (12/14). PCGS# 86541

- 3899 1898 PR64 NGC.** This Choice proof is boldly struck with just a blush of light golden toning over each side. Although not designated on the holder, both sides exhibit pronounced field-device contrast. NGC ID# 24P2, PCGS# 6545

- 3900 1902 PR64 PCGS.** This Choice proof Barber half dollar, certified in a green-label PCGS holder, has fully mirrored surfaces that are brilliant without toning, aside from faint gold toning lines on Liberty's cheek. A hint of contrast remains visible on each side. NGC ID# 24P6, PCGS# 6549

### 1905 Barber Half Dollar, PR65 Only 727 Pieces Struck

- 3901 1905 PR65 PCGS.** The low business-strike mintage for this date has resulted in additional market pressure being applied to the proofs, which also had a modest mintage of 727 pieces. This Gem example is fully struck and essentially brilliant, save for slight milkiness noted in the fields. The coin is well-preserved and free of contact marks or hairlines. Population: 43 in 65, 40 finer (12/14). NGC ID# 24P9, PCGS# 6552

### 1911 Barber Half, PR66 Modest Field-Motif Contrast

- 3902 1911 PR66 NGC.** The sharply struck devices of this Premium Gem proof Barber half display considerable mint frost, although a Cameo designation is precluded by splashes of sun-gold, lilac-gray, and deeper amber toning on each side. Substantial reflectivity is present in the fields and the preservation is outstanding. Census: 28 in 66, 19 finer (12/14). NGC ID# 24PF, PCGS# 6558

## WALKING LIBERTY HALF DOLLARS

- 3903 1916 MS65 NGC.** An attractive Gem example of the first year of the Walking Liberty design, with well-detailed design elements and vibrant satiny mint luster. The well-preserved surfaces show a few highlights of golden-tan and lavender toning. NGC ID# 24PL, PCGS# 6566

- 3904 1916-D MS64 PCGS. CAC.** An impressive branch mint issue from the first year of the Walking Liberty design, this Choice specimen displays well-detailed design elements, with a touch of the usual softness on the eagle's leg. Satiny mint luster shines through some natural silver-gray toning on both sides. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

- 3905 1916-D/D FS-501 MS65 PCGS.** The mintmark is repunched southwest and appears to have a curved tail. The variety is undesignated on the insert. A lustrous Gem with merely a wisp of honey-gold toning. One tiny spot is noted on the front wing. PCGS# 145780 Base PCGS# 6567

- 3906 1916-S — Scratch — PCGS Genuine. Unc Details.** Lustrous silver-white surfaces exhibit well-defined design elements, including Liberty's branch hand. A scratch at the right reverse border extends into the eagle's wing. Otherwise, a sharp looking coin. NGC ID# 24PN, PCGS# 6568

- 3907 1917-D Reverse MS62 PCGS.** Hints of champagne color visit the lustrous surfaces of this Reverse D-mint half dollar. The design elements are well-struck, including complete separation of Liberty's thumb from the branch. NGC ID# 24PS, PCGS# 6571

- 3908 1917-S Obverse AU55 PCGS.** The bright silver-white surfaces of this Choice AU half dollar are quite clean. Liberty's thumb shows complete separation from the branch. A nice looking Obverse Mintmark example. NGC ID# 24PT, PCGS# 6572

- 3909 1917-S Obverse AU58 PCGS.** The 1917-S Obverse half dollar comes from a relatively small mintage of 952,000 pieces. Ample luster emanates from the silvery surfaces that show hints of gold on the reverse. The design elements are well-impressed and neither side reveals significant marks. NGC ID# 24PT, PCGS# 6572

### 1919 Half Dollar, Lightly Toned MS63

- 3910 1919 MS63 PCGS.** The 1919 half, having a mintage slightly less than 1 million pieces, is one of the more challenging issues in the series. Light gold-gray patina graces much of this shimmering P-mint piece, while dappled blue-gray and reddish-gold makes occasional appearances at the margins. A delightful sharply struck Select example from this early issue, housed in a green label holder.  
Ex: *Summer FUN Signature* (Heritage, 7/2007), lot 980. NGC ID# 24PY, PCGS# 6577

- 3911 1920-D AU58 PCGS.** Slight high-point wear does not diminish the appeal of this lustrous half. Well-defined save for the usual softness in the centers. NGC ID# 24R4, PCGS# 6581

- 3912 1920-S MS62 PCGS.** The 1920-S Walker is rarely seen well-struck, a characteristic which contributes to its scarcity in the finer Mint State grades where striking sharpness becomes a factor in the third party assessment. The present coin exhibits fewer abrasions than are expected for the MS62 level, but does display some of the usual weakness on the figure of Liberty and the central eagle's feathers. A touch of light golden color accents each side. NGC ID# 24R5, PCGS# 6582

- 3913 1920-S MS62 PCGS.** A hint of light gold is visible on the reverse of this relatively well-struck S-mint half. Both sides display soft luster and faint die polish lines. NGC ID# 24R5, PCGS# 6582

### 1921-S Half Dollar, XF40 Collector-Grade Piece

- 3914 1921-S XF40 PCGS.** The 1921-S is the scarcest of the three 1921 Walkers in high grades, and this XF example offers the collector with a slightly more obtainable option than a rare Mint State piece. Both sides show original battleship-gray patina, with pleasing detail for the grade. Some luster remains in the protected regions upon close examination. NGC ID# 24R8, PCGS# 6585

- 3915 1923-S AU55 PCGS.** This Choice AU Walker displays considerable luster on its silver-gray surfaces imbued with traces of champagne-gold. Many of the gown lines are sharp, the centers show the typical softness. NGC ID# 24R9, PCGS# 6586

- 3916 1928-S MS62 PCGS.** The lustrous silver-white surfaces of this S-mint Walker are devoid of significant marks. The 1928-S is a leading strike rarity in the series as can be seen by the weakness in the centers of both sides. NGC ID# 24RB, PCGS# 6588

### 1933-S Walking Liberty Half, MS65 Sharply Struck, Original Surfaces

- 3917 1933-S MS65 PCGS. CAC.** The "last of the first," the 1933-S forms the final low-mintage issue from the early years of the Walking Liberty half dollar series. This a lovely grayish-gold Gem with cinnamon and charcoal accents at the peripheries and a bold strike, as usual for this well-produced issue. Note the split on the hand between thumb and forefinger, and the actual presence of visible feathers on the eagle's lower legs.  
Ex: *ANA Signature* (Heritage, 3/2010), lot 1095; *Long Beach Signature* (Heritage, 6/2010), lot 1012. NGC ID# 24RE, PCGS# 6591

- 3918 1934 MS67 PCGS. CAC.** The 1934 Walker only becomes scarce in Superb Gem condition, making this MS67 coin an important acquisition for the advanced series or date collector. Both sides display satiny, golden luster, and the design elements show above-average definition, including partial thumb separation on Liberty's branch hand. Only eight coins are certified numerically finer at PCGS (12/14). NGC ID# 24RF, PCGS# 6592

- 3919 1935 MS67 NGC.** Frosty mint luster resides beneath a blanket of vivid lemon-gold toning on each side of this Superb Gem Walker, with the color slightly deeper over the reverse. Liberty's branch hand is slightly soft, but the strike is otherwise sharp and the preservation is outstanding. Census: 33 in 67+, 1 in 67 ★, 0 finer (12/14). NGC ID# 24RJ, PCGS# 6595

- 3920 1936 MS67 PCGS. CAC.** Champagne-gold patination displays slightly deeper hues on the obverse of this radiantly lustrous Superb Gem Walker. Razor-sharp design detail and impeccably preserved surfaces round out the coin's outstanding eye appeal. NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598

- 3921 1937 MS67 PCGS. CAC.** The Walking Liberty half dollar is a favorite among collectors of 20th century type, and few examples would be better suited for representation than this Superb Gem. Vibrant, frosty luster cartwheels uninterrupted around each side beneath a blanket of lemon-gold toning. Liberty's head is slightly soft, but the strike is otherwise sharp, including thumb separation on the branch hand. PCGS has only seen five numerically finer submissions (12/14). NGC ID# 24RR, PCGS# 6601

- 3922 1937-D MS66+ PCGS. CAC.** Whispers of gold color are more prevalent on the reverse of this high-end Premium Gem. The design elements are well-struck, including Liberty's branch hand. Both sides are nicely preserved. NGC ID# 24RS, PCGS# 6602

- 3923 1937-D MS66+ PCGS. CAC.** A well-struck example, with noticeable thumb separation and virtually complete gown stripes. Frosty luster shines through warm sun-gold toning on each side, with a few small aquamarine tinges observed along the obverse periphery. PCGS has certified only 50 numerically finer representatives (12/14). NGC ID# 24RS, PCGS# 6602

- 3924 1937-D MS66+ PCGS. CAC.** Swirling hues of lemon-gold, ice-blue, and silvery-lavender grace richly lustrous surfaces on each side of this high-end Premium Gem example. The strike is bold with substantial thumb separation, and the surfaces are free of any obvious abrasions. PCGS has certified only 50 numerically finer representatives (12/14). NGC ID# 24RS, PCGS# 6602

**3925 1938 MS66 PCGS.** The obverse of this impressive Premium Gem is richly patinated in shades of bluish-gray and sea-green, while the reverse remains essentially brilliant, with a few hints of champagne-gold toning. The design elements are well-detailed and the pleasing surfaces display no mentionable distractions. NGC ID# 24RU, PCGS# 6604

**3926 1938-D MS65 PCGS.** A pleasing Gem example of this semikey Denver issue. Both sides show satiny luster with wisps of light champagne toning, while the surfaces are free of major abrasions. Some typical softness is seen on Liberty's branch hand, though the remainder of the relief elements are well-defined. NGC ID# 24RV, PCGS# 6605

**3927 1938-D MS66 PCGS.** Champagne-gold centers are framed with wisps of cobalt-blue and purple at the margins. Intensely lustrous surfaces exhibit sharply struck devices and are impeccably preserved. NGC ID# 24RV, PCGS# 6605

**3928 1939 MS67+ PCGS. CAC.** The 1939 Walker is an available date overall, but rarely found finer than MS67. This Plus-designated piece displays full design definition and softly frosted mint luster beneath a thin blanket of warm golden toning. PCGS has certified only 24 numerically finer representatives (12/14). NGC ID# 24RW, PCGS# 6606

**3929 1940 MS67 PCGS. CAC.** Intense mint luster and bold design definition are the most eye-catching aspects of this remarkable Superb Gem example, although closer study appreciates the delicate toning, as well. The centers show warm champagne color, while the peripheries exhibit pastel rainbow hues. PCGS has certified only 24 numerically finer representatives (12/14). NGC ID# 24RZ, PCGS# 6609

**3930 1940-S MS66 PCGS. CAC.** Blazing, frosty mint luster is the hallmark of this Premium Gem 1940-S Walker, although closer examination also finds the clean surfaces appreciable. Liberty's branch hand and the eagle's right (facing) leg are weakly struck, but the overall definition is pleasing for the issue. PCGS has seen only 11 numerically finer representatives (12/14). NGC ID# 24S2, PCGS# 6610

**3931 1940-S MS66+ PCGS. CAC.** Brilliant, satiny luster exhibits only trivial interruptions as it illuminates both sides of this high-end Premium Gem Walker. The design elements show above-average definition, including partial thumb separation on Liberty's branch hand. PCGS has certified only 11 numerically finer representatives (12/14). NGC ID# 24S2, PCGS# 6610

**3932 1940-S MS66+ PCGS. CAC.** Just a smidgen away from Superb Gem quality, this Plus-designated MS66 example is free of significant abrasions and displays above-average design definition. Both sides are blanketed in delicate ice-blue and light golden hues, with the latter color more prominent on the reverse. PCGS has encapsulated 11 numerically finer representatives (12/14). NGC ID# 24S2, PCGS# 6610

**3933 1943 MS67+ PCGS. CAC.** The 1943 Walking Liberty half is available in MS67 and lower grades, but finer pieces are rare. This Plus-graded example is boldly struck and displays softly frosted, largely undisturbed mint luster. Tinges of amber-gold toning around the peripheries accent the brilliant centers. PCGS has certified only six numerically finer representatives (12/14). NGC ID# 24S9, PCGS# 6618

**3934 1944 MS67 PCGS.** A lack of noticeable surface flaws complements the rich, satiny luster of this Superb Gem type coin. Partial thumb separation is evident on Liberty's branch hand, and both sides exhibit warm golden toning overall with deeper forest-green and amber-gold tinges also observed around the extreme outer obverse periphery. PCGS has seen only a single numerically finer example (12/14). NGC ID# 24SC, PCGS# 6621

---

### 1944-S Half Dollar, Untoned MS66+ Excellent Eye Appeal

**3935 1944-S MS66+ PCGS. CAC.** Thick, frosty mint luster runs over each side of this well-preserved Premium Gem 1944-S half, an untoned example with excellent eye appeal. The lack of singular marks puts this piece in the top echelon for the grade, yet the strike through the central obverse shows only the rudiments of a split thumb. 54 in 66+, 8 finer (12/14). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**3936 1945 MS67 PCGS. CAC.** A pleasing Superb Gem representative, ideal for inclusion in a 1940 - 1947 short set. The reverse shows blended honey and mint-gold toning, while the obverse exhibits lighter shades of the same along with some forest-green and cherry-red color along the periphery. Satiny and well-preserved, with sharp definition on Liberty's head and branch hand. None have been certified numerically finer (12/14). NGC ID# 24SF, PCGS# 6624 Base PCGS# 6624

---

### PROOF WALKING LIBERTY HALF DOLLARS

**3937 1936 PR64 PCGS.** A fully struck, Choice first-year proof example, with satiny devices set against glassy reflectivity in the fields. Light golden toning encompasses each side, with a few tinges of deeper honey-gold color also seen along the extreme outer peripheries. NGC ID# 27V4, PCGS# 6636

**3938 1937 PR67 PCGS Secure.** A well struck Superb Gem with noticeable frost on the motifs, although the coin is undesignated as Cameo. Brilliant except for a few tiny gray freckles on the upper reverse. The glassy fields are undisturbed. The AW monogram is faint but intact. NGC ID# 27V5, PCGS# 6637

**3939 1937 PR67 PCGS. CAC.** This magnificent Superb Gem exhibits the all-brilliant finish used on proof coins during this era, so the fully detailed design elements show little contrast with the deeply mirrored, and impeccably preserved, fields. PCGS has graded 10 numerically finer examples (12/14). NGC ID# 27V5, PCGS# 6637

---

### 1942 Walker, Brilliant PR68 Seemingly Unrivalled Eye Appeal

**3940 1942 PR68 PCGS.** As the final proof issue in the Walking Liberty half series, the 1942 is in high demand in the better grades of preservation. This remarkable piece is seemingly pristine, with full design definition and blazing, brilliant surfaces. The deeply mirrored fields deliver subtle contrast with much of the relief elements, although not to an extent worthy of a Cameo designation. Population: 48 in 68 (1 in 68+), 1 finer (12/14). NGC ID# 27V9, PCGS# 6642

## FRANKLIN HALF DOLLARS

- 3941 1949-S MS67 PCGS. CAC.** The 1949-S Franklin half dollar is a major condition rarity at the Superb Gem grade level, with or without Full Bell Lines definition. This piece is well-struck, but falls just shy of deserving a Full Bell Lines designation. The obverse is deeply toned in shades of violet-red, amber, and sun-gold, while the reverse displays the same over the left-hand margins and lighter champagne hues over the right-hand areas. Population: 6 in 67, 0 finer (12/14). NGC ID# 24SV, PCGS# 6655
- 3942 1953 MS66 Full Bell Lines PCGS.** The issue is known for its problematic strike, and this Full Bell Lines, Registry-quality example is about as sharp as one may hope to find. Dusky violet-gray patination with pastel accents covers the obverse, while the reverse displays whispers of soft violet and champagne. Strong luster shines throughout. Population: 45 in 66 (3 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24T6, PCGS# 86664 Base PCGS# 86664
- 3943 1953 MS66 Full Bell Lines PCGS. CAC.** This Premium Gem 1953 Franklin half is a high-ranking Registry Set candidate, as none have been certified numerically finer at PCGS. The obverse is thickly dappled in olive, lavender, and amber-gold colors, while the brilliant reverse displays sharp Full Bell Lines definition. Population: 45 in 66 (3 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24T6, PCGS# 86664 Base PCGS# 86664
- 3944 1959 MS66 Full Bell Lines PCGS. CAC.** Type One Reverse. According to Rick Tomaska (2011): "The 1959-P is especially elusive in MS66 FBL, and ranks among the rarest Franklin dates in this high grade from the 1948-1959 era, surpassed in rarity only by the 1949-D and 1953-S." This beautiful and sharply struck representative displays rich sea-green, fire-red, and steel-gray toning on the obverse margin. The portrait and reverse are close to brilliant. Population: 45 in 66 (3 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24TJ, PCGS# 86676

## PROOF FRANKLIN HALF DOLLAR

- 3945 1951 PR67 PCGS. CAC.** This is a brilliant, reflective proof, although the fields lack the deep mirroring necessary for the Cameo designation from PCGS. The strike is sharp throughout, and the surfaces are seemingly devoid of imperfections. PCGS has certified only one numerically finer representative (12/14). NGC ID# 27VB, PCGS# 6692

*End of Session Two*

# SESSION THREE

## EARLY DOLLARS

- 3946** 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3 — **Graffiti** — **PCGS Genuine Secure**. In our opinion, this example has details of a Very Good example with graffiti in the obverse fields. The central devices are light silver, with pewter-gray and blue-steel toning in the fields. PCGS# 39985 Base PCGS# 6853
- 3947** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — **Graffiti** — **PCGS Genuine**. VF Details. The initials DB are pinscratched on the right obverse field near the profile. The obverse field also has a few light or faded pinscratches. Otherwise, an attractive cream-gray two-year type coin with glimpses of deeper golden-brown near the rims. PCGS# 39986 Base PCGS# 6853
- 3948** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF20 PCGS. Bowers Die State I (obverse) and III (reverse). The obverse die is not lapped, the first such example of BB-112 that we have encountered. All prior examples seen have a weak obverse star 13 and an open shoulder curl due to lapping. The reverse shows the “crack” (more likely a die line) between the left shield point and the banner that is always present on BB-112. A problem-free stone-gray example with glimpses of tan and ice-blue toning. The strike is good aside from softness near the eagle’s head. PCGS# 40029 Base PCGS# 6877

**1798 Draped Bust Dollar, VF30  
Heraldic Eagle, B-8, BB-125**

- 3949** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF30 PCGS. Bowers Die State IV. Powder-blue, sea-green, and steel-gray toning enriches this minimally marked midgrade early dollar. E PLURIBUS UNUM is fully readable. B-8 is the only 1798 variety with four berries on the branch, and thus receives its own *Guide Book* listing. Buckling of the reverse die causes weakness of impression on UNITED and obverse stars 5 through 7. Population: 2 in 30, 9 finer (12/14). PCGS# 40042 Base PCGS# 6873
- 3950** 1799 7x6 Stars, B-16, BB-158, R.2, VG10 PCGS. Several obverse clash marks appear on this intermediate die state example, located above the date and in the right and left fields. The ivory surfaces have peripheral splashes of steel toning. An entry-level example for a date or type collector. PCGS# 40050 Base PCGS# 6878
- 3951** 1799 7x6 Stars, B-9, BB-166, R.1, VF30 PCGS. Bowers Die State II, the vertical die crack below the 1 in the date does not touch it. The “Apostrophe” variety with an appropriately located die break following the second S in STATES. Light silver-gray patina covers both sides of this appropriately defined VF30. PCGS# 40057 Base PCGS# 6878
- 3952** 1800 B-16, BB-187, R.2, Fine 15 PCGS. There is no evidence of the usual obverse die crack on this early die state dollar, although that observation may be due in part to moderate wear. Both sides have pleasing light surfaces with trivial, grade-consistent marks. An excellent example for a date or type collection. PCGS# 40073 Base PCGS# 6887

- 3953** 1802/1 Wide Date, B-9, BB-235, R.5 — **Improperly Cleaned** — **NGC Details**. VF. Bowers Die State I. A very scarce Bolender variety. The pearl-gray surfaces display parallel hairlines but no other abrasions are consequential. Scattered small gray spots are noted on the obverse periphery and the reverse. PCGS# 40095 Base PCGS# 6899

**1802 Bust Dollar, VF25  
B-6, BB-241, Narrow Date**

- 3954** 1802 Narrow Date, B-6, BB-241, R.1, VF25 PCGS. Die State III, as usual. Both sides take on a medallion, glossy appearance beneath a thorough coating of rich olive-gold and lilac-gray toning which deepens considerably toward the borders. The strike is well-centered and sharp, and the devices retain strong detail for the grade. A small rim bump near stars 5 and 6 is the only distinguishable flaw. Ex: Long Beach Signature (Heritage, 6/2006), lot 996. PCGS# 40088 Base PCGS# 6895

- 3955** 1803 Small 3, B-5, BB-252, R.3 — **Cleaning** — **PCGS Genuine**. XF Details. The pearl-white obverse center gradually cedes to a charcoal-gray periphery. The reverse is dusky mahogany-brown. A well defined early dollar without any obvious hairlines. Marks are trivial aside from a couple of hair-thin lines on the portrait. PCGS# 40097 Base PCGS# 6900

**1803 Draped Bust Dollar, VF25  
B-6, BB-255, Large 3**

- 3956** 1803 Large 3, B-6, BB-255, R.2, VF25 PCGS. Die State II. An available Large 3 variety. This piece is in an intermediate die state, with a single crack connecting stars 10 and 11. The surfaces exhibit pale pewter-gray patina, with hints of light gold and lilac also detected when tilted beneath a light. Much detail remains on the central devices, despite light circulation. Struck from mildly rotated dies. PCGS# 40101 Base PCGS# 6901

## SEATED DOLLARS

- 3957 1840 XF45 PCGS.** Only light wear shows on the design elements of this attractive Choice XF specimen, and the lightly abraded surfaces are blanketed in delicate shades of lavender and greenish-gold toning. NGC ID# 24YA, PCGS# 6926
- 3958 1842 AU55 PCGS.** The bright silvery surfaces of this Choice AU dollar display generous luster and bold design elements. A couple of thin pinscratches are visible in the upper-left reverse border. NGC ID# 24YC, PCGS# 6928
- 3959 1842 AU58+ PCGS. CAC.** Dusky gray patination is imbued with traces of electric-blue and lavender. The design elements are bold and remarkably clean surfaces reveal just a few trivial marks in the left reverse field. Well-deserving of the CAC endorsement. NGC ID# 24YC, PCGS# 6928
- 3960 1846 AU55 PCGS.** Traces of luster remain in the recessed areas of this champagne-gray Choice AU dollar. Well-struck design elements and minimally marked surfaces contribute to the coin's pleasing eye appeal. NGC ID# 24YG, PCGS# 6932
- 3961 1846-O XF40 PCGS.** The 1846-O was the first silver dollar produced in New Orleans. The light gray surfaces of this XF coin display hints of gold, and strong detail is apparent on the devices. A few minute marks are much less than what might be expected for a large silver dollar that has seen some circulation. NGC ID# 24YH, PCGS# 6933
- 3962 1846-O — Improperly Cleaned — NGC Details. Unc.** Well-struck, frosty motifs display mild contrast with the fields of this O-mint specimen. Faint hairlines in the fields are visible under magnification. Nevertheless, a nice looking piece as the cleaning is not all that bad. This low-mintage issue (59,000 pieces) is difficult to locate in Uncirculated condition.
- 3963 1850-O — Cleaning — PCGS Genuine. AU Details.** The 1850-O is the rarest New Orleans issue and has a mintage of just 40,000 pieces. The present well defined example has rich apricot and stone-gray toning. The obverse field is hairlined but no marks merit singular mention. NGC ID# 24YN, PCGS# 6938
- 3964 1853 AU55 PCGS.** Both obverse and reverse of this attractive Choice AU specimen show some interesting clash marks and strike-throughs. The pinkish-gray surfaces lightly abraded and just a touch of wear shows on the well-detailed design elements. Population: 31 in 55, 92 finer (12/14). NGC ID# 24YS, PCGS# 6941
- 3965 1859-O MS62 NGC.** Among No Motto issues, the 1859-O is one of the most available in Mint State, ideal for type representation. This piece displays frosty mint luster with traces of light golden color overall. An old pinscratch hidden within Liberty's lower gown folds is the only mentionable abrasion. NGC ID# 24YY, PCGS# 6947
- 3966 1860-O MS61 PCGS. CAC.** This attractive Mint State example is sharply detailed in most areas, but the stars on the right are a little flat. The lustrous surfaces show a few hints of pale gold toning and a scattering of minor contact marks that explain the grade. NGC ID# 24Z3, PCGS# 6950
- 3967 1860-O MS62 ANACS.** Along with the 1859-O, the 1860-O Seated dollar is the most readily available No Motto issue in Mint State grades, widely popular for type. This piece is unusually well-struck on the stars and the upper edge of the eagle's left (facing) wing, with noticeable semiprooflike mirroring in the fields and evenly mottled lavender-gold toning over each side. Light, scattered ticks account for the grade. NGC ID# 24Z3, PCGS# 6950
- 3968 1870-CC Fine 12 NGC.** The design elements of this low-mintage key retain much of their interior design detail, but only three letters in LIBERTY are really legible. The lightly abraded lavender-gray surfaces show traces of original mint luster. NGC ID# 24ZE, PCGS# 6964

### 1872-CC Seated Dollar, VF Details Deeply Patinated

- 3969 1872-CC — Corroded, Cleaned — ANACS. VF Details, Net Fine 15.** The corrosion addressed by ANACS is restricted to a thin "strip" of granularity that runs from the R in AMERICA, through the eagle toward the N in UNITED, and is hardly noticeable without magnification. The surfaces show evidence of old cleaning, but have long since acquired deep gunmetal-gray toning in the recesses and lighter golden-gray hues over the relief elements. At arms length, the coin is rather pleasing and well-detailed. A collectible example of this scarce Carson City issue. NGC ID# 24ZK, PCGS# 6969

### 1872-CC Seated Dollar, XF40 Lightly Toned and Problem-Free

- 3970 1872-CC XF40 PCGS.** Pale battleship-gray surfaces yield just a touch of light golden color on each side of this well-detailed 1872-CC representative. No major abrasions are present and the coin is quite appealing for the grade. This issue owes its scarcity partly to a low mintage of only 3,150 pieces, but also to a high attrition rate, as the date becomes increasingly difficult to locate the higher one searches up the grade scale. NGC ID# 24ZK, PCGS# 6969

## PROOF SEATED DOLLARS

### 1861 Seated Dollar, Toned PR63

- 3971 1861 PR63 PCGS.** The 1861 proof Seated dollar is not as available as its 1,000-coin mintage would suggest, but it is plentiful enough in lower grades to be a suitable choice for a proof type set acquisition. This piece is sharply struck on both sides, with deeply mirrored fields and modest cameo contrast. Deep golden-gray, lavender, and aquamarine toning blends over both sides, masking any grade-limiting hairlines in the fields. Census: 22 in 63 (1 in 63 ★), 40 finer (12/14). NGC ID# 252F, PCGS# 7004

**1869 Seated Dollar, PR61**  
**Remarkably Appealing for the Grade**

**3972 1869 PR61 PCGS.** From a tiny proof mintage of 600 pieces, this attractive PR61 specimen is sharply detailed throughout, with bold definition on Liberty's hair and the eagle's feathers. The reflective surfaces are enhanced by wisps of gold and lavender toning. A scattering of minor contact marks is consistent with the grade.  
*Ex: New York Signature (Heritage, 12/2011), lot 3739. NGC ID# 252R, PCGS# 7017*

**3973 1872 PR60 ANACS.** A pleasing lower-grade example of this proof Seated Liberty dollar. Mottled golden-gray toning blankets both sides, slightly diminishing the mirroring in the fields, but masking most of the minor surface marks that define the grade. The strike is bold, with notable definition on Liberty's head and the surrounding stars. NGC ID# 252U, PCGS# 7020

**3974 1873 — Cleaning — PCGS Genuine. Proof, Unc. Details.** Well struck with exemplary cameo contrast. Brilliant except for golden-brown toning on the reverse margin. The obverse is thickly hairlined. IN GOD WE is strongly die doubled, as usual for the proof issue of just 600 pieces. NGC ID# 252V, PCGS# 7021

### TRADE DOLLARS

**3975 1875-S Type One Reverse MS64 PCGS.** Large S. The obverse of this popular type coin is sharply detailed, but the reverse shows some of the usual softness on the eagle's wing and leg. The well-preserved surfaces radiate vibrant mint luster and show a few subtle hints of pale gold toning. PCGS# 510101 Base PCGS# 7039

**1875-S/CC Trade Dollar, MS61**  
**Popular Guide Book Variety**

**3976 1875-S/CC FS-501 MS61 PCGS.** Type One Reverse, Large S. The underlying CC is evident plainly to the right of the primary S and faintly to the left of the same. This piece is from an early die state, before the crack develops through AMERICA. Radiant luster resides beneath a glaze of light golden toning, and the well-defined design elements offer pleasing visual appeal. Light, scattered abrasions contribute to the grade, but none are individually bothersome. PCGS# 145813 Base PCGS# 7040

**3977 1876-S Type One Obverse, Type One Reverse, MS63 NGC.** The ribbon ends on the obverse point left and the reverse exhibits a berry under the eagle's talons. This example is toned in shades of golden-gray and amber-brown, with satiny original luster shining through. The strike is sharp and the surfaces exhibit only a few minor, scattered abrasions. PCGS# 40114 Base PCGS# 7043

**3978 1876-S Type Two Obverse, Type Two Reverse, MS62 NGC.** Minute S. A scarcer subtype combination. A brilliant, lustrous, and well struck silver type coin with pleasing surfaces for the designated grade. Minutely granular near TRADE and the UN in UNITED. PCGS# 40116 Base PCGS# 7043

**3979 1876-S Type Two Obverse, Type Two Reverse, MS62 PCGS.** Minute S. Most 1876-S Trade dollars have a Type One obverse with the scroll ends pointing left. But the present example shows the scroll ends pointing down, characteristic of the scarce Type Two obverse. Well struck and satiny with rich walnut-brown, olive-green, and slate toning. A thin mark is noted near star 3. UNITED exhibits minute die doubling. PCGS# 40116 Base PCGS# 7043

**3980 1877 MS63 PCGS.** Occasional wisps of cobalt-blue and maroon cling to the margins of this Select Trade dollar. The design elements are sharply struck except for the usually seen weakness in Liberty's hair and the adjacent stars. Lustrous surfaces display just a handful of minute marks. NGC ID# 253C, PCGS# 7044

### PROOF TRADE DOLLARS

**3981 1874 PR60 PCGS.** This lower-grade proof is deeply mirrored in the fields, with grade-consistent marks on each side. Liberty's head and the surrounding stars are sharply struck. Largely devoid of color. NGC ID# 27YK, PCGS# 7054

**1876 Trade Dollar, PR63**  
**Popular For Type Purposes**

**3982 1876 PR63 PCGS. CAC.** Type One Obverse, Type Two Reverse. This is a well-struck and deeply mirrored Select proof Trade dollar, with satiny devices that display faint field-motif contrast and just a touch of light golden toning over each side. No obtrusive abrasions are present, though we note some faint hairlines in the fields that limit the grade. NGC ID# 27YM, PCGS# 7056

**3983 1877 PR60 PCGS.** From a meager proof mintage of just 510 pieces, this impressive Trade dollar displays well-detailed design elements and hazy reflective fields, under attractive shades of greenish-gold and lavender-gray toning. NGC ID# 27YN, PCGS# 7057

**3984 1878 PR61 PCGS.** The design elements of this attractive Trade dollar are sharply detailed throughout and the deeply reflective fields show a few minor contact marks and hairlines, under delicate shades of pale gold toning. NGC ID# 27YP, PCGS# 7058

**3985 1879 PR62 PCGS.** A veil of gunmetal-gray toning reveals underlying multicolor hues when tilted beneath a light. The strike is sharp, particularly on Liberty's head and the surrounding stars, and the fields exhibit a high degree of reflectivity. NGC ID# 27YR, PCGS# 7059

### 1880 Trade Dollar, Toned PR63

- 3986 1880 PR63 PCGS.** This eye-appealing Select proof Trade dollar exhibits a bold strike and deep mirroring in the fields, but lacks slightly in regards to cameo contrast. A blend of lavender-gray and golden toning blankets each side, appearing most vividly when tilted beneath a light. Close examination reveals some grade-consistent hairlines in the fields, but these are well-hidden by the rich patina. NGC ID# 27YS, PCGS# 7060

- 3987 1881 PR62 PCGS.** Both sides of this lower-grade proof exhibit deeply mirrored fields and a modest cameo appearance, although the contrast is not quite bold enough to warrant a Cameo designation from PCGS. A moderate number of hairlines in the fields defines the grade. NGC ID# 27YT, PCGS# 7061

### 1882 Trade Dollar, PR63 Starkly Contrasted Cameo

- 3988 1882 PR63 Cameo PCGS.** Lovely white-on-black contrast draws the viewers eye on this deeply mirrored Select proof Cameo. Traces of light golden toning grace the peripheries, but leave the central regions brilliant. The top of Liberty's head and several adjacent stars are softly struck, but the definition is otherwise pleasing and the recesses yield only grade-consistent hairlines when viewed with a loupe. PCGS# 87062

## MORGAN DOLLARS

- 3989 1878 8TF First Die Pair, VAM-9, AU53 NGC.** A Top 100 Variety. Per VAMworld.com, the first Morgan dollars struck were coined on March 11, 1878, at 3:17 P.M. They were presentation pieces, including one destined for President Hayes. His coin survives, confirmed as VAM-9. This lightly circulated and moderately abraded example is untoned aside from a small obverse spot at 11 o'clock. PCGS# 133792 Base PCGS# 7072

- 3990 1878 8TF Open Nostril, Spiked "A", VAM-14.5, AU55 NGC.** A Hot 50 Variety. A rare eight tailfeather variety usually encountered in XF. The present lightly toned first year dollar has only minor wear and no distracting abrasions. A die line through the A in STATES, combined with lapping on the base of the nose, confirms the VAM. Census: 2 in 55, 4 finer (12/14). PCGS# 133800 Base PCGS# 7072

- 3991 1878 8TF Lines in Hair, VAM-14.15, AU50 NGC.** Unknown in Mint State, VAM-14.15 ranks among the rarest 8TF varieties. The present pearl-gray example shows light high point wear but retains noticeable luster across the borders and motifs. Marks are generally minor, though we note a thin obverse line in front of the nose. PCGS# 133810 Base PCGS# 7072

- 3992 1878 Reverse of 1878, Tripled Eye, VAM-166, AU50 PCGS.** A Hit List 40 Variety. Specific die doubling on the PLUR in PLURIBUS is the pick-up point for this rare first-year VAM. Designated as the Tripled Eye variety by PCGS for no obvious reason. A well struck dollar draped in rich golden-brown and dove-gray toning. Population: 4 in 50, 2 finer (12/14). PCGS# 134045 Base PCGS# 7074

- 3993 1878-CC MS65 NGC. VAM-20.** This VAM variety is notable for a heavy die line that appears as pointed die chips in Liberty's nostril and eye, and then as a line in the hair above the eye. This Gem example is sharply struck, with frosty luster that displays just a tinge of light golden toning. NGC ID# 253M, PCGS# 7080

- 3994 1878-CC MS65 PCGS. CAC.** Vivid shades of greenish-gold and violet toning blanket the well-preserved surfaces of this delightful Gem, with razor-sharp definition on all design elements and vibrant mint luster, under the patina. NGC ID# 253M, PCGS# 7080

- 3995 1878-CC Lines in Wing, VAM-11, MS64 Deep Mirror Prooflike ANACS.** A Top 100 Variety. Myriad die lines are embedded in the eagle's wings. A well struck and prominently mirrored Carson City dollar with rose-red, orange-gold, and blue-green peripheral patina. PCGS# 40438 Base PCGS# 97081

- 3996 1878-S MS66+ PCGS. CAC.** A sensational Premium Gem, this Plus-designated Morgan dollar has brilliant silver surfaces with soft, frosty luster. The details are bold and the eye appeal is exceptional. PCGS has only certified 29 finer examples (12/14). NGC ID# 253R, PCGS# 7082

- 3997 1879-CC Capped Die, VAM-3A, AU50 ANACS.** A Top 100 Variety. The very scarce late die state with a die gouge through the base of the first A in AMERICA. Also, the date is repunched, and the mintmark displays myriad die chips, but any AU 1879-CC dollar is desirable. Lightly marked and mildly subdued with a peripheral blush of lemon toning. Housed in a small-sized ANACS holder. PCGS# 133869 Base PCGS# 7088

### 1879-CC Morgan Dollar, MS60 Capped Die, VAM-3

- 3998 1879-CC Capped Die, VAM-3, MS60 NGC.** A Top 100 Variety. This enigmatic repunched mintmark variety induced collector distaste in earlier years of collecting, though modern enthusiasts appreciate its unique qualities. Though the present MS60 example shows numerous moderate to heavy abrasions, its peach-laced silver-gray surfaces exhibit no trace of wear. PCGS# 133869 Base PCGS# 7088

- 3999 1879-S Reverse of 1878 MS64 PCGS.** A Top 100 Variety. The 1879-S Morgan is a common date in the absolute sense, but pieces struck with the 1878 reverse hub type form only a tiny percentage of the surviving Mint State population. This Choice example is actually upper-end for the variety, with a sharp strike and frosty, brilliant luster. Only a few faint surface grazes on Liberty's cheek limit the grade. PCGS has encapsulated only 53 numerically finer representatives (12/14). NGC ID# 253W, PCGS# 7094

**4000 1879-S Reverse of 1878 MS64+ PCGS. CAC. VAM-39.** A Top 100 Variety. A diagonal die line through the base of the Y in LIBERTY identifies the VAM. Only a small portion of 1879-S dollars have a First Reverse with a parallel upper fletching feather. A brilliant and well struck near-Gem with exemplary luster. NGC ID# 253W, PCGS# 7094

**4001 1879-S MS67 PCGS. CAC.** An amazing Superb Gem with a highly lustrous and fully brilliant obverse. Turn the coin over and be greeted by a rainbow of beautiful toning over satiny underlying luster. NGC ID# 253X, PCGS# 7092

**4002 1879-S MS67+ PCGS. CAC.** Semiprooflike fields and brilliant, dazzling luster combine with the beautifully preserved surfaces to deliver the eye appeal and sheer technical quality that rank this 1879-S Morgan at the uppermost end of the MS67 grade. The strike is sharp and few pieces are certified numerically finer at PCGS. NGC ID# 253X, PCGS# 7092

**4003 1879-S MS67 ★ NGC. CAC.** A swath of ocean-blue, violet, and amber-orange toning across the upper-left portion of the obverse has earned this Superb Gem 1879-S Morgan the coveted Star designation from NGC. The strike is sharp and the untuned regions display vibrant, frosty luster. NGC ID# 253X, PCGS# 7092

**4004 1880-O MS64 PCGS.** Tinges of cherry-red and aquamarine accent glowing golden-gray toning on each side of this frosty 1880-O Morgan. The strike is unusually sharp for a New Orleans issue, and the surfaces exhibit fewer abrasions than are expected for the Choice grade level. Only 35 coins are certified numerically finer at PCGS (12/14). NGC ID# 2543, PCGS# 7114

**4005 1880-O MS64+ PCGS.** Small or Micro O. A crisply struck, lustrous, and nearly brilliant New Orleans dollar. The reverse is well preserved, and the obverse is free from noticeable marks. The 1880-O is surprisingly rare as a full Gem, and MS64+ examples are also desirable. NGC ID# 2543, PCGS# 7114

**4006 1880-O MS64 PCGS. CAC.** The design elements of this attractive Choice example are sharply detailed for a New Orleans Mint issue, and the lustrous surfaces are free of mentionable distractions. PCGS has graded 35 numerically finer examples (12/14). NGC ID# 2543, PCGS# 7114

#### 1880-O Morgan, Conditionally Rare MS64+

**4007 1880-O MS64+ NGC. CAC.** A true conditional rarity at the Gem level but quite common in lower Mint State grades, the 1880-O is popular and yet a conundrum for many collectors: Buy an inexpensive coin and always regret not purchasing a nicer piece, or buy a high-grade example and pay the price? This piece is quite close to the Gem level in luster and preservation, with a largely untuned reverse and colorful blue, amber, and orange patina on the obverse. The eye appeal and paucity of mentionable contact, however, are consistent throughout. Census: 28 in 64+, 2 in 64 ★, 27 finer (12/14). NGC ID# 2543, PCGS# 7114

#### 1880/79-O Morgan Dollar, MS64+ Popular VAM-4 Overdate

**4008 1880/79-O Crossbar, VAM-4, MS64+ PCGS. CAC.** A Top 100 Variety. The remnants of an undertype 79 are visible below the last two primary digits in the date and the mintmark is small, identifying the popular VAM-4 variety. This high-end Choice example is sharply detailed, with well-preserved lustrous surfaces under shades of champagne-gold and lavender toning. Population: 30 in 64 (2 in 64+), 2 finer (12/14). PCGS# 133880 Base PCGS# 7116

**4009 1880-S MS67 Prooflike PCGS. CAC.** Medium S. Plum-red, peach-gold, and forest-green toning embraces the borders of this well struck and flashy Superb Gem. Pristine aside from minor contact on the lips and the field near the chin. NGC ID# 2544, PCGS# 7119

**4010 1880-S MS67 Prooflike PCGS. CAC.** The deeply mirrored fields offset the frosty devices of this S-mint superb Gem yielding pleasing contrast. Sharply struck design elements and impeccably preserved surfaces enhance the coin's eye appeal, aptly recognized by CAC. NGC ID# 2544, PCGS# 7119

**4011 1880-S MS66 Deep Mirror Prooflike PCGS.** Medium S. Light wheat-gold patina clings to the margins of this highly lustrous and precisely struck silver dollar. Essentially pristine save for a solitary minor graze at the center of the cheek. Certified in a first generation holder. NGC ID# 2544, PCGS# 97119

**4012 1881-CC MS66 NGC.** Deep reddish-gold, olive, greenish-yellow, sky-blue, crimson, and ocean-green obverse toning cedes to essentially a color-free reverse. Sharply struck design elements include the hair over Liberty's ear and the eagle's breast feathers. A few minute marks are concealed within the toning on Liberty's cheek. NGC ID# 2547, PCGS# 7126

**4013 1881-CC MS66 PCGS. VAM-2.** The left margins exhibit orange-red, plum-mauve, and ocean-blue toning. This low mintage but high grade Carson City dollar has a bold strike and smooth fields. The cheek displays minor grazes. NGC ID# 2547, PCGS# 7126

**4014 1881-CC MS66+ PCGS.** This low-mintage high-end Premium Gem representative displays silver-white surfaces that exude radiant luster. Sharply struck design elements include strong detail in the hair over Liberty's ear and on the eagle's breast feathers. A few minor grazes are within the confines of the grade designation. NGC ID# 2547, PCGS# 7126

**4015 1881-CC MS66 PCGS. CAC.** Bright luster emanates from the silver-white surfaces of this Premium Gem CC-mint representative. The design elements are sharply struck and a few minor obverse grazes are insignificant. NGC ID# 2547, PCGS# 7126

**4016 1881-CC MS66 PCGS. CAC.** The untuned surfaces of this Premium Gem yield fabulous luster and well-struck design elements, including the hair over Liberty's ear and the eagle's breast feathers. A few minor grazes do not detract. NGC ID# 2547, PCGS# 7126

**4017 1881-S MS67 PCGS. CAC.** Silver-white surfaces display strong luster and sharply struck design elements. A remarkably well-preserved example. Housed in a first generation holder. NGC ID# 2549, PCGS# 7130

- 4018 1882-S MS67+ PCGS.** This magnificent high-end Superb Gem exhibits razor-sharp definition on all design elements and impeccably preserved brilliant surfaces with vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 254F, PCGS# 7140
- 4019 1882-S MS67+ PCGS. CAC.** The 1882-S Morgan is a favorite date for type purposes, as high-grade examples frequently come well-struck and with dazzling luster. This Plus-designated Superb Gem is no exception in that regard, showcasing radiant mint bloom and semiprooflike fields. Peripheral lavender-gold and pale aquamarine hues accent the delicately preserved mint frost, while the design elements exhibit a pleasing degree of sharpness on the high points. PCGS has certified only 48 numerically finer examples (12/14). NGC ID# 254F, PCGS# 7140
- 4020 1883 MS67 PCGS.** Close examination is needed to detect any surface disruptions on this remarkably well-preserved Superb Gem 1883 Morgan. Thickly frosted mint luster is devoid of toning and delivers pronounced visual appeal. The only complaint is a trifle of striking softness on the extreme centers, as usual. PCGS has seen only three numerically finer submissions (12/14). NGC ID# 254G, PCGS# 7142
- 4021 1883 Sextupled Stars, VAM-10, MS63 PCGS.** A Top 100 Variety. A lustrous and brilliant representative of this popular VAM. The right-side obverse stars are multiply die doubled. Scattered obverse grazes determine the grade. PCGS# 133896 Base PCGS# 7142
- 4022 1883-CC MS66+ PCGS. CAC.** The untuned surfaces of this high-end Premium Gem display ebullient luster and sharply struck design features. Vertical, as-made roller marks are visible on Liberty's cheek. NGC ID# 254H, PCGS# 7144
- 4023 1883-CC MS65 Deep Mirror Prooflike PCGS. VAM-8A.** The 18 is repunched. The N in IN is clashed near Liberty's neck. A snow-white and blatantly mirrored Gem with a crisp strike and exceptionally mark-free surfaces. Scattered tiny field strike-throughs are as coined. NGC ID# 254H, PCGS# 97145
- 4024 1883-S MS62 PCGS. CAC.** A slightly better San Francisco issue in Mint State. This example is radiantly lustrous, with brilliant surfaces and well-struck motifs. Scattered abrasions define the grade. NGC ID# 254K, PCGS# 7148

#### 1883-S Silver Dollar, Attractive MS63+

- 4025 1883-S MS63+ NGC.** The 1883-S Morgan dollar issue is the higher Mint State grades is close to the top of many a collector's want list. Generous luster sweeps each side of this attractive piece, largely untuned but with a trace of pinkish patina on each side. A few reeding marks on Liberty account for the grade, along with a few larger marks on the eagle's left (facing) wing and breast. An attractive coin despite the abrasions. NGC ID# 254K, PCGS# 7148
- 4026 1884 MS66+ PCGS. CAC.** Spectacular shades of golden-brown and violet toning blanket the well-preserved surfaces of this high-end Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster shines through the patina. NGC ID# 254L, PCGS# 7150

- 4027 1884-O MS65 PCGS. CAC. VAM-4.** Dramatic fire-red, orange, and jade-green encompass the obverse. The reverse is brilliant except for lemon toning near the lower rim. The 18 is nicely repunched and the portrait displays myriad tiny die lumps. NGC ID# 254N, PCGS# 7154
- 4028 1884-S AU58 PCGS.** Because of the scarcity of Mint State examples, the 1884-S Morgan is widely sought in the upper AU grades. This AU58 coin displays considerable luster and well-struck devices, and is minimally abraded. NGC ID# 254P, PCGS# 7156
- 4029 1884-S AU58 PCGS.** This piece must have just missed a Mint State grade, as both sides are brilliant and well-struck, with only the faintest trace of friction over the high points of the devices. Semiprooflike mirroring in the fields contributes to the eye appeal. NGC ID# 254P, PCGS# 7156
- 4030 1884-S AU58 PCGS.** Substantial luster remains on this nearly Uncirculated 1884-S Morgan, with sharply struck devices and just a trace of friction on the hair above Liberty's ear. Lightly toned golden on each side. NGC ID# 254P, PCGS# 7156
- 4031 1885 MS67 PCGS.** The obverse of this Superb Gem displays vivid toning, while the reverse is almost entirely silver-white. The obverse toning includes teal, copper, gold, and yellow colors. The strike is sharp, even at the extreme centers. Scattered marks are present, including a few above Liberty's eye. Only two examples have achieved higher numeric grades from PCGS (12/14). NGC ID# 254R, PCGS# 7158

#### 1885 Morgan Dollar, MS66 Deep Mirror Prooflike One Numerically Finer at PCGS

- 4032 1885 MS66 Deep Mirror Prooflike PCGS.** The 1885 Morgan dollar claims a huge mintage of 17.8 million pieces, making the issue reasonably available in high grade, and a popular choice with type collectors. This remarkable Premium Gem exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. No mentionable distractions are evident and eye appeal is terrific. Population: 80 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (12/14). NGC ID# 254R, PCGS# 97159
- 4033 1885-CC MS66 PCGS.** This is a well-struck and equally well-preserved example of this popular Carson City issue. Warm golden toning accents each side, yielding to deeper orange-gold, violet, and ocean-blue hues around the peripheries. Only 67 coins are numerically finer at PCGS (12/14). NGC ID# 254S, PCGS# 7160
- 4034 1885-CC MS64 Deep Mirror Prooflike PCGS.** The fields are flashy and moderately reflective on this minimally toned piece. The frost over the well-struck but modestly marked devices is what seals this coin's Deep Mirror Prooflike status. Strong overall eye appeal. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 4597. NGC ID# 254S, PCGS# 97161

**1886 Morgan Dollar, MS67  
Very Rare in Finer Grades**

**4035 1886 MS67 PCGS. CAC.** A melange of low-intensity yellow-gold, lavender, cobalt-blue, and orange toning covers the obverse, leaving the reverse color free. Radiantly lustrous, nicely preserved surfaces with sharply struck design elements enhance the coin's pleasing eye appeal. PCGS has graded only six numerically finer examples (12/14). NGC ID# 254V, PCGS# 7166

**4036 1886-O MS62 NGC.** The lustrous silver-white surfaces of this O-mint example exhibit sharply struck design elements, including the hair above Liberty's ear and the feathers on the eagle's breast. Some moderate marks limit the grade, the most noticeable occurring on the eagle's breast and above its head. NGC ID# 254W, PCGS# 7168

**4037 1886-O MS62 PCGS.** Bright luster issues from the silver-white surfaces of this O-mint Morgan. Sharply struck design elements show detail in the hair above Liberty's ear and on the eagle's breast. A few light grazes on the obverse show up under magnification. Really a nice coin for an MS62. NGC ID# 254W, PCGS# 7168

**4038 1886-O MS62 PCGS.** Bright silvery surfaces display well-struck design elements. The luster flow is nearly complete except where interrupted by occasional marks or grazes. Nevertheless, a nice looking piece for the grade designation. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63  
Brilliant, Unusually Vibrant Mint Luster**

**4039 1886-O MS63 PCGS.** The 1886-O Morgan dollar is a scarce issue in Mint State grades in comparison to the demand for it, and finding such an example with sharp detail and pleasing luster is especially difficult. This representative is remarkably appealing for a New Orleans issue, showcasing not only sharp definition on the eagle's talons and the hair above Liberty's ear, but also exhibiting thickly frosted mint luster that is more reminiscent of a Carson City issue. A few minor grazes on the cheek limit the grade, but none are individually obtrusive and the quality for the grade is exceptional. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63  
Radiant Mint Luster**

**4040 1886-O MS63 PCGS.** The 1886-O Morgan dollar is a slightly better date in Mint State, and is particularly challenging in grades finer than MS63. This collector-grade example is heavily frosted and brilliant, with a few minor luster grazes on the cheek limiting the grade. Slight softness is noted on the hair above Liberty's ear, but the strike is nonetheless above-average for this New Orleans issue. NGC ID# 254W, PCGS# 7168

**4041 1887 MS66 PCGS. CAC. VAM-11.** Remarkable cherry-red, lemon-gold, forest-green, and powder-blue toning occupies the obverse. The reverse is brilliant aside from peripheral honey patina. The 18 in the date is clearly repunched south. NGC ID# 254Y, PCGS# 7172

**4042 1887/6 VAM-2 MS65 PCGS.** A Top 100 Variety. The curved outline of the base of a 6 bookends the 7 in the date. This lustrous and brilliant Gem has a bold strike and outstanding eye appeal for its designated grade. PCGS# 133908 Base PCGS# 7174

**4043 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. The overdate is similar to the VAM-2 1887/6. A curved line near the base of the 7 corresponds to the outline of the loop of a 6. Brilliant aside from a blush of light tan toning near the base of Liberty's cap. The centers show softness of strike, characteristic of the variety. PCGS# 133912 Base PCGS# 7178

**4044 1887/6-O VAM-3 MS62 PCGS. CAC.** A Top 100 Variety. Light olive-gold toning visits this lustrous overdated New Orleans dollar. The cheek exhibits distributed delicate marks consistent with the grade. The eagle's breast and the hair above the ear are lightly brought up, usual for the issue. PCGS# 133912 Base PCGS# 7178

**4045 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The curve of a 6 is apparent to the right of the base of the 7. Delicate chestnut toning adorns lustrous and moderately grazed surfaces. The centers are lightly brought up, usual for this New Orleans overdate. PCGS# 133912 Base PCGS# 7178

**4046 1888 MS66+ PCGS. CAC.** A frosty, beautifully preserved example of a date that is not often seen as fine as MS66, and is rare in better grades. This Plus-designated coin is untuned with mint-fresh luster. The eagle's breast and the hair above Liberty's ear show slight weakness, as is typical. PCGS has certified only 30 numerically finer coins (12/14). NGC ID# 2555, PCGS# 7182

**4047 1888 MS66+ PCGS. CAC.** A Plus designation denotes superior quality for the grade on this Premium Gem 1888 Morgan, including a sharp strike, softly frosted luster, and beautifully clean surfaces. The obverse is vividly toned in warm gold, violet, and sea-green hues, while the reverse displays lighter shades of sun-gold and pale champagne. PCGS has certified only 30 numerically finer representatives (12/14). NGC ID# 2555, PCGS# 7182

**1888-O Morgan Dollar, Untoned MS66+  
Tied for Finest at PCGS**

**4048 1888-O MS66+ PCGS. CAC.** This untuned, frosty O-mint silver dollar shows a much sharper strike through the centers than most survivors of this issue, and Liberty's cheek in particular and the surfaces overall exhibit an excellent state of preservation. A couple of tiny luster grazes on the reverse are the only quibbles with this coin, and they are minor at that. Note that this piece is tied for the finest graded at PCGS. Population: 21 in 66+, 0 finer (12/14). CAC shows 45 with the green approval sticker — a number that would include NGC examples and disregard the Plus grade at PCGS. NGC ID# 2556, PCGS# 7184

**4049 1888-S MS65 PCGS.** The 1888-S Morgan dollar is seldom encountered in grades above the Gem level. This well-detailed MS65 example offers well-preserved brilliant surfaces with vibrant mint luster throughout. PCGS has graded 28 numerically finer examples (12/14). NGC ID# 2557, PCGS# 7186

**4050 1889-CC VF20 PCGS. CAC.** The light silver-gray surfaces display well-detailed devices. Both sides are quite clean for a large silver coin that has seen moderate circulation. NGC ID# 2559, PCGS# 7190

**4051 1889-CC VF25 PCGS.** Light to medium gray surfaces display blushes of light blue and charcoal and are minimally abraded. The design elements are well-defined. NGC ID# 2559, PCGS# 7190

**4052 1889-CC VF30 NGC.** Pale golden-gray patina blankets both sides of this piece, and there is pleasing detail remaining for the grade. A collector-grade example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

**4053 1889-CC — Smoothed — PCGS Genuine. XF Details.** The bright silvery surfaces have been smoothed in spots, yet this is a rather nice example of this key date Morgan. The design elements are well-defined except in the central areas. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, XF45  
Subtle Luster Remains**

**4054 1889-CC XF45 NGC.** A collectible but well-detailed grade level for this key Carson City issue. Only a single example of the 1889-CC Morgan was represented in the GSA sales of the early 1970s, and the date is proportionately rarer overall than all other Carson City issues in the series, many of which were represented in the GSA sales by the tens of thousands of coins or more. This piece is pleasing for the grade, with remnants of luster in the recesses and pale golden-gray toning overall. NGC ID# 2559, PCGS# 7190

**4055 1889-CC — Improperly Cleaned — NGC Details. AU. VAM-2A.** An interesting VAM with clashed letters and heavy cracks. This key date Carson City dollar displays an unbroken peripheral band of luster. Both sides are moderately hairlined and the reverse has an edge knock at 2:30. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, Sharp AU Details**

**4056 1889-CC — Cleaning — PCGS Genuine. AU Details.** The surfaces are lightly cleaned, but substantial mint luster remains around the borders. Semiprooflike fields backlight sharply struck design elements, and the surfaces are free of any major abrasions. Close examination is needed to detect any signs of actual wear, giving this piece the overall eye appeal of a lower-grade Mint State coin. A collectible example of the rarest Carson City Morgan dollar. NGC ID# 2559, PCGS# 7190

**4057 1889-S MS65 NGC.** Whispers of reddish-gold and lavender gravitate to the margins of this Gem. The design elements are well-struck, including partial detail in the hair over Liberty's ear and the breast feathers. The 1889-S becomes elusive any finer. NGC ID# 255B, PCGS# 7194

**4058 1890-CC MS64 PCGS. CAC.** Strong luster issues from both sides of this essentially untuned and well-struck near-Gem. Light grazes preclude Gem status. NGC ID# 255D, PCGS# 7198

**4059 1890-CC MS64 NGC. CAC.** Hints of lavender, turquoise, and greenish-gold toning enhance the outstanding eye appeal of this well-detailed Choice example. The lightly marked surfaces radiate vibrant mint luster. NGC ID# 255D, PCGS# 7198

**4060 1890-CC MS64 PCGS. CAC.** This flashy and crisply struck better date Carson City dollar has a well preserved reverse, and the obverse is only faintly abraded. Both sides display a whisper of gold patina. NGC ID# 255D, PCGS# 7198

**4061 1890-CC MS64+ Prooflike PCGS.** A tinge of delicate gold toning appears on the portrait of this impressive near-Gem silver dollar. The prooflike fields surround the satiny, lustrous silver devices, imparting attractive cameo contrast. PCGS has only certified 15 finer Prooflike examples (12/14). NGC ID# 255D, PCGS# 7199

**4062 1890-CC MS64 Deep Mirror Prooflike PCGS.** Modest cameo contrast confirms the deep mirroring on this Choice 1890-CC Morgan. The strike is sharp and only minor surface grazes limit the numeric level. Tinges of sun-gold toning are seen periodically around the extreme outer peripheries, leaving the remainder of each side brilliant. PCGS has certified only 27 numerically finer Deep Mirror Prooflike examples (12/14). NGC ID# 255D, PCGS# 97199

---

### 1890-CC Tail Bar VAM-4 Morgan, Attractive MS63

- 4063 1890-CC Tail Bar, VAM-4, Top 100, MS63 NGC.** We have always thought that the “tail bar” variety should be called the “tail sword,” as the broad die gouge just below the eagle’s tail feathers is shaped like the blade of a sword. This Select Mint State example boasts attractive cinnamon and golden-pink patina on well-preserved surfaces. The Tail Bar is hugely popular, and made more so by the Carson City source. Census: 79 in 63 (1 in 63+), 68 finer (12/14). PCGS# 133934 Base PCGS# 87198

- 4064 1890-O MS65 PCGS.** Mostly brilliant with satiny luster and brick-red, gold, and electric-blue toning toward the edges. Only the central devices show faint softness on this otherwise well-struck Gem. A loupe reveals small, infrequent marks that do not detract. PCGS has seen only 24 finer submissions (12/14). NGC ID# 255E, PCGS# 7200

- 4065 1890-O MS65 PCGS.** The Louisiana mint produced a substantial number of Morgans in 1890 (10.7 million pieces). Still, the certified population at PCGS drops off dramatically from MS65 to MS66. This Gem features radiant luster and light toning over typically struck surfaces. Only 24 numerically finer submissions at PCGS (12/14). NGC ID# 255E, PCGS# 7200

- 4066 1891-CC MS64 NGC. CAC.** Boldly struck and highly lustrous, with occasional light specks of gold toning on the otherwise untuned surfaces. A few minor blemishes are all that keep this attractive piece from a Gem holder. NGC ID# 255H, PCGS# 7206

- 4067 1891-CC MS64 PCGS. CAC.** An attractive Choice specimen of this popular issue from the charismatic Carson City facility, this coin is sharply detailed throughout and the lightly marked creamy surfaces radiate vibrant mint luster. NGC ID# 255H, PCGS# 7206

- 4068 1891-CC MS64 PCGS. CAC.** Delicate shades of champagne-gold toning blanket the well-preserved surfaces of this attractive Choice specimen, with well-detailed design elements and outstanding eye appeal. NGC ID# 255H, PCGS# 7206

---

### 1891-CC Morgan Dollar, MS65 Attractively Toned Obverse

- 4069 1891-CC MS65 PCGS.** The obverse of this Gem Carson City Morgan silver dollar has light gold toning at the center, deepening to orange-gold along the borders. Traces of peripheral blue add to its eye appeal. The reverse is essentially brilliant, but with hints of peripheral gold toning. A delightful example. NGC ID# 255H, PCGS# 7206

---

### 1891-O Morgan Dollar, Flashy MS65

- 4070 1891-O MS65 NGC.** The Gem grade of the present 1891-O Morgan dollar is seldom surpassed, save for a measly two examples at NGC. The untuned surfaces on this piece exhibit excellent eye appeal; Liberty’s cheek shows some small grazes but no large marks, and the surfaces elsewhere show good preservation. Flashy cartwheel luster tops off the top-notch presentation. Census: 69 in 65 (2 in 65 ★), 2 finer (12/14). NGC ID# 255J, PCGS# 7208

- 4071 1891-S MS65 PCGS.** Whispers of maroon, electric-blue, and gold visit the highly lustrous surfaces of this sharply struck Gem. A few minor grazes may prevent an even finer grade. NGC ID# 255K, PCGS# 7210

- 4072 1892 MS64 PCGS. CAC.** This attractive Choice Morgan dollar displays well-preserved brilliant surfaces that radiate vibrant mint luster and create outstanding eye appeal. The design elements are well-detailed, with just a touch of softness on the hair above the ear. NGC ID# 255L, PCGS# 7212

- 4073 1892 MS64 PCGS. CAC.** The design elements of this impressive Choice Morgan dollar are well-detailed, with just a trace of the usual softness on the hair above the ear. The well-preserved surfaces radiate vibrant mint luster on both sides. NGC ID# 255L, PCGS# 7212

- 4074 1892-CC MS61 PCGS.** The silver-gray surfaces exhibit well-struck design features, including in the central areas. Some prooflikeness is apparent in the fields that highlight the motifs when the coin is rotated under a light source, especially on the reverse. A few minute ticks are scattered about. NGC ID# 255M, PCGS# 7214

- 4075 1892-CC MS63 NGC.** An attractive Select example from the famous Carson City Mint, this coin exhibits sharply detailed design elements and vibrant mint luster, with a few minor contact marks on both sides that explain the grade. NGC ID# 255M, PCGS# 7214

---

### 1892-CC Morgan Dollar, MS64 Attractive Multicolor Toning

- 4076 1892-CC MS64 PCGS.** This Choice Mint State silver dollar is highly attractive, with grayish-gold and rose toning on the obverse and lighter champagne toning on the reverse. Both sides have considerable reflectivity in the fields, and some would be tempted to describe this piece as prooflike. NGC ID# 255M, PCGS# 7214

**1892-O Silver Dollar, MS65  
Rarely Found in Finer Grades**

**4077 1892-O MS65 PCGS.** A delicately preserved Gem example of this conditionally elusive New Orleans issue, this piece displays shimmering, frosty luster that yields to attractive peripheral hues of sea-green and amber-gold color. The eagle's breast and the hair above Liberty's ear are softly struck, as is typical of this issue, but not so much so as to be detracting. PCGS has certified only six numerically finer representatives (12/14). NGC ID# 255N, PCGS# 7216

**4078 1893 MS63 PCGS. VAM-2.** The top of the 3 is repunched, and the profile is lightly die doubled. A lustrous and lower mintage silver dollar with light golden patina and only minor incompleteness of strike at the centers. NGC ID# 255R, PCGS# 7220

**4079 1893 MS64 PCGS.** The 1893 Morgan dollar is a low-mintage better date in the series and this attractive Choice example offers sharply detailed design elements and vibrant mint luster throughout, with pleasing lightly marked surfaces. NGC ID# 255R, PCGS# 7220

**4080 1893 MS64 PCGS. CAC.** This impressive Choice specimen exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of champagne-gold toning. Housed in a green label holder. NGC ID# 255R, PCGS# 7220

**1893-O Dollar, Frosty MS61**

**4081 1893-O MS61 PCGS.** Although not as popular as its San Francisco counterpart, the 1893-O Morgan dollar is a challenging semikey, and is particularly elusive with pleasing eye appeal. This piece is moderately abraded, as the grade suggests, but the luster is remarkably frosty and attractive for a New Orleans issue from this period. Light golden color accents each side. The hair above Liberty's ear is slightly soft, as usual, but nonetheless shows above-average definition for the issue. NGC ID# 255T, PCGS# 7224

**4082 1893-S — Cleaning — PCGS Genuine. VG Details.** The silver-white surfaces of this key-date Morgan example are somewhat bright from the cleaning. The design elements are appropriately defined, and neither side reveals any significant marks out of the ordinary for a large silver coin that has seen heavy circulation. NGC ID# 255U, PCGS# 7226

**4083 1893-S — Rim Filing, Reverse Repaired — NGC Details. VG.** The rims are filed, most noticeably above the URI in PLURIBUS. The eagle's breast exhibits swirling marks associated with a wire brush, and horizontal hairlines are present above the eagle's head. Diagnostic die lines and dots within the RT in LIBERTY confirm the low mintage business key. NGC ID# 255U, PCGS# 7226

**4084 1893-S VG8 PCGS.** An evenly worn collectible example of this important series key, with all lettering legible and major design elements intact in outline, retaining much interior detail. The pinkish-gray surfaces are free of large or distracting abrasions and LIBERTY remains bold. NGC ID# 255U, PCGS# 7226

**4085 1893-S VG10 PCGS.** This key-date Choice VG dollar displays strong definition, including a bold LIBERTY. Silver-gray surfaces reveal scattered light marks, fewer and less severe than expected for a heavily circulated large silver coin. A nice fit for a lower- to mid-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VF Details**

**4086 1893-S — Cleaning — PCGS Genuine. VF Details.** A collectible example of this series key, this 1893-S Morgan is well-circulated, but retains the appropriate detail for the VF level. The surfaces are unnaturally bright due to cleaning, though the coin remains suitable for inclusion in a low to mid-grade set for a budget-conscious collector. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VF Details Key Date**

**4087 1893-S — Smoothed — PCGS Genuine. VF Details.** Some smoothing appears on the high points of each side as well as in the obverse left field before Liberty. The piece retains its essential attractions, however, and may provide an otherwise unobtainable entry point in terms of detail for this key issue. The patina provides a range of appealing colors. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, XF Details  
In-Demand Key Date**

**4088 1893-S — Tooled — PCGS Genuine. XF Details.** This key-date Morgan dollar is a coin that will have no trouble finding a new home, despite its surfaces which have been "reworked" on the high points of each side — the eagle's breast, Liberty's hair and cheek, and the obverse left field. Much eye appeal remains, however, and the pinkish-gray to smoke-gray color is equally attractive. NGC ID# 255U, PCGS# 7226

**4089 1894 AU53 PCGS.** An appealing AU example of this semikey Philadelphia issue. The obverse displays deep aquamarine and orange-gold peripheral toning around a brilliant center, while the reverse is more evenly toned in pale champagne hues. NGC ID# 255V, PCGS# 7228

**4090 1894 AU53 NGC.** The silvery surfaces of this Morgan dollar retain ample luster and exhibit well-defined devices. The few light marks are within the confines of a briefly circulated coin. The 1894 had a low production of 110,000 pieces. NGC ID# 255V, PCGS# 7228

---

**1894 Morgan Dollar, MS61  
High-End for the Grade**

**4091 1894 MS61 NGC.** Aside from the proof-only 1895, the 1894 Morgan dollar is the scarcest Philadelphia issue in the series, aided in this regard by the second-lowest mintage as well of just 110,000 coins. Only the key 1893-S has a lower mintage figure. This is a brilliant, satiny representative, showing sharp design definition on both sides. Remarkably, there are no major abrasions present, and we instead note only faint luster grazes on each side that preclude a finer grade. NGC ID# 255V, PCGS# 7228

---

**1894 Morgan Dollar, Untoned MS61  
Popular P-Mint Semikey Issue**

**4092 1894 MS61 PCGS.** A relatively affordable example of this low-mintage P-mint key issue, the present piece is untoned and shows good eye appeal, despite the scattered scrapes and luster grazes that preclude a finer Mint State grade. A nicer coin than the technical grade suggests, and always a popular date among the legions of Morgan dollar enthusiasts. NGC ID# 255V, PCGS# 7228

---

**1894 Morgan Dollar, MS62  
Low-Mintage Philadelphia Issue**

**4093 1894 MS62 NGC.** The 1894 Morgan dollar is a key date in the Philadelphia series, from a low mintage of 110,000 pieces. This attractive MS62 example displays lightly marked surfaces and well-detailed design elements, under shades of lavender-gray and violet toning. Frosty mint luster shines through the patina. NGC ID# 255V, PCGS# 7228

---

**1894 Silver Dollar, Appealing MS62**

**4094 1894 MS62 PCGS.** Radiant mint luster is untoned as it cartwheels around each side of this satiny representative, while the strike is well-executed and the surfaces are remarkably clean for the grade. The 1894 is a favorite among Morgan dollar collectors due to its low mintage (just 110,000 pieces) and its corresponding scarcity in pleasing Mint State condition. NGC ID# 255V, PCGS# 7228

---

**1894 Silver Dollar, MS62  
Frosty and Unusually Appealing**

**4095 1894 MS62 PCGS. CAC.** An unusually appealing example for the grade, this Mint State 1894 Morgan dollar displays frosty cartwheel luster with just a trace of light champagne color over each side. The eagle's breast and the hair above Liberty's ear are not fully defined, but exhibit pleasing definition for this elusive and widely popular Philadelphia semikey. Scattered luster grazes limit the grade, but none are individually detracting. NGC ID# 255V, PCGS# 7228

**4096 1894-S MS63 PCGS.** Whispers of orange-gold peripheral color are deeper on the reverse of this Select Morgan. The design elements are well-struck, including relatively strong detail in the hair over Liberty's ear and on the eagle's breast feathers. Light obverse grazes determine the grade. Faint roller marks are visible on the jaw. NGC ID# 255X, PCGS# 7232

**4097 1894-S MS63 NGC. CAC.** Most of the Mint State 1894-S Morgans known are in the MS62 to MS64 grade range, and these pieces are ideal for the casual collector. The present Select example is unusually appealing for the grade, with fewer abrasions than are expected and softly frosted luster that exhibits just a few traces of light golden color. Slight striking weakness is noted in the centers, as usual. NGC ID# 255X, PCGS# 7232

**4098 1894-S MS64 PCGS.** This semikey issue can be located without too much trouble through near-Gem but becomes elusive any finer. Lustrous surfaces show occasional wisps of light gold and exhibit sharply struck devices, including relatively strong detail in the hair over Liberty's ear and on the eagle's breast feathers. Faint horizontal roller marks cross Liberty's cheek. NGC ID# 255X, PCGS# 7232

**4099 1894-S MS64 NGC.** Freckled electric-blue, purple, and gold patination is slightly more extensive and deeper in hue on the obverse of this near-Gem S-mint representative. Sharply struck design motifs and well-cared for lustrous surfaces round out the coin's pleasing eye appeal. NGC ID# 255X, PCGS# 7232

**4100 1895-O AU55 PCGS.** The 1895-O can be obtained in circulated grades but Mint State pieces are elusive, especially in the higher levels. This Choice AU offering displays mint luster in the recessed areas. The design features are well-defined except for localized high-point wear. NGC ID# 255Y, PCGS# 7236

**4101 1895-O AU55 NGC.** Moderate luster remains in the recesses of this Choice AU 1895-O Morgan dollar, illuminating pale golden-gray toning over each side. No major abrasions are present and there is only minor wear over the high points of the design. NGC ID# 255Y, PCGS# 7236

**4102 1895-O AU55 PCGS.** This Choice AU Morgan dollar displays ample luster on its untuned surfaces. There are relatively few marks for a lightly circulated silver dollar. NGC ID# 255Y, PCGS# 7236

#### 1895-O Dollar, Unc Details A Pleasing Example of This Scarce Date

**4103 1895-O — Cleaning — PCGS Genuine. Unc Details.** A seldom seen and respected semikey, the 1895-O Morgan dollar is a favorite in Uncirculated condition. This piece is unworn, with brilliant, satiny luster and well-defined motifs. PCGS notes evidence of light cleaning, though the surfaces remain largely attractive. No obtrusive abrasions are observed. NGC ID# 255Y, PCGS# 7236

#### 1895-S Morgan Dollar, Well-Preserved AU58

**4104 1895-S AU58 PCGS.** For a near-Mint State coin the surfaces are nicely preserved and quite attractive, showing no major marks on either side amid lovely pearl-gray and heather patina on each side. The strike is quite well brought up, save for some expected weakness on the hair over Liberty's ear. This example of the in-demand 1895-S would fit well into a mostly Mint State complete set. NGC ID# 255Z, PCGS# 7238

**4105 1895-S/S VAM-3 AU50 ANACS.** A Hot 50 Variety. The mintmark was initially entered with a blundered counterclockwise rotation, then repunched in a correct position. But the low mintage and conditionally scarce 1895-S is desirable in AU, regardless of its VAM variety. A partly lustrous example with freckles of peach-gold toning near the rims. PCGS# 134020 Base PCGS# 7238

**4106 1896 MS67 PCGS.** Bright luster radiates from the minimally marked silvery surfaces of this Superb Gem. Partial detail is evident in the hair over Liberty's ear and the eagle's breast feathers. NGC ID# 2562, PCGS# 7240

#### 1896 Morgan Dollar, MS67 Extraordinary Eye Appeal

**4107 1896 MS67 PCGS. CAC.** The 1896 Morgan dollar is a scarce issue at the MS67 level, and finer examples are virtually unobtainable. This delightful Superb Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster and a crescent of vivid green and blue toning on the lower obverse. PCGS has graded only two numerically finer examples (12/14). NGC ID# 2562, PCGS# 7240

#### 1896-O Silver Dollar, MS62 Better O-Mint Issue

**4108 1896-O MS62 PCGS.** This New Orleans issue is somewhat of a challenge in Mint State, and most such pieces are heavily abraded. This example is moderately well-struck, with soft, glowing luster that illuminates subtle gold toning over each side. Light, scattered ticks limit the grade, but none are singularly distracting. NGC ID# 2563, PCGS# 7242

- 4109 1896-O MS62 PCGS.** A scarcer New Orleans issue in Mint State grades, seldom found with pleasing eye appeal. This piece is lightly abraded, but grade-limiting marks are well-masked by dusky lavender-gray and pale golden hues. The centers are a trifle soft, but the overall definition is pleasing for the issue. NGC ID# 2563, PCGS# 7242

**1896-O Morgan, Appealing MS62  
Shifted Date VAM-19 Variety**

- 4110 1896-O Shifted Date, VAM-19, MS62 NGC.** A Hit List 40 Variety. Initial too-high date punches inside of the 8, 9, and 6 appear inside of the subsequent correctly placed date punches on the VAM-19 Shifted Date variety. This appealing example boasts untuned silver-gray areas contrasted against cinnamon and amber patina. A few scattered abrasions account for the grade. The errant underdigits are bold. PCGS# 134054 Base PCGS# 7242

**1896-S Silver Dollar, MS62  
Radiant Mint Bloom**

- 4111 1896-S MS62 PCGS.** Brilliant, dazzling mint luster is the hallmark of this eye-catching 1896-S dollar, although well-struck design elements also contribute to the overall appeal. Light, scattered abrasions on the obverse contribute to the grade, but the quality remains above-average overall. This is a slightly better S-mint date in Mint State grades. NGC ID# 2564, PCGS# 7244

- 4112 1897 MS66+ PCGS.** The availability of the 1897 Morgan dollar decreases substantially in MS66, and finer pieces are rarely seen. This plus-graded representative displays brilliant, frosty mint luster and sharp design elements. The fields and Liberty's cheek are clean, and close study is required to detect any unobtrusive, grade-defining flaws. PCGS has certified just 28 numerically finer representatives (12/14). NGC ID# 2565, PCGS# 7246

- 4113 1897-O MS62 PCGS.** Frosty, shimmering luster shines through pale olive-gold toning on each side of this lower-grade Mint State example. The relief elements are well-struck for the issue, and the surfaces exhibit fewer abrasions than are expected for this level. NGC ID# 2566, PCGS# 7248

- 4114 1898 MS67 PCGS.** Tinges of amber-gold toning grace the peripheries of this frosty Superb Gem, while the strike is well-executed and the surfaces are devoid of mentionable abrasions. The 1898 Morgan is readily obtainable in grades through MS66, but finer coins are scarce. None have been certified numerically finer than this piece (12/14). NGC ID# 2568, PCGS# 7252

- 4115 1898-O MS67 PCGS.** Remarkably clean, glowing surfaces yield impressive visual appeal on this Superb Gem 1898-O Morgan dollar. Lavender-gray and ice-blue centers deepen to green-gold and olive peripheral toning, and the strike is above-average for this New Orleans issue. None have been certified numerically finer at PCGS (12/14). NGC ID# 2569, PCGS# 7254

**1899 Morgan Dollar, MS66+  
Only Three Finer Coins at NGC**

- 4116 1899 MS66+ NGC. CAC.** The 1899 Morgan dollar claims a low mintage of 330,000 pieces, but the survival rate is surprisingly high. This high-end Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster, with a few hints of pink toning. Census: 76 in 66 (1 in 66+), 3 finer (12/14). NGC ID# 256B, PCGS# 7258

- 4117 1900-O MS66+ PCGS. CAC.** Radiant, brilliant cartwheel luster illuminates largely undisturbed surfaces on each side of this high-end 1900-O Morgan. The strike is above-average for the date, and the eye appeal is proportionately high. The 1900-O is an available date in Premium Gem condition, but numerically finer pieces are scarce, with only 58 coins so-graded at PCGS (12/14). NGC ID# 256F, PCGS# 7266

- 4118 1900-O MS67 PCGS.** Generous luster on both sides of this Superb Gem complements the lack of mentionable abrasions, while the surfaces display rich mint-green and lemon-gold color on the obverse, with rose-orange hues accenting the same on the reverse. A pleasing, high-end O-mint Morgan, with well-struck central devices. Population: 58 in 67 (4 in 67+), 0 finer (12/14). NGC ID# 256F, PCGS# 7266

**1900-S Morgan Dollar, Satiny MS66**

- 4119 1900-S MS66 PCGS.** Liberty's cheek and neck, as well as the surfaces overall, are notably free of mentionable abrasions on this Premium Gem 1900-S dollar. The satiny surfaces are sharply struck and show only slight accents of rim color. PCGS reports only two numerically finer of this S-mint issue (12/14). NGC ID# 256H, PCGS# 7270

- 4120 1901 Doubled Die Reverse, VAM-3, AU53 PCGS.** A Top 100 Variety. The reverse is strongly die doubled south, most evident on the tailfeathers, arrows, and beak. All 1901 dollars are conditionally rare, but VAM-3 is virtually unobtainable in Mint State. The present lightly circulated example has ample luster and a hint of sun-gold toning on the reverse. PCGS# 133965 Base PCGS# 7302

**4121 1901 Doubled Ear, VAM-5, AU58 NGC.** A Hot 50 Variety. VAMworld.com notes, "An exceptional obverse doubled die. ... The eyelid, hair above the ear, and back of ear all show clear doubling." Substantial satin luster illuminates this momentarily circulated silver-gray silver dollar. Smooth aside from faint marks below the shoulder curl. A conditionally rare date. PCGS# 134027 Base PCGS# 7272

**4122 1901-S MS64 PCGS.** Blazing luster radiates from the untuned surfaces of this well-struck near-Gem. A few minute obverse grazes limit the grade. NGC ID# 256L, PCGS# 7276

**4123 1901-S MS64 PCGS.** Each side of this Choice Mint State condition rarity exhibits delicate splashes of champagne toning on otherwise fully brilliant and highly lustrous silver surfaces. A few trivial marks prevent a higher grade. NGC ID# 256L, PCGS# 7276

**4124 1902 MS66 PCGS. CAC.** Radiant, brilliant luster is largely uninterrupted as it cartwheels around each side of this Premium Gem 1902 Morgan. The strike is pleasing for the issue and the overall eye appeal is excellent. PCGS has certified only 29 numerically finer coins (12/14). NGC ID# 256M, PCGS# 7278

#### 1902 Silver Dollar, Untoned MS65 Prooflike

**4125 1902 MS65 Prooflike PCGS.** Only about 1% of the Gem 1902 Morgan dollars at PCGS currently make the cut to the Prooflike designation, making coins such as this piece hotly pursued by legions of series fans. This silver-white piece is virtually untuned save for a pale hint of gold on the reverse. Liberty's cheek and the surfaces throughout are free of singular distractions. Population: 13 in 65 Prooflike, 9 finer (12/14). NGC ID# 256M, PCGS# 7279

**4126 1902-O MS63 ANACS. VAM-26A.** A Super CD Variety. The dies are double clashed, and a partial incuse G (from GOD) is clashed in front of Liberty's throat. Lustrous and nearly brilliant with a good strike and excellent eye appeal for the MS63 level. PCGS# 44825 Base PCGS# 7280

#### 1902-S Dollar, MS64 Prooflike Seldom Seen So Deeply Mirrored

**4127 1902-S MS64 Prooflike PCGS. CAC.** Prooflike examples of this late-series San Francisco issue are rarely encountered in any grade, let alone as fine as MS64, and Deep Mirror Prooflike coins are almost unknown. This piece is brilliant, with mirrored fields and boldly defined design elements. A few minor, grad-consistent ticks are present on the obverse. Population: 9 in 64 Prooflike, 2 finer (12/14). NGC ID# 256P, PCGS# 7283

**4128 1903 MS67 NGC.** The devices of this Superb Gem feature strong definition throughout, notably over Liberty's ear and the eagle's breast feathers. Essentially untuned surfaces exude pleasing luster and have been nicely cared for. The 1903 is scarce in MS67 and virtually unobtainable any finer. NGC ID# 256R, PCGS# 7284

#### 1903-O Morgan Dollar, MS67 Among the Finest Certified

**4129 1903-O MS67 PCGS.** The 1903-O Morgan dollar was considered a great rarity before a large number of coins were discovered in government storage in the early 1960s. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster throughout. Eye appeal is incredible. Population: 72 in 67, 0 finer (12/14). NGC ID# 256S, PCGS# 7286

#### 1904-S Dollar, MS62 Lightly Toned and Frosty

**4130 1904-S MS62 NGC.** The San Francisco is the most challenging 1904 Morgan dollar issue. Here offered is an unusually appealing example for the MS62 grade level, with vibrant, frosty luster and tinges of light golden toning around the margins. The strike is slightly soft on the hair above Liberty's ear, but the surfaces reveal fewer distracting abrasions than are expected at this level. NGC ID# 256W, PCGS# 7294

#### 1904-S Morgan Dollar, MS63 Last Pre-1921 Issue

**4131 1904-S MS63 NGC.** When San Francisco coined its last Morgan dollar of 1904, that would have been the end of an era, but the Peace dollar (and its 1921-S Morgan dollar predecessor) intervened. Nonetheless, collectors have come to appreciate the challenge posed by this date in Select and better, where it is available only for a price. Though lightly abraded, this minimally toned example has great luster and a decent strike. A thin layer of hazy gold color graces the upper reverse. NGC ID# 256W, PCGS# 7294

**4132 1921 MS66+ PCGS. CAC.** Despite being highly plentiful in lower grades, the 1921 Morgan dollar becomes conditionally elusive as fine as MS66, and better pieces are nothing short of rare. This Plus-graded Premium Gem is awash in vibrant, frosty mint bloom, with remarkably clean surfaces and no significant color. The eagle's breast is weak, as usual, but the wreath is sharp and the hair above Liberty's ear is bold. PCGS has certified only nine numerically finer examples (12/14). NGC ID# 256X, PCGS# 7296

**4133 1921 Wide Reeding, VAM-44, AU55 NGC.** A Top 100 Variety. Two different collar dies were used to strike 1921 Morgan dollars, respectively with normal and wide reeding. The latter variety is very scarce. Medium golden-brown and steel-blue toning drapes partly lustrous and lightly marked surfaces. PCGS# 133969 Base PCGS# 7296

**4134 1921-S MS65 PCGS.** The 1921-S is the most conditionally elusive of the final-year Morgan dollar issues, scarcely seen finer than MS65. This example is awash in creamy-white, glowing luster that reveals few distractions as it illuminates each side. The lower wreath and the central devices are slightly soft, as is typical of coins struck from this modified final-year hub. NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

**4135 1892 PR58 NGC.** An attractively toned lower-grade proof, with a thin ribbon of rainbow surrounding the peripheries. Slight friction on the high points of the devices is balanced by ample mirroring in the well-preserved fields. A navy blue toning spot is noted at the base of Liberty's neck. NGC ID# 27ZM, PCGS# 7327

**4136 1893 PR62 PCGS.** A few whispers of violet and gold color run over the bright surfaces of this Morgan proof. Well struck save for weakness in the centers. NGC ID# 27ZN, PCGS# 7328

### 1894 Dollar, Lightly Toned PR62

**4137 1894 PR62 PCGS.** A light golden-gray hue accents the deep mirrors and satiny devices of this pleasing lower-grade proof. The strike is sharply executed, and the surfaces are free of contact marks, showing instead only faint hairlines in the fields to limit the grade. An excellent entry-level piece for the collector seeking a proof Morgan dollar. NGC ID# 2577, PCGS# 7329

**4138 1900 PR62 NGC.** Soft champagne patina is slightly deeper on the obverse of this silver dollar proof. All design elements are sharply impressed. Faint hairlines limit the numerical grade. NGC ID# 27ZY, PCGS# 7335

### 1902 Dollar, Deeply Mirrored PR63

**4139 1902 PR63 PCGS.** The fields on this eye-appealing Select proof are deeply mirrored, but the devices are just a bit too satiny to deliver the necessary contrast for a Cameo designation. Well-defined design elements are accentuated by areas of amber-gold color, and the surfaces reveal only minor hairlines upon close examination. NGC ID# 2822, PCGS# 7337

**4140 1903 PR62 PCGS. CAC.** From a tiny proof mintage of 755 pieces, this attractive Morgan dollar displays the all-brilliant finish used on proof coins after 1902. The design elements display razor-sharp definition and the deeply reflective fields are lightly marked. NGC ID# 2823, PCGS# 7338

## PEACE DOLLARS

**4141 1921 MS65 PCGS.** Luminous lavender-gray surfaces reveal speckles of olive color, mostly around the borders. The devices are moderately well-struck, showing only some of the usual weakness over Liberty's ear. Minimal abrasions are present. Ex: Dallas Signature (Heritage, 12/2004), lot 7779. NGC ID# 2U4E, PCGS# 7356

**4142 1921 MS65 PCGS.** Delicate ice-blue and straw-gold toning visits this highly lustrous and well preserved Gem. The strike is above average, although the centers lack a definitive impression. Certified in a green label holder. NGC ID# 2U4E, PCGS# 7356

### 1921 Peace Dollar, Attractive MS65+ One-Year High Relief Subtype

**4143 1921 MS65+ PCGS.** The 1921 Peace dollars, produced in higher relief than the remainder of circulation strikes in the series, are thus not only first-year type coins, they are technically a one-year subtype. It is not only this that makes them in such demand, but also because they are simply beautiful coins, another product of the coin-design renaissance that began with Augustus Saint-Gaudens' gold coin designs of 1907. This Gem offers silver-gold surfaces accented with burgundy patina. The high points are better-preserved than usually seen, although Liberty's high-point hair is typically struck. NGC ID# 2U4E, PCGS# 7356

**4144 1922-S MS65 NGC.** Whispers of soft champagne-gold visit the obverse of this lustrous Gem, leaving the reverse essentially untuned. The design elements are well-struck, including the hair over Liberty's ear. MS65 is the highest grade that will likely be encountered. NGC ID# 257E, PCGS# 7359

**4145 1925-S MS64+ PCGS.** An available date in MS64 and lower grades, the 1925-S Peace dollar becomes conditionally scarce any finer. This Plus-designated Choice example is well-struck, with frosty, brilliant mint luster. A few faint surface grazes, only visible when rotated beneath a good light, limit the grade. PCGS has certified 39 numerically finer representatives (12/14). NGC ID# 257M, PCGS# 7366

**4146 1925-S MS64 PCGS. CAC.** The surviving population of 1925-S Peace dollars drops off drastically in grades above MS64. This impressive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. PCGS has graded only 39 numerically finer examples (12/14). NGC ID# 257M, PCGS# 7366

**4147 1925-S MS64+ PCGS. CAC. VAM-1A1.** A thin diagonal die gouge in the rays is noted beneath the BE in LIBERTY. Original butter-gold, steel-blue, and tobacco-brown toning adorns this lustrous and well preserved better date dollar. An excellent value relative to the few graded finer. NGC ID# 257M, PCGS# 7366

**4148 1927-S MS64 PCGS. CAC.** Sharply struck design features and radiant luster affirm the CAC endorsement of this S-mint near-Gem. Some trivial marks preclude Gem classification. This issue is elusive any finer. NGC ID# 257U, PCGS# 7372

**4149 1927-S MS64+ PCGS. CAC.** Ebullient luster issues from the untuned surfaces of this sharply struck high-end near-Gem. A few unobtrusive, trivial marks do not disturb. NGC ID# 257U, PCGS# 7372

**4150 1928 MS64 PCGS.** Both sides of this color-free near-Gem are awash with potent luster and exhibit sharply struck design elements. A few minute marks prevent Gem classification. This is a popular low-mintage date. NGC ID# 257V, PCGS# 7373

**4151 1928 MS64 PCGS.** The 1928 Peace dollar is a low-mintage key. This attractive Choice specimen is sharply detailed and brightly lustrous, with subtle highlights of pale gold toning. Eye appeal is outstanding. NGC ID# 257V, PCGS# 7373

**4152 1928 MS64 PCGS.** Faint golden toning visits this lustrous and suitably struck example. Moderate obverse grazes determine the grade. The 1928 has less than half the mintage of any other Peace dollar issue. Certified in an old green label holder. NGC ID# 257V, PCGS# 7373

**4153 1928-S MS64 NGC. CAC.** Light gold-gray overall with deepening to orange at parts of the rims. This Choice example offers impressive luster, though the centers show soft striking definition.  
*Ex: Houston Signature (Heritage, 12/2008), lot 3412.* NGC ID# 257W, PCGS# 7374

**4154 1928-S MS64 PCGS. CAC. VAM-3.** A Top 50 Variety. WE TRUST is die doubled, and the mintmark position is low, diagnostic of this popular VAM. The cheek, neck, and obverse field are smooth. The light tan toning is more apparent on the obverse. The 1928-S is among the most difficult issues to locate in MS65. NGC ID# 257W, PCGS# 7374

**4155 1934-S MS62 NGC.** The 1934-S is always in demand among series specialists and is only marginally available in Mint State. This piece is rather appealing for the grade, with just light luster grazes on the obverse precluding a higher numeric assessment. Frosty, light-golden luster blankets both sides, and the devices are well brought up. NGC ID# 257Z, PCGS# 7377

**4156 1935-S MS65 PCGS. CAC.** The 1935-S is the final issue in the Peace dollar series, and is also scarce finer than MS65. This Gem example is well-struck and satiny, with faint traces of light golden color observed when tilted beneath a light. A few minor disruptions in the luster, primarily on the reverse, limit the grade. NGC ID# 2583, PCGS# 7379

**4157 1935-S MS65 PCGS. CAC.** Vibrant, satiny luster delivers pronounced visual appeal on each side of this Gem 1935-S dollar. The strike is above-average for the issue and the preservation is pleasing. A few wisps of olive-gold color appear when tilted beneath a light. NGC ID# 2583, PCGS# 7379

## EISENHOWER DOLLAR

1972-D Eisenhower Dollar, MS67

Paramount Registry Coin

**4158 1972-D MS67 NGC.** Registry Set competitors will want to pay attention when this Superb Gem crosses the auction block. NGC has certified only five examples in this lofty grade, and none numerically finer (12/14). Nickel-gray surfaces yield a faint golden hue amid vibrant cartwheel luster. No significant abrasions are present, delivering pronounced visual appeal. NGC ID# 2588, PCGS# 7410

## GOLD DOLLARS

**4159 1851-C AU55 PCGS. Variety 1.** The Low Date variant of this low mintage and popular Charlotte type issue. A richly detailed wheat-gold Choice AU example. Free from any detrimental abrasions, and nicely struck despite incompleteness on the A in DOLLAR. NGC ID# 25BL, PCGS# 7514

**4160 1851-C AU58 NGC. Variety 3.** A slightly more available Charlotte issue, with a mintage of 41,267 pieces. This near-Mint example is well-struck, with just minor friction over the obverse portrait. Satiny yellow-gold luster illuminates fairly clean surfaces. NGC ID# 25BL, PCGS# 7514

**4161 1852-D XF45 PCGS. Variety 4-F.** The only known variety. The yellow-gold surfaces of this Choice XF gold dollar display whispers of rose and ice-blue. The design elements are sharply defined. Housed in a green label holder. NGC ID# 25BS, PCGS# 7519

1853 Gold Dollar, MS65+  
Curious Obverse Die Lines

**4162 1853 MS65+ NGC.** An extraordinary Gem Type One gold dollar with the NGC Plus designation, this piece has satiny yellow-gold luster with beautiful wisps of blue and violet toning. Several curious die lines appear on Liberty's nose, cheek, and temple, including one that pierces the eye. NGC has only certified 49 finer examples of this issue (12/14). NGC ID# 25BU, PCGS# 7521

**1857-C Gold Dollar, XF45  
Original Surface Color**

**4163 1857-C XF45 PCGS. CAC. Variety 1.** The 1857-C is one of the more plentiful gold dollars from the Charlotte Mint, but it is also one of the most difficult to locate with pleasing eye appeal and original color. This Choice XF coin is an attractive exception to the rule, with natural honey-gold patina and strong detail for the grade. No obtrusive abrasions are noted. Housed in an old green label holder. NGC ID# 25CE, PCGS# 7545

**4164 1857-S AU53 PCGS.** Some light wear shows on the high points of the well-detailed design elements of this attractive AU53 example, and the lustrous greenish-gold surfaces show some minor abrasions, with interesting clash marks on the reverse. Population: 16 in 53, 25 finer (12/14). NGC ID# 25CG, PCGS# 7547

**4165 1866 MS62 PCGS.** A charming MS62 example of this popular issue, from a mintage of 7,130 pieces. The design elements are sharply detailed and some interesting clash marks are evident on both sides. The lightly marked yellow-gold surfaces are lustrous and appealing. Population: 9 in 62, 55 finer (12/14). NGC ID# 25D2, PCGS# 7565

**4166 1888 MS66 PCGS.** The design elements of this impressive Premium Gem are sharply detailed throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 25DT, PCGS# 7589

**4167 1888 MS66 PCGS. CAC.** Radiant yellow-gold mint bloom illuminates carefully preserved surfaces on this boldly struck Premium Gem example. PCGS has encapsulated 49 numerically finer representatives (12/14). NGC ID# 25DT, PCGS# 7589

**4168 1889 MS65 PCGS. CAC.** The final year of issue for the gold dollars except for a few later commemoratives. This Gem has light yellow surfaces and frosty luster with minimal marks and above average design definition. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, Flashy MS67  
Superb Final-Year Type Coin**

**4169 1889 MS67 PCGS.** Despite a mintage of only 29,000 pieces, the 1889 gold dollar was heavily saved and is available today for type purposes, even in high grades. This example is superb in both strike and preservation, with semiprooflike fields and rich lemon-gold luster over both sides. PCGS has certified only five numerically finer representatives (12/14). NGC ID# 25DU, PCGS# 7590

**CLASSIC QUARTER EAGLES**

**4170 1834 AU55 NGC. Variety 4, R.3.** The Large Head obverse is combined with a reverse that is missing the right diagonal of the M in AMERICA on this slightly scarcer die combination. Both sides have reflective fields, considerable yellow-gold luster, and generally sharp design definition that shows slight central weakness. NGC ID# 25FS, PCGS# 7692

**4171 1836 Block 8 AU55 NGC. Breen-6142, Variety 8, R.3.** Rich peach-gold patination covers both sides of this Choice AU quarter eagle. The design elements are well-struck save for the usual softness in some of the star centers. A darkish area is visible above the U in UNITED. PCGS# 97694

**LIBERTY QUARTER EAGLES**

**4172 1843-C Large Date, Plain 4 XF45 PCGS. Variety 1.** An attractive honey-gold Charlotte two and a half. The minutely granular surfaces are devoid of consequential detractors. The portrait is nicely struck but the eagle's neck, shield, and legs are lightly impressed, usual for the issue. NGC ID# 25GN, PCGS# 7728

**1843-C Large Date, Plain 4 Quarter Eagle, AU53  
Bold Eye Appeal**

**4173 1843-C Large Date, Plain 4 AU53 PCGS. CAC. Variety 1,** the only die marriage for the Large Date, Plain 4, although a different die pair was used for the Small Date, Crosslet 4 variety. Repunching on the left side of the C mintmark is yet another way to differentiate the two types. Doubling also shows on the Large Date, most prominently on the 1 (south) and the 8 (north). This piece is far and away nicer than most survivors of the issue of 23,076 pieces. A few light marks and the expected high-point wear explain the grade, but the richly lustrous orange-gold and yellow-gold surfaces show much eye appeal. Population: 8 in 53, 36 finer (12/14). NGC ID# 25GN, PCGS# 7728

**4174 1846 AU55 PCGS.** A somewhat scarcer issue in AU grades, the 1846 quarter eagle becomes rare in Mint State. This Choice AU example is well-struck, with just slight wear over the high points of the design. Some luster remains in the recesses amid pale yellow-gold patina. Population: 19 in 55, 19 finer (12/14). NGC ID# 25GZ, PCGS# 7740

**4175 1851-O AU58+ NGC. Variety 1.** Ample bright luster illuminates the peripheries of this lightly circulated New Orleans type coin. The strike is good except on the eagle's legs, and no marks merit discussion. The date is repunched southwest. NGC ID# 25HP, PCGS# 7762

**4176 1853 MS64 NGC.** This delightful Choice example exhibits razor-sharp definition on all design elements and vibrant mint luster throughout. The well-preserved yellow-gold surfaces add to the outstanding eye appeal. Census: 86 in 64 (1 in 64+), 23 finer (12/14). NGC ID# 25HV, PCGS# 7767

**4177 1861 New Reverse, Type Two, MS64 PCGS.** A well-preserved and lustrous near-Gem with olive-green borders and peach-gold centers. The mintage of the 1861 is much higher than all other gold quarter eagle issues of its decade combined, which makes the issue ideal for a Civil War type set.  
*Ex: Long Beach Signature (Heritage, 2/2011), lot 4347, which realized \$2,530. NGC ID# 25JX, PCGS# 7794*

**4178 1862 AU50 NGC.** Just a touch of wear shows on the well-detailed design elements of this popular Civil War issue, and the orange-gold surfaces are lightly abraded, with traces of original mint luster on both sides. NGC ID# 25JZ, PCGS# 7796

**4179 1868-S AU55 PCGS.** From a mintage of 34,000 pieces, this Choice AU specimen shows the typical softness on the eagle's leg, with just a touch of actual wear on the devices. The lightly abraded yellow and orange-gold surfaces retain much of their original mint luster. Population: 22 in 55, 29 finer (12/14). NGC ID# 25KC, PCGS# 7808

**4180 1869 AU58 NGC.** Blushes of apricot show on the peach-gold surfaces of this near-Mint quarter eagle. All design elements are sharply struck. The 1869 saw a minuscule mintage of 4,320 pieces. NGC ID# 25KD, PCGS# 7809

### 1870 Liberty Quarter Eagle, MS61 Elusive Low-Mintage Issue

**4181 1870 MS61 NGC.** Only 4,520 business-strike Liberty quarter eagles were struck at the Philadelphia Mint in 1870 and the date is a prime condition rarity in Mint State grades. This attractive MS61 example exhibits sharply detailed design elements and the pleasing greenish-gold surfaces display radiant mint luster on both sides. Census: 9 in 61, 2 finer (12/14). NGC ID# 25KE, PCGS# 7811

**4182 1878 MS65 PCGS.** A melange of yellow-gold, apricot, lime-green, and lavender toning cascades over the lustrous surfaces of this sharply struck quarter eagle. Both sides are nicely preserved. The 1878 is scarce in Gem and rare any finer. Population: 39 in 65 (1 in 65+), 7 finer (12/14). NGC ID# 25KY, PCGS# 7828

**4183 1901 MS65 PCGS.** This frosty Gem has brilliant yellow luster with exceptional eye appeal. Both sides have bold design motifs and pristine surfaces. Slight central weakness and a trivial reverse rim nick prevent a higher grade. NGC ID# 25LS, PCGS# 7853

**4184 1903 MS65 PCGS.** Variegated orange-gold and mint-green patination cascades over the radiantly lustrous surfaces of this Gem. All design elements are sharply struck on this well cared for specimen. NGC ID# 25LU, PCGS# 7855

**4185 1905 MS65+ PCGS.** A beautiful piece with flaming luster and even reddish-green toning. Both sides reveal flawlessly preserved, mark-free surfaces. NGC ID# 25LW, PCGS# 7857

**4186 1905 MS65 PCGS. CAC.** A pristine yellow Gem, this piece has a bold strike and satin luster with a single small copper toning spot outside star 3 at 9 o'clock. An excellent type candidate. NGC ID# 25LW, PCGS# 7857

## INDIAN QUARTER EAGLES

### 1908 Indian Quarter Eagle, MS65 Excellent First-Year Type Coin

**4187 1908 MS65 PCGS.** Generous luster proceeds from each side of this Gem 1908 quarter eagle, the first year of the new Bela Lyon Pratt design. This example shows deep orange-gold color with full luster and a strike that is a tad soft on the front portion of the eagle's wing. A couple of thin grazes appear under ER of LIBERTY on the obverse. NGC ID# 288Y, PCGS# 7939

### 1908 Quarter Eagle, MS65 Ideal for Type

**4188 1908 MS65 NGC. CAC.** The 1908 Indian quarter eagle is widely popular as a first-year type coin, but is seldom located finer than MS65. This Gem representative is highly lustrous in yellow-gold hues, with largely unabraded surfaces. The eagle's wing shows the diagnostic engraving deficiency, but the coin is well-struck overall. NGC ID# 288Y, PCGS# 7939

**4189 1910 MS64 NGC.** Gem examples of this early Indian quarter eagle are on every series collector's want list, but are out of range for many enthusiasts on a budget. The present Choice example, however, is remarkably well-preserved for its respective grade, and is comfortably in a lower cost bracket than its more elusive and more expensive MS65 counterparts. The strike is sharp and both sides show a blend of warm honey and olive-gold mint frost. NGC ID# 2892, PCGS# 7941

**4190 1913 MS64 PCGS. CAC.** Yellow-gold and olive coloration resides on the lustrous surfaces of this nicely struck near-Gem. Neither side reveals marks of consequence. The pleasing eye appeal is appropriately recognized by CAC. The availability of the 1913 declines significantly any finer. NGC ID# 2897, PCGS# 7945

**4191 1914 MS62 NGC.** Tints of mint-green show on the yellow-gold surfaces of this MS62 offering. The design elements are well-impressed. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS63  
Unusually Smooth Fields**

- 4192 1914 MS63 PCGS.** A well-struck, satiny example of this elusive semikey Philadelphia issue. Bronze-gold luster yields the occasional glint of deeper olive and honey. The surfaces are devoid of detracting abrasions, and we instead note just faint, scattered luster grazes in the fields — primarily on the reverse — that limit the grade. A high-end example for the MS63 level that will draw much attention from cost-conscious collectors. NGC ID# 2898, PCGS# 7946

- 4193 1914-D MS63 PCGS.** Lustrous yellow-gold surfaces display well-struck design elements, including the eagle's shoulder feathers. Both sides are minimally marked. NGC ID# 2899, PCGS# 7947

- 4194 1914-D MS63 NGC.** This Select D-mint quarter eagle displays a subtle mix of yellow- and greenish-gold and rose patina on its lustrous surfaces. The design elements are well-struck. A few handling marks in the raised, open field of the upper-right reverse determine the grade. NGC ID# 2899, PCGS# 7947

- 4195 1914-D MS64 NGC.** Strong luster issues from the peach-gold surfaces of this near-Gem, and the design elements are well-struck. Light handling marks determine the grade. The 1914-D is elusive finer than MS64. NGC ID# 2899, PCGS# 7947

- 4196 1914-D MS64 PCGS.** Khaki-gold and pink hues blend across both sides of this satiny near-Gem. The surfaces are boldly struck with good luster and excellent preservation. The Indian's cheek is noticeably clean. A tiny fragment of lint inside the holder between stars 4 and 5 should not be mistaken for a scratch. This is the second-rarest Indian Head quarter eagle issue in Gem or finer grades. NGC ID# 2899, PCGS# 7947

- 4197 1914-D MS64 NGC.** The 1914-D is one of the most elusive Indian quarter eagle issues in Gem condition, making attractive Choice examples, such as the piece here offered, widely sought by casual date collectors. The surfaces are rich in honey-gold brilliance, with only a few light luster grazes in the reverse fields limiting the grade. The strike is crisp throughout. NGC has certified only 43 numerically finer representatives (12/14). NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64+  
Elusive Any Finer**

- 4198 1914-D MS64+ PCGS.** Near-Gem is the finest numerical grade that is likely to be encountered when one is searching for a 1914-D quarter eagle. Indeed, PCGS has certified fewer than 50 coins finer. Ebullient luster resides on yellow-gold surfaces imbued with faint hints of rose. The design elements are well brought up. NGC ID# 2899, PCGS# 7947

- 4199 1925-D MS65 PCGS.** Gem Indian quarter eagles are always in demand among type collectors, and the 1925-D is one of the most available issues in this grade. The present piece is well-struck, with frosty luster in shades of honey, lilac, and rose-gold. The fields are devoid of major distractions. PCGS has certified just 33 numerically finer representatives (12/14). NGC ID# 289B, PCGS# 7949

- 4200 1926 MS65 PCGS.** A well struck Gem that has intermingled hues of mint-green and orange-gold color. Both sides have strong cartwheel luster for the issue, which greatly enhances the eye appeal. The surfaces are carefully preserved, although there are a few small contact marks in the reverse field. Indian quarter eagles, to an extent greater than any other gold series, are often collected by date and mint rather than type. This adds to the demand for important specimens. NGC ID# 289C, PCGS# 7950

- 4201 1929 MS64+ PCGS. CAC.** The Plus designation gives a good indication of just how eye-appealing this final-year type coin is for the Choice grade level. The strike is sharp, and the frosty surfaces display blended shades of honey and lilac-gold color. The obverse appears to grade full MS65, but the upper-right reverse field shows a few too many small ticks to warrant the higher numeric level. NGC ID# 289F, PCGS# 7953

**1929 Indian Quarter Eagle, MS65**

- 4202 1929 MS65 NGC.** The final issue of the Indian quarter eagle series, and a plentiful date through MS64. In MS65, however, the 1929 quarter eagle is scarce, and it is rare any finer, as NGC has only certified four examples numerically finer than this Gem (12/14). Copper-gold luster adorns both sides, with sharply struck design elements. No marks of consequence are observed upon close examination. NGC ID# 289F, PCGS# 7953

**THREE DOLLAR GOLD PIECES**

- 4203 1854 AU58 NGC.** The 1854 is one of the more available issues in the three dollar series and very popular as a type coin. Considerable bright luster issues from the yellow-gold surfaces of this near-Mint example. The design elements are well-brought up. These attributes add up to very pleasing eye appeal. NGC ID# 25M3, PCGS# 7969

- 4204 1854 MS61 NGC.** A pleasing lower-grade Mint State example of this popular type issue. Shimmering honey-gold luster blankets each side, and the surfaces are pleasantly clean for the grade. The bow knot is slightly soft, as usual. NGC ID# 25M3, PCGS# 7969

**1872 Three Dollar Gold, AU58**  
**Seldom Seen in High Grade**

**4205 1872 AU58 PCGS. CAC.** The 1872 three dollar gold piece had a low mintage of only 2,000 coins, and was not saved to the extent as were later issues from this series. As a result, this issue makes only infrequent appearances at auction in AU and better grades. This near-Mint State example displays medium honey-gold luster and semiprooflike mirroring in the fields. The bowknot is soft, but the other details are sharply brought up and the high points exhibit only minor friction. Population: 43 in 58, 40 finer (12/14). NGC ID# 25MV, PCGS# 7994

**4206 1874 AU55 NGC.** Hints of reddish patina visit the yellow-gold surfaces of this Choice AU three dollar. The design features are well-defined except for the usual softness in the bowknot. A few minute marks are visible on the obverse. A plentiful issue, the 1874 is a popular type-coin choice. NGC ID# 25MX, PCGS# 7998

**4207 1878 AU58 NGC.** An attractive near-Mint example of this popular three dollar type coin, with well-detailed design elements and lustrous orange-gold surfaces that show only a few minor abrasions. NGC ID# 25MZ, PCGS# 8000

**4208 1878 MS62 NGC.** One of the few high-mintage three dollar gold pieces, always a favorite date among type collectors and gold specialists. This example is richly lustrous with original orange-gold toning. A sharp, Select Uncirculated example, hard to improve upon for the grade. NGC ID# 25MZ, PCGS# 8000

**4209 1879 AU55 NGC.** Yellow-gold luster resides in the protected areas of the well-defined design elements of this Choice AU three dollar while rich apricot-gold covers the fields. Both sides are remarkably clean for a gold coin having seen some circulation. NGC ID# 25N2, PCGS# 8001

**1889 Three Dollar Gold, AU58**  
**Richly Patinated**

**4210 1889 AU58 PCGS.** A collectible near-Mint example of this final-year three dollar gold issue. The strike is sharp and only slight friction is evident over the high points of the design. Largely orange-gold in color, the surfaces also show overtones of deeper lilac and pale violet. An original, problem-free date or type representative. NGC ID# 25NC, PCGS# 8011

**EARLY HALF EAGLES**

**1802/1 Half Eagle, AU Details**  
**BD-2, Centered Overdate**

**4211 1802/1 BD-2, High R.4 — Bent — PCGS Genuine. AU Details.** Bass-Dannreuther Die State c/c, terminal — a very early stage of this final die state, before the crack over OF breaks further into a rim cud. Appealing orange-gold patina blankets both sides, while the strike is sharp and only slight wear is evident over the devices. A slight, minor bend in the planchet is detectable near the lower-right reverse border, but it is not immediately obvious. BD-2 is fairly scarce, with only 75 to 100 examples believed extant in all grades. PCGS# 519885 Base PCGS# 8083

**1808 Wide 5D Half Eagle, BD-4, Unc Details**  
**Late-State Boldly Clashed Reverse, BD-Unlisted**

**4212 1808 Wide 5D, BD-4, High R.3 — Obverse Scratched — NGC Details. Unc.** Bass-Dannreuther Die State c/"b," strongly clashed reverse. The nonoverdate obverse die combined with the widely spaced 5D on the reverse is sufficient to identify this relatively available — meaning, somewhat scarce — die pair. A series of pinscratches appears just before Liberty's face and on her neck but this is an attractive coin nonetheless, showing deep reddish-orange patina, a bold strike on a well-centered planchet, and immense eye appeal. Further extending the collectibility is the appearance of bold die clashing in the region of STATES and PLURIBUS from the obverse die, a later reverse state unlisted in Bass-Dannreuther. More bold signs of clashing appear on each side of the eagle's wings.

**CLASSIC HALF EAGLES**

**4213 1834 Plain 4 AU53 PCGS. Breen-6502, McCloskey 4-C, R.2.** The forehead curl displays minor wear but luster fills the margins. The sun-gold surfaces display distributed small marks. A popular Classic type variety. Certified in a green label holder. NGC ID# 25RR, PCGS# 8171

**4214 1834 Plain 4 AU55 PCGS. Breen-6501, McCloskey 3-A, R.3.** A pleasing type coin, this Choice AU Classic Head five is well-struck and shows just minor wear over the high points of the design. Bright, yellow-gold patina accents the semiprooflike fields on each side. NGC ID# 25RR, PCGS# 8171

**4215 1836 XF45 PCGS. CAC. Breen-6509, McCloskey 6-E, R.4.** Second Head, Large Date. A middle die state with a lengthy vertical crack from the obverse center to 6 o'clock. Originally toned sea-green with glimmers of golden-brown luster in protected areas. Minimally abraded aside from a dull mark near the base of the shield. NGC ID# 25RY, PCGS# 8174

- 4216 1836 AU55 NGC. Breen-6509, McCloskey 4-C, R.3.** Peach-gold surfaces display traces of luster in the recessed areas. The design elements are well-struck save for softness in a couple of star centers. NGC ID# 25RY, PCGS# 8174

## LIBERTY HALF EAGLES

- 4217 1840-O Narrow Mill AU55 NGC. Variety 2.** The majority of extant 1840-O half eagles are in the XF to AU grade range, and Mint State survivors are decidedly rare. Winter, however, notes that many representatives have been cleaned or otherwise brightened, and any example with fully original color is highly sought-after among branch mint gold specialists. This is just such a coin, as rich orange-gold overtones complement natural bronze-gold patina on each side. Only light wear is present over the design elements, and major surface abrasions are minimal, with the most notable being an old scratch on the reverse below the second S in STATES. Census: 29 in 55, 40 finer (12/14). NGC ID# 25SK, PCGS# 8200

### 1844-C Half Eagle, VF35 Choice Original Patina

- 4218 1844-C VF35 PCGS. CAC. Variety 1.** The 1844-C is one of the scarcer half eagle issues from the Charlotte Mint. Only 23,631 pieces were struck, and it is believed that just 125 to 175 examples are extant in all grades. This example is well-circulated, as are most examples of this issue, but is outstanding in that it retains fully original patina — largely green-gold, but with overtones of coppery-gold and bronze color. Strong detail also remains, suggesting a sharp strike. NGC ID# 25T8, PCGS# 8220

### 1846-C Half Eagle, VF35 Pleasing Patina, Scarce in All Grades

- 4219 1846-C VF35 PCGS. CAC. Variety 1.** Sole dies for the year. This is a midrange piece that is faintly radiant with surfaces between antique-gold and olive-bronze in color. A small nick on Liberty's chin is faint and the only mentionable surface flaw. The 1846-C is one of the scarcest half eagles from the Charlotte Mint, with only 100 to 125 examples believed extant in all grades, and this issue is decidedly rare finer than XF. This is a lovely, collector-grade piece that just missed an XF grade from PCGS. Population: 1 in 35, 50 finer (12/14). NGC ID# 25TG, PCGS# 8227

### 1847-D Half Eagle, AU55 Lovely Original Color

- 4220 1847-D AU55 NGC. Variety 19-I.** The 1847-D half eagle, with as many as 325 examples believed extant, is one of the more plentiful issues from this mint overall, but in high grades it is somewhat scarcer than is generally realized. This Choice AU representative displays original olive-gold patina, with just slight wear over sharply detailed devices. The surfaces are smooth and the eye appeal is exceptional for a Dahlonga issue. Census: 18 in 55, 36 finer (12/14). NGC ID# 25TP, PCGS# 8234

### 1850-C Half Eagle, AU50 Lovely Original Patina

- 4221 1850-C AU50 PCGS. CAC. Variety 2.** The mintmark is furthest left on this variety. The reverse is cracked through the FI in FIVE, but the cud has not yet formed. The 1850-C is one of the more plentiful half eagles from this mint, with as many 350 pieces extant in all grades, but most examples have been cleaned or otherwise brightened, and finding a piece with deep, original patina can be challenging. This AU example is just such a coin, however, with luminous olive-gold color over both sides that exhibits the occasion orange-gold and violet overtone. The eagle's neck and the arrow fletchings are slightly soft, but the design elements are otherwise well brought up. An immensely attractive Charlotte type coin. Population: 22 in 50, 55 finer (12/14). NGC ID# 25TZ, PCGS# 8244

### 1852-C Half Eagle, XF45 Collector-Grade Charlotte Five

- 4222 1852-C XF45 PCGS. CAC. Variety 1.** The 1852-C is fairly plentiful in the context of Charlotte half eagles, with more than 300 examples believed extant — an ideal date for type purposes. This Choice XF example is only slightly worn on the high points of the design, with much detail remaining. Tinges of coppery-orange accent natural green-gold patina over each side. NGC ID# 25UB, PCGS# 8251

- 4223 1852-D VF25 PCGS. Variety 32-V.** This moderately worn example would make an attractive entry to the world of Southern gold. Medium-yellow and antique-gold surfaces show scattered light marks and a small circular depression to the left of Liberty's chin. Ex: ANA Signature (Heritage, 8/2010), lot 5952. NGC ID# 25UC, PCGS# 8252

**1854-C Five Dollar, XF40  
Challenging Late-Date Issue**

- 4224 1854-C XF40 PCGS. CAC. Variety 1.** A distinctly original Charlotte half eagle from one of the scarcest issues in the 1850s. The North Carolina mint struck 39,283 examples, but no more than 140 to 170 pieces are believed to exist today. This piece is lightly circulated, but retains completely natural, green-gold coloration, along with tiny remnants of soil in the crevices. Population: 13 in 40, 52 finer (12/14). NGC ID# 25UH, PCGS# 8257

- 4225 1854-D Medium D, Variety 37-CC, XF45 NGC.** The 1854-D half eagle is a fairly plentiful Dahlonega issue, ideal for the type collector seeking a single example from this mint. The present Choice XF example is well-struck around the most of the borders, although the reverse denticles grow weak near 9 o'clock. The specialist will appreciate the smooth, problem-free surfaces and appealing orange-gold coloration. PCGS# 88258

- 4226 1855-C — Improperly Cleaned — NGC Details. AU. Variety 1.** The 1855-C half eagle is a fairly scarce issue, with only 175 to 225 examples believed extant in all grades. This piece is well-detailed for the issue, with appealing honey-gold patina overall. Evidence of light cleaning precludes a numeric grade from NGC. NGC ID# 25UR, PCGS# 8262

- 4227 1855-O XF40 PCGS. Variety 1.** The only known dies. This green-label certified example has excellent eye appeal with deep rose-gold surfaces showing faint field reflectivity with a few scattered marks on each side. NGC ID# 25UT, PCGS# 8264

**1858-C Five Dollar, XF40  
Attractive, Collectible Example**

- 4228 1858-C XF40 PCGS. CAC. Variety 1.** The usual variety, with the mintmark slightly further left. The 1858-C is one of the more plentiful half eagle issues from the later years of the Charlotte Mint's production period, with more than 275 examples believed extant. Pieces that retain old-time patina, however, are scarce in all grades, as most examples have been cleaned or otherwise brightened. This lightly circulated piece is well-detailed for the XF grade level, with consistent olive-gold color and smooth, problem-free surfaces. NGC ID# 25V8, PCGS# 8277

**1866 Half Eagle, Crisp AU55  
First-Year With Motto Issue, Low-Mintage Rarity**

- 4229 1866 AU55 NGC.** This first-year With Motto P-mint issue saw a stingy mintage of only 6,700 circulation strikes during an era when Philadelphia was producing few of the half eagle denomination each year. This Choice AU piece boasts golden-yellow surfaces that show a modicum of light abrasions but no mentionable drawbacks. The strike is crisply executed. A great coin that will appeal to collectors of low-mintage gold rarities. Census: 8 in 55, 18 finer (12/14). NGC ID# 25VZ, PCGS# 8311

- 4230 1867-S XF40 NGC.** Only 29,000 Liberty half eagles were struck in 1867 at the San Francisco Mint, making the issue scarce-to-rare in all grades. This lightly worn XF example offers bright lemon-yellow surfaces that show a scattering of minor abrasions. Census: 6 in 40, 47 finer (12/14). NGC ID# 25W4, PCGS# 8314

- 4231 1879-S MS63 NGC.** The 1879-S Liberty half eagle is a scarce issue in all Mint State grades. Shimmering luster adds to the eye appeal of this Select representative. The obverse reveals hints of red. Abrasions on Liberty's face and neck likely held this piece from a higher grade. Census: 25 in 63, 13 finer (12/14). NGC ID# 25X9, PCGS# 8350

- 4232 1880 MS64 PCGS.** MS64 is the last grade in which the 1880 half eagle can be termed available, as finer pieces are decidedly scarce. This representative is well-struck, with frosty green-gold luster and just a few minor, grade-consistent ticks on each side. PCGS has certified only 17 numerically finer representatives (12/14). NGC ID# 25XA, PCGS# 8351

- 4233 1880-S MS62 Deep Mirror Prooflike NGC.** NGC has certified 2,161 examples of the 1880-S five dollar, and this MS62 piece is the sole Deep Mirror Prooflike specimen! Yellow-gold surfaces display modest field-motif contrast. All design elements are sharply defined. Scattered light marks limit the numerical grade. PCGS# 98353 Base PCGS# 8353

**1882 Liberty Half Eagle, MS65  
Only Three Finer Coins at NGC**

- 4234 1882 MS65 NGC.** From a generous mintage of 2.5 million pieces, the 1882 Liberty half eagle is still rare at the MS65 level, and finer examples are almost unobtainable. This impressive Gem displays razor-sharp definition on all design elements and the well-preserved peach-gold surfaces are brightly lustrous. Census: 36 in 65 (1 in 65+), 3 finer (12/14). NGC ID# 25XG, PCGS# 8358

### 1882-S Liberty Half Eagle, MS65

- 4235 1882-S MS65 NGC.** Original peach and lime tints alternate across this lustrous and attractively preserved representative. Well struck, and nearly unobtainable any finer, since NGC and PCGS combined have graded only 4 pieces above the MS65 level (12/14). The mintmark is clearly repunched within the lower loop. NGC ID# 25XJ, PCGS# 8360

### 1886-S Liberty Five, MS65+ Only One Finer Coin at NGC

- 4236 1886-S MS65+ NGC.** The enormous mintage exceeding 3.2 million coins is responsible for the survival of high-grade Gem examples such as this compelling coin. Higher-grade specimens are virtually unobtainable. Orange-gold centers cede to mint-green near the rims on each side, and a finer grade is precluded only by a couple of scattered reeding marks. The strike is sharp throughout. Census: 53 in 65 (3 in 65+, 1 in 65 ★), 1 finer (12/14). NGC ID# 25XV, PCGS# 8370
- 4237 1893 MS64+ NGC.** A slightly better Philadelphia issue in high grades, the 1893 half eagle is scarce above the Choice level. This plus-graded piece is sharply struck, with frosty wheat-gold luster and grade-consistent abrasions. NGC ID# 25YA, PCGS# 8383
- 4238 1893-CC AU53 PCGS. Variety 1-A.** A spike from the rim between star 1 and the date identifies the variety. Peach-gold surfaces exhibit well-struck design elements. Both sides are quite clean. NGC ID# 25YB, PCGS# 8384
- 4239 1896-S MS62 PCGS.** Scattered abrasions define the grade on this example, though the sharp strike and vibrant yellow-gold mint luster balance the eye appeal. The 1896-S half eagle is scarce in all Mint State grades, and is genuinely rare finer than MS62. Population: 16 in 62, 11 finer (12/14). NGC ID# 25YL, PCGS# 8393
- 4240 1897 MS65 PCGS.** This impressive Gem displays lustrous orange and rose-gold surfaces with no mentionable distractions and outstanding eye appeal. The design elements are sharply detailed throughout. Population: 27 in 65 (3 in 65+), 2 finer (12/14). NGC ID# 25YM, PCGS# 8394
- 4241 1899-S MS64 PCGS.** Lustrous yellow-gold surfaces exhibit well-struck design elements save for minor softness on the arrow feathers. A few minuscule marks limit the grade. Very scarce at this level. Population: 42 in 64 (3 in 64+), 8 finer (12/14). NGC ID# 25YT, PCGS# 8399

## INDIAN HALF EAGLES

- 4242 1908-D MS63 PCGS.** Lower-level Uncirculated 1908-D half eagles are seen with frequency through MS63 but finer specimens are scarce to rare. Yellow-gold lustrous surfaces display well-struck design elements and reveal some grade-defining marks. NGC ID# 28DE, PCGS# 8511
- 4243 1909 MS64 NGC.** Honey-gold surfaces display pleasing luster and well-struck design features, including fairly good detail in the eagle's shoulder feathers. There are fewer marks than what might be expected for the grade designation. The 1909 five becomes conditionally scarce above MS64. NGC ID# 28DH, PCGS# 8513
- 4244 1909 MS64 NGC. CAC.** Both sides of this near-Gem are awash with peach-gold luster and show well-struck design motifs, though the eagle's shoulder is a tad soft. A few minute ticks are noted in the raised open fields of the reverse. NGC ID# 28DH, PCGS# 8513
- 4245 1909-D MS64 NGC.** An attractive Choice specimen from the second year of the series, this coin exhibits sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show only minor signs of contact. NGC ID# 28DJ, PCGS# 8514

### 1909-O Half Eagle, XF Details

- 4246 1909-O — Planchet Flaw — PCGS Genuine. XF Details.** Long, pronounced planchet laminations behind and before the eagle on the reverse are the primary cause for PCGS not giving this piece a numeric grade, though such curiosities are of interest to some specialists. The coin is otherwise bright, with green-gold, slightly granular surfaces. The mintmark is clear. This is the only issue of the Indian Head type struck at the New Orleans Mint before it ceased coinage operations in early 1909. NGC ID# 25ZK, PCGS# 8515
- 4247 1911-D AU53 PCGS.** With a mintage of 72,500 coins, the 1911-D is one of the most elusive dates in the Indian Head half eagle series. This AU53 offering displays orange-gold surfaces and well-defined devices. Minimally abraded for a briefly circulated coin. NGC ID# 28DR, PCGS# 8521
- 4248 1912 MS63 PCGS. CAC.** With a mintage of 790,000 coins, the 1912 Indian half eagle is one of the more plentiful issues in the series overall, but it becomes increasingly difficult to locate in the finer grades of Mint State. This Select example is well-struck, with satiny green-gold luster and fewer abrasions than are expected for the grade. NGC ID# 28DS, PCGS# 8523
- 4249 1915 MS63 NGC.** The peach-gold surfaces of this Select five dollar exhibit well-struck design features, including the eagle's shoulder feathers. Light marks on the raised, exposed reverse fields limit the grade. NGC ID# 28DX, PCGS# 8530

## LIBERTY EAGLES

**4250 1850-O VF35 NGC. Variety 2.** The scarcer of the two known varieties, with the date positioned slightly further left. This New Orleans issue had a mintage of only 57,500 pieces, and is notably challenging to locate in pleasing condition. The current Choice AU coin is a remarkable piece that showcases a thick crust of coppery-orange, and olive-gold color. Wear is consistent with the grade and a few minor marks are present, but the eye appeal of this coin to the collector who appreciate old-time patina is seemingly unsurpassable. NGC ID# 2639, PCGS# 8605

**4251 1854-S AU53 NGC.** The San Francisco Mint struck a substantial mintage of 123,826 Liberty eagles in 1854, the first year of coinage operations at the Western facility. The issue is not too difficult to locate in circulated grades, but Mint State specimens are quite elusive in today's market. This attractive AU53 specimen offers lustrous yellow and greenish-gold surfaces, with a number of minor abrasions and some light wear on the design elements. NGC ID# 263K, PCGS# 8615

### 1858-O Eagle, Lovely AU55 Semiprooflike Luster

**4252 1858-O AU55 PCGS. Variety 1.** A notably low mintage of 20,000 pieces was accomplished for the 1858-O eagle, but examples survive today in circulated grades; Mint State coins are far more elusive. This lovely Choice AU piece displays much semiprooflike luster on problem-free, sharply struck amber-gold surfaces with top-notch eye appeal. Population: 23 in 55, 19 finer (12/14). NGC ID# 263X, PCGS# 8626

**4253 1860-O — Cleaning — PCGS Genuine. AU Details. Variety 2.** The Low Date variant of this scarce New Orleans issue. Well struck and only minimally circulated, but the sun-gold surfaces are bright from cleaning. The fields display scattered small abrasions, but no more than is customary for the grade. NGC ID# 2645, PCGS# 98631

**4254 1860-O — Streak Removed — PCGS Genuine. AU Details. Variety 2.** The low date variant of this scarce New Orleans issue, the final ten dollar emission from the facility prior to its 1879 re-opening. The present yellow-gold representative has minimal wear. The left obverse field has a streak of struck-in grease, and the streak has a granular border. NGC ID# 2645, PCGS# 98631

**4255 1866 Motto — Cleaning — PCGS Genuine. XF Details.** Gold coin did not circulate in most of the United States in 1866. Exporters and bankers preferred the greater convenience of the double eagle denomination. Because of these factors, the 1866 eagle has a business mintage of only 3,750 pieces. The few gold collectors of the day purchased proofs, and no consideration was given to the 1866 until decades later. PCGS estimates only 75 to 90 pieces are known, making the issue rarer than a 1794 dollar. The present yellow-gold example displays ample definition along with pockets of luster. Hairlines emerge beneath a glass. The date is repunched east. NGC ID# 264J, PCGS# 8649

### 1866-S Motto Ten, VF35 Low-Mintage Issue

**4256 1866-S Motto VF35 PCGS.** A scarce issue, and the first of the With Motto eagles, with production limited to just 11,500 coins that mostly entered circulation at the time they were minted. Pleasing medium yellow with subdued peripheral orange toning on both sides. An important opportunity for the advanced Liberty eagle collector. Population: 5 in 35, 19 finer (12/14). Ex: ANA Signature (Heritage, 7/2008), lot 3138; ANA Signature (Heritage, 8/2010), lot 6037. NGC ID# 264K, PCGS# 8650

**4257 1870-S — Cleaning — PCGS Genuine. XF Details.** Another underappreciated rarity from the Liberty series, the 1870-S has a low survival rate from its small mintage of 8,000 pieces. PCGS estimates 80 to 100 examples are known. The present apricot-gold representative is well defined but glossy from a wipe. NGC ID# 264V, PCGS# 8659

### 1881-S Eagle, MS63+ Sole Finest at PCGS

**4258 1881-S MS63+ PCGS.** This 1881-S eagle is the sole finest certified of the issue at PCGS, although NGC reports two in finer grades. Deeply lustrous surfaces show bold eye appeal via the sharp strike and lovely apricot-gold color. A few scattered light marks appear, along with a couple of blunt larger abrasions on the bust truncation and field nearby on the obverse. Population: 46 in 63 (1 in 63+), 0 finer (12/14). NGC ID# 265Z, PCGS# 8694

**4259 1882-CC — Cleaning — PCGS Genuine. XF Details. Variety 2-A.** The 1882-CC has a meager mintage of 6,764 pieces, and approximately 300 pieces have survived. Nearly all are circulated, although a handful of coins have been certified as Mint State. The present lightly worn example has noticeable luster and glossy caramel-gold surfaces. The fields exhibit occasional moderate marks. NGC ID# 2663, PCGS# 8696

**4260 1882-S MS63 NGC.** The 1882-S ten dollar is seldom encountered in the Select level of preservation and becomes a significant condition rarity in MS64. Peach-gold luster embraces both sides of the present offering, each of which exhibits sharply struck design elements. Minor grazes are slightly more prominent on the obverse. Census: 22 in 63, 3 finer (12/14). NGC ID# 2665, PCGS# 8698

**4261 1883-CC VF20 NGC. Variety 2-C.** A challenging Carson City issue with a mintage of only 12,000 pieces. This example is well-circulated, uniform bronze-gold patina. A collector-grade example. NGC ID# 2667, PCGS# 8700

**4262 1886 MS62 PCGS. CAC.** A pleasing example of this slightly better Philadelphia issue, this 1886 Liberty eagle displays shimmering yellow-gold luster and sharp design elements. Scattered abrasions contribute to the grade. PCGS has seen 43 numerically finer coins (12/14). NGC ID# 266F, PCGS# 8708

**4263 1886-S MS63 PCGS.** With a mintage of 826,000 coins, the 1886-S eagle is plentiful in lower grades, although rarely encountered in grades finer than this Select Mint State piece, with only 20 better examples certified by PCGS (12/14). Both sides have brilliant yellow luster and scattered, grade-limiting marks, with delicate peripheral green toning. NGC ID# 266G, PCGS# 8709

**4264 1886-S MS63+ PCGS. CAC.** Frosty luster delivers warm honey-gold color in the centers and lighter lilac hues around the peripheries. The strike is sharp, and the surfaces display only minor surfaces grazes, with no obtrusive abrasions present. PCGS has encapsulated 20 numerically finer representatives (12/14). NGC ID# 266G, PCGS# 8709

**4265 1887-S MS63 NGC.** The lustrous surfaces of this Select ten dollar display peach-gold color and exhibit sharply struck design elements. Scattered minuscule marks determine the grade. Census: 66 in 63, 12 finer (12/14). NGC ID# 266J, PCGS# 8711

#### 1891-CC Eagle, Sharp MS62

**4266 1891-CC MS62 PCGS. Variety 2-B,** showing the first C in the mintmark close to the tip of the fletchings and a die line in the top loop of the R of LIBERTY. This piece boasts a strike that is nice and sharp although not absolute, and good luster and eye appeal prevail on surfaces that range from wheat-gold through reddish-orange. An attractive example of this issue of slightly more than 100,000 pieces. NGC ID# 266U, PCGS# 8720

**4267 1896-S MS62 PCGS.** This crisply struck scarcer date Liberty ten has good luster across radiant and lightly marked butter-gold surfaces. An excellent value relative to the few certified finer. Population: 26 in 62, 7 finer (12/14). NGC ID# 267C, PCGS# 8736

**4268 1899-O MS62 PCGS. Variety 4.** A scarcer New Orleans issue in Mint State, rarely seen finer than this example. Both sides display sharp design definition and frosty honey-gold luster. Grade-limiting surface flaws are limited to faint chatter in the exposed areas, with no individually detracting abrasions present. Population: 40 in 62 (2 in 62+), 16 finer (12/14). NGC ID# 267K, PCGS# 8743

**4269 1899-S MS63 NGC.** Despite a mintage exceeding 800,000 pieces the 1899-S eagle is challenging in MS63 and rare numerically finer. Pleasing luster issues from the yellow-gold surfaces of this sharply struck Select example. Grade-determining minute marks are more apparent on the obverse. NGC ID# 267L, PCGS# 8744

#### 1900 Ten Dollar, Lustrous MS65

**4270 1900 MS65 PCGS.** The 1900 ten dollar is an available issue in the lower Mint State grades but Gems are very scarce and higher-grade pieces are rare. The honey-gold surfaces of this MS65 specimen yield strong luster and sharply struck design elements. A few minor grazes are within the parameters of the grade designation. Population: 20 in 65 (1 in 65+), 3 finer (12/14). NGC ID# 267M, PCGS# 8745

**4271 1901-O MS61 PCGS.** The lustrous surfaces of this low-mintage O-mint end dollar display a mix of peach and lime-green colors. All design elements are sharply defined. A few minute marks limit the grade. The 1901-O can be located with patient searching in the lower Mint State grades, but becomes very scarce in MS63. NGC ID# 267R, PCGS# 8748

**4272 1901-S MS64 PCGS.** Vibrant cartwheel mint luster and sharply detailed design elements are the calling cards of this attractive Choice example, with vivid orange-gold surfaces that show only a few minor contact marks. NGC ID# 267S, PCGS# 8749

**4273 1906-D MS64 NGC.** Vibrant luster endows this sharply struck, peach-gold near-Gem. The reverse is quite smooth while the obverse reveals a few more scattered marks. The 1906-D eagle is conditionally scarce at this level and rare any finer. NGC ID# 2685, PCGS# 8760

**4274 1906-O MS62 PCGS. Variety 1.** The 1906-O eagle is popular as the final issue of this denomination struck at the New Orleans Mint. The Denver Mint opened that same year, taking over a significant portion of the necessary work load, and the New Orleans facility ceased coinage completely three years later. This example is well-struck, with radiant honey-gold luster. Light chatter on Liberty's cheek is all that limits an MS63 grade from PCGS. NGC ID# 2686, PCGS# 8761

#### 1907-D Liberty Ten, Exemplary MS64

**4275 1907-D MS64 PCGS.** Despite the reported mintage exceeding 1 million coins, the 1907-D Liberty Head eagle is scarce at the Choice level of the present coin, and very rare in Gem grade. It is also a well-made issue on those rare occasions when Mint State examples appear. This PCGS-certified near-Gem boasts exemplary luster and a sharp strike on medium orange-gold surfaces. This piece is only a few tiny ticks away from the Gem grade. Population: 53 in 64 (1 in 64+), 0 finer (12/14). NGC ID# 2689, PCGS# 8764

## INDIAN EAGLES

**4276 1907 No Periods AU58 PCGS.** Generous luster emanates from the yellow-gold surfaces of this near-Mint eagle. The design elements are well-defined. An ideal type coin. NGC ID# 28GF, PCGS# 8852

**4277 1907 No Periods MS62 PCGS.** A melange of peach and mint-green resides on the lustrous surfaces of this well-defined No Periods eagle. A handful of minute marks limits the grade. NGC ID# 28GF, PCGS# 8852

### 1907 No Periods Indian Eagle, MS64 Superior Quality for the Grade

**4278 1907 No Periods MS64 NGC.** An exceptional coin for the grade, this first-year No Motto Indian ten dollar displays satiny, honey-gold luster and boldly rendered devices. The surfaces are devoid of noticeable abrasions, as close examination reveals only minor stacking marks on the high points of Liberty's cheek and the eagle's feathers. Few coins are visually superior within the Choice grade level. NGC ID# 28GF, PCGS# 8852

### 1907 No Periods Ten, MS64 Exceptional Quality for the Grade

**4279 1907 No Periods MS64 NGC.** About as high-end as is technically possible for the MS64 grade level, this No Motto type Indian ten is remarkably devoid of any perceptible abrasions in the fields, and we note only faint evidence of stacking marks on the highest points of the devices that appear to limit NGC's assessment. Satiny honey-gold luster illuminates each side and the design elements are well brought up. NGC ID# 28GF, PCGS# 8852

**4280 1908-D No Motto MS61 NGC.** Honey-gold surfaces display well-struck devices and soft luster. Light marks are more prevalent on the reverse. The D mintmark is positioned high. NGC ID# 28GH, PCGS# 8854

**4281 1908 Motto MS63 NGC.** The 1908 Motto Indian eagle is an important date for type purposes. This attractive, Select specimen displays lightly marked orange and rose-gold surfaces with well-detailed design elements and strong eye appeal. NGC ID# 28GJ, PCGS# 8859

**4282 1908 Motto MS63 PCGS.** Strong luster illuminates the peach-gold surfaces of this Select Indian Head eagle. Scattered minute marks determine the grade. The 1908 is the first issue with the motto IN GOD WE TRUST, and is consequently a popular type coin. NGC ID# 28GJ, PCGS# 8859

**4283 1908-D Motto AU58 PCGS. CAC.** Considerable mint luster shows on the yellow-gold surfaces of this near-Mint With Motto ten dollar. The design elements are well-defined. A few minute marks do not detract. NGC ID# 28GK, PCGS# 8860

**4284 1909 MS62 PCGS.** The example is well-struck, with rich satiny luster, as is typical of this issue. No individually detracting abrasions are present, and we instead note only minor chatter in the fields and on Liberty's cheek that limits the grade. NGC ID# 28GM, PCGS# 8862

**4285 1909 MS62 PCGS.** Lustrous yellow-gold surfaces are well-defined. Abrasions are visible on the Indian's cheek and eagle's shoulder. NGC ID# 28GM, PCGS# 8862

**4286 1909 MS62 PCGS.** An appealing MS62 example of this early series issue, with well-detailed design elements and vibrant mint luster on both sides. The colorful orange-gold surfaces show a scattering of minor contact marks that explain the grade. NGC ID# 28GM, PCGS# 8862

### 1909 Indian Eagle, MS63 Underrated Early Series Issue

**4287 1909 MS63 NGC.** From a reported mintage of 184,789 pieces, the 1909 Indian eagle is an underrated issue, outside of series specialists. This impressive Select example exhibits sharply detailed design elements and pleasing orange-gold surfaces, with vibrant mint luster and a scattering of minor contact marks on both sides. NGC ID# 28GM, PCGS# 8862

**4288 1909-D MS61 PCGS.** A lustrous green-gold Indian ten. Only infrequent and incidental marks emerge beneath a loupe. Although the 1910-D had a generous mintage of 2,356,640 pieces, the 1909-D production was a scant 121,540 pieces. Housed in a green label holder. NGC ID# 28GN, PCGS# 8863

### 1909-D Indian Eagle, MS62 Scarce in Finer Grades

**4289 1909-D MS62 PCGS.** From a small mintage of 121,540 pieces, the 1909-D Indian eagle is a scarce issue in grades above the MS62 level. This attractive specimen offers well-detailed design elements and a bold mintmark, with lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

**4290 1910-D MS64 PCGS.** Strong luster issues from both sides of this near-Gem eagle, each of which exhibits well-struck design elements. Peach-gold surfaces display slivers of orange at the margins. NGC ID# 28GS, PCGS# 8866

- 4291 1910-S MS61 PCGS.** Lustrous peach-gold surfaces display relatively well-struck devices. Numerous minuscule ticks show under magnification. NGC ID# 268D, PCGS# 8867

**1910-S Eagle, Attractive MS62  
Condition Rarity in Finer Grades**

- 4292 1910-S MS62 PCGS.** The mintage figure of the 1910-S eagle — at 811,000 coins the largest S-mint in the Indian Head series — is deceptive, as nearly all of the production was melted a couple of decades afterward. Today only a few thousand survive in all grades. This piece shows good luster and attractive peach-gold color with scattered scrapes and ticks accounting for the grade, including a patch on the jawline and neck of Liberty. The strike is typical, with the 19 in the date weak (often seen on the issue) and the 10 much sharper. MS63 examples are much more elusive and will cost far more. NGC ID# 268D, PCGS# 8867

- 4293 1911 MS64 NGC.** Lustrous yellow-gold surfaces exhibit well-struck design elements. Light marks are visible on the Indian's cheek and the eagle's shoulder. The 1911 becomes scarce any finer. NGC ID# 28GT, PCGS# 8868

- 4294 1911 MS64 NGC. CAC.** The 1911 ten dollar is a well-produced issue in terms of strike and planchet quality. The present near-Gem offering is no exception as its lustrous yellow-gold surfaces display well-defined devices. Moreover, both sides are quite nicely preserved for the grade designation. NGC ID# 28GT, PCGS# 8868

- 4295 1911-S AU53 PCGS.** The 1911-S is marginally available in the AU grade level and becomes challenging in mint condition. This yellow-gold AU53 displays luster in the protected areas and is well-defined save for some high-point wear. NGC ID# 28GV, PCGS# 8870

- 4296 1912 MS64 NGC.** Lustrous yellow-gold surfaces exhibit well-struck design elements. Faint marks on Liberty's cheek preclude Gem status. The 1912 eagle is challenging any finer. NGC ID# 28GW, PCGS# 8871

- 4297 1912-S — Questionable Color — PCGS Genuine. Unc Details.** The rich and uniform lemon-gold toning is attractive, but flagged as suspicious by PCGS. A lustrous branch mint Indian ten with few marks and only slight incompleteness of definition on the high points of the eagle's front wing. NGC ID# 28GX, PCGS# 8872

- 4298 1913 MS64 PCGS Secure.** The 1913 Indian eagle is not too difficult to locate in Choice condition, but the issue is very scarce in higher grades. This well-detailed MS64 example offers well-preserved orange-gold surfaces and vibrant mint luster throughout. NGC ID# 28GY, PCGS# 8873

- 4299 1914-S AU58 PCGS.** The 1914-S Indian eagle is a challenging date in Mint State, making high-end AU examples such as this piece ideal for the budget-conscious collector. Both sides retain moderate luster beneath honey-gold patina. The strike is sharp, with only minor friction over the high points of the design. NGC ID# 28H4, PCGS# 8877

- 4300 1914-S AU58 PCGS. CAC.** The yellow-gold surfaces of this near-Mint ten dollar retain considerable luster. Well-defined and revealing no significant marks. NGC ID# 28H4, PCGS# 8877

**1915-S Ten Dollar, Bright AU58**

- 4301 1915-S AU58 NGC.** The 1915-S ten dollar saw a low mintage of 59,000 pieces, many of which were apparently melted in the 1930s. Mint State coins can be difficult to come by, especially finer than MS62. This bright yellow-gold near-Mint example retains luster in the recessed areas and is relatively well-defined. Scattered minuscule marks are visible. NGC ID# 28H6, PCGS# 8879

- 4302 1926 MS64 NGC.** With a mintage in excess of 1 million coins, the 1926 Indian ten is a favorite for type purposes. This Choice example is well-struck, with satiny yellow-gold luster. A few small ticks are present — behind Liberty's eye on the obverse and on the eagle's body on the reverse. NGC ID# 28H9, PCGS# 8882

**1926 Eagle, Bold Gem Example**

- 4303 1926 MS65 NGC.** The 1926 is the second most-common Indian Head eagle behind solely the 1932, but few appear in finer grades than the present Gem. This piece shows the quintessential good production qualities of the issue, including a bold strike, good luster, and excellent preservation overall, despite scattered small marks consistent with the grade. NGC reports 50 submissions finer from the mintage exceeding 1 million coins (12/14). A top-notch alternative, for those seeking one, to the ubiquitous 1932 issue. NGC ID# 28H9, PCGS# 8882

- 4304 1932 MS64 PCGS.** A pleasing satiny example of this penultimate Indian Head Eagle issue, this near-Gem shows apricot-gold coloration and impressive detail. An abrasion near the back of the eagle's wing limits the grade. NGC ID# 28HB, PCGS# 8884

- 4305 1932 MS64 PCGS Secure. CAC.** The 1932 eagle is a favorite choice for a type collection, and the current near-Gem offering will be an excellent fit for such a set. Well-struck design features and strong luster combine with impeccably preserved surfaces to yield outstanding eye appeal. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

### 1851 Double Eagle, AU53 Lustrous Original Surfaces

**4306 1851 AU53 PCGS.** An attractive Philadelphia-issued Type One Liberty double eagle, showing just a trace of high-point friction over lustrous, honey-gold surfaces. The strike is sharp, and uniformly light, scattered abrasions are present, as expected for the grade. Housed in an old green label holder. NGC ID# 268H, PCGS# 8904

**4307 1853 XF45 NGC.** Yellow-gold surfaces display traces of luster in the recessed areas of the well-defined design elements. Distributed light marks confirm the brief circulation of this Choice XF specimen. NGC ID# 268M, PCGS# 8908

### 1853 Liberty Twenty, AU53 Lustrous, Colorful Surfaces

**4308 1853 AU53 PCGS.** Despite a number of high-quality examples recovered from recent shipwreck finds, the 1853 Liberty double eagle is an elusive date in Mint State grades. This attractive AU53 specimen exhibits lightly abraded orange-gold surfaces, with much original mint luster and just a touch of wear on the design elements. NGC ID# 268M, PCGS# 8908

### 1853 Type One Twenty, Multihued AU53

**4309 1853 AU53 PCGS. CAC.** The yellow-gold fields on this Type One double eagle cede to orange accents in the protected device edges, and a hint of smoky gray on the high points is consistent with some long-term bag storage. A few scattered ticks appear on each side, none of them bothersome save for a nick in the reverse field above NT in the denomination. The range of colors make this piece especially attractive at this grade level. NGC ID# 268M, PCGS# 8908

### 1853 Double Eagle, AU55 Still-Lustrous Type One Coin

**4310 1853 AU55 NGC. CAC.** An available early Philadelphia issue, ideal for Type One representation. This Choice AU example is patinated with original green-gold hues and retains remnants of luster in the recesses. Only slight wear is evident over the design elements, though both sides do show the scattering of small abrasions that is typical of this grade level. NGC ID# 268M, PCGS# 8908

### 1854 Liberty Double Eagle, AU50 Earlier Small Date Variety

**4311 1854 Small Date AU50 PCGS.** The 1854 Liberty double eagle was produced in both Large and Small Date varieties, with a total mintage of 757,899 pieces. The Small Date was struck first and is somewhat more available, but it is still challenging in high grade. The present coin is an attractive AU example, with lustrous orange-gold surfaces that show a number of minor abrasions and some slight wear on the design elements. NGC ID# 268P, PCGS# 8911

### 1854 Small Date Double Eagle, AU53 Interesting Type One Issue

**4312 1854 Small Date AU53 NGC.** The Liberty double eagles struck in the early months of 1854 at the Philadelphia Mint had small numerals in the date. This attractive AU53 example shows just a touch of wear on the well-detailed design elements and the moderately abraded orange-gold surfaces retain much original mint luster. NGC ID# 268P, PCGS# 8911

**4313 1855 — Scratch — PCGS Genuine. AU Details.** A light straight pinscratch crosses the obverse between 5:30 and 11:30. The cheek and chin are also faintly abraded, and the eyebrow has a few tiny flecks of struck-in grease. Close to Mint State with good cartwheel luster. The dies are rotated counter-clockwise. NGC ID# 268V, PCGS# 8914

**1855-S Liberty Twenty, AU55**  
**Attractive Type One Issue**

- 4314 1855-S AU55 NGC.** Like many Type One double eagles, the 1855-S was rarely encountered in high grade before a number of nice coins were recovered from recent shipwreck finds. This attractive Choice AU specimen offers well-detailed design elements, with just a trace of wear on the highpoints, and lustrous lightly abraded surfaces. NGC ID# 268X, PCGS# 8916

**1860 Twenty Dollar, AU53**  
**Smooth Surfaces**

- 4315 1860 AU53 NGC. CAC.** Despite a mintage in excess of 577,000 coins, the 1860 double eagle is conditionally scarce in Mint State, which makes appealing AU examples an attractive alternative for the casual collector. This piece is well-detailed, with smooth straw-gold surfaces and small remnants of luster in the peripheral recesses. NGC ID# 269D, PCGS# 8929
- 4316 1861 XF45 NGC.** The orange-gold surfaces of this Choice XF Civil War-era representative retain traces of luster in the recessed areas, and appropriate detail shows on the design elements. Scattered circulation marks are more numerous on the obverse. NGC ID# 269G, PCGS# 8932

**1866-S Twenty Dollar, AU50**  
**Later With Motto Variant**

- 4317 1866-S Motto AU50 NGC. CAC.** The first With Motto issue from the San Francisco Mint. This AU example is lightly circulated, with original olive-gold color over the high points of the design and more luminous, straw-gold hues in recesses, retaining some luster near the borders. A pleasing coin for the collector who appreciates original coloration. NGC ID# 269Y, PCGS# 8950

- 4318 1870-S AU55 PCGS.** The 1870-S double eagle is more collectible than some other denominations of this issue, but it is nonetheless elusive in Mint State grades. This Choice AU example offers the casual collector a more budget-friendly alternative to an Uncirculated piece, and displays natural orange-gold surfaces with hints of luster in the recesses. NGC ID# 26A9, PCGS# 8959

**1872 Liberty Double Eagle, AU58**  
**Vivid Color, Some Prooflike Reflectivity**

- 4319 1872 AU58 PCGS.** Like most Type Two double eagles, the 1872 is not difficult to locate in lower circulated grades, but Mint State specimens are elusive. This attractive near-Mint example shows just a trace of wear on the design elements and the lightly abraded orange-gold surfaces show prooflike reflectivity in sheltered areas. NGC ID# 26AD, PCGS# 8963
- 4320 1873 Closed 3 AU55 PCGS. CAC.** A definitive example of the Closed 3 logotype, this Choice AU 1873 Liberty double eagle exhibits original orange-gold patina with remnants of luster residing in the border recesses. A well-struck piece, with just slight wear over the high points of the design. Finer examples are scarce. NGC ID# 26AG, PCGS# 8966
- 4321 1873 Open 3 MS62 PCGS.** Lustrous yellow-gold surfaces reveal a few minor grazes. The design elements are well-impressed. NGC ID# 26AH, PCGS# 8967
- 4322 1875-CC — Filed rims — PCGS Genuine. AU Details. Variety 7-A.** A small die line above the E in AMERICA identifies the variety. The yellow-gold surfaces retain considerable luster and display well-defined design elements. Interested bidders should not be dissuaded by the PCGS disclaimer as the rim filing is not all that bad. NGC ID# 26AT, PCGS# 8974
- 4323 1877 MS61 NGC.** The reverse of this twenty dollar displays virtually full reverse luster while that on the obverse is interrupted in places by minute abrasions. The design elements are sharply struck throughout. A fine vertical scratch on Liberty's portrait prevents a finer grade. The 1877 is a scarce issue in Mint State. NGC ID# 26AY, PCGS# 8982
- 4324 1882-S MS61 PCGS.** The vivid orange-gold surfaces of this well-detailed MS61 example show the expected number of minor abrasions for the grade, with vibrant mint luster on both sides. Housed in a green label holder. NGC ID# 26BG, PCGS# 8998
- 4325 1882-S MS61 PCGS.** The orange-gold surfaces of this attractive Mint State double eagle show the minimum number of minor contact marks for the grade, with some prooflike reflectivity in sheltered areas on the reverse. NGC ID# 26BG, PCGS# 8998

**1882-S Liberty Double Eagle, MS62**  
**Conditionally Very Scarce in Finer Grades**

**4326 1882-S MS62 PCGS.** The 1882-S Liberty double eagle was produced in large numbers, but most examples show signs of circulation or rough storage, making the date elusive in high grade. This attractive MS62 specimen is well-detailed, and the lightly marked orange-gold surfaces display a scattering of minor contact marks. PCGS has graded 41 numerically finer examples (12/14). NGC ID# 26BG, PCGS# 8998

**4327 1885-S MS61 NGC.** The pleasing orange and rose-gold surfaces of this Mint State Liberty double eagle show a number of minor contact marks but retain most of their original mint luster. The design elements are well-detailed and the overall presentation is quite attractive for the grade. NGC ID# 26BP, PCGS# 9005

**1888 Liberty Double Eagle, MS62**  
**Rare Any Finer**

**4328 1888 MS62 PCGS.** From a mintage of 226,161 pieces, the 1888 Liberty double eagle is a condition rarity in grades above the MS62 level. This attractive specimen exhibits sharply detailed design elements and lightly marked orange and rose-gold surfaces with vibrant mint luster on both sides. PCGS has graded 27 numerically finer examples (12/14). NGC ID# 26BT, PCGS# 9008

**4329 1888-S MS61 NGC.** This 1888-S Liberty double eagle offers well-detailed design elements and vibrant mint luster on both sides, with a scattering of minor contact marks that explain the grade. NGC ID# 26BU, PCGS# 9009

**4330 1888-S MS62 PCGS.** This attractive MS62 specimen exhibits well-detailed design elements and brightly lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 26BU, PCGS# 9009

**1889 Twenty Dollar, MS62**  
**Seldom Seen Philadelphia Issue**

**4331 1889 MS62 PCGS.** The 1889 double eagle is many times scarcer than its typically seen San Francisco counterpart, and is genuinely rare finer than MS62. This piece is lightly abraded, as the grade suggests, but is attractively frosted in warm honey-gold luster that exhibits hints of rose in the centers. PCGS has encapsulated only 27 numerically finer representatives (12/14). NGC ID# 2695, PCGS# 9010

**4332 1889-S MS62 PCGS.** This well-detailed MS62 example displays pleasing orange-gold surfaces, with vibrant mint luster and the minimum number of minor contact marks for the grade. Overall eye appeal is quite strong. NGC ID# 26BW, PCGS# 9012

**4333 1890 MS61 PCGS.** The vivid orange-gold surfaces of this attractive Mint State specimen show a scattering of grade-consistent minor abrasions and retain almost all of their original mint luster. The design elements are well-detailed throughout. NGC ID# 26BX, PCGS# 9013

**1890-CC Double Eagle, XF45**

**4334 1890-CC XF45 PCGS. Variety 1-A.** A late die state with lapped feathers on the right side of the eagle's tail. Although moderately circulated, this apricot-gold and olive-green double eagle offers plentiful pockets of luster. The fields lack mentionable marks but the portrait has a few noticeable abrasions. A popular Carson City issue. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU53**  
**Collectible Carson City Issue**

**4335 1890-CC AU53 NGC. Variety 1-A.** The usual late die state, with the eagle's right (facing) tailfeathers partially effaced by die lapping. The minor reverse die doubling of this variety is still evident on PLURIBUS. This is a pleasing, partly lustrous example of this moderately available Carson City issue, with well-detailed devices and medium straw-gold patina. Light, scattered abrasions are present, as is expected for this grade level. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Twenty Dollar, AU53  
Still-Lustrous Carson City Example**

- 4336 1890-CC AU53 NGC. Variety 1-A.** The usual late die state, with the eagle's right-side tailfeathers partially effaced by die lapping. The strike is solid, and only minor wear is observed over the high points of the design. Substantial luster resides in the recesses, illuminating the warm orange-gold patina on each side. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Double Eagle, AU55  
Significant Luster Remaining**

- 4337 1890-CC AU55 NGC. Variety 1-A.** This piece shows the usual die lapping on the eagle's right-side (facing) tailfeathers, but it is not as extensive as is usually seen, with much of the lower reverse legends clearly exhibiting the minor die doubling that is diagnostic of this variety. This Choice AU example is appealing with much luster and warm honey-gold coloration. NGC ID# 26BY, PCGS# 9014
- 4338 1898-S MS64 NGC. CAC.** The 1898-S Liberty double eagle is an available date in high grade, making it a popular choice of mintmark type collectors. This sharply detailed Choice example is brightly lustrous, with well-preserved peach-gold surfaces. NGC ID# 26CL, PCGS# 9034
- 4339 1899-S MS63 NGC.** The design elements of this attractive Select specimen are sharply detailed throughout and both sides radiate vibrant mint luster. Only minor signs of contact are evident and eye appeal is outstanding. NGC ID# 26CN, PCGS# 9036

---

**1900 Liberty Twenty, MS64+  
Popular Type Coin**

- 4340 1900 MS64+ PCGS. CAC.** This high-end Choice specimen exhibits sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster radiates from both sides and eye appeal is quite strong. The 1900 Liberty double eagle is always in demand as a turn-of-the-century type coin. NGC ID# 26CP, PCGS# 9037

- 4341 1901 MS63 NGC.** A charming Select specimen, with sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact, with vibrant mint luster throughout. NGC ID# 26CS, PCGS# 9039

- 4342 1901 MS64 PCGS. CAC.** Boldly impressed with straw-gold centers and deeper yellow-gold fields. Excellent preservation and eye appeal, even by Choice standards.  
*Ex: Houston Signature (Heritage, 12/2008), lot 2551.* NGC ID# 26CS, PCGS# 9039

---

**1901 Double Eagle, MS65  
Abundant Luster on a Low-Mintage Date**

- 4343 1901 MS65 PCGS.** Abundant cartwheel luster accompanies the attractive orange-apricot patina on this well-preserved Gem 1901 Liberty twenty. The issue was struck to the surprisingly small extent of 111,400 pieces — compare that to the 1904's mintage exceeding 6.2 million — and yet, examples are available up to the Gem level (seldom finer) for only a modest premium over the "true" type coins. One factor contributing to this situation was the 1990s discovery of a large hoard of the date. Scattered, small marks on this piece are consistent with the Gem grade. One small dark spot appears on the reverse. PCGS reports only four numerically finer (12/14).  
*Ex: November Signature (Heritage, 11/2003), lot 7928.* NGC ID# 26CS, PCGS# 9039

---

**1901 Double Eagle, Attractive MS65**

- 4344 1901 MS65 PCGS.** The 1901 Philadelphia double eagle's mintage is a surprisingly low 111,000 pieces, but examples survive today up to the Gem level of the present piece — and seldom finer. This example boasts copious luster and a sharp strike on nicely preserved surfaces with deep, attractive peach-gold patina. PCGS reports only four numerically finer (12/14). NGC ID# 26CS, PCGS# 9039

---

### 1902-S Twenty Dollar, Richly Lustrous MS63+

- 4345 1902-S MS63+ PCGS.** Rich golden-yellow luster radiates from both sides of this appealing S-mint Liberty twenty. The surfaces show only scattered minor marks, mostly confined to the reverse, that preclude an even finer grade. Examples in higher Mint State grades are rather infrequently seen, given the large mintage of more than 1.7 million pieces. Population: 5 in 63+, 73 finer (12/14). NGC ID# 26CV, PCGS# 9042

- 4346 1903 MS64 PCGS. CAC.** Apricot-gold patina displays traces of light tan. A well executed strike brings out strong definition on the design elements, and lustrous surfaces reveal a few minute grade-limiting marks.  
*Ex: Long Beach Signature (Heritage, 2/2008), lot 2761. NGC ID# 26CW, PCGS# 9043*

---

### 1903 Liberty Twenty, Standout MS65 Example

- 4347 1903 MS65 PCGS.** The 1903 double eagle issue's mintage of 287,200 pieces appears positively minuscule compared to the vast emissions of 1904 in both Philadelphia and San Francisco. The 1903 is nonetheless available in Gem grade, but seldom if ever seen finer; PCGS reports only three submissions in higher grades than this MS65 piece — all MS66, as expected (12/14). A great strike, lovely orange-gold patina, and sumptuous luster combine to make this a standout example of the issue. NGC ID# 26CW, PCGS# 9043
- 4348 1904 MS64 NGC.** Vibrant luster illuminates deep yellow-gold patina on each side of this Choice example. The 1904 Liberty double eagle is widely known as one of the most plentiful issues in the series, ideal for type representation. NGC ID# 26CY, PCGS# 9045
- 4349 1904 MS63 Prooflike NGC.** Prooflike fields establish mild contrast with the razor-sharp design elements. Distributed small marks on the yellow-gold surfaces limit the grade. PCGS# 79045
- 4350 1904 MS63 Prooflike NGC.** This remarkable Select specimen displays dazzling prooflike reflectivity in the lightly marked yellow-gold fields and the design elements exhibit razor-sharp definition throughout. Eye appeal is outstanding. PCGS# 79045
- 4351 1904-S MS64 NGC.** Razor-sharp devices and intense luster endow this near-Gem S-mint twenty. Peach-gold surfaces reveal light grade-determining marks. The 1904-S is somewhat challenging any finer. NGC ID# 26CZ, PCGS# 9046

---

### 1904-S Double Eagle, MS64 Rich Reddish-Orange Patina

- 4352 1904-S MS64 PCGS. CAC.** Rich reddish-orange patina enhances the strong eye appeal of this near-Gem 1904-S twenty dollar. A few scattered, small marks on Liberty's hair as well as in the fields determine the grade, but they are minor, and the bold strike and overall good preservation make this an extremely attractive example of this high-mintage issue. The Gem grade level is much more difficult and expensive. NGC ID# 26CZ, PCGS# 9046

---

### 1905-S Double Eagle, MS63 Surprisingly Elusive Issue in High Grade

- 4353 1905-S MS63 NGC.** Although the 1905-S Liberty double eagle claims a mintage of 1.8 million pieces, the issue is much more difficult to locate in high grade than that large production total suggests. This attractive Select example exhibits sharply detailed design elements and vibrant mint luster, with a scattering of minor contact marks that explain the grade. NGC ID# 26D3, PCGS# 9048
- 4354 1907 MS64 NGC.** The well-preserved peach-gold surfaces of this attractive Choice example show only a few minor contact marks, with vibrant mint luster and sharply detailed design elements throughout. NGC has graded 18 numerically finer examples (12/14). NGC ID# 26D7, PCGS# 9052

---

## SAINT-GAUDENS DOUBLE EAGLES

- 4355 1907 Arabic Numerals MS63 NGC.** Intense luster emanates from the peach-gold surfaces of this Select twenty and a solid strike imparts strong definition to the design elements. Minute grade-determining marks do not detract. The 1907 Arabic Numerals double eagle is an ideal issue for type purposes. NGC ID# 26F5, PCGS# 9141
- 4356 1907 Arabic Numerals MS64 PCGS.** The radiantly lustrous surfaces of this near-Gem display greenish-yellow patina and are sharply struck. A few grade-consistent marks are inconsequential. NGC ID# 26F5, PCGS# 9141
- 4357 1907 Arabic Numerals MS64+ PCGS.** This sharply struck high-end near-Gem emanates strong luster from its peach-gold surfaces. A few scattered marks prevents Gem classification. NGC ID# 26F5, PCGS# 9141

---

**1907 Arabic Numerals Double Eagle, Sharp MS65  
An Excellent Type Coin**

- 4358 1907 Arabic Numerals MS65 PCGS.** This “low relief” or Arabic Numerals Gem representative of the Saint-Gaudens double eagle exhibits sharp design detail. Moreover, both sides possess strong luster on the peach-gold surfaces that have been well cared for. This is an excellent type coin that will fit comfortably in a high-grade collection. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65+  
Arabic Numerals**

- 4359 1907 Arabic Numerals MS65+ PCGS.** A lovely, high-end Gem example of this first Arabic Numerals issue, showing rich honey-gold luster over well-preserved, satiny surfaces. The strike is sharp and the eye appeal is pleasing. This date is available in Gem and lower grades, but finer pieces are elusive and proportionately more expensive. NGC ID# 26F5, PCGS# 9141
- 4360 1908 No Motto MS65 NGC.** Peach-gold coloration rests on the lustrous surfaces of this well-struck Gem. A linear mark in the left reverse field and a grease stain on the eagle are visible. NGC ID# 26F6, PCGS# 9142
- 4361 1908 No Motto MS66 PCGS.** Peach-gold surfaces are imbued with hints of lime-green and radiate strong luster. All design elements are well-impressed. An excellent choice for a high-grade type collection. NGC ID# 26F6, PCGS# 9142

---

**1908 No Motto Twenty, Appealing MS66  
Briefly Coined Two-Year Type**

- 4362 1908 No Motto MS66 PCGS. CAC.** The 1908 No Motto twenty dollar coins survive in high grades in copious numbers due to the remarkable Wells Fargo Nevada horde. Although this coin is not specifically provenanced to that treasure trove, it bears the typical hallmarks regardless: flowing, bountiful luster; rich golden-yellow patina; and a paucity of marks, in this case confined to a single nick on Liberty's left (facing) thigh. A great example of this two-year type. NGC ID# 26F6, PCGS# 9142

- 4363 1908-D No Motto MS64 PCGS.** Radiant luster issues from the peach-gold surfaces of this lovely near-Gem twenty. The design elements are sharply struck, including the panes of the Capitol building and the eagle's plumage. A few grade-consistent marks do not disturb. NGC ID# 26F7, PCGS# 9143

---

**1908 Double Eagle, MS64  
With Motto Variant**

- 4364 1908 Motto MS64 PCGS. CAC.** An appealing example of this first With Motto Philadelphia issue, showing satiny green-gold luster and minimally abraded surfaces. The design elements are well-defined and the eye appeal is pleasing. Few examples of the 1908 With Motto Saint-Gaudens twenty have been certified numerically finer. NGC ID# 26F8, PCGS# 9147
- 4365 1909-D AU58 PCGS.** Peach-gold surfaces display ample luster and sharply struck design elements. Minimally abraded for a briefly circulated large gold coin. NGC ID# 26FD, PCGS# 9152
- 4366 1909-D AU58 NGC.** A touch of friction precludes a Mint State grade, although this nearly Uncirculated 1909-D twenty is nonetheless well-detailed with satiny yellow-gold luster. The 1909-D is a slightly better branch mint issue with a mintage of only 52,500 pieces. NGC ID# 26FD, PCGS# 9152
- 4367 1910 MS64 PCGS. CAC.** The 1910 double eagle can be located with little trouble through MS64, but the certified population declines significantly in higher grades. Brightly lustrous surfaces display yellow-gold color fringed by apricot at the margins. The design elements are sharply struck throughout. NGC ID# 26FF, PCGS# 9154
- 4368 1910-D MS64 NGC.** Strong luster endows the peach-gold surfaces of this near-Gem D-mint twenty, and sharply struck design elements include the panes of the Capitol building and the eagle's plumage. Light marks concealed within the lower part of Liberty's portrait precludes gem classification. NGC ID# 26FG, PCGS# 9155
- 4369 1910-D MS65 PCGS.** This Gem D-mint twenty is awash with ebullient peach-gold luster and exhibits sharply struck design elements, including the panes of the Capitol building and the eagle's plumage. A few minor ticks do not disturb. The 1910-D becomes challenging in numerically finer grades. NGC ID# 26FG, PCGS# 9155
- 4370 1910-S MS64 PCGS. CAC.** Boldly struck design elements stand out on this near-Gem double eagle, as does coruscating luster. Just a few minuscule marks on the peach-gold surfaces preclude Gem classification. The 1910-S is readily available through MS64 but scarce any finer. NGC ID# 26FH, PCGS# 9156
- 4371 1911-D MS65 NGC.** Peach-gold patina adorns the lustrous surfaces of this Gem D-mint twenty. The design elements are sharply struck, including the Capitol building. A dark spot is located on the eagle's neck. The 1911-D is plentiful through MS65. NGC ID# 26FK, PCGS# 9158

**1911-D Double Eagle, MS66  
Elusive Any Finer**

**4372 1911-D MS66 NGC.** The 1911-D double eagle can be located with little trouble through the Gem level of preservation, and even Premium Gems can be obtained with a degree of searching. The lustrous yellow-gold surfaces of the current offering exhibit well-struck design elements, including the fingers on both of Liberty's hands, the panes of the Capitol building, and the eagle's plumage. Both sides are nicely preserved. NGC has seen only 35 pieces finer (12/14). NGC ID# 26FK, PCGS# 9158

**4373 1912 MS63 PCGS.** The vivid orange-gold surfaces of this impressive Select specimen radiate vibrant mint luster and show only minor signs of contact. Eye appeal is quite strong for this popular early series issue. NGC ID# 26FM, PCGS# 9160

**4374 1912 MS63 PCGS.** The lustrous honey-gold surfaces of this Select twenty dollar exhibit sharply struck design elements. Scattered minuscule marks limit the grade. NGC ID# 26FM, PCGS# 9160

**4375 1913-D MS64 PCGS.** A fairly plentiful date overall, the 1913-D twenty dollar becomes challenging in grades finer than MS64. This piece is sharply struck, with satiny rose-gold luster and just minor, grade-consistent abrasions. NGC ID# 26FP, PCGS# 9162

**4376 1913-D MS64 PCGS.** Boldly struck with intense satiny luster and subtly variegated coloration across each side. A touch of milkiness in the fields and a few minor abrasions limit the grade.  
Ex: FUN Signature (Heritage, 1/2008), lot 5040. NGC ID# 26FP, PCGS# 9162

**4377 1913-D MS64 PCGS.** Orange-gold luster emanates from both sides of this near-Gem D-mint example, each of which possesses well-struck design elements. Distributed minute marks preclude Gem status. NGC ID# 26FP, PCGS# 9162

**1913-D Double Eagle, Flashy MS64+**

**4378 1913-D MS64+ PCGS.** Flashy yellow-gold luster and a paucity of mentionable marks, save for a couple on Liberty's lower gown, make this piece an attractive example of what is generally a well-produced issue. The sharp strike and good eye appeal are part and parcel of the date, also popular for its mintmarked status. NGC ID# 26FP, PCGS# 9162

**4379 1913-S AU58 NGC.** Light friction on the knee, forehead and eagle's breast suggests momentary circulation, but this lustrous low mintage double eagle is only moderately abraded, and striking indifference is limited to the Capitol building.  
Ex: Dallas Signature (Heritage, 12/2005), lot 1972. NGC ID# 26FR, PCGS# 9163

**1914 Twenty Dollar, Sharply Struck MS63**

**4380 1914 MS63 PCGS.** The rich peach-gold patination of this Select twenty dollar displays hints of sky-blue and lavender, and its lustrous surfaces exhibit sharply struck devices, characteristic of most examples of this issue. Scattered light marks determine the grade. The 1914 becomes very elusive at the Gem level. NGC ID# 26FS, PCGS# 9164

**4381 1914-S MS65 PCGS.** The 1914-S had a healthy mintage of nearly 1.5 million pieces, but is conditionally scarce finer than MS65. This vibrant Gem example exhibits superior eye appeal for the grade, with radiant yellow-gold cartwheel luster and sharply struck motifs. NGC ID# 26FU, PCGS# 9166

**4382 1914-S MS65 NGC.** Rich peach-gold, apricot, orange, and lime-green patina runs over the lustrous surfaces of this S-mint Gem. Well-struck design features enhance the coin's eye appeal. NGC ID# 26FU, PCGS# 9166

**4383 1915 MS63 PCGS.** This Select double eagle displays peach-gold lustrous surfaces and sharply struck design elements, including Liberty's fingers and the panes in the Capitol building. Scattered light marks determine the grade. NGC ID# 26FV, PCGS# 9167

**4384 1916-S MS64 PCGS.** Lustrous yellow-gold surfaces are minimally marked for the grade designation. The design features are well-impressed. NGC ID# 26FX, PCGS# 9169

**1916-S Double Eagle, Well-Struck MS65**

**4385 1916-S MS65 NGC.** The 1916-S was a scarce date in the Saint-Gaudens double eagle series prior to the 1983 discovery of a hoard in South America that yielded 4,000 mint condition examples. Specimens finer than Gem are still scarce. This MS65 offering displays lustrous yellow-gold surfaces and well-struck design elements. A few minor reverse marks precludes an even finer grade. NGC ID# 26FX, PCGS# 9169

**4386 1920 MS63 NGC.** Lustrous peach-gold surfaces exhibit well-struck devices, including the panes of the Capitol building and the eagle's feathers. Scattered minute marks limit the grade. NGC ID# 26FY, PCGS# 9170

- 4387 1920 MS63 NGC.** Lustrous yellow-gold surfaces show a few grade-determining marks. Sharp detail is seen on the devices, including the Capitol building and eagle's plumage. NGC ID# 26FY, PCGS# 9170

**1920 Saint-Gaudens Double Eagle, MS64  
Only One Numerically Finer at PCGS**

- 4388 1920 MS64 PCGS. CAC.** Generally pale wheat-gold with occasional glimmers of deeper yellow and apricot. The strike is pleasing, and if not for an abrasion at Liberty's waist, an even finer grade would be within reach. Essentially unavailable in higher numeric grades, with only one such coin certified by PCGS (12/14). NGC ID# 26FY, PCGS# 9170

**1922 Saint-Gaudens Twenty, MS65  
Conditionally Rare in Finer Grades**

- 4389 1922 MS65 PCGS.** Despite a large reported mintage of nearly 1.4 million pieces, the 1922 Saint-Gaudens double eagle is a condition rarity in grades above the MS65 level. This delightful Gem offers sharply detailed design elements and vivid orange-gold surfaces with vibrant mint luster and no mentionable distractions. PCGS has graded eight numerically finer examples (12/14). NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, Sharply Struck MS65**

- 4390 1922 MS65 PCGS.** Rich orange-gold patination shows hints of lime-green at the borders. Both sides are awash with strong luster and exhibit sharply struck design elements, including the panes and pillars of the Capitol building. A few minuscule marks are within the parameters of the grade designation. The certified population of the 1922 twenty declines precipitously beyond MS65; PCGS has seen fewer than 10 examples numerically finer (12/14). NGC ID# 26G3, PCGS# 9173

- 4391 1924 MS66 PCGS.** The 1924 is the most plentiful issue in the series, ideal for type representation. This piece is well-struck and frosty, with intermingled honey and yellow-gold hues over the vibrantly frosted surfaces. A loupe fails to reveal any significant abrasions, though the obverse is faintly scattered with tiny blue-gray specks. NGC ID# 26G7, PCGS# 9177

- 4392 1924 MS66 NGC.** Apricot and lime-green colors adorn the impeccably preserved lustrous surfaces of this gorgeous Premium Gem. The design elements are well-struck save for the typical softness in the Capitol building. NGC ID# 26G7, PCGS# 9177

- 4393 1927 MS63 PCGS.** The 1927 Saint-Gaudens double eagle is an available date and a popular choice of type collectors. This attractive Select specimen offers sharply detailed design elements and vibrant mint luster throughout. A few vertical scratches on the reverse, well-hidden in the eagle's feathers, explain the grade NGC ID# 26G6, PCGS# 9186

- 4394 1928 MS66 PCGS.** Radiant luster issues from the peach-gold surfaces of this lovely Premium Gem and a solid strike imparts strong definition to the design motifs. A few trivial marks concealed within the eagle's wings do not distract. The 1928 becomes very scarce in numerically finer grades. NGC ID# 26GK, PCGS# 9189

**COMMEMORATIVE SILVER**

**1893 Isabella Quarter, Lightly Toned MS66**

- 4395 1893 Isabella Quarter MS66 PCGS.** The surfaces are sharply struck as usual (but always a pleasing sight to see) on this lovely toned Premium Gem, showing pinkish-gold patina with accents of cobalt-blue and burgundy near the rims on each side. The high points of each side are free of distractions, large or small. The Lafayette silver dollar and Isabella quarter are the outliers in the silver commemorative series due to their odd denominations, making them easy targets for acquisitive collectors. PCGS reports only 46 in numerically finer grades (12/14). NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66  
Glowing, Lightly Toned Centers**

- 4396 1893 Isabella Quarter MS66 PCGS.** The Isabella quarter is a favorite issue, not only for its stance as the first commemorative of that denomination issued, but also for its relatively low distribution of only 24,124 pieces. This Premium Gem example is sharply struck, with satiny luster that illuminates largely undisturbed surfaces. Pale silver-gray toning yields to tinges of sun-gold, violet, and aquamarine around the relief elements. PCGS has seen only 46 numerically finer submissions (12/14). NGC ID# 28HR, PCGS# 9220

**4397 1900 Lafayette Dollar MS63 NGC. DuVall 2-C.** A brilliant Select Mint State example, this Lafayette dollar has delicate gold toning on both sides with pleasing surfaces showing only a few trivial marks. NGC ID# 28N8, PCGS# 9222

**4398 1921 Alabama MS65 PCGS. CAC.** Soft champagne-gold color resides on both sides of this wonderful Gem, each of which displays booming luster. Sharply struck design features and impeccable preservation further enhance the coin's outstanding eye appeal. NGC ID# 28HT, PCGS# 9224

**4399 1921 Alabama MS66 NGC.** Medium-intensity violet, gold, lavender, and yellow-green patination cascades over the highly lustrous surfaces of this splendid Premium Gem. Sharply struck design elements and impeccable preservation further enhance the coin's eye appeal. Nearly unobtainable numerically finer. Census: 83 in 66 (3 in 66+, 3 in 66 ★), 7 finer (12/14). NGC ID# 28HT, PCGS# 9224

#### 1921 Alabama Half Dollar, MS66+ Lightly Toned and Frosted

**4400 1921 Alabama MS66+ PCGS. CAC.** The 1921 Alabama Centennial half dollar is seldom available in Premium Gem condition, and finer pieces are rare. This Plus-graded MS66 coin is well-struck, with frosty, shimmering luster. Pastel gold hues encompass much of each side, and tinges of amber and aquamarine are also seen along the upper obverse border. Only three coins are numerically finer at PCGS (12/14). NGC ID# 28HT, PCGS# 9224

**4401 1921 Alabama 2x2 MS66 PCGS.** This Alabama Centennial half dollar exhibits bold design definition and luminous, satiny mint luster that reveals just a hint of light golden color. No mentionable abrasions are observed. Only seven examples are numerically finer at PCGS (12/14). NGC ID# 28HS, PCGS# 9225

**4402 1936-D Arkansas MS67 PCGS. CAC.** A pleasingly toned Superb Gem example of this popular commemorative type, from a low distribution of just 9,660 pieces. The strike definition is unusually sharp on both sides, and the satiny surfaces are smooth and blemish-free. Population: 34 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 28J2, PCGS# 9238

**4403 1937-D Arkansas MS67 PCGS.** A faint tinge of pale golden toning is present over both sides of this Superb Gem Arkansas Centennial half dollar, while the design elements are well brought up and the surfaces are free of distractions. Population: 28 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 28J5, PCGS# 9242

**4404 1939-S Arkansas MS66 PCGS. CAC.** This sharply struck and satiny Premium Gem exhibits full silver luster beneath delicate gold toning on both sides, resulting from the original packaging. An attractive example of the final Arkansas issue. PCGS has only certified 10 finer pieces (12/14). NGC ID# 28JC, PCGS# 9251

#### 1936-S Bay Bridge Half, MS67 Richly Toned Over Glistening Surfaces

**4405 1936-S Bay Bridge MS67 PCGS. CAC.** The Bay Bridge commemorative halves, struck for souvenirs in conjunction with the opening of the bridge in November 1936, are a favorite among classic commemoratives enthusiasts. The bridge is majestically depicted on the reverse, while the obverse shows a portrait of a California grizzly. This representative is well-struck and possesses satiny mint luster. Both sides exhibit an array of complementary colors, including sun-gold, olive, amber, lavender-gray, crimson, and pine-green. Only 10 examples are numerically finer at PCGS (12/14). NGC ID# 28JD, PCGS# 9254

**4406 1935/34-S Boone MS67 PCGS.** This low-mintage issue consisted of 2,004 pieces and included the addition of the commemorative date 1934 above the words PIONEER YEAR. The issue is sometimes referred to as "1935 small 1934." Golden-gray patina is imbued with wisps of green and lilac. Well-struck with lustrous, impeccably preserved surfaces. Population: 17 in 67 (3 in 67+), 2 finer (12/14).  
Ex: *Central States Signature* (Heritage, 4/2008), lot 1635. NGC ID# 28JL, PCGS# 9264

**4407 1925-S California MS67 PCGS.** Vibrant mint luster shines through shades of greenish-gold and lavender-gray toning on the well-preserved surfaces of this impressive Superb Gem. The design elements are sharply detailed, adding to the considerable appeal. PCGS has graded six numerically finer examples (12/14). NGC ID# 28JY, PCGS# 9281

**4408 1936-D Cincinnati MS66+ PCGS. CAC.** This Plus-graded Cincinnati half dollar exhibits spectacular preservation, with sharp motifs and smooth, softly frosted luster. The obverse is dappled in complementary violet and forest-green toning, while the reverse displays just a pale champagne hue overall. PCGS has seen 48 numerically finer submissions (12/14). NGC ID# 28K2, PCGS# 9284

**4409 1936 Delaware MS67 PCGS. CAC.** Struck to commemorate the 300th anniversary of the Swedes' landing in Delaware, this Superb Gem Delaware Tercentenary half dollar is well-struck and delicately preserved. Tinges of olive accent dusky bone-gray toning on each side, with satiny underlying mint luster. PCGS has certified only two numerically finer representatives (12/14). NGC ID# 28K9, PCGS# 9301

**4410 1922 Grant No Star MS66+ PCGS. CAC.** The silky-smooth surfaces of this high-end No Star Grant Memorial half dollar are beautifully preserved, with absolutely no disturbances visible on the obverse portrait. Areas of cherry-red and lilac accent soft lavender-gold toning over each side, while the only area of striking weakness is minutely visible on Grant's upper hair. PCGS has certified 46 numerically finer representatives (12/14). NGC ID# 28KD, PCGS# 9306

**4411 1922 Grant With Star MS64 NGC.** Aside from the usual "bald spot" on Grant's head, this is a well-struck near-Gem, minimally toned with subtle luster. A solid example of this popular With Star subtype.  
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1709. NGC ID# 28KC, PCGS# 9307

**4412 1928 Hawaiian MS64 NGC.** A pleasing Choice example of this slightly more elusive classic commemorative issue. Sharp and satiny, both sides exhibit just a touch of light golden toning and minimal abrasions. NGC ID# 28KE, PCGS# 9309

- 4413 1935 Hudson MS65 PCGS. CAC.** Grayish-gold patination resides on the highly lustrous surfaces of this Gem commemorative half. A small milling mark on the left side of the main sail is all that stands in the way of the next highest grade. Nevertheless, this piece yields fantastic eye appeal. NGC ID# 28KF, PCGS# 9312
- 4414 1935 Hudson MS65 PCGS. CAC.** Variegated violet and champagne-gold patina cascades over the highly lustrous surfaces of this sharply struck Gem commemorative. This issue celebrates the founding of Hudson, New York, a small city on the east bank of the Hudson River. NGC ID# 28KF, PCGS# 9312
- 4415 1935 Hudson MS66 PCGS.** This satiny Hudson commemorative half dollar is particularly well-preserved, with pale lavender-gold toning over each side. Some minor striking softness is noted on the central ship's sails, as usual, but the level of sharpness is nonetheless pleasing. PCGS has certified only 11 numerically finer representatives (12/14). NGC ID# 28KF, PCGS# 9312
- 4416 1924 Huguenot MS67 PCGS.** A lovely Superb Gem representative, this coin displays pleasing, satiny luster, while yellow-gold, orange, auburn, and lime-green toning is present on both sides, primarily at the outer edges. The devices are sharply struck with very few abrasions. Population: 57 in 67 (8 in 67+), 2 finer (12/14). NGC ID# 28KG, PCGS# 9314
- 4417 1946 Iowa MS68 PCGS. CAC.** Vivid shades of burnt-orange, lavender-gray, and greenish-gold toning blanket the impeccably preserved surfaces of this spectacular MS68 example. The design elements are sharply detailed and vibrant mint luster shines through the toning. Population: 76 in 68 (7 in 68+), 0 finer (12/14). NGC ID# 28KJ, PCGS# 9316
- 4418 1918 Lincoln MS67 PCGS. CAC.** Struck to commemorate the 100th anniversary of Illinois' statehood, the Illinois Centennial half dollar depicts a portrait of Abraham Lincoln on the obverse and is often referred to casually as the "Lincoln" half dollar. This Superb Gem example is sharply struck, with satiny luster and just a tinge of pale lavender-gold toning over each side. PCGS has certified only two numerically finer representatives (12/14). PCGS# 9320
- 4419 1936 Long Island MS67 NGC.** A superlative Gem example that has been carefully preserved from the day of issue. The obverse has pewter gray toning at the center changing to coppery-orange and golden-brown at the borders. The reverse is warmly toned in intermingled shades of coppery-orange and lilac-gray. Only four submissions have been certified numerically finer at NGC (12/14).  
*Ex: ANA Signature (Heritage, 7/2005), lot 7170; Los Angeles Signature (Heritage, 8/2009), lot 2134. NGC ID# 28KL, PCGS# 9322*

**1920 Maine Centennial Half, MS66+  
Sharp and Beautifully Toned**

- 4420 1920 Maine MS66+ PCGS. CAC.** The Maine Centennial half dollar was authorized by Congress in May 1920, and was struck to the extent of 50,000 pieces (plus 28 coins for assay purposes). Premium Gem survivors are marginally available, but finer pieces are decidedly scarce. This Plus-graded representative displays bold detail and satiny luster. The obverse is awash in intermingled orange-gold, aquamarine, mint-green, and pale lavender hues, while the reverse shows smaller areas of the same around the peripheries, with warm champagne in the center. PCGS has certified only 38 numerically finer representatives (12/14). NGC ID# 28KN, PCGS# 9326

**1920 Maine Centennial Half, MS67  
None Numerically Finer at PCGS**

- 4421 1920 Maine MS67 PCGS.** Pale champagne is the dominant color on both sides of this well-preserved Maine Centennial half, although subtle hints of rose, lavender, and olive also appear around the peripheries. The design elements are sharply executed, particularly on the central obverse which is frequently deficient. This issue is scarce in this high of grade, and finer pieces are nearly unknown. Population: 38 in 67 (4 in 67+), 0 finer (12/14). NGC ID# 28KN, PCGS# 9326
- 4422 1934 Maryland MS67 PCGS. CAC.** This spectacular Superb Gem displays impeccably preserved surfaces with vibrant mint luster and highlights of greenish-gold and lavender toning. Sharply detailed design elements add to the outstanding eye appeal. Population: 61 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28KP, PCGS# 9328
- 4423 1923-S Monroe MS65+ PCGS.** Whispers of orange-gold, lavender, and aqua-blue make occasional visits to the lustrous surfaces of this high-end Gem. Sharply struck design features and impeccable preservation round out the coin's pleasing eye appeal. NGC ID# 28KT, PCGS# 9333
- 4424 1938 New Rochelle MS67+ PCGS.** Stunning mint luster emanates from the marvelously preserved surfaces of this sharply struck high-end Superb Gem. Soft violet, yellow-gold, mint-green, and lavender patina resides on both sides. NGC ID# 28KU, PCGS# 9335
- 4425 1936 Norfolk MS68 PCGS.** Peripheral golden-orange toning is more pronounced on the reverse of this gorgeous commemorative. Lustrous surfaces exhibit sharply struck design elements and are immaculately preserved. NGC ID# 28KV, PCGS# 9337
- 4426 1933-D Oregon, Tripled Die Obverse, FS-101, MS67 PCGS. CAC.** Attractively toned sea-green, rose-red, and gunmetal-gray. Crisply struck, coruscating, and well preserved. The obverse legends, especially HALF, exhibit prominent die tripling. All 1933-D Oregon half dollars have this feature, which likely occurred on a master die since the 1934-D Oregon halves are also affected. Certified in a green label holder. PCGS# 145750 Base PCGS# 9343
- 4427 1939-S Oregon MS67 NGC. CAC.** Soft yellow-gold and violet colors rest on the radiantly lustrous surfaces of this sharply struck Superb Gem. Close examination indicates that no mentionable marks impact the virtually flawless surfaces. One of the most popular issues of the silver commemorative series. NGC has seen only eight examples finer (12/14). NGC ID# 28LB, PCGS# 9354
- 4428 1915-S Panama-Pacific MS65 NGC.** Ring of green, gray, and violet toning surround the mostly brilliant centers on both sides of this well-preserved Gem. The design elements are sharply detailed and vibrant mint luster enhances the outstanding eye appeal. NGC ID# 26H7, PCGS# 9357
- 4429 1920 Pilgrim MS67 PCGS.** Mottled olive-green and orange toning blanket otherwise brilliant surfaces with illuminant mint luster. This Superb Gem, celebrating the tercentenary of the landing of the pilgrims at Plymouth, is sharply struck and delicately preserved with no mentionable marks. PCGS has seen only one numerically finer submission (12/14). NGC ID# 28LC, PCGS# 9359

- 4430 1935 Spanish Trail MS64 PCGS. CAC.** Magnification brings out blushes of soft violet and gold on the obverse of this radiantly lustrous near-Gem commemorative. A handful of small marks determines the grade. NGC ID# 28LN, PCGS# 9376
- 4431 1935 Spanish Trail MS65 PCGS. CAC.** Wisps of violet are slightly deeper on the obverse of this Spanish Trail Gem. Lustrous surfaces reveal just a few trivial obverse marks that might preclude an even finer grade. NGC ID# 28LN, PCGS# 9376
- 4432 1935 Spanish Trail MS65 PCGS. CAC.** The highly lustrous surfaces of this Gem commemorative display soft champagne color joined by splashes of violet on the reverse. This sharply struck coin has impeccably preserved surfaces. NGC ID# 28LN, PCGS# 9376
- 4433 1935 Spanish Trail MS66 PCGS.** This spectacular Premium Gem exhibits pinpoint definition on all design elements and the virtually pristine surfaces are blanketed in delicate shades of golden-tan toning, with a few hints of lavender. NGC ID# 28LN, PCGS# 9376
- 4434 1935 Spanish Trail MS66 PCGS. CAC.** A charming Premium Gem example of this popular silver commemorative, with sharply detailed design elements and well-preserved lustrous surfaces that show hints of golden-tan and lavender toning. NGC ID# 28LN, PCGS# 9376
- 4435 1934 Texas MS67+ PCGS.** Beautifully blended lavender-gold and powder-blue toning grace both sides of this high-end Superb Gem. The design elements are well-defined and the preservation is excellent. The 1934 issue is often chosen to represent the Texas Independence Centennial in classic commemorative type sets. Population: 76 in 67 (6 in 67+), 2 finer (12/14). NGC ID# 28LP, PCGS# 9381

**1935-D Texas Half Dollar, MS67+  
Well-Preserved Colorful Surfaces**

- 4436 1935-D Texas MS67+ PCGS. CAC.** The Texas design is a favorite commemorative for many collectors, and this Superb Gem certainly shows it to good advantage. Satiny pale blue-gray centers cede to saffron and amber at the obverse rims, and both sides are distraction-free and well-struck. Top-notch. PCGS has graded five numerically finer examples (12/14). NGC ID# 28LS, PCGS# 9383
- 4437 1938 Texas MS67 PCGS.** The Philadelphia Mint distributed only 3,780 Texas commemorative halves in 1938, and Superb Gem survivors are elusive. This piece is sharply struck, with satiny luster and just a suggestion of light golden color. The faint remnants of a print are detectable in the left obverse field. Population: 54 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 28M2, PCGS# 9394

**1925 Vancouver Half Dollar, MS67  
Only One Finer Coin at PCGS**

- 4438 1925 Vancouver MS67 PCGS. CAC.** Ex: Bruce Scher. Hints of golden-tan and violet toning enhance the outstanding eye appeal of this delightful Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. No mentionable distractions are evident. Population: 53 in 67 (8 in 67+), 1 finer (12/14). NGC ID# 28M5, PCGS# 9399
- 4439 1949-D Booker T. Washington MS67 PCGS. CAC.** Intensely lustrous surfaces are visited by splashes of light gold, and all design elements are sharply struck. This piece yields magnificent eye appeal. Population: 35 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 28MH, PCGS# 9417
- 4440 1949-D Booker T. Washington MS67+ NGC. CAC.** Intense luster reaches out to the observer of this sharply struck, high-end Superb Gem D-mint commemorative. Both sides display occasional whispers of olive-green and are impeccably well preserved. Census: 25 in 67 (1 in 67+, 1 in 67 ★), 0 finer (12/14). NGC ID# 28MH, PCGS# 9417

**COMMEMORATIVE GOLD**

- 4441 1917 McKinley MS66 PCGS.** An immaculate representative bathed in exquisite ruby-red and lime-green patina. The strike is slightly shy of complete, but the eye appeal is imposing. Certified in a green label holder. NGC ID# 26HG, PCGS# 7455

**1922 Grant Gold Dollar, MS67  
No Star Variant**

- 4442 1922 Grant No Star MS67 NGC.** Pale yellow-gold surfaces are prominently lustrous, and the hair detail on the portrait is uncommonly sharp. A remarkable Superb Gem example of this popular classic gold commemorative issue, carefully preserved with top-notch eye appeal. NGC has graded just five numerically finer pieces (12/14). NGC ID# 26HJ, PCGS# 7458

### 1922 Grant With Star Gold Dollar, Highly Lustrous MS67

**4443** 1922 Grant With Star MS67 PCGS. The yellow-gold highly lustrous surfaces of this Superb Gem commemorative are imbued with wisps of apricot. Sharply struck design elements and impeccable preservation round out the coin's overall pleasing eye appeal. The first versions of the Grant commemorative coins, both gold dollars and silver halves, were struck with an incuse star in the obverse field. NGC ID# 26HH, PCGS# 7459

**4444** 1926 Sesquicentennial MS65 NGC. This frosty Gem has rich orange-gold luster with hints of peripheral green toning on each side. The surfaces are pristine, with exceptional eye appeal. NGC ID# 26HL, PCGS# 7466

### MODERN ISSUES

#### 1995 and 1996 Atlanta Olympic Commemoratives Complete 32-Piece Set in Wooden Case

**4445** Complete 32-Piece 1995-1996 Atlanta Olympics Commemorative Set in Wooden Case. Every design, every metal, every coin from half dollars to half eagles: the complete 32-coin Uncirculated and Proof set of Atlanta Olympic commemoratives. All coins housed in their original Mint plastic capsules, the whole contained in a two-tray setup mounted in an impressive wooden box. Comes with key and certificate of authenticity.

### MODERN BULLION COINS

#### Five-Piece 1995-W American Eagle Silver and Gold Set, PR68 to PR69 Deep Cameo

**4446** Five-Piece 1995-W Silver Eagle and Gold Proof Set PR68 to PR69 Deep Cameo PCGS. The 1995-W silver eagle could only be obtained upon issue with the additional purchase of a four-piece gold eagle set. Silver eagle collectors delayed acquisition until after 1995, when the price of examples soared. The issue remains the key to the silver eagle series. The present silver eagle appears as made with glassy fields and frosty, full struck motifs. The gold coins display light honey-gold toning. The set includes: 1995-W silver eagle PR68 Deep Cameo; 1995-W tenth-ounce gold eagle PR69 Deep Cameo; 1995-W quarter-ounce gold eagle PR69 Deep Cameo; 1995-W half-ounce gold eagle PR69 Deep Cameo; and a 1995-W one-ounce gold eagle PR69 Deep Cameo. No box or papers are included. (Total: 5 coins) NGC ID# 28WZ, PCGS# 9887

#### 1995-W Silver Eagle, PR69 Ultra Cameo Near-Flawless Surfaces

**4447** 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W is far and away the key date in the American Silver Eagle set, despite some interesting later issues and new finishes such as the reverse proofs. This piece shows untuned surfaces that are nearly flawless, but to mention the minuscule distractions would be to overemphasize them. "Buy the keys first" is still good advice, and it applies here. NGC ID# 28WZ, PCGS# 9887

**4448** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. A modern mint blunder, the 1999-W gold coins were supposed to have been struck only in proof format. These eagles were struck from unfinished proof dies, with satin luster instead of reflective fields. A fully struck example that displays only inconsequential contact. NGC ID# 26MG, PCGS# 99942

**4449** (5) 2005 Quarter-Ounce Platinum Eagles MS70 NGC. A pristine quintet that demonstrates the full strike and immaculate surfaces expected of its ultimate grade. One of the pieces exhibits a few pinpoint imperfections on the face of the Statue of Liberty. The mintage was just 12,013 pieces. (Total: 5 coins) PCGS# 21109

**4450** (3) 2008 Half-Ounce Platinum Eagles MS70 NGC. This pristine and untuned trio displays a complete strike and undiminished cartwheel sheen. Each coin has a wire rim. From a mintage of only 14,000 pieces. (Total: 3 coins) PCGS# 393109

**Gold Libertas Americana Medal  
Paris Mint Restrike, PR67 Ultra Cameo**

- 4451** (2000) 1781 Paris Mint Libertas Americana Medal Gold Restrike PR67 Ultra Cameo NGC. 46.5 mm. 64 gm of .916 fine gold. The edge has a cornucopia hallmark and is lettered 325/500. Medal turn. A modern gold restrike of the famous Libertas Americana medal. Originally engraved by Augustin Dupré, and designed by Benjamin Franklin while he served as the U.S. Minister to France. The inspiration for the depiction of Liberty on the 1793 half cent.

**TERRITORIAL GOLD**

**1861 Clark, Gruber & Co. Five  
Kagin-6, AU Details**

- 4452** 1861 Clark, Gruber & Co. Five Dollar, K-6, R.4 — Damaged, Cleaned — NGC Details. AU. Clark, Gruber & Co. only issued gold coins in 1860 and 1861, and survivors of any denomination are widely collected by territorial gold specialists. This 1861 five dollar piece is well-detailed, with bright green-gold patina that yields occasional tinges of orange-gold in the reverse peripheral recesses. The central fields and devices show evidence of surface etching and light cleaning, as designated on the holder. PCGS# 10140

**CALIFORNIA FRACTIONAL GOLD**

- 4453** Undated Liberty Round 25 Cents, BG-204, R.5, MS63 NGC. A very scarce Period One variety interesting for its defective star punch and crudely engraved fraction. An early die state with a long fraction bar and more complete definition on the lower wreath. An originally toned orange-gold and apple-green example. No abrasions are readily evident. PCGS# 10389
- 4454** 1854 Liberty Octagonal 1 Dollar, BG-509, R.6, AU50 PCGS. Like many Period One pieces, the present rare variety octagonal dollar briefly entered Gold Rush commerce, which faced a shortage of silver coin prior to 1855. But the rose-red and apricot surfaces are attractively toned and unblemished. Encapsulated in a green label holder. PCGS# 10486
- 4455** 1855/4 Liberty Octagonal 1 Dollar, BG-511, High R.4, MS61 NGC. Both sides of this lustrous straw-gold piece have reflective fields with full lustrous and excellent eye appeal. Census: 4 in 61, 8 finer (12/14). PCGS# 10488

- 4456** 1853 Liberty Octagonal 1 Dollar, BG-524, High R.6, AU58 NGC. A lovely near-Mint example displaying delicate blue-green toning on still lustrous yellow-gold surfaces. Census: 2 in 58, 0 finer (12/14). PCGS# 10501
- 4457** 1859 Liberty Octagonal 25 Cents, BG-701, Low R.6, MS64 PCGS. A rare variety distinctive for its lapped portrait and repunched wreath. The obverse die was first used to strike BG-107 in 1856. The peach-gold surfaces are glassy and unblemished. Housed in an old green label holder. Population: 5 in 64, 4 finer (12/14). PCGS# 10528
- 4458** 1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS67 PCGS. A pristine canary-gold Superb Gem. The strike is sharp and the lustrous fields are unperturbed. A Frontier & Co. die variety available in Uncirculated grades but seldom located in the present extraordinary quality. Population: 2 in 67, 0 finer (12/14). PCGS# 10541
- 4459** 1871 Liberty Octagonal 25 Cents, BG-767, R.3, MS64 Deep Prooflike NGC. A stunning fractional quarter-dollar piece with deeply mirrored fields and fully lustrous, satiny yellow devices. Census: 2 in 64 Deep Mirror Prooflike, 1 finer (12/14). PCGS# 910594

- 4460** 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 PCGS. A stunning Premium Gem with a high degree of cameo contrast on the brilliant yellow surfaces. The fields are fully and deeply mirrored around the bright yellow devices. Population: 6 in 66, 0 finer (12/14). PCGS# 10617
- 4461** 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 NGC. An amazing Premium Gem, this frosty and highly lustrous lemon-yellow fractional quarter dollar gold piece has satiny fields that create a hint of cameo contrast. Census: 12 in 66, 1 finer (12/14). PCGS# 10662
- 4462** 1878/6 Indian Round 25 Cents, BG-883, High R.4, MS65 PCGS. A splendid lemon-gold Gem with exemplary surfaces and minor inexactness of strike on the A in DOLLAR. The central reverse exhibits several delicate die cracks. Certified in a green label holder. Population: 3 in 65, 0 finer (12/14). Ex: FUN Signature (Heritage, 1/2013), lot 14549, which realized \$2,350. PCGS# 10744
- 4463** 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS65 PCGS. A semiprooflike orange-gold Gem that boasts a bold strike and exemplary preservation. An outstanding example of this collectible variety. Certified in a green label holder. Population: 11 in 65, 2 finer (12/14). PCGS# 10760

**1868 Round Half Dollar, BG-1074, MS65+  
Finer Than the Jay Roe Collection Example**

- 4464** 1868 Indian Round 50 Cents, BG-1074, R.6, MS65+ PCGS. Issued by Christopher "Christoph" Ferdinand Mohrig. This pristine and prooflike 1868 Period Two round half dollar shows great eye appeal on surfaces that are problem-free, save for the usual weak strike in the center reverse. This piece is in considerably nicer shape than the Jay Roe Collection MS64 PCGS example (Bowers and Merena, 9/2003, lot 539), which was the plate coin in the second edition of the Breen-Gillio reference. Population: 3 in 65 (2 in 65+), 1 finer (12/14). PCGS# 10903

---

1868 Round 50 Cent, Reflective BG-1074, MS65+

- 4465** 1868 Indian Round 50 Cents, BG-1074, R.6, MS65+ PCGS. This prooflike yellow-gold Period Two round half dollar, issued by Christopher Ferdinand Mohrig, shows a better strike through the denomination on the reverse than most survivors, to the point that we would nearly describe it as clear. The minimal few thin scrapes showing on the obverse are in complete accord with the high grade. Population: 3 in 65 (2 in 65+), 1 finer (12/14). PCGS# 10903

---

**PATTERNS**

---

1854 Reduced-Diameter Cent  
Judd-161, PR55

- 4466** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR55 PCGS. The design is similar to that of contemporary large cents except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in bronze with a plain edge. Streaks of original red remain on each side with most of the surfaces medium brown. Attractive and problem-free, especially so for the grade. PCGS# 11663

---

1854 Smaller Diameter Cent Pattern  
Judd-161, PR63 Brown

- 4467** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR63 Brown PCGS. On the obverse Liberty faces left on a blank field with no peripheral stars or legends; the date 1854 below. On the reverse, the denomination ONE CENT is in the center, surrounded by a laurel wreath; with the legend UNITED STATES OF AMERICA around the margins. Struck in bronze with a plain edge. The obverse displays even brown patina, while the reverse has a strong suggestion of red intermixed with the brown. PCGS# 11663

---

1859 Longacre Half Dollar, PR64  
Judd-241, Silver

- 4468** 1859 Half Dollar, Judd-241, Pollock-297, R.4, PR64 NGC. The Longacre "French Head of Liberty" design for the half dollar. The reverse displays 50 CENTS encompassed by a cereal wreath that is very similar to that introduced on the issued 1860 Seated dime, although much larger in scale. Struck in silver with a reeded edge. A fully struck Choice specimen with smooth, untoned surfaces. The fields display parallel die lines, as coined. PCGS# 11978

---

1859 Longacre Half Dollar  
PR63 Brown, Judd-242

- 4469** 1859 Half Dollar, Judd-242, Pollock-298, R.5, PR63 Brown PCGS. The Longacre design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse is a large format version of the wreath of the issued 1859 dime, except the denomination is expressed as 50 / CENTS. Struck in copper with a reeded edge. Both sides have delicate turquoise, champagne, and iridescent toning over lightly mirrored surfaces. Population: 7 in 63 Brown, 12 finer (12/14). PCGS# 11980

---

1865 Three Cent Nickel Pattern  
Judd-410, PR64

- 4470** 1865 Three Cent Nickel, Judd-410, Pollock-481, Low R.6, PR64 PCGS. CAC. The obverse die is similar to that used for regular proof coinage, with the only difference a higher date placement. The reverse is likewise similar to the regular die, but the ribbon ends are larger and encroach upon the denticles. Struck in nickel with a plain edge. A hint of contrast appears on the light gray surfaces of this delicately toned example. A diagonal line of planchet lamination appears on the reverse. Population: 4 in 64, 9 finer (12/14). PCGS# 60591

**1865 Quarter Pattern, PR63 Brown  
Judd-426, Pollock-498**

- 4471** 1865 Quarter Dollar, Judd-426, Pollock-498, Low R.7, PR63 Brown PCGS. The obverse die is the traditional Liberty Seated design used for regular coinage in 1865. The reverse die features the familiar perched eagle design, with the addition of the scroll and motto IN GOD WE TRUST adopted for regular coinage in 1866. Struck in copper with a reeded edge. Probably around a dozen examples are known today of this scarce off-metal striking. While labeled Brown, there is significant underlying mint red still evident. Fully struck. Population: 1 in 63 Brown, 2 finer (12/14). PCGS# 60611

**1867 Five Cent Pattern, PR66 Ultra Cameo  
Judd-570, Pollock-638, Attractive and Well-Mirrored**

- 4472** 1867 Five Cents, Judd-570, Pollock-638, R.5, Ultra Cameo PR66 NGC. Liberty wears a coronet and faces left on the obverse, showing UNITED STATES OF AMERICA around the periphery and the date below. The top of the 7 is distant from the curl, distinguishing the Pollock-638 variety from the Pollock-640, which shows the 7 close to the curl. The reverse offers 5 CENTS centered within a laurel wreath and IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. This nickel-white piece is quite attractive, well-mirrored, and free of mentionable abrasions despite a few minuscule ticks on Liberty's cheek. PCGS# 60780

**1868 One Cent Nickel Pattern, Judd-605, PR66**

- 4473** 1868 One Cent, Judd-605, Pollock-670, R.5, PR66 PCGS. CAC. The design is similar to the as-issued three cent nickel, with a single pillar (or Roman numeral 1) enclosed in a laurel wreath to signify the denomination. Struck in nickel with a plain edge. This Premium Gem proof offers pristine preservation on surfaces that show a light overlay of golden-gray patina. Population: 3 in 66, 0 finer (12/14). PCGS# 60817

**1869 Standard Silver 10 Cent, PR65 Brown  
Judd-704, Copper, Reeded Edge**

- 4474** 1869 Standard Silver Ten Cents, Judd-704, Pollock-783, Low R.7, PR65 Brown PCGS. CAC. Standard Silver design with the head of Liberty facing right with a diadem in her hair, motto below, and UNITED STATES OF AMERICA above. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in copper with a reeded edge. A fully struck Gem with iridescent sea-green undertones. One tiny spot noted on the reverse margin at 7 o'clock. Struck from a lightly rusted obverse die. PCGS# 60929

**REDFIELD DOLLAR**

**1893-CC Redfield Dollar, MS62  
Lovely Peripheral Patina**

- 4475** 1893-CC Morgan Dollar MS65 Paramount (MS62 NGC). Ex: Redfield Collection. Narrow bands of golden-brown, plum-red, and navy-blue patina endow this lustrous and intricately struck final year Carson City dollar. The fields are smooth and the portrait displays moderate marks. La Vere Redfield presumably obtained the present key date Carson City dollar at face value during the 1950s. NGC ID# 255S, PCGS# 7222

## ERRORS

### 1943-S War Nickel, AU55 Struck on a Steel Cent Planchet

- 4476** 1943-S Jefferson Nickel — Struck on a Steel Cent Planchet — AU55 PCGS. 2.75 gm. The standard weight of a 1943-dated zinc-coated steel cent planchet is 2.70 gm. Struck flush against the collar die at 8 o'clock, this wrong planchet mint error has complete left-side design elements. The upper portion of LIBERTY and the date are off the flan, as is most of AMERICA. The gunmetal-gray surfaces are minimally marked and display only slight wear.

### Kennedy Half on a Cent Planchet Blank Obverse, MS64 Red and Brown

- 4477** Undated Kennedy Half Dollar — Struck on a Cent Planchet, Uniface Obverse — MS64 Red and Brown PCGS. A cent planchet and a half dollar planchet were fed together between Kennedy half dies, with the cent planchet struck between the half dollar planchet and the reverse die. The centering favors the heraldic eagle motif and the banner, rays, and clouds above. Appropriately, all of HALF DOLLAR is off the flan. The obverse shows only a ghostly incused and reversed impression of the reverse, as struck through the flan.

## MINT SETS

- 4478** Uncertified 1948 Double Mint Set. An original double mint set housed in the cardboard holders of issue. The outer mailing envelope is absent. The Philadelphia and San Francisco sets are lightly toned. The silver coins in the Denver set display peripheral autumn-brown toning. The median grade is between MS63 and MS64. No 1948-S quarters were struck. (Total: 28 coins)
- 4479** Uncertified 1949 Double Mint Set. This 1949 PDS double mint set remains housed in the original cardboard holders but lacks the outer manila mailing envelope. All of the coins are lightly to moderately toned, and the typical example grades MS63 to MS64. This set contains 28 coins since no 1949-S quarters were minted. (Total: 28 coins)
- 4480** Uncertified 1949 Double Mint Set. The coins remain housed in the issued cardboard holders with green paper covers. No outer envelope is present. The Philadelphia Mint quarters and halves and the 1949-S dimes are moderately but attractively toned. The 1949-D cents exhibit iridescent patina, and the remainder of the coins are lightly toned. The median grade for the coins in the set is MS63. No 1949-S quarters were struck. (Total: 28 coins)

## CERTIFIED MODERN PROOF SET

- 4481** 1938 Five-Piece Proof Set PR64 to PR66 PCGS. The coins are housed in separate PCGS holders with consecutive serial numbers. The set includes: **Cent PR64 Red and Brown**, mostly cherry-red with peripheral blue-green, a couple of small spots; **Nickel PR66, CAC**, pristine and fully struck with milky straw-gold toning; **Dime PR66**, an intricate strike, flashy, freckles of russet-gray toning; **Quarter PR65, CAC**, an undisturbed Gem with light tan and gray patina; and a **Half Dollar PR65**, sharply struck, golden-brown, pearl-gray, and jade-green toning, a few tan spots near the sun. (Total: 5 coins)

## End of Session Three

# MyRECOMMENDATIONS ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, **MyRecommendations** looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available – even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at [HA.com/Coin](https://www.ha.com/Coin).

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐ 1 ☐ 2 ☐ 3 INCREMENT(S)

Lots will be purchased as much below top bids as possible.

☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.

☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$4,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$500,000

## 7 Easy Ways to Bid

## 1 Internet

Simply go to [www.pearsoncmg.com](http://www.pearsoncmg.com)

Simply go to [www.HA.com](http://www.HA.com), find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

## 2 eMail

You can also

You can also email your bids to us at [Bid@HA.com](mailto:Bid@HA.com). List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

### 3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

## 4 In Person

Come to the auction and view the lots in person and bid live on the floor.

**5 FAX**  
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

## 6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

**7 Live using HERITAGE Live!®**  
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit [HA.com/Live](http://HA.com/Live) and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

*Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid	Bid Increment
< \$10	\$1
\$10 - \$49	\$2
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$499	\$20
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$4,999	\$200
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE

WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1,500, and there is no sales tax on coins in Texas.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

# Terms and Conditions of Auction

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, those of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: [CreditDept@HA.com](mailto:CreditDept@HA.com)

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foosse 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 10-6-2014

**7920 1907-D MS61 PCGS.** PCGS Population (274/1988). NGC Census: (419/1601). Mintage: 842,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$1,460. NGC ID# 26D8, PCGS# 9053

## SAINT-GAUDENS DOUBLE EAGLES

**7921 1908 No Motto MS63 PCGS.** PCGS Population (34049/56781). NGC Census: (46376/47778). Mintage: 4,271,551. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,530. NGC ID# 26F6, PCGS# 9142

**7922 1909 AU58 NGC.** NGC Census: (226/1057). PCGS Population (205/1742). Mintage: 161,282. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,415. NGC ID# 26FB, PCGS# 9150

**7923 1909/8 — Improperly Cleaned — NGC Details. AU.** NGC Census: (19/1581). PCGS Population (58/1983). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,725.

**7924 1909-S MS62 NGC.** NGC Census: (1537/3375). PCGS Population (1355/4133). Mintage: 2,774,925. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$1,725. NGC ID# 26FE, PCGS# 9153

**7925 1910 MS62 NGC.** NGC Census: (3438/3478). PCGS Population (2306/3790). Mintage: 482,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$1,725. NGC ID# 26FF, PCGS# 9154

**7926 1910 MS62 PCGS.** PCGS Population (2306/3790). NGC Census: (3441/3479). Mintage: 482,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$1,725. NGC ID# 26FF, PCGS# 9154

**7927 1911-D MS63 PCGS.** PCGS Population (2700/5919). NGC Census: (2921/5963). Mintage: 846,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,650. NGC ID# 26FK, PCGS# 9158

**7928 1911-S MS64 PCGS.** PCGS Population (1526/524). NGC Census: (1420/286). Mintage: 775,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$2,025. NGC ID# 26FL, PCGS# 9159

**7929 1912 AU58 NGC.** NGC Census: (228/2157). PCGS Population (286/3155). Mintage: 149,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,415. NGC ID# 26FM, PCGS# 9160

**7930 1913 AU58 NGC.** NGC Census: (248/2372). PCGS Population (342/2293). Mintage: 168,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,415. NGC ID# 26FN, PCGS# 9161

**7931 1913 MS61 NGC.** NGC Census: (709/1546). PCGS Population (272/1942). Mintage: 168,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$1,575. NGC ID# 26FN, PCGS# 9161

**7932 1914-D MS64 NGC.** NGC Census: (1925/594). PCGS Population (2275/1062). Mintage: 453,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,800. NGC ID# 26FT, PCGS# 9165

**7933 1914-S MS62 NGC.** NGC Census: (4697/15593). PCGS Population (3839/13488). Mintage: 1,498,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$1,480. NGC ID# 26FU, PCGS# 9166

**7934 1915 AU55 PCGS.** PCGS Population (64/1959). NGC Census: (36/2201). Mintage: 152,050. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,400. NGC ID# 26FV, PCGS# 9167

**7935 1915-S MS63 NGC.** NGC Census: (5470/7359). PCGS Population (4094/6491). Mintage: 567,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,600. NGC ID# 26FW, PCGS# 9168

**7936 1916-S AU58 PCGS.** PCGS Population (140/4521). NGC Census: (105/4107). Mintage: 796,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,415. NGC ID# 26FX, PCGS# 9169

**7937 1916-S MS64 PCGS. CAC.** PCGS Population (1615/1296). NGC Census: (1403/929). Mintage: 796,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$2,050. NGC ID# 26FX, PCGS# 9169

**7938 1925 MS63 PCGS.** PCGS Population (14736/20423). NGC Census: (18100/20970). Mintage: 2,831,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,530. NGC ID# 26GA, PCGS# 9180

## COMMEMORATIVE SILVER

**7939 1893 Isabella Quarter MS64 PCGS.** PCGS Population (1200/689). NGC Census: (1054/649). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 28HR, PCGS# 9220

**7940 1893 Isabella Quarter MS64 NGC.** NGC Census: (1054/649). PCGS Population (1198/689). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 28HR, PCGS# 9220

**7941 1893 Isabella Quarter MS64 NGC.** NGC Census: (1054/648). PCGS Population (1200/689). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 28HR, PCGS# 9220

**7942 1900 Lafayette Dollar AU58 PCGS. CAC.** PCGS Population (322/2698). NGC Census: (186/2204). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$520. NGC ID# 28N8, PCGS# 9222

**7943 1921 Alabama MS65 PCGS.** PCGS Population (460/110). NGC Census: (372/83). Mintage: 59,038. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,050. NGC ID# 28HT, PCGS# 9224

**7944 1921 Alabama 2x2 MS64 PCGS. CAC.** PCGS Population (753/546). NGC Census: (726/442). Mintage: 6,006. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$485. NGC ID# 28HS, PCGS# 9225

**7945 1937 Antietam — Cleaning — PCGS Genuine. Unc Details.** NGC Census: (0/2611). PCGS Population (2/4713). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$550.

**7946 1937 Antietam MS64 PCGS.** PCGS Population (1149/3143). NGC Census: (548/1921). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$635. NGC ID# 28HV, PCGS# 9229

**7947 1937 Antietam MS65 PCGS. CAC.** PCGS Population (1569/1574). NGC Census: (998/923). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$740. NGC ID# 28HV, PCGS# 9229

- 7948 1937 Antietam MS66 NGC.** NGC Census: (736/187). PCGS Population (1270/305). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 28HV, PCGS# 9229
- 7949 1937 Antietam MS66 PCGS. CAC.** PCGS Population (1270/305). NGC Census: (736/187). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 28HV, PCGS# 9229
- 7950 1937 Antietam MS66 PCGS. CAC.** PCGS Population (1270/305). NGC Census: (736/187). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 28HV, PCGS# 9229
- 7951 1937-S Arkansas MS66 PCGS.** PCGS Population (64/5). NGC Census: (31/3). Mintage: 5,506. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,075. NGC ID# 28J6, PCGS# 9243
- 7952 1935-S Boone MS66+ NGC. CAC.** NGC Census: (182/31). PCGS Population (202/26). Mintage: 5,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$260. NGC ID# 28JH, PCGS# 9260
- 7953 1935/34-D Boone MS66 NGC.** NGC Census: (122/56). PCGS Population (170/67). Mintage: 2,003. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$685. NGC ID# 28JK, PCGS# 9263
- 7954 1935/34-S Boone MS65 PCGS. CAC.** PCGS Population (210/120). NGC Census: (182/112). Mintage: 2,004. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$625. NGC ID# 28JL, PCGS# 9264
- 7955 1936-D Boone MS67 NGC. CAC.** NGC Census: (14/0). PCGS Population (34/0). Mintage: 5,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$1,450. NGC ID# 28JN, PCGS# 9267
- 7956 1937-S Boone MS65 Prooflike NGC. CAC.** NGC Census: (0/0). PCGS Population (0/0). Mintage: 2,506. PCGS# 89272
- 7957 1938 Boone MS66+ PCGS. CAC.** PCGS Population (145/30). NGC Census: (86/5). Mintage: 2,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$610. NGC ID# 28JU, PCGS# 9274
- 7958 1938-D Boone MS66 PCGS. CAC.** PCGS Population (169/66). NGC Census: (131/34). Mintage: 2,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$530. NGC ID# 28JV, PCGS# 9275
- 7959 1938-S Boone MS66 PCGS. CAC.** PCGS Population (140/38). NGC Census: (107/31). Mintage: 2,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$725. NGC ID# 28JW, PCGS# 9276

- 7960 1925-S California MS65 PCGS. CAC.** PCGS Population (796/462). NGC Census: (914/581). Mintage: 86,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$640. NGC ID# 28JY, PCGS# 9281
- 7961 1925-S California MS66 NGC.** NGC Census: (430/151). PCGS Population (354/108). Mintage: 86,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$935. NGC ID# 28JY, PCGS# 9281
- 7962 1936 Cincinnati MS66 NGC.** NGC Census: (72/5). PCGS Population (140/8). Mintage: 5,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 28JZ, PCGS# 9283
- 7963 1936 Cincinnati MS66 PCGS. CAC.** PCGS Population (140/8). NGC Census: (73/5). Mintage: 5,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 28JZ, PCGS# 9283
- 7964 1936 Cleveland MS66+ PCGS. CAC.** PCGS Population (659/66). NGC Census: (501/56). Mintage: 50,030. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$265. NGC ID# 28K4, PCGS# 9288
- 7965 1936 Columbia MS67 PCGS.** PCGS Population (73/1). NGC Census: (77/3). Mintage: 9,007. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$775. NGC ID# 28K5, PCGS# 9291
- 7966 1893 Columbian MS66 PCGS. CAC.** PCGS Population (209/15). NGC Census: (145/27). Mintage: 1,550,405. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$885. NGC ID# 26H6, PCGS# 9297

## PEDLEY-RYAN DOLLAR

- 8130 1933 Pedley-Ryan Dollar, Type Four, HK-825, MS62 NGC. On January 5, 1933, Pedley-Ryan & Co., a Denver investment house, began its sale of round, rimless, plain-edge discs for the purpose of providing a medium for speculation in silver and to increase the use and popularity of silver as a medium of exchange. The size of a silver dollar, they contained one ounce of silver, 430 grains 99% fine. This MS62 specimen displays bright silvery surfaces that reveal faint grade-defining handling marks under magnification. All incuse letters and numerals are bold. Not more than 500 of the Type Four variety of these interesting So-Called dollars were issued. Census: 74 in 62, 43 finer (12/14). PCGS# 661000

- 8163** (circa-1860s) Dieterich's Rubber Store, Philadelphia, PA, MS64 NGC. Red rubber.

## ALASKA TOKENS

- 8164** 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT, MS63 NGC. Gold. Hart's Coins of the West.
- 8165** 1911 Parka Head, Alaska Gold 1/2, MS62 NGC. Gould-Bressett 176. Hart's Coins of the West.

## GOLD CHARMS

- 8166** 1914 Montana Gold (One) MS62 NGC. Hart's Coins of the West.
- 8167** 1914 Washington Gold (One) MS62 NGC. Hart's Coins of the West.

## WORLD MEDALS

- 8168** (2006) Libertas Americana Medal, Paris Mint Bronze Restrike, MS64 NGC. 47 mm. Edge: Cornucopia.
- 8169** (2006) Libertas Americana Medal, Paris Mint Silver Restrike, MS64 NGC. 47 mm. Edge: Cornucopia. .916 Silver.
- 8170** (2004) Libertas Americana Medal, Paris Mint Silver Restrike, PR69 Ultra Cameo NGC. 40 mm.

## HOBO NICKEL

- 8171** Hobo Nickel by an Unknown Artist. Seemingly a recent carving, although the artist is unverified and the exact vintage is unknown. The rounded shoulder lacks a collar and the date is removed. The carving is well done using a variety of punches and tools, in a style that incorporates some characteristics of known classic Hobo nickels such as a notched ethnic nose, an expressively punched eye, and a large, distinctive ear.

## GSA DOLLARS

- 8172** 1883-CC GSA Hoard MS65 Prooflike NGC. NGC Census: (0/0). PCGS Population (0/0). PCGS# 0
- 8173** 1885-CC GSA Hoard MS65+ PCGS. PCGS Population (29/13). NGC Census: (1316/296). Mintage: 228,000. PCGS# 407146 Base PCGS# 7146
- 8174** 1895-O GSA Hoard VF20 NGC. GSA Softpack. NGC Census: (122/4113). PCGS Population (240/4531). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$320. PCGS# 518875 Base PCGS# 407160

## PROOF SETS

- 8175** 1941 Proof Set NGC. This set includes: 1C PR65 Red and Brown, 5C PR64, 10C PR66, 25C PR65 CAC, 50C PR65 CAC. (Total: 5 coins)
- 8176** 1942 Proof Set PCGS. All CAC. This set includes: 1C PR65 Red, 5C Type 1 PR66, 5C Type 2 PR66, 10C PR65, 25C PR65, 50C PR65. (Total: 6 coins)
- 8177** 1951 Proof Set NGC. This set includes: 1C PR64 Red and Brown, 5C PR67, 10C PR67, 25C PR66, 50C PR65. (Total: 5 coins)
